Second class—Nauman 24, Forster 23, E. Klevesahl 23, Hoyt 22, Murdock 22, "Slade" 22, Pisan 22. Nauman, Forster and E. Klevesahl divided second money.

Third class—Mitchell 21, G. Sylvester 21, Walpert 20, Pitres 20, Frankel 20. Mitchell and G. Sylvester divided third money.

Fourth class—Frahm 19, Masterson 19, Dutton 19, Shields 19, Bitter 18. Fourth money was divided between the first four named.

Fifth class—Knick 17, Muller 17, Finocchio 16, Iverson 16. Fifth money was divided between Knick and Muller.

Sixth class—Angonnetti 15, Burns 15. [Money divided.]

Seventh class—Scott 13, Swarts 13. Money divided.

Eighth class—Dr. Hutton 10, Dr. Hansen 9, Green 6. Hutton and Hansen divided the money.

Club handicap match, 25 to 30 targets, two classes: First class—E. Klevesahl 22, Nauman 22, Forster 21, Hoyt 25, Murdock 24, Walpert 22, "Slade" 21, Pitres 24, Pisan 19, Frahm 20, Masterson 21, Sylvester 24, Frankel 20, Shields 24, Dutton 19, Iverson 25, Bitter 19, Muller 18, H. Klevesahl 24, Burfield 19. Iverson and Hoyt shot off at 25 birds, and Iverson won first medal for the month with a score of 22, as against 21 for Hoyt.

Second class—Swartz 21, Flney 15, Angonnetti 11, Dr. Hanson 14, Dr. Hutton 22, Scott 19, Burns 23. Finocchio won the second medal for the month.

Open to all race, handicap, 20 to 25 targets, high guns, three money—Nauman 17, Sears 16, Frahm 15, Dr. Hutton 12, E. Klevesahl 20, Pisan 12, Masterson 17, Pitres 20, Hoyt 13, "Slade" 18, Sylvester 20, Iverson 15, Murdock 18, Finocchio 15. Klevesahl, Pitres and Sylvester divided the purse.

Fifth event, 10 singles at 16 yards, 5 doubles at 14 yards, class shooting, three money—

Nauman	11	11	11	11	1111	1111	20
Klevesahl, E.	10	11	10	11	1111	1110	16
Hoyt	11	11	11	11	1010	1111	14
Pitres	10	11	10	10	1101	1111	15
Sylvester	10	11	11	11	1111	0011	18
Iverson	10	11	00	11	1101	1111	15
Sears	11	10	10	11	1010	1001	14
Ashlin	10	10	10	11	1101	1111	16
Haas	10	20	11	11	1010	1111	14
Shankley	10	11	00	11	1111	0011	14

Nauman first money, Sylvester second money; Klevesahl and Ashlin divided third money.

Twenty-five target event, reverse angles—Nauman 20, Pitres 19, E. Klevesahl 21, H. Klevesahl 18, Sylvester 16, Shields 12, Dr. Hutton 11, Shankley 16, Pisan 17, Iverson 19, Ashlin 19, Haas 19, Sears 22, Burfield 15, Hoyt 19, Forster 23, Murdock 18, Gerstle 9. Sears and Forster, first money; E. Klevesahl second money, Nauman third money.

On May 6th forty-six shooters participated in the first of the three days' 16th semi-annual tournament of the Los Angeles Gun Club.

All of the events on the first day with the exception of the first race at ten targets and the two-men team championship at 25 targets per man, were at 15 targets. In the team race, two teams only competed, C. B. Monaghan of Needles, Cal., and F. R. Mills of Santa Ana against J. E. Vaughan and N. Inman. When the first 100 birds had been sprung the score stood 45 even. The shoot-off also resulted in a tie, each side knocking 43 of the blue rocks. On the third trial Monaghan and Mills won out by one hrld, the score standing 45 to 44.

On Saturday the second day thirty-six men lined up in front of the traps. The last three events of the preceding day, which had not been shot were added to the day's schedule, making, with the exception of the opening 10 target race, the five men team race at 25 targets per man and the Tufts-Lyon medal race at 50 targets each, eleven 15 target races to count on average.

The team race would have excited more interest than it did had not the first five at bat run up a score that was plainly good enough to win. Fred B. Mills 23, Frank S. Ecker 23, O. O. Orr 21, C. B. Monaghan 22, C. L. Julian 22, total 111, is what the rest had to go up against, but if the others had all done as well as Sam Smith it would have been easy. The second team was made up of Vaughan 22, Lovelace 20, Inman 21, Van Valkenburg 20 and Smith 25, for 108. Daniels 19, Seaver 22, Justins 23, Reed 24, Rohertson 22, for 110, were the third team; had Daniels shot up to his average they would have tied at least. Knight 22, Gibson 23, Erlson 14, Stone 22, Hagerman 20, for 101,

South Fork of Kings River
A Black Bass Water

placed after Newmarket Beatrice at 'Frisco and Newmarket Baby beat Beatrice at Portland, under Mortimer and then Baby went under Jean at San Jose. Well, I am not making a squeal, as I am too good a sportsman, I hope, to complain when beaten, but I am simply saying it was a puzzler to me.

"John Bradshaw of your city handled my dogs for me on the circuit and did it well and I am highly pleased with the good manner in which he took care of them on the five weeks' circuit.

"The dog fancy is gaining here daily and Portland will be well represented in the future at the hench shows on the Coast."

Santa Clara County Fish and Game Protective Association.

The inaugural annual outing of the Santa Clara association of sportsmen will take place to-morrow on the Odd Fellows' tract, Alum Rock road near San Jose. A general good time is on the card, a barbecue (with accompaniments) will furnish something substantial for the inner man at one o'clock.

Trap shooting, open to all, will be an all day attraction for those who shoot (or think they can). The grounds can be reached by street cars from San Jose. There will be quite a gathering of good fellows and a jolly time will be had.

The Marysville Gun Club shot blue rocks last Sunday. The following scores were made: Doubles, 5 pairs, J. Steward 8, J. Gihlin 8, C. McAlpine 6, F. S. Marshall 4. Ten singles: F. S. Marshall 9, J. Gihlin 9, C. McAlpine 9, C. Baird 8, J. Steward 8, J. L. Hare 8, Graham 8, Best 7, Ed Case 7, George Peacock 6.

AT THE TRAPS.

The Golden Gate Gun Club shoot should draw a large attendance of shooters at Ingleside tomorrow. Besides the regular club program a big merchandise prize shoot will be shot.

The system of distance handicapping has been so successful at Sacramento that the Kimball-Upson Company, in giving their tournament May 28th, 29th and 30th, will carry out the same plan. In the tournaments of Northern California hitherto there have been a certain few who have won most of the honors, and these are the ones who will be sent back to the 18-yard mark.

Most of the average shots will compete for the prizes and moneys from the 16-yard post, while the novice he placed at fourteen yards from the trap. Programs of this tournament will be issued this week, and will be distributed to the shooters of Northern California.

At a recent shoot of the Santa Rosa Gun Club the scores were made the following:

F. W. Hesse, Jr. 58 hrlds out of 79 at 18 yards; Paul Fehman, 47 out of 71 at 18; Geo. Hartman, 52 out of 76 at 16; M. Edwards 27 out of 65 at 16; E. Sherman 15 out of 40 at 16; F. Jones 7 out of 24 at 16; J. W. Ramage 6 out of 24 at 16; L. W. Burris 6 out of 24 at 16.

At the Capital City Blue Rock Club shoot held Sunday last on the Kimball-Upson Company grounds, Sacramento, Judge Hughes, who broke 23 out of 25 shot at, breaking his last 16 straight in good style and won the club medal. J. R. Hughes, who won the match two weeks ago, then had the pleasure of pre

were the fourth, and Work 21, G. Julian 18, Harrison 21, Carr 22, Varian 23, for 105, the fifth team.

Seaver, Mills and Monaghan tied with 48 out of 50 each for the Tufts-Lyon medal; Seaver being in for the birds did not shoot off. Monaghan scored 24 and won on the shoot off, Mills 20. Vaughan and Inman 45, Reed 44, Ecker 43, Lovelace 42, Justins 41, Parker and Harrison 39, Daniels 38, were the other scores.

On the closing day, the opening event was again at 10 targets, all of the other events were at 15 targets excepting the fifth at 25 and the eighth race at 50 targets—these two not counting on general average. The final race was a miss and out.

C. A. Julian won the Marlin shoot on a straight score of 25. Breer, Ecker and Knight were close up with 24 each. J. E. Vaughan won the individual championship medal with a score of 47 out of 50. Van Valkenberg came out of his slump and finished with a score of 44. By winning this event Vaughan deprived Guy Lovelace of the club's challenge medal, which the local man won at the last tournament with the same score as the present holder made yesterday.

The last event of the tourney, a miss-and-out contest, was between Vaughan, Lovelace, Gibson, Orr and Daniels. No one was retired until the tenth round, when Lovelace and Daniels made poor sights. The thirteenth was unlucky for Vaughan, and Orr and Gibson were left to fight it out. No misses were recorded until the nineteenth, when both let their birds get away untouched. Both succeeded on the twentieth trial, but on the next Gibson fell down, while Orr broke his target.

Although none of the big prizes were won by local men, the tourney was one of the best ever held by the Los Angeles Gun Club. In the three days thirty-seven events were contested and the shooting was far above the average. Sixty-six sportsmen participated and all united in expressions of general satisfaction.

General high average was made by W. H. Seaver, 98.1%; second high average, J. E. Vaughan; third high average, C. B. Monaghan; 460 targets counted on average, Seaver's average counted .902, Vaughn's .896 and Monaghan's .889.

Among the visiting shooters were: C. C. Newland, W. H. Seaver, W. S. Wattles, G. W. Gibson, C. C. Sylvester, C. R. Reed, Charles Carr and R. H. Varian, Pacific Grove; M. Chick, Charles Julian, George Julian, E. A. Fano, San Diego; Jess Kolb, George McCabe, Oceanside; E. M. Churchill, Escondido; Frank Stone, Jack Fanning, Fresno; James Ryan, Joe Inman, Russ Caldwell, Hanford; J. W. Gibson, Roy Whitman, R. N. Arnold, Oxnard; Fred Mills, Frank Monihan, Proud, Santa Ana; N. E. Tabor, Riverside; W. H. Wilshire and others, Redlands; Gns Knight and Chase, San Bernardino; A. G. Allen, Ontario. From various points in Arizona come R. H. Burmeister, D. D. McDonald, K. L. Hart, E. C. Hibbard, Moore, Graham, J. F. Aiken and H. L. Pinney.

The money division was under the Chick system, three moneys. A summary of the scores for the three days' shoot follows:

First day's scores—

Van Valkenberg	7	14	12	9	12	14	12	11	13	104
Hagerman	7	12	12	5	14	12	11	13	12	98

The feature of the Empire Gun Club shoot last Sunday at Alameda Point was the team shoot between six Empire shooters and a squad of College City Gun Club representatives. The match had originally been arranged for a series of three 12 men team shoots—best two in three. A lack of available material reduced the teams to half a dozen shooters each. The race was won by the Empire men by a lead of 13 targets out of a total of 120 shot at. The shooters and scores made were as follows:

Empire Club team—A. J. Webb 16, W. O. Cullen 16, L. H. Allen 19, James P. Sweeney 14, Dr. C. C. Payne 18, J. B. Hauer 18. Total, 101.

College City team—C. C. Juster 10, W. A. Searles 13, H. D. Swales 17, Newcomb 13, L. E. Leavell 18, L. Baird 17. Total, 88.

Warranted
to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendon, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balm sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address
THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Fast Pacer For Sale.

THE PACING GELDING, AL SANDY 2:19½ by Wayland W., dam Rapid Ann by Overland. Can pace three heats better than 2:17. Can crush very fast on the road. Excellent prospect to race. He is one of the best road horses in the city. Gentle and intelligent. Safe for lady to drive. For price and further particulars address S. WATSON, 235 Douglas street, San Francisco.

For Rent. THE STABLES FORMERLY occupied by the late John Cassidy at Point Lobos and 20th avenues; 23 stalls with conveniences. For further particulars call or address. Mrs. J. CASSIDY, 3104 Pt. Lobos Av.

For Sale. COAL BLACK FILLY BY A son of Directum 2:05½; is very handsome and stylish. Would make a very fine saddle animal. Broke to drive. Apply to J. H. RAYKES, San Leandro.

SITUATION WANTED—Experienced Trainer and Driver, as Superintendent stock farm. Careful man with young stock. First-class references. Address TRAINER AND DRIVER, care BREEDER AND SPORTSMAN, 36 Geary Street, San Francisco.

Quinn's Ointment

Will Make A Horse Over;

will put sound legs under him and will save him from the cheap hawker and trader. It is the standard cure for Spavins, Curls, Splints, Windpuffs and all the various lumps and bunches of like kind. Keep it always on hand and you will be prepared when trouble comes. Leading horsemen everywhere know it and use it.

Mr. H. H. Clark, Fredonia, N. Y., writes: "The bottle of Quinn's Ointment purchased from you about two years ago removed a curb and thoroughpin and did it for good. My horse's leg is as smooth as ever."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write for circulars, testimonials, etc.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is now superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALES, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a wettery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Carise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

Distemper in Young Colts.

Distemper is one of the chief dangers to young colts and if proper treatment is not immediately given the disease is often fatal.

Crafts' Distemper Cure is a specific for the disease and perfectly safe to give even to a new born colt. It can't hurt anything but the germs that cause the disease.

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Apply to or address

BONNIE DIRECT 2:05 1-4

Will serve a limited number of approved mares during the season of 1904. Fee \$100 for the season. The owners of BONNIE DIRECT have at the Pleasanton Track three two-year-olds from his first crop of colts, and three yearlings. These can be seen at any time.

BONNIE STEINWAY, 4 Y.O.

By STEINWAY 2:25½, dam BON BON 2:26 (dam of Bonnie Direct 2:05½, etc.), will serve a few mares during the season of 1904 at \$25 for the season.

Mares bred to either horse not proving to be with foal can be returned in 1905 free of charge, or service fee refunded, at option of owner of mare. Best of care taken of mares, but no responsibility assumed.

Full pedigree of either or both Stallions mailed on application.

C. L. GRIFFITH, Pleasanton, Cal.

SILVER BEE 2:27 3-4 By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:10)

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEES: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Creascoe 1:59½, and so his dam's side he carries the blood of the Goldust family, that most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

FERNDALE STOCK FARM Stallions at Stud.

Longworth, \$25. Sable Czar, \$25
Ringwood, \$25. Mahomet, \$20

LONGWORTH 2:19 (Reg. No. 18452), sired by Sidney, grandsire of the champion Lou Dillon 1:59¼. Dam, Gray Dale by American Boy Jr., he by American Boy, sire of Williamson's Belmont; second dam by Winfield Scott; third dam, Sorrel Pol by Sir Henry. LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12¼, El Moro 2:13¼, A. C. 2:15¼, Esmeralda 2:19, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, soo of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olive by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Blackhawk; third dam, Lady Almack by Almack, he by Monmouth Eclipse, soo of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$25.00 per month. No responsibility assumed for accidents or escapes.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

SEYMOUR WILKES REG. NO. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12¼
and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a soo of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Manager, WALTER SEALY.

PETIGRU 2:10¹

Son of Kingward by Onward (sire of 11 in 2:10) and Lemonade (dam of Bessie Wilton 2:09⁴, Petigru 2:10⁴, Lady Wilton 2:11⁴, and Lemonee 2:13⁴). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. **FEE \$50.**

CORONADO 2:18¹

By the great McKinney 2:11⁴ (sire of 8 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos. Rysdyk; second dam by Venture, sire of dams of Directum 2:05⁴ and Sidney Dillon (-ire of Lou Dillon 1:58⁴, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. **FEE \$40.**

SILVER COIN 2:11⁴

Sired by the great Steinway (sire of 4 in 2:10); dam, the fast mare Jenny Mac 3:09 by McKinney 2:11⁴. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. **FEE \$40.**

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address

W. G. DUFEE,

Box 96, University P. O., Los Angeles, Cal.

BAYSWATER WILKES 2:25¹

Sire of KELLY BRIGGS 2:10⁴

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sahle Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

SIDNEY DILLON 2:31:57

Sire of LOU DILLON 1:58⁴ (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06⁴ (the fastest mare of 1901), B. S. Dillon 2:16⁴ and Captivity 2:28⁴.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19⁴; dam Venus (dam of Adonis 2:11⁴, Leah 2:24⁴, Cupid 2:18 and Jno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27⁴, sire of dam of Directum 2:05⁴. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasture \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,
Supt. Santa Rosa Stock Farm,
Santa Rosa, Cal.

Or IRA PIERCE, 723 Montgomery St., S. F.

No. 23444

THREE-YEAR-OLD
2:15¹

STAM B.

FOUR-YEAR-OLD
2:11⁴

A Colt Trotter Himself, and His Produce Perform Early, and the Blood of the Two-Minute Trotters, Futurity and Horse Show Winners can be found in his Veins.

WILL MAKE THE SEASON From Feb. 15 to June 1, 1904, at PLEASANTON

AFTER THAT DATE (by request) AT SALEM, OR.

At \$40 the Season, or \$60 to insure.

For further particulars address

SAMUEL GAMBLE, Pleasanton, Cal.
Or TUTTLE BROS., Rocklin, Cal.

NEERNUT 19810 Record 2:12⁴ (Sixth Heat) 2:14
Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09⁴ to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 1133 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04⁴, MUCH BETTER 2:07⁴, DERBY PRINCESS 2:08⁴, DIABLO 2:09⁴, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasture, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station, S. P. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL

LIMONERO

RECORD (3) 2:15⁴

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:30 list and of dams of Fanny Wilcox 2:10⁴, Alta Vela 2:11⁴, etc., etc.); dam LULANEER (dam of Limonero 2:15⁴, Bion 2:19⁴) by Electioneer 125.

LIMONERO 2:15⁴, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He gets big hays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15⁴ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. F., Baron Dillon, Axinite and Futurity. LIMONERO 2:15⁴ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

J. H. WILLIAMS,

Owner.

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07³

(Winner of \$11,450 in 1903) Will Make the Season of 1904, to a Limited Number of Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS JUNE 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides, his dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shyllock 2:15⁴ and Ned Winslow 2:12⁴. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09⁴, champion 4 y. o. of 1903 (half mile 3:04), OUR LADY (trial 2:20⁴), and full brother to JOHN A. McKERRON 2:04⁴ (the fastest trotter of the Wilkes family).

Season of 1904 at Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16⁴, sire of John A. McKerron 2:04⁴, Who Is It 2:10⁴, Stanton Wilkes 2:10⁴, Claudius 2:13⁴, George B. 2:12⁴, Boh Ingersoll 2:14⁴, Tidal Wave 2:13⁴, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04⁴, Nearest 2:22⁴ and Thursday 2:34) by the old champion Director 2:17, sire of Directum 2:05⁴, Direction 2:10⁴, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 4:02 sire of Echora 2:23⁴ (dam of Direct 2:05⁴) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:24⁴, sire of Our Dick 2:10⁴, Homestake 2:14⁴ and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15 3 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All hills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17⁴, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28⁴ (trial 2:22); The Bonnet (4 y. o. trial 2:17⁴); Majella 2:29 (4 y. o. trial 2:13⁴).

Sired by Sahle Wilkes 2:18, sire of 33 in 2:30. Dam, Fidella (dam of Fidette 2:28⁴, dam of Mary Celeste 2:17⁴) by Director 2:17; second dam by Reavis Blackbird 2:23; third dam by Lancet, son of McCracken's Blackhawk. **FEE \$50** for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Elceta 2:08⁴, James L. 2:09⁴, Edith 2:10, etc.); dam Woodflower (dam of Sylex 2:15⁴) by Ansel 2:30, son of Electioneer; second dam Mayflower 2:30⁴ (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on in training at Pleasanton and can beat 2:30 easily. **FEE \$30** for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM. Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

DIRECT 2:12 1-2

(Officially Timed in Race in 2:08⁴)

SIRE, DIRECT 2:05⁴, sire of 54 in the list, including Directly 2:34, Direct Hal 2:04⁴, Bonnie Direct 2:05⁴, Prince Direct 2:07, Directum Kelly 2:08⁴, Trilby Direct 2:08⁴, King Direct 2:09⁴, Red Direct 2:10, etc., etc.

DAM, FRANCISCA (dam of 1 Direct 2:12⁴, Sahle Frances 2:15⁴, Guycesca 2:23 and Earl Medium, sire of May Bird 2:13⁴, Tom Martin 2:14⁴, Kanawah Star 2:14⁴, Lucy Stokes 2:18⁴, Gonerl 2:24⁴, Pearl Medium 2:29, etc.) by Almont 83.

Second Dam, Frances Breckenridge (dam of Maxinus 5:17, sire of 8 in list) by Sentinel 2:30; third dam by Bayard 3:4; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee \$50. I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

SAVAGE RIFLES

THE 22-caliber Savage Repeating Rifle was officially adopted at the St. Louis World's Fair. The important fact is that the Rifle deserves this. It is a clean cut little gun, shooting the best of the 22-caliber ammunition—the short, long and long rifle cartridges. In a word, it is "Savage Quality" all through, and that means it is honestly made. Any good dealer will sell you a Savage under a trustworthy guarantee. May we not send you our illustrated catalogue No. 10? Write to-day.

(Winners of 1st or 2d money in either Stanford or Occident Stakes barred.)

The above Stakes Close Wednesday, June 1, 1904; when horses must be named and eligible.

Entrance dues as follows: 3% June 1, 1904; 1% additional if not declared out before July 1, 1904; 1% additional if not declared out before July 20, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at the time the declaration is made.

NOTICE—Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

N B—Our program will be arranged as far as possible so that horses entered in several events will have an opportunity to start in each.

THE STANFORD-OCCIDENT PACE.

For three-year old pacers that were originally entered in either the Stanford or Occident Stakes.

\$50 entrance and \$100 added by the State Agricultural Society for each starter over three and up to six.

Colts must be named June 1, 1904, and entrance money due and must be paid August 12th, as follows:

\$40 from those having made first payment, \$25 from those having made first and second payments, nothing from those having made first, second and third payments in the Occident Stake. \$45 from those having made first payment, \$40 from those having made first and second payments, \$30 from those having made first, second and third payments in the Stanford Stakes.

Only pacing colts having been entered in the Occident and Stanford Stakes of 1904 are eligible to this Stake.

SPECIAL CONDITIONS.

Five per cent of the amount of the stakes closing June 1st (except the Stanford-Occident Pace) will be deducted from money winners.

All races will be heats, three in five, except otherwise stated.

Money to be divided 54, 25, 15 and 10 per cent, unless otherwise specified in conditions.

All races to fill satisfactory to the Board of Directors or they may be declared off.

Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning or making a dead heat to three, to be ruled out, but will retain his position in summary, except otherwise stated.

If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance money only paid in, to be divided 60, 30 and 10 per cent.

Stakes are for the amount guaranteed—no more, no less.

When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second.

A horse distancing the field will only be entitled to first and fourth moneys.

Hopples barred in trots, but allowed in pacing races, except where otherwise stated.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

The Board of Directors reserve the right to change the hour and day of any race, except when it becomes necessary to antedate a race in which instance the nominators will receive three days' notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

Racing orders should be claimed with entries, must be signed by S. P. M. on the day preceding the race and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.

Drivers must weigh in by 12 o'clock noon day of race they are to drive.

The Board reserves the right to inflict penalties for non-compliance with the above conditions.

Otherwise than as herein specified, National Trotting Association (of which this Society is a member) rules to govern.

GEO. W. TUTHILL, Sec'y. B. F. RUSH, President

NOTICE TO OWNERS AND TRAINERS.

SPECIAL.—Owing to the demand for stabling, the Society will provide stalls for horses entered in races. Special stalls for horses shown for premiums.

It is not intended to give any specials. If you want to start your horses or secure stalls enter in advertised races.

STATE AGRICULTURAL SOCIETY.

STANFORD STAKE of 1906

TROTting STAKE FOR FOALS OF 1903.

To be Trotted at the CALIFORNIA STATE FAIR of 1906.

Entries to Close Wednesday, June 1, 1904,

With Geo. W. Tuthill, Sec., at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1904; \$5 November 1, 1904; \$10 June 1, 1905; \$10 June 1, 1906, and \$20 on the tenth day before the first day of the State Fair of 1906. \$30 added by the Society.

The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the winner, and 33% per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out.

The stake is growing in value each year; every owner should enter in it; it will enhance the value of his colt in case he desires to sell.

Your colt entered in the Occident Stake for 1906 is eligible for entry in this stake.

Remember the date of closing is Wednesday, June 1, 1904.

GEO. W. TUTHILL, Secretary.

ADDITIONAL GUARANTEED STAKES

PLEASANTON

Fair and Racing Association

JULY 27, 28, 29 AND 30,

Entries Close Wednesday, June 1, 1904

MEETING TO OPEN THE CIRCUIT

WEDNESDAY.	FRIDAY.
1. Citizens Stake, Pacing 2:20 class, \$1000 (Entries Closed March 1, 1904).	7. Pleasanton Stake, 3 yr.-old Trotters, \$600 (Entries Closed March 1, 1904).
2. Trotting, 2:30 class, \$500	8. Trotting, 2:13 class, \$500

25¢ Premium pamphlet for live stock will appear later

Entries in all stakes to close Monday, May 23, 1904. Entrance fees to stakes Nos. 1, 3, 5, 7, 9, 11, due as follows: Five per cent May 23, 1904, two and one-half per cent additional, if not declared out, by June 23, 1904; two and one-half per cent additional, if not declared out, by July 23, 1904.

CONDITIONS OF COLT STAKES—Entrance fees on stake No. 2 due as follows: \$5 May 23, 1904; \$2.50 additional, if not declared out, by June 23, 1904; \$2.50 additional, if not declared out, by July 23, 1904. Entrance fees on stakes Nos. 4, 6, 8, 10 due as follows: \$10 May 23, 1904; \$5 additional, if not declared out, by June 23, 1904; \$5 additional, if not declared out, by July 23, 1904; \$5 additional, if not declared out, by August 23, 1904.

Races Nos. 1, 3, 5, 7, 9, 11—One-mile heats, best three in five. Race No. 2—One-half mile heats, best two in three. Races Nos. 4, 6, 8, 10—One-mile heats, best two in three.

All Colt Stakes Nos. 2, 4, 6, 8, 10, for colts owned in Stanislaus, Marced, Madera, Modesto, Fresno, Kings, Kern and Tulare counties.

DECLARATIONS (to declare out) must be made in writing, and will not be accepted unless accompanied by the amount due at the time of declaration is made.

SUBSTITUTIONS—In stakes Nos. 1, 3, 5, 7, 9, 11, closing May 23, 1904—Nominators, by the payment of an additional ten per cent on September 15, 1904, have the right of transferring their entry or substituting another horse eligible to the class in place of the one named in the original entry.

Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

N B—It is not the intention of the management to give any special harness races at this meeting and if you want to start your horses they must be entered in the regular advertised events. Running Program will appear later.

HACKNEYS.

GREEN'S RUFUS.....	The Baywood Stud, San Mateo
--------------------	-----------------------------

THE STATE FAIR has provided an excellent program of harness racing and from present appearances there will be a good list of entries in every event. With the meetings now advertised California can have the best circuit of racing in 1904 that has been held for some time, and if the State Board of Agriculture will prohibit bookmaking at its meeting and confine the betting to auction and mutuals the "tone" of the fair will be raised much above what it has been during the past few years. It would be well for the Directors to make a trial of the Australian totalisator this year. A large revenue is derived by associations in other countries from its use, so that

purses and stakes have been increased since it took the place of the bookmakers. By cutting out that portion of the running program at the State Fair, which is devoted to "skate races," enough events will remain to furnish all the sport needed and the book-making can be abolished. Races at the State Fair are supposed to be given to encourage the breeding of good horses and to furnish sport to the thousands who attend. When from four to six purses of \$225 each are given every day for a class of skate runners that would not sell for over \$50 each at auction, simply because the bookmakers stand ready to provide the money for these events, it cannot be said that the racing is given for the purpose of encouraging the breeding of good horses. It looks more like an enterprise for the encouragement of gambling. The statement has often been made that there is not as much betting on the harness events as on the runs. This is doubtless true and is an argument in favor of making harness racing the leading feature of the sport at the State Fair instead of giving the larger part of the program over to the running horses.

THE BIG STOCKHOLDERS and Directors of that great corporation the Western Union Telegraph Company, have finally come to the conclusion that public sentiment will no longer countenance the company's connection with the pool room gambling houses all over the country, and at a meeting of the Directors held in New York this week the pool room service was ordered discontinued. For many years the Western Union Company has derived an immense revenue from the pool rooms all over the country, notwithstanding the fact that the pool rooms were running in direct violation of the law in the majority of instances. Such a fight has been made by the authorities of New York to close these gambling places, that the officials of the District Attorneys office finally proclaimed the fact that the Western Union Company would be complained against and its officials brought into court to answer the charge of aiding and abetting crime. This was more than the stockholders, who are among the leading capitalists, business men and high officials of the State and Nation could stand, and the Directors were induced to make the order above referred to. The pool rooms have received the severest blow yet dealt them and every person interested in the breeding and development of horses and racing as a sport, will rejoice over this new departure of the Western Union Company and hope that the order will be permanent.

THE DIRECTORS of the State Agricultural Society met at Sacramento last Saturday and accepted the resignation of Geo. M. Tuthill, who had been elected Secretary at the meeting held two weeks previous. They then elected to the position Mr. Leon R. Miller, of Sacramento, who has been connected with the society for several years as clerk to the secretary. Mr. Miller is thoroughly familiar with the work and we believe the directors will find that they have made a wise selection for the position, as the new secretary is a thorough and accurate book-keeper, diligent, attentive and affable, and fully able to carry on the business of this important office.

THE SALE of Holstein-Friesian cattle from La Siesta Herd owned by Mr. Frank H. Burke was held at the Fred. H. Chase & Co. salesyard, 1732 Market street, this city, last Monday evening. The young hulls sold very well, as did the heifers. There were a number of calves six weeks old and under that brought the average down. The highest price paid for a hull was \$185.

Answers to Correspondents.

B. L. ELLIOTT, Mendocino—Please let me know if the horse Irvington 379 has a record, or if he ever sired any that has a record. Also if the mare Fanny Congdon, registered in Vol. IX has a record, or if she is the dam of any with a record.

Answer—Irrington had no standard record and is not the sire of any with standard records. Neither does Fanny Congdon's name appear in the list of standard performers or as the dam of any.

WILLIAM LEACH—What is the record of the pacer Monroe S.?

Answer—There are two pacers by that name, both with records. Monroe S., chestnut gelding by Dictator Wilkes has a record of 2:13. Monroe S. 17180, bay stallion by Monroe Chief, has a record of 2:20.

Geo. R. DITTS, Sacramento—Please inform me how imported Loyalist is bred; also extended pedigree of Norwood by Hambletonian 10. Give performance of Daedalion 2:11.

Answer—Imported Loyalist is by The Marquis, out of Loyal Peeress by the Peer. Norwood 522 by Hambletonian 10 is out of Lady Falls (dam of Kishar

2:27½ and Pickering 2:30) by American Star 14, second dam Beck by Black Hawk 24. We do not understand what you mean by performance of Daedalion. If you refer to the race in which he took his record with state that it was at Santa Rosa in 1889. Clipper Daedalion, Kelly Briggs, Captain Hackett, Robt. and Gaff Topsail were the starters. Clipper won the first heat in 2:09½, Kelly Briggs second and Daedalion third; Capt Hackett, Robt. and Gaff Topsail were distanced. Clipper won the second heat in 2:13, Kelly Briggs second and Daedalion third. Daedalion won the third heat in 2:11, Clipper second and Kelly Briggs third. Clipper won fourth and last heat in 2:11½ with Daedalion second.

J. S. D., Ilseston—I have a broodmare named Sacramento Girl. Please let me know if she is registered and if so her breeding.

Answer—Sacramento Girl, bay mare, foaled 1888, record 2:30 is by Alcazar 5102, dam Viola, (dam also of Vidette 2:16, etc.) by Flaxtail 8132, second dam Madam Buckner (dam of Acrohat 2:18½ and Argert 2:24½) said to be by Tom Hal. Sacramento Girl is not registered but is eligible to registration.

Two \$10,000 Trotting Stakes.

Under radically different conditions from anything in connection with grand circuit meetings, there will be two \$10,000 trotting stakes for 2:14 trotters at New York's two meetings in August. The one at Empire City track will be known as the Knickerhocker, while the stake at Brighton will be called the Long Island. The \$20,000 stakes will be in addition to the \$48,000 already offered for early closing events.

In compliance with requests from horsemen, the Empire City Trotting Club for its meet at Empire City track and the New York Trotting Association for its affair at Brighton Beach, have each offered a \$10,000 trotting stake for 2:14 trotters. The conditions require that should the entrance fees amount to more than enough to cover the stake, the additional money will go to the horsemen. In other words, the Associations in no way profit by a large entry list, but give all money to the horsemen. Each stake is guaranteed to be \$10,000.

The conditions require that the horses must be named on Thursday, June 2, when the first payment of three per cent is due. The race is on the Empire plan, best two in three heats; all horses not standing for money after two heats (were the race then ended) to be ruled out.

This offering, together with other stakes and the late closing events will bring the total prize money up to \$100,000 for the two weeks of trotting in New York, beginning August 8th.

Driving as a Fine Art.

Ever since the chariot-racing days of the ancients the skillful and fearless driving of spirited horses has been looked upon as an accomplishment giving pleasure to the performer and exciting the admiration of the beholder. Really skillful drivers are the exception in country or city. Even on the many farms where a number of horses are kept and more or less colts raised for use and sale it is seldom that those employed to drive and handle the horses are skilled in the art of getting the best performance and appearance out of the animals in their charge. Inferior driving rapidly deteriorates the value and appearance of a horse; and a colt reared and trained with shiftless, inadaptive methods will never attain anything like the inherent natural value that would have been possible with correct training and skillful driving.

All horsemen, and observant people generally, are familiar with examples showing the influence of the driver upon the horse. Fine, showy, high-stepping animals, fit to grace the finest turnout, have very soon become lawless drones, and in fact very like "plugs" simply by a change in ownership and drivers.

The best drivers are those that require prompt and strict obedience from the horses under their care while in harness and stable, and who never permit them to form awkward and unseemly habits. It is not necessary to be cruel or especially savage to accomplish right performance in a horse. The prevalent custom so common among drivers of constantly tapping, jerking, or threatening, to keep horses up to their work, frets and wears them frequently more than the work they do, since it keeps them irritated, and in the end produces an ill-mannered and disagreeable animal.

The skilled, intelligent driver will seldom strike or punish his horses; but when it is necessary he will use a first class whalebone or strap that will produce a decided tingle and will be held in remembrance by the horse without doing him injury. It is much more humane, as well as effective, to treat the horse inclined to laziness and lawlessness to a few moments of sharp, tingling punishment a few times a year or month, as the case demands, rather than to a daily and hourly rain of ineffective blows and cruel mouth-jerking of the bit.

Briefly, the requirements of good driving, courage, firmness, confidence and self control, insure safety and good appearance, whether before the farmer's market wagon or the fancy city turnout.

B. F. W. THORP

Pleasanton Pickups.

George G. 2:12½ trotted a half last Saturday in 1:01 the fastest half ever trotted over the Pleasanton track—1½ seconds faster than the champion Lou Dillon trotted same distance last spring. Sonoma Girl, green trotter and Allendale, green pacer worked an easy mile together in 2:15½.

"Farmer" Bunch drove his green pacing mare Hattie Croner a mile in 2:15 and repeat in 2:13½.

Al McDonald has a great trotting colt in a three-year-old gelding by Prince Almont (p) 2:13. When Al got him two months ago he was not half broken. He stepped a mile the other day in 2:21 and a half in 1:08. Mc has also two green four-year-old trotters by Zomro that can beat 2:15.

Verona 2:18 worked a mile to her record bitched to a cart last Saturday.

W. W. Mendenhall has purchased from Dave Young of Stockton a very likely two-year-old colt by Iran Alto 2:12½, dam Alma Wilkeswood by Alcantara, next dam by Nutwood. "Farmer" Bunch will train him.

Headlight by Searchlight worked a mile in 2:22½, and Geo. Kelly drove his Searchlight Jr. a mile in same time to heavy cart.

C. L. Crellin has given his colt Sunlight by Searchlight to Fred Chadbourne to train. This colt has never had any track work but is very fast with a smooth, rapid way of pacing that makes him look like a 2:00 prospect.

Geo. Ramage drove J. W. Simpson's pacing mare Biddy a mile in 2:19½. She is expected to go a mile in 2:15 by June 1st if she does George will either get a bonus or lose his job. Maybe both, as she might be sold.

Barney Simpson has a big handsome mare owned by H. Busing of Byron that is a coming pacer. She has had just a month's work since she was put to pacing and last Saturday went a mile in 2:23½ and a quarter in 0:32½. She is by James Madison 2:17, dam by Chas. Derby, next dam by Anteo 2:16½. Two crosses to Anteo and three to Electioneer. By the way, Mr. Busing is breeding four mares to Searchlight. He has recently started breeding good horses and believes in getting a good start in the business by breeding to the best, as the best pay the best.

J. D. Springer worked Billy Red a mile last Tuesday in 2:16, last quarter in 0:30. Mr. Springer has got more speed than any man who ever trained a stable of horses at this track. He is training four horses and all have been quarters in 0:30 or better, and all can do a mile in 2:10 and they are all green.

Ed Parker has a three-year-old, full sister to Dictatress 2:09½, that he has worked a half in 1:07. He is working Geo. Davis' two-year-old filly by Rey Direct 2:10, out of the dam of Directum 2:05½, that will be a credit to her family some day. Little Dictatress is working nicely and promises to heat her record.

Geo. McGuire has the fast pacers Rajah and Uncle Johnny and a green trotter, full brother to Rajah, all working well.

The green Bay Bird trotter Golden Gate worked in 2:16 and repeat in 2:13½ last week.

Al McDonald drove his two-year-old trotter Rey McGregor a mile to a heavy McMurray cart last Tuesday in 2:27½ and a quarter in 0:34½.

Charley Spencer has five two-year-old trotters by Nusbagak and Prince Ansel that will beat 2:30 this year, and a three-year-old by the latter horse that will get some of the Occident and Stanford money.

"Farmer" Bunch has a late addition to his stable in a gigantic pacer by Arthur Wilkes that they say is a whirlwind. He has not been turned loose yet.

The three-year-old filly Easter Direct by Direct, dam Cleo G. by Yosemite, paced a mile in 2:23, last quarter in 0:33.

Searchlight, Lecco and Bonnie Direct are all getting a nice lot of mares this spring; there is evidently being more breeding done this year than for several years. Lida W., dam of Nutwood Wilkes, has been returned to Searchlight. She has a fine filly by that sire. George B. 2:12½ by Nutwood Wilkes has been bred to Bonnie Direct. She also has a filly by her side by Searchlight. Martin Carter owns these two mares and also has another, Irvington Girl by Nutwood, in foal to Searchlight. Sally Dexter, dam of Nora McKinney 2:12½, has been bred to Lecco. She has a grand looking colt by Searchlight.

Tony Bernal still continues to make improvements about his new hotel and boarding-house near the track. This well kept place is fast becoming popular not only with the horsemen but others and is deserving of its popularity. Mr. Bernal has purchased Mr. Alviso's interest in the good green trotter Major Oak by Chas. Derby, dam Ally Sloper by Richard's Elector, and is now sole owner, and has placed him in the hands of that ambitious young trainer, Eddy Jones. The Major recently stepped a mile in 2:15½.

Mr. Dunlap is building an addition to his cottage opposite the "Lou Dillon Palace" and expects to have it ready for occupancy by June 1st.

An excited controversy took place last Monday evening on the porch of the Rose Hotel in regard to the merits of different green trotters being trained at Pleasanton. After everybody had expressed an opinion and offered to back it with all their available cash and all they could borrow, Mr. Mills reduced all hands to a normal condition by offering to match Sonoma Girl against any green trotter in California for from \$10,000 to \$20,000 and post \$1000 immediately. After a peaceful silence of five minutes in which no word was spoken, Mr. Mills asked everyone to have a cigar or a drink and conversation on general subjects was resumed.

Mr. Crowley Proposes a Sweepstake.

EDITOR BREEDER AND SPORTSMAN:—Seeing that I have started a verbal controversy as to the probable owner of the winner of Breeders Futurity No. 4 for foals of this year to race in 1907, I now propose to make the event still more interesting to all the owners of foals of this year who think they have a royal chance to win the long end of the above mentioned stake by offering the following:

I suggest that each owner who has an entry in this stake deposit with the BREEDER AND SPORTSMAN the sum of \$25 to be kept in trust for the winners of the races. The money deposited by the owners of trotting colts to go to the winner of the three-year-old trot, and the money deposited by owners of pacers to go to the winner of the three-year-old pace. I am presumptuous enough to imagine that my colt by the peerless California stallion Monterey 2:09½ out of Lottie Parks 2:16½ has a mortgage on the long end of Breeders Futurity No. 4, to be trotted or paced, as the case may be, in 1907. Any or all of the 403 entries in this stake will have a glorious opportunity to enter this contest, entries to close August 1, 1904.

Should this challenge meet the approbation of those who have made entries in the Futurity, and 400 foals have \$25 paid on them in this side stake, we would be contending for the magnificent sum of \$10,000, which, added to the \$6000 of the Futurity, would make it the equal of the Kentucky Futurity, and result in a contest worth going many miles to see. Now, I am willing to go in this proposed sweepstake against any number or all of the colts entered in Breeders Futurity No. 4, on which \$25 may be paid. Don't all speak at once, but any of you gentlemen who thinks he can win the event can look forward to making a substantial acquisition to his bank roll, and winning a race that any man should be proud to win. My money is up. So come to the front, gentlemen, come to the front.

T. J. CROWLEY,

Director P. C. T. H. B. A.

Butchers Day Races.

Twelve or fifteen thousand people attended the annual celebration of the Butchers Board of Trade at Emeryville on Wednesday of this week. A program of racing consisting of seventeen events began shortly after midday and lasted until nearly seven o'clock. Four bookmakers handled the coin of those who wanted to speculate and were kept busy most of the time. The Ward totalisator was not used as expected. It seems that a half dozen bookmakers were interested in the betting privilege for the day, and at the last moment one of them objected to the Australian machine being used, remarking: "If that thing is permitted we will not be able to take in any money." So the managers of the machine were compelled to place it in the back ground, where it soon became an object of great interest. Mr. Hughes and the inventor Mr. Ward were kept busy explaining its workings, and there is no doubt but the public would have patronized it very liberally had it been put into use. The bookmakers can hardly be blamed for objecting to the machine being used as they paid \$1750 for the privilege of handling the betting and as they remarked the totalisator would have had the bulk of the patronage and the bookies been very lucky to have come out even on the day.

The races while furnishing good contests in many instances were not of much class, and the very heavy track made the time slow in all the barnes events.

HARNESS RACES.

First heat, retail butchers' cart race—Miss Lockwood first, Nonie second, Headlight third. Second heat—Nonie first, Headlight second, Soup Bones third.

Butchers' trotting and pacing race—Headlight first, Miss Lockwood second, Kreuger third.

First heat, free for all trotting race—Della McCarthy first, Louise Croner second, Cicero third. Second heat—Louise Croner first, Cicero second, Little Victor third.

Pacing race (2:20 class), one mile dash—Gertie A. first, Sandow second, Flora third.

Mule race (to cart), one mile dash—Lillie Gray first, St. Julien Bill second, Last Chance third.

RUNNING RACES.

Five-eighths of a mile—Nonie first, Gladys Belle second, Lizzie Rice third.

Three-quarters of a mile—Cousin Carrie first, Nonie second, Fair Lady Anna third.

Special vaquero race, quarter of a mile—Pajamas first, Silver Dick second.

One mile—Milas first, Rowena second, Pastmaster third.

Vaquero race, one-quarter mile—Pajamas first, Silver Dick second, Brown Jim third.

One mile—Charles Schweitzer first, Conger second, County Down third.

Steer running race, one-eighth mile—Red Light first, Butchertown Bell second, Quino third.

One-quarter mile—Kubelik first, El Pilar second, Judge Shropshire third.

One mile—Pat Morrissey first, Isahellita second, Florestan third.

Thinks Dandy Search a Good One.

Mr. R. P. M. Greeley, of Oakland, sent his mare Winnie Wilkes 2:17½ back to Searchlight this year. When she foaled a big fine colt by that horse a few days ago Mr. Greeley concluded that he would go out of the breeding business for a while, as he now owns a four-year-old from Winnie Wilkes by Diablo 2:09½, a yearling from her by McKinney 2:11½ and the foal of this year he calls Dandy Search by Searchlight. Dandy was such a good looking youngster, however, that Mr. Greeley concluded to send Winnie Wilkes back to Searchlight and shipped her to Pleasanton last week. When she reached Pleasanton Mr. Mills became so enamored with Dandy Search that he immediately made Mr. Greeley an offer for him which was declined. Mr. Greeley received the following letter from Mr. Mills last Monday:

PLEASANTON, May 15, 1904.

MR. R. P. M. GREELEY, Oakland, Cal., Dear Sir:—Your mare Winnie Wilkes 2:17½ was bred back to Searchlight 2:03½ on the 12th. Her foal now twelve days old, which you have named Dandy Search, is certainly a "dandy" and one of the largest and best formed colts of his age I ever saw. He is so much the style and conformation of his sire that I would like very much to own him, and will raise the offer I previously made you to \$750, and take him when six months old, and you may leave the mare here till that time free of charge.

Respectfully yours,
ED. MILLS.

As highly as Mr. Greeley appreciated this offer he was compelled to decline it, as he wants to win first money in the Breeders Futurity of 1904 with Dandy Search.

French Government is Good Buyer.

Late every autumn the stud commissioners of the French government make selections of stallions to be placed in the government studs, which are situated in many parts of the Republic. Chief interest annually centers in the French coaches as we call them in this country, or trotters (trotteurs) as they are called in France. Last year at the annual presentation the commissioners selected 23 of these coach stallions. The prices paid range from 7,000 to 15,000 francs. In France there is offered each year a stake for three-year old stallion trotters (etalon trotteurs), called the Prix du Ministere d'Agriculture, a condition of which is that any horse taking part in it may be purchased by the government immediately after the race at an agreed price of 20,000 francs or \$4000. Last fall two of the competing horses were bought, the time made by the winner being at the rate of about 2:27 to the mile and the distance of the race something over two and one-half miles. In France records are given for the kilometer, not for the mile as in this country. A kilometer for the transmutation of these records into our way of expressing them may be called five-eighths of a mile, and therefore 1:40 to the kilometer is equal to 2:40 to the mile. The French coach stallion bought by the government last fall had records varying from 1:31 (or about 2:25½) to 1:43, mostly made in races of four kilometers or two and one-half miles. The aggregate price paid for the 25 stallions referred to was 267,000 francs, which figuring 5 fr. to the dollar of American money brings \$2,136 per head. Six of the 25 were four, the rest all three years old. Every breeder in France has a chance to sell to the government. Notice is given of the day and place when and where the inspection will be held and any one may present his horse there. If he does not like the price offered he need not take it, but the government is usually the best buyer the French breeder has, for it wants the best.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

A fine granite shaft is to be erected over the grave of Director 2:17, at Locust Grove Farm, Newcastle, Pa.

A record of 2:05 before the season closes is predicted by Scott Hudson for the blind stallion Rhythmic 2:06½.

Over 300 horses are now at the Glenville track, Cleveland.

Cresceus row tips the beam at 1100 pounds. He has lost no flesh worrying over that Wichita affair.

Unless all signs fail, the blind pacer Elastic Pointer 2:06½ will win money at the races this season, as he is looking well and taking his work satisfactorily.

Frank Loomis has collected a good bunch of prospects together and is working them at Denver, Col. Among them is the pacing mare Laura Spurr 2:09½ which was so good the early part of last season.

The flea-bitten gray gelding Jim Ferry 2:10½, which stirred up all kinds of trouble in last season's M. & M., is reported to be showing well in his early work at the Denver half-mile track.

The Maine state fair will make a new departure this year by offering a purse of \$1600 for free for all pacers, open to the world. An entrance of 10 per cent will be charged and a bonus of \$100 will be given to the horse that beats the track record of 2:10½.

The Lexington management have changed the McDowell stake, formerly for 2:10 trotters, to a stake for four-year-old trotters of the 2:25 class. Last season's stake, won by Monte Carlo 2:07½, stands as a record for a seven-heat contest.

At the recent seven day meeting in Vienna, Austria, there was an average attendance of 20,000 people daily. The betting was evidently very lively, as a total of \$300,000 was bet in the mutuels. Of this amount 5 per cent was paid to the racing association, 5 per cent to the city and 2 per cent to the poor fund.

As usual, Baltimore will this year open the trotting season in the East and Electric Park is out with its program of twelve purses of \$400 each. The meeting will be held the week of June 7 to 10, and entries close with Secretary W. H. Gore, at Arlington, Md., on May 31.

Geo. T. Beckers and S. E. Kent, both of Los Angeles, Cal., reached Glenville, May 6th. The former brought with him the trotting stallion Zombro 2:11, sire of Zephyr (4) 2:11½, together with Zomboyette 2:18 and Tee Dee Cee 2:19½, two others of his get. He also has two green ones by Stam B. 2:11½, out of the dam of Zombro, and a yearling filly that is a sister of the fast son of McKinney.

John Howell, who trains the horses belonging to A. B. Gwathmey, including the good trotters Tiverton 2:11½ and Senator Mills 2:12½, has shipped his stable to Poughkeepsie, where he will get ready to race for the big money. Many good judges consider Tiverton one of the best trotters eligible to the 2:12 class, as he showed 2:08 in a race last year and was a very consistent performer.

Lou Dillon 1:58½, the queen of trotters, was weighed May 6th, preparatory to being shipped to Cleveland for hard work in preparation for her 1904 campaign against Father Time. The weight at which she tipped the beam rather surprised her trainer, Millard Sanders, who thought that she was considerably heavier. Though a bit nervous while the weighing ceremony was being performed, Lou was finally pacified and stood quietly as the notch registered exactly 830 pounds. Sanders said that she had taken off about twenty pounds during the brief training season here, and before she is ready for the word the queen's avoidpulis will probably be about 810 pounds.

From time to time there have been rumors that Ed Geers was considerably taken up with the runners and might take to training them some day. Down at Memphis the other day a reporter asked Geers about it. "Not for me," said the silent man. "It is a nice game. I like the runners, but when it comes to a business proposition I will still score down with the pole horse for mine. When I get one ready, place him where I want him and do the driving, there is no kick coming if I don't win. But I would hate to spend my time on a runner, get him in shape and then have some no-account jockey burn my money up."

Alameda 2:09½ is the proud mother of a colt by Joe Patchen 2:01½.

Twinkle 2:05½ should be a very troublesome factor in the 2:06 classes if Scott Hudson gets her to the races again in good shape.

Four pacers have beaten 2:05 over half mile tracks: Dan Patch 2:03½, Prince Alert 2:03½, Joe Patchen 2:04½, and John R. Gentry 2:04½.

The American trotter is known and appreciated in England, Scotland, Ireland, France, Germany, Austria, Russia, Holland, Italy and Australia.

Anaconda 2:01½ evidently has much of his old-time vim, as reports say that Jack Trout brushed him an eighth in 13 seconds at Boston the other day.

Mr. Robert Bonner paid \$40,000 for Maud S., \$36,000 for Rarus, \$35,000 for Dexter, \$35,000 for Pocahontas, \$20,000 for Startle and \$20,000 for Edward Everett.

Among the fast record trotters that after several years of retirement are again being prepared for racing this season are the stallions Tommy Britton 2:06½ and Charley Herr 2:07, and the gelding Chain Shot 2:06½.

Brown Hal sired 312 colts that lived to yearling estate. Of them eleven are in the 2:10 list, twenty-seven have records below 2:15 and fifty-seven are listed below the 2:25 standard line. A remarkably successful speed sire, surely! The old chap is now twenty-five years old, yet vigorous.

Philadelphia Record: The idea is beginning to spread that the way for the horsemen and lovers of racing to get their rights is to stand up and fight for them. If the politicians see that the horsemen mean business they will soon knuckle down and give them what they want.

If the track is of ordinary width the pole makes quite a difference in the distance a horse has to travel in a mile. It is assumed that the average scoring will be 220 yards at each score. A horse scoring twice will trot one-quarter of a mile; four times, one-half mile; six times, three-quarters; eight times, one mile; ten times, one mile and a quarter; twelve times, one and one-half miles; fourteen times, one and three-quarter miles; sixteen times, two miles. The pole horse trots three feet from the pole; the second horse trots forty-four feet; more than the pole horse, the third horse, eighty-eight feet more; the fourth, one hundred and thirty two feet, and the fifth horse, one hundred and seventy-six feet, and a horse forty feet from the pole, two hundred and fifty feet more than a mile.

At the convention of the National Academy of Sciences at Washington, D. C., the other day, a paper was read describing researches made by exploring parties sent out by the American museum of New York, as a result of a gift of \$15,000 made by the late W. C. Whitney for the purpose of learning the prehistoric story of the horse on the American continent. One of the finds made was of the skeletons of a small herd consisting of a mare and colts of the Neohipparion. This type was named "Neohipparion Whitney" in honor of Mr. Whitney. The find was made in 1902 in the Upper Miocene formation of Nebraska.

The right to create and maintain highways devoted to certain kinds of traffic to the exclusion of other kinds has always been sustained in every court where the question has been properly at issue. The courts can exclude certain classes of vehicles from public highways. The bicycle people were compelled to acquire right to traverse the public highways because they were machines foreign to the purpose for which the public highways were built. For the same reason it is unlawful to use automobiles upon the public roads. The highways were not constructed for their use, and the courts will stop them whenever the test is made.

Secretary A. H. Moone of Providence reports that there had been received twenty-nine nominations to the \$5000 Roger William Stake for 2:12 trotters; twenty-one to the \$5000 Park Brew Stake for 2:09 pacers; twenty-two to the \$2000 event for 2:18 trotters; twenty to the \$2000 event for 2:25 trotters; twenty to the \$2000 event for 2:14 pacers, and eighteen to the \$2000 event for 2:20 pacers. The average is about twenty-two per stake.

Lexington offered the Kentucky Live Stock Breeders Association the use of the grounds of the Kentucky Trotting Horse Breeders Association and a guarantee fund of \$10,000 as an inducement to hold the Kentucky State Fair at the capital of the Blue Grass, and the proposition being accepted the fair will be held there beginning the first Monday in September. The state appropriation to the fair is \$15,000.

Scott Hudson says that a trotter, to win any money on the Grand Circuit, must trot three heats in 2:08 or better.

There were 115 meetings in Ohio last season. Surely the people throughout the State like to see the trotters in their races.

Dan Patch 1:56½ and Directum 2:05½ secured such a patronage in the West that owner Savage raised their fees to \$500 and \$300 respectively this season.

Everybody that has seen Charley Herr 2:07 this spring says the stallion is looking better than he has at any time since he gave Cresceus the race of his life.

Talk about gameness, Manager J. H. Tucker of the Locust Grove Stock Farm, Newcastle, Pa., says that Director died on his feet, and when his stiffened body fell to the ground the last spark of life had been extinguished.

Advices from Toledo, O., states that George H. Ketcham has employed counsel, and will bring suit against the Board of Review of the American Trotting Association, on account of its recent decision in regard to the performance of Cresceus 2:02½ at Wichita, Kansas, last fall.

Charles Marvin has patched up Captor 2:09½, and the son of Electric Bell is going like a new horse. Great is Marvin on patching up cripples. Captor is owned by C. K. G. Billings. He went wrong at Memphis last year, and his owner turned him over to Marvin, his former owner, for repairs. Captor won the Walnut Hall Cup in 1902.

E. E. Smathers of New York will campaign a formidable stable this season. His string includes Sadie Mac 2:11½, Billy Buch 2:07½, the largest money winner of the Grand Circuit last season; Major Delmar 1:59½, the world champion trotting gelding; Lord Derby, Jolly Bachelor and Lady Babbie. The last-named two are entered in the M. & M. and it is in this entry that Mr. Smathers places his hope to carry off the first classic of the season. The horses are being trained by George Spear of Louisville, Ky.

One of the big sources of expense to owners of trotters is railroad freight. Theodore Coleman, manager and secretary of the Central New York Circuit, has successfully evolved a plan by which this expense on his circuit will be reduced to a minimum. He has made arrangements with the railroad companies, by which horsemen who go through the Central New York Circuit will be able to have their horses shipped from one point to another in the circuit in a special express train. Sulkies and traps will be carted from the railroad to and from the track at each point in the circuit free, and the shipping will be attended to from each meeting by Mr. Coleman personally. On the day preceding the last one of each meeting a bulletin board will be hung out, announcing the time of departure of the special train, and all the trainers will have to do is to have their horses and traps ready at the time denoted. This plan will enable a trainer to go to the twelve meetings in the circuit at a cost for shipping of about \$50 per horse, which is about half of what it would cost under the old method, and, in addition to the saving in money, the trainer is relieved of a lot of work and worry incident to shipping.

It is the idea of the management of the Empire track that the general public will patronize light harness races if they are made attractive, and the success of innovations last year demonstrated the soundness of the idea. Fanciers of speed contests will not patronize meetings that afflict them with the long drawn out three in five heat races, a fact that was so clearly proven last year as to no longer furnish a subject for argument. The short, sharp racing last year at the Empire track was popular, as shown by the gate receipts, and in addition to the same system this year, some other plans are under consideration and are likely to be tried. One race which Secretary Reeves thinks pretty well of, is at one mile and a half for \$1000, divided so that the horse in the lead at each quarter will receive \$150, with the exception of the last quarter, the horse first under the wire getting \$250. The money can also be divided so that the horse in the lead at each of the five quarters will get a portion and the first three horses under the wire get the balance. This plan is being carefully considered and may be tried, the class to be decided by the one from which the greatest number of entries can be secured. The plan of sending all horses to the barn not being in the money at the finish of the second heat will be adhered to. As the Brighton Beach Grand Circuit meeting will be under the same management this year, the same system will prevail there.

Jackson's Napa Soda untangles the feet.

Notes and News.

ENTRIES CLOSE.

Hanford Meeting.....	May 23
Tulare Meeting.....	May 23
California State Fair Meeting.....	June 1
Pleasanton.....	June 1
Breeders Meeting Santa Rosa.....	June 1
Stanford Stake.....	June 1

See advertisements of all of above meetings in this paper.

Hanford and Tulare entries close next Monday.

The three-year-old pacers will be provided with a race at Pleasanton. The purse is \$350.

The Stanford Stake for foals of 1903, to be trotted in 1906, will close Wednesday, May 1st.

Santa Rosa Stake has three grandly bred yearling colts by Sidney Dillon for sale. Read the advertisement in another column.

Don't forget the big sale of trotting bred horses from the Haggin ranch to be held at Sacramento on Tuesday next. See advertisement.

Marengo King 2:29½ by McKinney, dam By By by Nutwood, worked a mile at Memphis during the first week in this month in 2:17½, last half in 1:06½.

A. E. Mastin of Davisville claims the name Johnny J. for his colt by John A. 2:12½ out of Celmor by Falrose. Johnny J. is entered in the Breeders Futurity No. 4.

The Blue Ribbon Sale began on Tuesday of this week at Cleveland. A number of California horses were consigned. Full particulars of the sale will be given next week.

The trotter and the pacer by Stam B. 2:11½ that Sam Gamble is giving a few lessons to at Pleasanton are stepping out in a way that has about silenced the hammer welders at the track.

Elsie Downs, dam of the handsome filly Altadown by Iran Alto 2:12½, has a foal by Stam B. 2:11½. Elsie Downs is by Boodle out of the great brood mare Lynda Oak 2:18½ by Guy Wilkes.

Pleasanton has made an addition to its list of purses to close June 1st. \$350 is offered for three-year-old pacers. There has been quite a demand for a race of this class and it should fill well.

There is over \$60,000 for the harness horses to contest for on the California circuit this year. That is more money than is hung up in many Eastern States that do a lot of bragging about their circuits.

Harry W. Moore of Menlo Park has a very handsome bay trotter at the San Jose track in John Gordon's string that is a nice mover and quite promising. The horse was sired by Mr. Moore's stallion Boxwood by Nutwood.

Mr. Henry Struve, of Watsonville, who leased the stallion Welcome 2:10½ from Mr. W. E. Meek this year reports that he is doing a fine business with him and expects to breed him to 65 mares this year and possibly 75.

Don't miss naming your foal of last year, now a yearling, in the Stanford Stake of 1906. Entries close June 1st, with L. R. Miller, Secretary of the California State Agricultural Society. \$5 must accompany the entry.

The black mare Lena Holly 2:16 by Mountain Boy foaled a chestnut sorrel horse colt by Sidney Dillon, April 29th. The colt stood 42 inches high, and its owner, Mr. J. B. Nightingale, says it is the finest one he ever saw and a square pacer.

Ben Benjamin, the well known sporting writer of the San Francisco Chronicle, has gone East for a three months trip. He will see the American Derby run at Chicago, and will also take in a few trotting meetings on the Grand Circuit before his return.

The San Jose track is one of the prettiest places in the State at the present time. The infield has a crop of barley growing thereon that would delight the president of an agricultural college. It will probably be cut for hay and should go more than three tons to the acre.

John Gordon, of San Jose, reports that his Diablo trotter that has been off for several weeks, is rounding to and may yet make a showing this year. Had this gelding met with no bad luck he would have been able to show three heats in 2:15 or better this summer.

A short letter to the BREEDER AND SPORTSMAN from Ted Hayes who took the string of horses belonging to W. A. Clark, Jr., to Denver, states that the California horses reached Denver in good shape and everything looks favorable for a successful meeting there.

Victor Verhilac won the 2:20 pacing race at the Butchers Day races with his mare Gertie A. by Diablo. The heat was in 2:26, which was very easy for the mare. Her owner won about \$800 on the result of the race and would have won more, but the bookmakers refused to take his money.

Jerry Doran's mare Della McCarthy by McKluney that won the free-for-all trot at the Butchers Day races last Wednesday looks as if she would beat 2:20 before the year is out. The track at Emeryville is very heavy yet she won Wednesday in a jog in 2:27, and was as steady as a clock.

Every person who enjoys athletics or any sort of outdoor recreation should subscribe to the fund being raised to build a new amphitheatre in Golden Gate Park. Considerable more than half the \$25,000 necessary has already been subscribed, but there are several thousand yet needed.

Queen C. 2:28½ by Nutwood Wilkes 2:16½, dam Queen by Venture 2:27½, son of Williamson's Belmont, has been bred to Kinney Lou 2:07½. The Nutwood Wilkes-McKinney cross has produced speed both ways and this good mare by the sire of John A. McKerron 2:04½ should produce a great foal by McKinney's fastest trotting son.

There are \$10,000 stakes at Brighton Beach and Empire City track this year for the 2:14 class trotters. They are most liberal stakes, as they are guaranteed to be worth \$10,000 each, and all entrance money received over that amount will be added to the stake. This is a good chance to win a fortune in two races. Entries close June 2d.

C. A. Duffee is one of the busiest men in the State just now. He is working the colt Almaden 2:22½ by Direct, winner of last year's two-year-old trotting division of the Breeders Futurity, and is also training the little twin Cuate by McKinney out of Miss Jessie 2:13½ that took a three-year-old record of 2:18. Two better gaited ones are seldom seen.

Amazon, brown mare, foaled 1891, died soon after foaling at Oakwood Park Stock Farm, a few days ago. She left a filly that is being raised on the bottle and is doing well. Amazon was by Chas. Derby, dam Ramona (dam of W. Wood 2:07) by Anteeo, second dam the dam of Crescent 2:23½ by Captain Webster.

Coronado 2:18½, one of the handsomest of all the handsome sons of McKinney 2:11½, and said to look "more like his dad" than any of them has made a good season in the stud this year. Coronado is 16.3

Coronado by McKinney

hands high and weighs 1120 pounds. The picture herewith gives some idea of his conformation. His dam Johanna Treat trotted a mile in 2:17 as a three-year-old and was out of a mare by Venture. Coronado should make a great sire of speed.

Entries for the Hanford and Tulare races close May 23d, which falls on Monday next. There are two \$1000 purses at each meeting, besides several purses of \$500 each. The meetings are to be held just before the Los Angeles meeting. Better enter at these places as there will be good tracks to race over and the meetings will be largely attended. Horsemen are always well treated at Hanford and Tulare and the racing is according to National rules.

Arrangements have been concluded whereby Dan Patch will essay at the Illinois State Fair at Springfield, October 6, next, to break the world's pacing record held by himself at 1:56½. The course at the Illinois capital is a very fast one, and it is hoped that Dan Patch will then set a new mark. It is possible that Lou Dillon 1:58½ may be secured to trot an exhibition mile either on the same or some other day during the Illinois fair.

Catalogues have been issued for the sales of Mr. J. B. Haggin's thoroughbred yearlings from the Rancho del Paso in California and Elmendorf in Kentucky, which will take place at Sheephead Bay, beginning June 16th. Two hundred and twenty-six yearlings will go to this sale from Rancho del Paso and ninety-seven from Elmendorf. The catalogues are elaborate publications and contain tabulated pedigrees of all the sires and dams of the colts to be offered.

Owing to the fact that a number of the most promising of the trotters and pacers that were listed to be sold next Thursday night at the Occidental Horse Exchange have shown such trotting ability on the Santa Rosa race track, the owners have decided to wait until after the Breeders meeting before disposing of them. Wm. G. Layng, the auctioneer, had a number of others ready for cataloguing, but concluded not to do so and decided to postpone the sale for a few weeks as there are at least twenty others that are a little too thin in flesh and a run on the rich pastures this month will make them more salable and enhance their value.

Dr. J. Hammond, of Byron, reports that his mare Blue Bells by San Diego, foaled a fine filly, May 6th, by Bert Logan. Blue Bells has had four foals since Dr. Hammond bought her, the first by Altamont 2:26, the next by Welcome 2:10½, the next by Nutwood Wilkes 2:16½ and the last by Bert Logan. They are all fine, handsome foals. Blue Bells will be bred to the great race winning pacer Searchlight 2:03½ this year.

On Friday of last week there was a picnic at Lockford, attended by five or six thousand people, at which a race between three local horses was the leading amusement feature. The track there is a half-mile ring and, not being kept in order, was very rough. However, Mr. G. Peirano of Lodi concluded to start his stallion Alta Genoa 2:14½ in the race, and although the old fellow had not seen a track in years he won the race, which was half mile heats, best two in three, very handily. The time of the heats was 1:08 and 1:10, good time for the condition of the track. Alta Genoa has made a big season in the stud this year, but Mr. Peirano has concluded to put him in training and has entered him at the Vallejo meeting.

The Los Angeles Driving Club will hold a matinee and one day horse show at Agricultural Park to-day. There are many entries for the parade, which will doubtless be the best ever held in the southern metropolis. Last year the parade was of sufficient length nearly to reach around the mile track at Agricultural Park, but this will be discounted when the parade is on the move this afternoon. Six-in-hands, four-in-hands to coach, break or tally-hos; pairs harnessed to Landau, Victoria, Brougham, Stanhope, Cabriolet, traps, T carts, surreys, spider phaetons, tandems, road wagons and the same with single horses hauling them, are all represented in the entries. Society is preparing to turn out to witness and take part in the horse show. Decorations outside of ribbons on horses will not be used, as the vehicles are elegant and handsome enough to take prizes without other decorations.

Liege 2:12½, the big rangy trotter whose picture occupies our title page this week, is a bay gelding by Lobasco that Mr. C. F. White of Cosmopolis, Washington, purchased over East two years ago and brought to California for Jack Groom to handle. Liege got his record in 1900 in a race at Des Moines, Iowa, where he met such trotters as Anzella, Phoebe Onward and others. Liege took the first two heats in 2:13½ and 2:12½, Anzella the next two in 2:14½ and 2:14½, and then Liege took the final heat in 2:13½. A five heat race with all the heats below 2:15 is a pretty good contest and the horse that could beat Anzella that year was not only fast but game. Liege is a bold going trotter and should make a good showing this year as Groom has him in good shape and he is acting like a horse that can beat his record.

George G. 2:12½ has not been taken east yet. There is some disagreement between his owner and trainer in regard to the horse which we hope may be amicably adjusted soon and the son of Homeward sent to the Grand Circuit to meet his engagements. Mr. Albertson has spent nearly two years on George G. and made a short but very successful campaign with him in California last season, winning all his starts but one. He has made him one of the most valuable geldings ever bred and trained in California and will, no doubt, be able to continue his success if he takes the horse east. George G. trotted a half in 1:01 over the Pleasanton track last week, the fastest half ever trotted in California, and Mr. Albertson has him in the very pink of condition. We hope he will be able to start east with him soon enough to give the horse a chance to get acclimatized before the racing starts.

One of the best prospects in California that has come under the writer's notice for some time is a big seal brown stallion that Jack Phippen is training at the San Jose track for Mr. P. H. McEvoy of Menlo Park. This horse is a trotter and a good one at that, but has had a very limited amount of training. Last Saturday Phippen worked him a mile in 2:21, one quarter of which was a shade better than 3 seconds. The last half of the mile was in 1:08. In 1898, when the final dispersal sale of the horses at the Corbitt farm in San Mateo was held, Mr. McEvoy purchased for a song the broodmare Fearless by Fallis 4781, with a colt at her side by Prince Airlie 28045, son of Guy Wilkes and Chantilly, by Nutwood. The colt grew into a big fine brown stallion, and last year Mr. McEvoy offered him for sale repeatedly at a fair figure, but found no buyer as the horse was undeveloped, though a good looker. This year he concluded to have Mr. Phippen work him a little with the result that the stallion is showing marvelous speed and can doubtless show a quarter in 32 seconds or better right now. He is a Wilkes in appearance, though larger than most of the horses of that family, standing over 16 hands high and being well proportioned. He ought to make a great stock horse as his dam was an extra well bred mare. Besides being by one of Electioneer's best sons she is out of a mare by Signal 3327, next dam by John Nelson and next dam Miss Eaton by Williamson's Belmont. The horse will be raced on the circuit this year if Mr. McEvoy can get a nomination for him in any of the stakes offered, and he should make a good showing.

ADDITIONAL STAKE!
\$350-For Three-Year-Old Pacers-\$350
 Offered by the Pleasanton Race Meeting.
 Entrance Five Per Cent. Make your entries for this race on the regular blank. Call it No. 13.
Entries Close June 1st.
 F. E. ADAMS, Secretary.

The Cresceus Case at Wichita.

[American Sportsman]

Sofar as Cresceus and his record at Wichita is concerned, it is ended. As announced in the *American Sportsman* last week the Board of Appeals of the National Trotting Association have held that the mile in 1:59 $\frac{1}{4}$, made at Wichita, is neither a record nor a har. The decision is final, as the Board of Appeals is the Supreme Court of the American Trotting Association. The same body with the same members in session heard the Cresceus case at the December meeting in Chicago, but as there was no affidavits filed against the time made by Cresceus at Wichita, and some seven affidavits including the official timers, made as to the correctness of the time, the Board postponed the case to May, in order (as stated) to enable the Wichita Association to furnish evidence that the meeting at which Cresceus trotted was duly advertised under the rules. It was thought that the Board of Appeals would secure some affidavits as to the time, to be read at the May meeting, but it is learned that only three were presented. Neither did the Wichita Association furnish further evidence that the meeting was duly advertised for seven days, or a week, according to the requirements of the rules. It seems that some 1500 persons passed through the gates of the Wichita track on the day that Cresceus trotted, but it is claimed that the meeting was only advertised four days in advance. The last finding of the Board of Appeals that the case against Cresceus is dismissed without prejudice to the horse or his owner, and that the case against the Wichita Association is continued for fraud, leaves us in doubt as to the nature of the fraud charged. Two other horses took standard records at Wichita the same day that Cresceus performed, and both these records are printed in the Year Book as regular. See page 232 of Year Book for 1903, and you will find that Arthur Wright took record 2:24 $\frac{1}{4}$, and Golden Bow, pacer, took a record of 2:19 $\frac{1}{4}$. The ordinary, as well as the extraordinary, student of the rules will wonder how two horses can take standard records at a fraudulent meeting, and another horse that starts the same afternoon gets neither a record nor a har.

The Toledo *Times-Bee* of May 8th prints an interview with Geo. H. Ketcham, owner of Cresceus, which is here printed:

"Mr. Ketcham was seen yesterday by a *Times-Bee* and declined to be interviewed, further than to say that it gave him great pleasure to know that, while the length of the track, the correctness of the watches used in timing, as well as the honor and integrity of the official timers themselves have all been attacked in turn, these attacks proved futile. Not even one line of evidence was presented to the board going to prove that Cresceus did not perform the world's record feat of trotting a mile in 1:59 $\frac{1}{4}$. 'I always believed he did, though I myself was too busy to time him, and it's a satisfaction to me to know that the horsemen of the world believe it—so why should myself or my friends lose any sleep because seven gentlemen, owning other horses, saw fit to throw out the record on a technicality?'"

A representative of the *American Sportsman* had a

talk with Mr. Clarence Brown, a leading lawyer of Toledo, who attended the meeting of the Board of Appeals as the attorney of Mr. Ketcham. As Mr. Brown states it, there was not a particle of evidence introduced to establish any charge of fraud against Mr. Ketcham or his horse, or the officers of the Wichita Association. The form of the case before the Board of Appeals was "Application to Establish the Record of Cresceus and Application is Denied." Mr. Brown immediately stated to the board that there had been no application made to establish the record of Cresceus, as that record was established when the official time was formally made and officially proclaimed at Wichita; and, furthermore, there can never be an application made to establish a record unless an association refuses to proclaim a record that has been regularly made under the rules, on said association's track. Mr. Jams, president of the Board, then said that the Board were investigating the case on behalf of Mr. Ketcham. Mr. Ketcham, who was present, said: If such was the understanding, he would withdraw his application. This left the Board without any case, because the record made by Cresceus, 1:59 $\frac{1}{4}$, was made when the time was officially announced, and needed no further establishment under the rules to make it valid.

Mr. Brown said that the official time made was verified by three outside timers, who stood either in the stand or right under the wire, and all made affidavits, as well as the three official timers, verifying the official time. Three affidavits were filed against the correctness of the official time. A representative of the *American Sportsman* was allowed to examine a number of affidavits filed with the Board in which these three witnesses against the Cresceus record were discredited. One was classed as a gambler, another as the keeper of a 15-cent restaurant, etc., and the other, two persons make affidavit, that they sat beside him in the grand stand and heard him say his watch had stopped and that he did not get the time. G. W. Holdridge, who owns the watch that was used by Mr. Jordan, one of the timers, makes an affidavit that the watch is accurate and reliable, and that he saw the time made, and that the time was 1:59 $\frac{1}{4}$. Mr. Holdridge was formerly superintendent of the Jewett Stock Farm at Buffalo, or is so reported in the documents filed.

The meeting in which Cresceus made his mile at Wichita was originally advertised for Thursday, October 15, but owing to rain it was postponed until Saturday. On Saturday a large crowd was present, but the track was still too soft for fast time. Another postponement was taken to Monday, October 19th, on which date some 1500 people was present. This is the date that Cresceus trotted his wonderful mile. On the same day two other events were raced, and two other horses took new records, as stated above, and these records are treated as regular in the Year Book, and they were timed by the same timers, with the same watches, that timed Cresceus.

Under the rules, however, the meeting on Monday was not duly advertised under the rules. It was not originally intended or advertised as a two weeks meeting, and the meeting legally expired on Saturday. Hence the Board's holding that the record made by

Cresceus is not a record under the rules is technically correct.

We have endeavored to give our readers a fair and impartial statement of the case. It is by far the most important case ever before the officials of the trotting turf, and every horseman wants the facts. If we have failed to state the case fairly on any material point our columns are always open to make corrections.

As we understand the status of the case it is this: The Board of Appeals has instructed the Secretary of the American Trotting Association "to commence proceedings against the Wichita Trotting Association and all others interested in the occurrence at Wichita October 19, 1903."

It will be seen that this is a drag-net resolution, and the attorneys of the Southern Kansas Fair will not know what they are up against until the case comes up.

State Fair of 1904.

Leon R. Miller, the newly elected Secretary of the California State Agricultural Society in an interview with a *Sacramento Union* representative this week, said:

"We are using every endeavor to again secure the services of W. L. Carlyle, who gave such universal satisfaction last year in judging the live stock exhibits, but it is doubtful if he can attend to the matter this year, as I understand that he is one of the judges at the St. Louis exposition. We will secure his services, if possible, but we are also corresponding with other eastern experts in case we fail.

We expect to have the largest live stock exhibit this year that we have ever had, as several new herds have been brought into the State since the fair, containing the flower of the eastern herds. In all, about \$45,000 of blooded stock has entered the State, and among those who have brought them to the coast are J. H. Glide, C. W. Howard, H. Eakle, of Woodland, and there are others whose names I do not recall at this time.

Owing to the fact that the fair starts at such an early date this year, we expect to have a good many valuable herds on exhibition from the State of Oregon, as they can be exhibited here and then return in time to arrive at the fairs there. The same may be said of the racing. We should have the best lot of horses here this season that have been at the fair in many years, as they can be raced here before going to the northern circuit.

I intend to get out a line of posters that will be sown broadcast over the State, and I expect that the services of a solicitor will be retained to visit outside cities and get exhibits for the pavilion. At the present time the outlook is good for a fine display of agricultural implements and machinery of all kinds.

The most important work that I have on hand at the present time is, as I said before, the formation of the stakes for racing, and I am now mailing to every breeder in the State the entrance blanks for the Stanford stake of 1906. I am also looking after the collection of moneys due on other stakes.

Strikel—if they don't give you Jackson's Naps Soda when you ask for it.

Fiesta Parade of Los Angeles Driving Club

The American Saddle Horse.

[By Herbert J. Krum]

The American saddle horse presents an anomaly; unknown to the great majority of the American people; unrecognized by America's foremost horse show and propagated by only a small number of individual enthusiasts, he is nevertheless known to his breeders as the most docile, most versatile and most intelligent of all breeds of domestic animals. Not only so much, but also as far and away, the most beautiful and most nearly ideal of all the breeds of horses. He has received the gratuitous and unstinted praise of all writers who have contributed to the literature of The Horse in recent years, and where he is known at all his partisans are absolute devotees. And yet of all of the forms of untutilized wealth at our command, so far as horse flesh is concerned, no other is so generally ignored as this beau ideal of the horse kingdom.

To explain why this is so is to seek the *raison d'être* of the saddle horse, and this is plainly found in the local conditions obtaining where he originated. In any country where short distances are to be frequently traversed and convenience of the means employed is essential the saddle horse is par excellence. Further that saddle horse who conveys his rider with greatest ease and expedition is obviously most desired.

Hence the original habitat of the American saddle horse is found in the hilly districts of the Southern States, where the nature of the country and the vast extent of the plantations made him the child of Mother Necessity. Climatic conditions have made Kentucky the nursery of America's horses, and it is here, in common with the thoroughbred and the trotter, that the saddle horse originated, flourished and has blown into the full flower of perfection.

In a technical sense the saddle horse includes those animals that have been entered for registration in the books of the American Saddle Horse Register Association. The number included up to the last published volume 1785 stallions and 2229 mares, including animals entered under different numbers, etc. Probably at this time there are less than 5000 registered horses living. But aside from registration the saddle horse is sui generis. Leaving out of consideration for the present the blood lines of saddle horse sires, let us recall the essential characteristics and distinguishing features that have created a specific type and peculiar breed of horses.

Every breed of horses to day extant has come to be recognized as such by virtue of two essential characteristics: First, the ability to do certain things better than others, and, second, to reproduce its kind. Thus certain horses were observed to run very fast, and from this fact grew the development of our thoroughbred horse, with his five generations of uncontaminated blood. Other horses were able to go swiftly at the trot until the ability to trot a mile at this gait in two minutes and thirty seconds became one of the elements of the breed, it being assumed that so much demonstrated speed betokened the requisite blood in the ancestors or likely to occur in the progeny. The draft breed grew out of the ability of certain strains to move great burdens, and each particular family perpetrates certain peculiar features.

So the saddle horse. In the localities where horses were mostly used under the saddle it was found that certain animals had peculiar gaits, the motion of which conveyed no sense of discomfort to their riders. It will be readily appreciated that an animal who would carry his rider at a rapid gait, and could change from one to several others without losing time at any of them would do so with a maximum of longevity to himself and minimum of fatigue to the rider.

With these selfish considerations as the (perhaps unconscious) basis of his law of selection, the southern breeder mated animals who possessed the easy riding gaits until we have the result in the breed of horse under this title head. Inasmuch, therefore, as they are the basic foundation of the type let us study these gaits somewhat in detail.

Until within the last past two years the gaits requisite to be shown for registration by performance were: First, walk; second, trot; third, rack; fourth, canter, and fifth, either (a) fox trot, (b) running walk, or (c) slow pace, and five were essential. The walk and center are natural gaits with all breeds of horses. We cannot here give space to the much mooted question as to the trot vs. pace being the original gait as against the other, but will assume that the consensus of opinion is in favor of the trot reserving only our personal opinion that the burden of evidence is on the side of the pace. We find that in walking, a horse really lifts his feet one at a time, but that the extensions of the front near and hind off foot are made so nearly together as to convey the impression of moving in pairs.

It may be observed here that by the ear and not by the eye is the only true way to observe the succession of movement in a horse.

In the trot the diagonally opposite feet strike the ground together, resulting in a two-beat sound.

In the pace the fore and hind leg on the same side are extended together; two-beat gait.

I think the word "rack" is a misnomer. It is at best a colloquialism or, perhaps better, a localism. In the authorities the words rack, pace and amble are practically synonymous, and none have the sense of our use of them. However, as used by horsemen, the word rack means the same thing as the term "single-foot," which I prefer on the ground of expressiveness. Single-foot, i. e., each foot striking the ground singly separately, aptly and truthfully tells the story of this four-beat gait to the ear. While the impulses arise almost in pairs, as in the pace, yet the extension of the hind legs are retarded sufficiently as to alternate with the fore legs, giving the rapid one-two-three-four sound peculiar to this gait.

The slow pace differs only from the pace in point of speed.

The canter is the slow form of the gallop or run. The perfection of a canter is measured not by its speed but by its slowness.

The mass is propelled by one hind foot the other three feet striking the ground practically together and the impelling foot following after. Nevertheless the legs on each side move in pairs.

This leaves us with the running-walk and fox-trot

swinging, all-day trot of the fox in his native hunts and which he will maintain hour after hour, to the despair of the most ardent "unter."

It is the two-beat trot reduced in point of speed—but also with a peculiarity. While the diagonally opposite legs move in pairs, there is a shortening of the extensions, resulting in a peculiar rhythm of what sounds like a one-two-one-two recurrence. Another characteristic is that the hinder parts of the horse feel as though slightly elevated and cause the sensation to the rider of his being tilted forward in a small degree.

Having thus cursorily examined the mechanism of the gaits, let us consider them solely from the vantage of the saddle.

When a rider mounted upon a horse accelerates the speed of the animal from a walk into a trot he experiences the feeling that it is next to impossible for him to retain his seat. It is, indeed, possible to remain on the horse by leaning well back and extending the arms and the legs, but even so it becomes extremely wearisome and dangerous. In other words, the lifting in unison of the diagonally opposite legs of a horse results in an effect upon his back that causes any object placed thereon to receive a succession of jolts, which come with too great rapidity to admit of continuous adjustment. Next, one finds by experiment that by having something whereon to rest the

Jack o' Diamonds

A Gaited Saddle Gelding, Unbeaten in His Class
Owned by THOMAS DUNN, St. Louis, Mo.

for consideration, and I believe it will be as well to make a frank confession about these gaits, and say plainly we don't know what they are. It is very difficult to explain them on paper or without having an object lesson for illustration. It may be that there are men who know all about these two gaits, but I have questioned numberless trainers and breeders, and I have never met one who could give me a concise, accurate description of the successions of leg movements distinguishing these gaits. I have, myself, been engaged in breaking, training, gaiting and riding saddle horses for some years, and, contradictory as it may seem, I cannot tell much about the gaits, though I can teach them to an amenable horse. Here is about the best I can offer.

The running walk is a slow gait; faster than a walk, not so fast as a trot or rack. An extremely exaggerated walk in point of speed comes very nearly being accurate. But there is a peculiarity about it, too. In this gait a horse moves forwards with seemingly very little leg motion. The knee action is next to nothing, and on the other hand the ankle or fetlock joint motion is excessive. One might fairly say stiff-legged, so far as the upper joints are engaged. Really the horse seems to easily glide forward in a rapid four-beat gait, each leg moving independently. A horse called Bald Stockings was the first horse to attract attention to this peculiar gait. For ease to the rider it is the very "poetry of motion" idealized.

The fox-trot, too, is a slow gait. It probably owes its name to some fancied resemblance to the rapid,

feet (stirrups) and by throwing his weight onto the stirrups and rising from the horse with each alternate bound he can maintain his series of readjustments with ease and regularity. This is what is called "posting" in the saddle, from which it may be easily seen that the trot is not an easy gait to ride, although the effort involved in "posting" is stimulating and enhances a pleasurable feeling of exhilaration.

In the canter, as the horse leads with his right forward foot, that foot will extend beyond the point where the left fore leg alights, and his left hind foot will be the one from which the mass receives its impetus, and which will be the last to leave the ground. Consequently it will be placed at a point somewhat in the rear of the right hind foot. So nearly, however, do the feet move in pairs that the result to a mounted rider is one of undulating grace that leaves his contact with the saddle unimpaired, and hence it is an easy gait to ride.

The slow pace is the gait par excellence for ease and comfort. In this, as in the pace, the two side legs move in unison, and the result is a smooth, even effect to the rider, wholly devoid of jolt or jar. In the fast pace, however, there is too much of the rolling motion for great comfort. This brings us, then, to the rack. This is a fast gait, and may be said to be between a pace and a trot. It is considered an easy gait to ride, no matter how great the speed. The rider sits fast in the saddle, simply helping to maintain his equilibrium by carrying the weight of the legs in the stirrups. A person can ride as far as he would ask a

horse to go at a fast gait on the rack without any fatigue or effort. In point of ease and comfort to the rider the running-walk and fox-trot are akin in that they are wholly pleasurable. This consideration of the slow gaits brings prominently to mind the fact that there are really two sorts of saddle horses. The slow gaits and the rack are characteristics distinguishing one sort from the other. They have given rise to a saddle horse called "the gaited horse" as distinguished from what is known as the "walk, trot and canter saddle horse." The term used in connection with each of these horses characterizes their abilities. Now, among the "smart" people who follow the dictates of fashion, and with whom fashion means aping the succession of changes in our English cousins across the water, the gaited horse is ostracized, and the only saddle beast recognized is the walk, trot and canter horse.

In England they have no such thing as a gaited horse. The hunter of the English gentleman is to all intents and purposes a thoroughbred, and along with the ability to walk, trot and canter he must be able to run swiftly and jump any of the fences and ditches that abound in the "Tight Little Isle." I doubt if any English rider ever tried a "gaited" horse enough to learn his merit, and I apprehend a somewhat ludicrous result of a first experiment. And this tying to old country custom has prevented our own leaders of fashion from becoming acquainted with the treasure their own countrymen have to offer them in the form of a pure American-bred product.

Of the incomprehensible things under heaven this is the most so, that people who love to ride should favor an uncomfortable horse to an easy one. In our consideration of the gaits in the foregoing paper we have shown that the trot is a rough, jolting gait, tiresome and fatiguing, and to be used with pleasure only as a change from something else. Just why a horse should be tahood because he is beautiful, vivacious and comfortable to ride upon is one of the impenetrable mysteries of "fad, fashion and foolishness." There is not one single point of merit in the "walk, trot" horse that is not embodied in the gaited saddler. In fact, they are the same horse in breeding, put to a different use. The 1903 winner of the saddle horse championship at the Garden was sired by the most popular and successful saddle horse in Kentucky. Given a good saddle horse, take his tail off, teach him to forget his easy gaits, pull his chin in and bound towards his ears with one step and hump back in the saddle with the next, and you have your fashionable horse that conforms to the indefinite, intangible, ethereal thing they call "Type."

Further—an important part of my plea—a woman, quite as well as a man, can ride a gaited horse with ease, pleasure and decorum, and remember the trot (so dear to the heart of the "walk-trot" purist) is always there in its perfection for the change we take advantage of on some short, secluded hit of road. But the other gaits are so peculiarly adapted for woman's riding it seems a marvel she will permit herself to be denied their perfect pleasure. Early on a spring morning she mounts her gaited horse, whose graceful beauty, from flashing eye to gorgeous, flowing tail, completely fills her pride, and over springy country roads, beneath the foliage of the full-bloomed trees, her horse glides under her at that easy "stealing pace" that fills her whole being with health, hope and happiness. The running walk is conducive to pleasant thoughts, and while nature smiles on her from every side she moves along in pleasant communion with herself and at peace with all the world. A gently sloping stretch of road invites to faster speed, and gently "feeling" the velvet of her companion's mount, with double reins well gathered, she is graduated without conscious effort or effect, into a rhythm of the four-beat rack that sends her swirling through space, easily, gently and with only such vibration of movement as brings a flush of color mounting, and sends the blood flying through her veins in a fever of exhilaration. She sits quietly upon the saddle, bracing herself slightly upon the reins and stirrup, and the quiet, rolling, rocking, swaying of her body thrills her, fills her with ecstatic pleasures never felt before. Horse and rider are one, and in perfect unison. The music of the flying feet, the rushing of the air past her as she sweeps through space and the sense of perfect security and ease combine to form such a symphony of pleasure as makes the path on which she rides seem but a "way to glory."

Slowing down with the same diminution of momentum to a walk, she feels no more of unpleasant sensation than the parlor-car passenger of an Empire State express. And while she feels how good a thing is life and how sweet a joy is youth, the gentle onward swing of the fox-trot allows the enthusiasm to become cooled and the blood to resume its normal flow. And even here the great advantages of the gaited horse are in evidence, for these slow gaits, so pleasant to ride as a change from the fast speed of the trot, rack

or gallop, are at the same time ground-covering gaits far different from the dull, dead level of the flat-foot walk. The walk is for the end of the journey, for remembrance and contemplation, but now we want life and activity. And if the rack is the princeps facile of the fast gaits, so is the canter the movement of beauty, grace and dignity at a slower rate of speed. No horse in the world is comparable with the gaited American saddle horse in the refined daintiness with which he performs this graceful movement. Leading with either foot, rising from his supple haunches, mane and tail swaying with the up-and-down undulation, he is easy as a cradle and realizes the adage of "cantering all day in the shade of a tree."

Add to all this the almost intuitive adaptability of this breed for the higher education of the menage and haute e'cole, and his special adaptability for the uses of a harness horse (in which capacity, despite all his prolixity of paces, he knows hut the square trot), is it any wonder that to those who know him he is akin to that imperious mistress of the East of whom 'twas said, "Age cannot wither her, nor custom stale her infinite variety."

In a practical way it may be said that the day of the horse as a means of transportation has gone by. The filling up and settling of the country; the decrease in the size of individual holdings; the era of railway and electric trains, of the bicycle and the motor car—all these have helped to force the horse from the Southern hridge path, the cow range and trail, and even the humble livery steed has all but found the oblivion of innocuous desuetude along with the tow-path mule. Generally speaking, the horse remains to us to-day as one of but two things—a beast of burden or a vehicle of pleasure. The race horse, running or trotting, is still here, but whether he is to be classified under the head of profit or pleasure, we will leave to those who have tried him for the former. When we speak of the horse for pleasure, we are sure we are on solid ground, where neither that convenient little run-about bicycle nor the most pretentious auto-car can affect us. Nor can such improvements be made in mechanics as will, for one thing is sure: The pleasure of riding or driving a horse is sui generis. Auto-machines may come and go, but for pleasure two horses will forever retain their absolute supremacy: The American Trotter and the American Saddle Horse. For at the last the whole thing is right here: A horse may be a companion; there establishes itself between a congenial man and his horse a bond of sympathy, a camaraderie that nothing can take the place of, and nothing take away. The two become one thing, with common feelings and impulses. In song and story; in marble and bronze; in peace and in war, the horse has been part and parcel of the history of man, and through all the unrest of ambition, whether of toil of husbandry or charge of battlefield, the page whereon is written the story of man's progress bears letters in shining light of Man's noblest Friend, the Horse.—*Horse Show Monthly.*

News From the North.

[Portland Rural Spirit.]

Never in the history of the track has the footing on Irvington track been as good as it is this spring. The horses too are all feeling good and when they are taken out for their regular work they feel like running away at trot or pace. Even old Mack Mack a chronic loafer has to be watched these fine spring mornings to keep him racing with old Velox, the teaser, Mack is stepping miles in about 2:25 with no fast brushes, but the way he is doing work this spring it will certainly take a mighty good horse to beat him when he strikes the races. Alma Mack, a green trotter by McKinney is another good one in the Senator's stable. She is stepping evenly rated miles in 2:30 and does her work exactly like Mack Mack and if she had a little more size it would be difficult to tell them apart in a workout. Loveless is doing some good work and acts like a fast mile; she turned the track in 2:27 very handy. These are the only ones the Senator was working the day we were there, but he has others equally as good. Prince Tom they say is working steady and fast, and the good filly Zipsy by McKinney is going like a trotter, and Lovely Dell, by Lovelace is working good, but his green pacer Chuintieneng has not been doing well, this spring, and may not be started this year.

The favorite pacer on the track is the three-year-old Sunny Jim formerly known as Shadow Holmes. This is a phenomenal colt owned and driven by Mr. Davis, a motorman, who devotes all his spare time to him, and with what little work he had can pace a 2:15 gait with but little effort. He wiggled off a quarter in 35 seconds in his last work as though it was play for him. He is by Ladis, son of Phallamoot Boy and Beulah, dam by Altamont.

Sawyer was up behind a very promising two-year-

old trotter by Zombro, owned by Mr. Bryan, of Lafayette. He is also working the fast pacer, Yukon, but is not giving him any fast work yet. This fellow is looking fine and has been entered in all the fast classes on the circuit. Those who know him say he is one of the gamest pacers on the coast. Mr. Sawyer is jogging a very handsome trotter owned by Mr. Watson, sired by Caution, out of the dam of Atlas 2:15½ that has a good way of going.

The talk of the track is the match race between Walter Allison's gelding, Monkey, and Ed Chase's Harry Marvin, to go under saddle, at the spring meet of the Hunt Club. We could not find the stakeholder, and the sum reported to be raced for ranges all the way from \$50 up to \$500 a side.

J. A. Jones of Springbrook, Oregon, has sold his team of three-year-old geldings, Raven Jones and Doctor Jones, to G. W. Loggie, president of the Whatcom Mill Co., Bellingham, Wash. These colts stand 15.2½ and weigh 1050 each, and are nearly full brothers, being sired by Capt. Jones, son of McKinney. The dam of Raven is Rosa Lee by Malheur; second dam Tempest by Mazeppa. The dam of Doctor Jones is Tempest by Mazeppa. The youngsters look alike, are well mannered and one of the handsomest teams that ever left the State. Mr. Loggie wanted something good and he certainly found it in this team, for which he paid \$800 and refused a good profit on his investment before the colts were shipped.

The first matinee meeting of the season was held in Spokane last Saturday, under the auspices of the Amateur Driving Club of that city. There was a good attendance and some good sport furnished by the local club. Ben Bolt, Almota and Reflector were the winners in the three events. Other meeting will be held by the club during the summer.

J. A. Jones has brought his stallion, Capt. Jones, home from California, and has placed him in H. H. Helman's stable, Irvington Park where he will make a stud season. Capt. Jones worked miles in 2:23½ this year at Los Angeles, and after the season will be put in training for a record. Capt. Jones is one of the best sires in Oregon, and his return here should be welcomed by the breeders.

Perry Mauzey has moved to the fair grounds with a stable of trotters and pacers.

Pathmark 2:11½ will be raced again this year. He has been entered in the 2:11 class throughout the circuit.

Mr. F. B. Allard has sold his driving mare, Pearl, to J. E. Zeigler, of Gervais. This is one of the good mares to leave this city. She is a hay mare by Lemont. First dam Katy Bird by Deadshot, second dam by Post Hambletonian, third dam by Duval's Mambrino, fourth dam by Pioneer, fifth dam by Blackhorns Whip.

To Purify Racing.

The Grand Circuit trotting tracks were organized as a corporation at a meeting held in New York last week by representatives of twelve of the most important trotting tracks in the country. The object of the organization will be the purification of the turf and uplifting of racing to the highest possible plane. It will not interfere with the parent bodies, the National and American Trotting Associations, but will act in harmony with them. The twelve tracks in the corporation in the Grand Circuit will be Detroit, Cleveland, Buffalo, Empire City, Brighton Beach, New York; Readville, Boston; Providence, Hartford, Columbus, Ohio, Cincinnati and Memphis.

The articles of Incorporation were signed by D. J. Campau of Detroit, James Butler of New York, C. K. G. Billings of Memphis, J. S. Thayer of Boston, F. E. Perkins of Providence, and H. M. Hanna of Cleveland. The six named were chosen stewards of the Grand Circuit, and the following officers were elected:

Daniel J. Campau, President; J. S. Thayer, Vice-President; Albert H. Moore, Secretary; C. R. Bentley and Albert H. Moore were appointed a committee to draw up the constitution and by-laws for the organization. These probably will be similar to those of the National and American Trotting Associations.

It seems to be settled that there will be no Grand Circuit meeting in Cleveland in July. The dates of the Cleveland meeting will probably be taken by Detroit, which will make the start of the Grand Circuit a week later than the original program. This will allow Windsor, Ontario, to take the Detroit dates, thereby preventing a clash in dates between Columbus and Windsor.

Doc Taoner is breaking a two-year-old filly by John A. McKerron 2:04½, dam Carrie Onward 2:14½. This is a very fine filly, one of the very best looking of McKerron's colts to be seen. The dam has been bred back.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

AT THE TRAPS.

The Millwood Gun Club blue rock shoot for May will take place tomorrow at Mill Valley, a week in advance of the scheduled date, so as to enable the club members to attend the tournament at Ingleside on the 29th inst.

The program for the Pacific Inadimate Target Association tournament on May 29th and 30th at Ingleside will be made up each day of six events at twenty targets each, \$10 added, entrance \$1, 5 moneys, Rose system of money division. Side pool \$1 entrance, optional, 4 moneys, high guns.

Besides the foregoing matches there will be two team shoots. A six-men team shoot the first day, at 20 targets per man, \$6 entrance, 4 moneys, Union Gun Club trophy and 40% to first, 30%, 20% and 10%. On the second day a three-men team shoot will take place. The conditions are the same as the six-men team shoot, with the difference that the trophy or added cash will be donated by the Golden Gate Gun Club. The grounds will be open for practice shooting on Saturday preceding the tournament.

Many noted crack pigeon shots participated in the chief events at Cercle du Bois de Bouchigue last week at Paris. The Prix des Glaieuls was the principal event, in which Prince Poniatowski, Prince P. Carman, Chimay, Messrs. Crittenden Robinson and Comte H. D'Oultremont took part. It was won by the last named shooter.

In the sweepstakes which followed Mr. Robinson, who will be remembered by Coast shooters as a clever wing shot, grassed all his birds and won outright.

At the Golden Gate Gun Club shoot last Sunday the winning and high guns in the different events were:

Medal shoot—Champion class, C. A. Haight and M. O. Feudner. First class, E. Klevesahl, straight score 25; second money G. Sylvester after shooting off a tie on 23 with Gamble, Wattles and Laing. Second class, H. Klevesahl and J. Clark.

Purse shoot, \$150, high guns—Champion class, A. J. Webb, straight, 25 breaks, M. O. Feudner and E. J. Forster. First class, G. Sylvester and W. J. Golcher. Second class, Knauff and Biller.

Consolation race—Champion class, Haight, Nauman and Webb divided, 24 each. First class, Wattles, G. Sylvester and Potter divided first three moneys. Iverson won fourth money and E. Klevesahl, Gamble, Golcher, Murdock and "Slade" divided fifth money. Second class, H. Klevesahl and Clark divided first two moneys, Jacobsen third money, Baker fourth money.

Cartridge re-entry shoot, sealed conditions—Haight scored straight, eight shooters broke 14 targets each. Merchandise shoot winners—First class Ed Donohoe first prize, A. J. Webb second. Second class, Gamble and Laing. Third class, Dr. Derby, C. C. Nauman. Fourth class, G. Sylvester and Biller. Fifth class, Dr. Hutton, A. M. Shields. Sixth class, W. A. Robertson and W. E. Murdock. Seventh class, J. Bruns and Knauff. In the fifth class seven shooters tied with 15 breaks each.

In the regular events C. A. Haight was high average for the day breaking 102 out of 110. A summary of scores follows:

Champion Class	Medal Shoot 25 targets	\$150 Cash 25 targets	Consolation 25 targets	Cartridge 15 targets
Haight.....	24	22	24	15
Feudner.....	23	24	21	8
Nauman.....	22	20	24	14
Webb.....	22	25	24	13
Forster.....	21	23	23	..
First Class				
E. Klevesahl....	25	22	22	14
Gamble.....	23	22	22	12
Laing.....	23	15	18	14
Wattles.....	23	20	24	12

Dr. Derby.....	20	18	21	..

Merchandise Shoot, 20 targets—Donohoe 19, Webb 19, Gamble 18, Laing 18, Golcher 18, Derby 17, Nauman 17, Haight 17, Wattles 17, Sylvester 16, Biller 16, Iverson 16, Hutton 15, Shields 15, E. Klevesahl 15, Hass 15, Hoyt 15, Forster 15, H. Klevesahl 15, Robertson 14, Murdock 14, "Slade" 14, Bruns 13, Knauff 12, Clark 12, Cuneo 10, Jacobsen 8.

The second team shoot between the Empire and College City Gun Clubs will be shot tomorrow on the College City club grounds, North Berkeley.

The first race took place at the Alameda Point grounds and was between teams of six men from each club. The Empire shooters scoring 101 out of 120 against 88 points of their opponents. Should the former club prevail again the match tomorrow will be the final one. The match tomorrow will probably be, as originally arranged, between twelve-men teams.

The blue rock shoot of the Washington Gun Club at Sacramento last Sunday brought out some good scores. Judge Hughes was the high man. He now holds the medals of both the gun clubs of Sacramento—the Capital City and the Washington.

Club shoot, 25 targets—Hughes 19, Hoffman 6, Korn 13, Reichert 13, E. Brown 9, Davis 14, Trumpler 7, Adams 18, Smith 10, Connor 8, Heilbron 10, Morgan 6, Bowles 10, Vetter 13, Newbert 13, Haggerty 15, O'Brien 10, Frazee 10, F. Brown 15, Just 12, Gusto 15, Peek 17, Stephens 17, Cotter 10.

Ten targets—Adams 7-5, Hughes 6-7-5, Stephens 6-6-4-8, Vetter 6-7-3-7, Newbert 4-6-7, Englehart 6-7, Smith 5-5, Hoffman 0-0-4, Reichert 4-4, Haggerty 9, Peek 4-6, O'Brien 9, Morgan 6-2, Cotter 4-5, Connor 6.

Fifteen targets—Adams 7-4-9, Hughes 12-9, Stephens 11-11-13, Vetter 6-12, Newbert 9-10, Connor 6, Hoffman 4-6, Reichert 10, Englehart 8-6, Davis 6-14, Peek 13, O'Brien 9-13, Trumpler 11, Smith 5, Korn 7, Morgan 4, F. Brown 9, Bowen 5, Frazee 5.

Fish Lines.

The warm weather spell should soon enable anglers to enjoy fly-fishing to their hearts' content. The streams are clear and getting lower, but bait fishing has been in vogue at most of the angling resorts.

At Klamath Hot Springs splendid bait fishing has been the rule with those on that favorite stream. Al M. Cummings has been making good catches daily and has sent a number of boxes of large trout to friends in this city. By this time the salmon and caddisflies should be in evidence. When these insects make their appearance excellent fly-fishing can be had. The Klamath was higher this season than for thirty years past, all the dams were washed out and fish had an unimpeded run up the river and its tributaries.

Reports from the Truckee state that the river is still too high for fly-fishing, but the stream is full of fish and the big rainbows attack a spoon or attractive bait with much vigor and determination. Many anglers have recently had good sport in landing some of these fish with 6 oz. rods.

Near Verdi, at the bridge about 200 feet from the Country Club resort, a lady angler last week struck and landed a four pound trout. A number of other good sized fish have been caught at the resort recently.

At Lemoine this season, the flat has gone forth that there will be no accommodations for ladies. The frugal conveniences of the resort will be at the disposal of anglers of the sterner sex only.

Word comes from Sims that although Hazel creek is still somewhat high the fishing is extra good.

From Bairds a correspondent writes, that there is no fly-fishing anywhere on the McCloud at present. The melting snows have made the waters of the river very muddy. To reach Bairds, an angler can go by way of Redding, thence by lively rig or the daily (excepting Sundays) mail wagon and drive a distance of 21 miles. Another route is by railroad to Baird's Spur and then by hired vehicle ten miles to Bairds. By writing in advance or telephoning to J. L. Bass at Bairds a team can meet the sportsman at the "spur." Fly-fishing up there should be good when the river clears. There is a good boarding house at either place above mentioned.

S. A. Wells, Rube Haas and Will Burlingame are hooked for a trip to Big Meadows, leaving tomorrow evening.

Within easy striking distance of Ukiah the angler can find many likely streams for good trout fishing. The streams of Mendocino and Sonoma counties should be better this year for fly-fishing than has prevailed for many past seasons.

A fresh run of fish is reported in the Paper Mill, a number of local anglers having taken advantage of the finny visitation during the week. James Watt, S. A. Wells and Frank Marcus have each made good catches of the newcomers.

From the Sequel, San Lorenzo and Boulder creek resorts come recent encouraging reports of some excellent fly-fishing.

Some good catches with the fly have recently been made in Sonoma creek. Two anglers whipped the stream from just above the town of Sonoma down to a short distance below Glen Ellen station, and nearly eighty acceptable sized trout were caught.

Santa Clara anglers have enjoyed, during the recent pleasant weather, excellent trout fishing in various streams. The creeks are falling rapidly and becoming clearer every day and fish are rising readily to the fly. Most of the streams in the county have yielded good sport but anglers who have visited the streams on the western slopes seem to have enjoyed the most success. The continued warm weather for the past week should about bring fishing conditions up to the best notch. On the Calaveras last week Frank Monroe of San Jose caught 47 nice fish, many 10 and 11 inches long. He hooked one 20 inch trout that took half an hour to land. Smith's creek from the forks almost up to the hotel has been found good. Stevens creek, Arroyo Honda, Alum Rock creek and the Llagas have been prospected with some little success by a number of anglers.

Recent trips to the Purissima have been productive of sport and trout. Howard Black and W. L. Johnstone last Sunday creeled seventy five trout. James Maynard, Jr., also had good luck on this stream.

Reverend John Butler and President John Lemmer two weeks ago went over the San Gregorio and Pescadero country for a three days' trip, in hy way of San

Mateo and out again via Redwood City, a pleasant way to enjoy a change of scenery, etc., on an outing trip. The anglers did not fish Pescadero creek, but did most of their fishing in the San Gregorio and Ralston creeks. The fish in the latter stream were found to be rather small, this year's fish, in fact.

The last day of the trip was, however, the big day's sport—and that of a somewhat novel character. Both anglers have whipped many waters and they each know a trick or two, but on this occasion "Salmon Roe Jack" played it low down on "Bleck Jack."

When the two anglers worked along the banks of the creek that morning they used angle worms for bait at first and for a while with indifferent results. Presently, S. R. Jack landed a nice sized trout, and at short intervals following he played and landed several more fish. B. Jack was not keeping pace with his partner. The assumed air of indifference, while attending strictly to business, a side look of quiet observation and an uncalled for silence on S. R. Jack's part aroused B. Jack's suspicions. He assumed, and justly so, that he was entitled to catch a few trout also, all conditions being equal. Passing on down stream a short distance, he made a detour and taking position where he was unobserved, awaited developments. S. R. Jack landed another trout, examined his bait, then opened his bait box. The visible supply of bait was apparently exhausted, for S. R., after cautiously looking about, resurrected from a nearby hiding place a glass fruit jar, from which he refilled his bait box, again hid his mysterious jar, then went on down stream a bit. B. Jack hopped onto the hidden jar like a hawk pouncing on a chicken. A brief investigation showed that the jar was nearly filled with shrimp. Not fresh ones, for the close season began on the 1st inst., but, as after events proved, better still, shrimps that were preserved in old Hayden. S. R. Jack believes in the many virtues of old 'Ayden for man or beast, and evidently thought what was good for the former would also be good for fins. In this he was consistent and preticel.

B. Jack heited up with an embalmed shrimp, made a cast, there was no rise. Another cast and this time there was a rush and a swirl and a big fight was on. The fish was a 20-inch steelhead. It required all the skill of B. Jack to land it, but the task was finely accomplished. The fish lay gasping in the grass and B. Jack wiped his brow and then turned to get some more of the wonderful bait.

Then it was when he felt broken hearted. In the excitement of landing the fish he upset the jar of preserved shrimp which had rolled down the bank and into the stream. There it floated hottom up. His spirits sank as he thought of what might have been accomplished had it not been for the unfortunate mishap. Whilst he was saying things and reproaching himself for his carelessness, S. R. Jack again appeared on the scene. Before both anglers had proceeded far in a spontaneous mutual gabfest they noticed something doing in the pool where they had been fishing. It was over this hole that the bait jar drifted in its cruise from the bank and into its depths had dropped the whisky soaked shrimps. The astonished anglers saw a boiling, seething mass in the pool. It appeared to be alive with fish, there was big fish and little fish galore, swirling and swishing through the water in the hole.

The astonished fishermen rubbed their eyes to assure themselves they were not dreaming. They looked twice, then thrice before they were satisfied that their first impressions were not built on a hop foundation. There was more fish in sight than they believed were in the whole creek. The hunch of fish looked like a scrimmage in a football field, so eager were they to get the alcoholized shrimps. It did not takelong for the fish to dispose of the last bait, but the supply was not equal to the fierce demand.

Finally the disturbance quieted down and the writhing fish gradually disappeared from view. The two anglers thought the shindy was over and B. Jack stooped to pick up the big fish he had caught. They were mistaken however, for the fun was yet to come, the fish had eaten the shrimps all right, but that brand was the first sample of shrimps preserved in liquor they had ever encountered. To their uninitiated palates and unseasoned stomachs the whiskey that "Salmon Roe Jack" had used in pickling his bait was an entirely new experience. When they settled to the bottom of the stream to digest the shrimps they were totally unprepared for what ensued.

The whiskey worked potentlly, and in a few minutes the fish were as drunk as the Flowin' Bole Gun Club members used to get when they went duck hunting at Antioch. If they had been lively in their first onslaught on the pickled bait they were superlatively active now. They raced through the water and danced two-steps. They played teg, hon-scoth, turned handsprings and did cake walks. They went through all the antics that any drunken crowd ever tried and they did themselves proud. Some of them turned somersaults so lively that they landed on the shore, the cool moist earth felt so good that they decided to remain there. These fish were picked up and brought to the city and thus it happened that there was a large distribution of nice trout at the Black Jack symposium the next day.

The Fly-Casting Club members will meet at Stow lake this afternoon and to-morrow morning for the first contests in the class series.

On next Tuesday evening a regular meeting, and dinner, will take place at the California Hotel.

Railroad rates for club members and their families are now in effect as follows: Cisco, \$6.90; Truckee, \$8.30; Boca, \$8.70; Floriston, \$9; Chico, \$5.90; Ba rd, \$9.50; Sims, \$9.60; Upton, \$10.75; Ager, \$14. Tickets on Shasta Route good for season. To Sierra points good for 30 days.

Striped bass anglers are catching plenty of fish on the east shores of the bays, in the vicinity of San Pablo particularly. The fish run from two to five pounds in weight, although bass as heavy as fifteen pounds have been taken. They are following the shoals of sardines which frequent the east side waters

at present and are mostly taken on a No. 4 Wilson spoon. Frank La Coste landed 37 last Saturday and 18 on Sunday. E. Bouton caught 10 on Saturday. Jack Kearney and Ed Schultz hooked 10 fish on Sunday. J. B. Kenniff and Will Barnes also had fair luck. These fish were all taken off San Pablo. Frank Marcus and Bert Wyman caught 4 bass, the largest a 9 pounder, in the east arm of Richardson's bay on Sunday. Results in and about Tiburon and on the Marin shores have not been encouraging recently.

The Salmon Industry of the Coast.

There has been recently published some details of interest on the salmon industry on the Pacific Coast. Whatever may be done in the future by the Japanese or Russians on the rivers of Asia, the American coast has hitherto been practically the sole source of the world's supply of the canned fish. The industry was first started on the Sacramento river in 1864, at Washington, and the pack for the first year consisted of some 2000 cases, each containing forty-eight 1-lb tins. The greatest output was reached in 1882, when over 100 times this amount was produced, the pack exceeding 200,000 cases. After this, however, either owing to over killing, or to saw-mills, mining, and other works on the banks, the catch became very much reduced; but of late the fish have been returning to the Sacramento in increased numbers. For statistical purposes, besides the Sacramento, the take is classed under four heads—"Outside Rivers," Puget Sound, Alaska and Columbia. The "outside rivers" are those of Oregon south of the Columbia, and the northern California streams as far as the Eel River. Taken in the aggregate, this group reached its highest output in 1895, when 264,000 cases were canned; but the pack has now fallen to half this amount, largely owing to the increased sale of fresh or cold storage fish. It is from Puget Sound and Alaska, however, that the great bulk of the pack comes. Canning was first started in the former district in the year 1877, and soon became an enormous industry. In 1901 the pack was as much as 1,380,590 cases, but this colossal output has not been kept up, the figures falling to 563,000 cases in 1902, while last year the total was still lower, being only 464,000 of all grades. It is here that the sockeye (O. nerka), which is one of the most appreciated sorts, is chiefly canned. How greatly it has decreased is best shown by the fact that in 1901 it filled 1,110,000 of the number of cases given above, while last year only 150,000 cases of it were canned. In Alaska there were no canneries previous to 1878, but twelve years later there were thirty-eight in operation, and in 1902 they had still further increased to fifty-four, with the enormous output of 2,500,000 cases. This, the maximum pack hitherto made, is largely owing to the use of the cheaper kinds of salmon, such as the humpback (O. garbusa), and the chum or dog salmon. British Columbia had almost as many separate canneries as Alaska, but in 1901 the British Columbian Packers' Association, which was formed with the aim of putting an end to the over-competition on the Fraser River, amalgamated forty-four of these establishments with undoubted benefit, though the total for last year is not large as compared with some previous seasons, the whole province, including the Fraser River and northern points, only amounting to 473,547 cases, while two years previously over 1,200,000 were packed.

Of the total amount of salmon yielded by the rivers of the Pacific Coast, about 45 per cent is consumed in the United States, 40 per cent in Europe, and 15 per cent in all other countries. By far the largest part of the European import is taken by England, the duties in most continental countries being practically prohibitive. The chinook or quinnat holds the first place followed by the sockeye and the coho (O. kiatoh), the pink (garbusa) and chum belonging to the inferior grade. The packing of these last has never proved remunerative in British Columbia, though there is a considerable demand for them in the southern states, so much so that in 1901 unusual efforts were made to increase the take. This resulted in the enormous output of 5,000,000 cases of salmon—an increase of 2,000,000 cases in one year—and, as might be imagined, the market became overstocked, causing large losses to the packers of the cheap grades of fish. At the present time the prices of the better qualities are comparatively high and are said to be likely to remain so.

E. Courtney Ford's English Setter bitch Loveknott (Mercury-Sweetheart's Last) was served by A. Trueman's Wig Wag (Ch. Mohawk-Daughter Gladstone) on April 17th and is now perceptibly in whelp.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.
April 1-Nov. 1—Trout season open
May 1-Sept. 1—Close season for ehlmp.
May 21—Saturday Contest No. 6. Classification Series, Stow lake, 2:30 P. M.
May 22—Sunday Contest No. 6. Classification Series, Stow lake, 10 A. M.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crabs.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gua.

May—Capital City Blue Rock Club. Agricultural Park Sacramento.
May 22—Millwood Gun Club. Blue rocks. Mill Valley.
May 28, 29, 30—Northern California Blue Rock Tournament. Kimball and Upson grounds. Sacramento.

An Elk Preserve.

On the Miller and Lux cattle ranges of the San Joaquin valley there was put, some years ago, a small band of elk. These noble animals—with but a few exceptions, now the sole survivors of the large bands that were plentiful at one time in California, have thriven and increased until the bunch, 150 of them, were found to have outgrown their protecting habitat and in the way. Various efforts to have the animals transferred to other and more congenial quarters were made but until recently the project was a difficult one to handle satisfactorily, for many reasons. There were no private landowners who were in a position to assume the responsibility, for the band of 150 elk required quite a range and feeding grounds where they would be free from molestation and could thrive. The State Board of Fish Commissioners were unable, much as they desired to, to cope with the situation. Finally the United States Department of Agriculture took the matter under advisement with the result now that the puzzling question has been settled.

On the north fork of the Kaweah river in a portion of the Sequoia National Park, in Tulare county, has been found an almost ideal place for the elk. A beautiful valley, with plenty of food and shelter, having precipitous and unscalable rocky hills on each side, has been selected for a range where the animals will be protected and safe from poachers. Six miles of the valley, with a substantial fence at each end, has been turned into an elk preserve where the band will be kept and watched by the forest rangers until accustomed to their new range, when the fences will be removed and the animals will be free to roam the whole national forest reserve, a portion of which has been set aside (or soon will be) as a perpetual game preserve.

This step is a most important one in the preservation and protection from extermination of elk in this State. What few animals there may be here and there in remote localities have been on the protected list of the State, the killing of elk being prohibited at any time. While the law is necessary and proper, its enforcement at the right time is to a great extent problematical. In the present instance, the animals will be under competent and constant supervision and no doubt will thrive and increase.

DOINGS IN DOGDOM.

Mr. Thos. S. Griffiths of Spokane writes us as follows:

"I feel very proud of the showing our Collies have made at the seven shows; sixty-five firsts; eighteen seconds and three thirds, besides cups for the best Collie dog and bitch at all shows but one and there we got it for the best Collie bitch in the show."

Spokane, October, 1903; Judge E. Davies: fourteen firsts and three seconds, cup for best Collie dog, cup for best Collie bitch.

San Francisco, December 4, 1903; Judge Cole: won kennel prize for best Collies; also four firsts, two seconds, one third, three specials and cup for best bitch.

Vancouver, B. C., March 31, April 2, 1904; Judge E. Davies: eight firsts, two seconds, one third, Lieutenant Governor's cup for best Collie dog in show; also four other specials.

Victoria, B. C., April 6-8, 1904; Judge Davidson: ten firsts, two seconds, one third and three specials.

Seattle, Wash., April 13-16, 1904; Judge Watson: thirteen firsts, six seconds, cups for best dog and bitch.

Portland, Oregon, April, 1904; Judge Mortimer: nine firsts, two seconds, cup for best Collie dog, cup for best Collie bitch, cup for best puppy, also three specials offered by California Collie Club.

San Jose, Cal., April 28, 1904; Judge Turner: six firsts, trophy for best Collie dog and best Collie bitch, also three specials. The winners were Lenzie Prince (winner of forty-seven firsts) by Ch. Rightaway; Bo-Peep by Ch. Heacham Galopin (now a champion herself) Rippowam's Miss Tuffett, Glen Tana Black Baby (both out of Vesta ex Archer), Glen Tana Monk by Ch. Wellsbourne Conqueror, Glen Tana Marquis by Ellwyn Carnegie, Rippowam Archer by Ch. Ellwyn Astrologer, Craigmere Caroline by Doon Selection and Brandane Marionlea by Brandane Rightaway. Our show dogs arrived home in good shape, Saturday, May 7th. We sold Monk and Black Baby for \$500 to British Columbia parties."

J. H. Ravekes of San Leandro announces he has for sale three well broken, two year old Foxhounds—trained to work perfectly on deer. He will also dispose of two five months old puppies. The deer season is near and good dogs are in demand; there is just about time for a purchaser to get thoroughly acquainted with a dog so that the initial venison hunt would not be marred by some unexpected surprise perpetrated by a newly acquired dog.

At Gablan Kennels, Hollister, there is a promising lot of Llewellyn puppies coming on in a grand way. Gath's Moxey recently whelped seven handsome pups.

Last week Fairland Fleet (Marie's Sport-Mark's Fleet) and a litter to Sport's Destiny arrived from W. J. Baughn. Fleet is in whelp to Petrel's Count.

Taking it all in all, Mrs. Murphy is to be congratulated on some very good Setter prospects.

☞ The pioneer Coast litter to Boston (Rob Roy-Dinah S.), the handsome Pointer, brought out here by James Cole, of Kansas City, last December, and purchased by Mr. E. Courtney Ford, was whelped at Boca, May 7th. The dam Bess is owned by Mrs. Leonard S. Bolter of this city. Bess is a stylish bitch by Glen Du Pont, a grandson of Ch. Glenbeigh out of Fay, a Rip Rap bitch. This litter should be the making of some notable field dogs.

Western Kennel League.

The Western Kennel League adopted on April 16, 1904, the constitution and rules given below. The league is now completely organized and invites kennel clubs throughout the United States and British Columbia to join. The Field Dog Stud Book has been adopted as the league's official register—which stud book is now open to all breeds. The officers of the club are: President, Julius Redelsheimer, Seattle, Wash.; Vice-Presidents—First, C. B. Yandell, Seattle, Wash.; second, William Goldman, Portland, Or.; third, T. P. McConnell, Victoria, B. C.; fourth, J. J. Tulk, Vancouver, B. C.; fifth, Arthur Lette, Los Angeles, Cal. Secretary-Treasurer, N. J. Stewart, San Jose, Cal.

CONSTITUTION.

Article I—Name—The name of this organization shall be the Western Kennel League.

Article II—Object and Powers—Section 1. Its objects shall be to form a more perfect union between kennel clubs and fanciers; promote harmony of interest; establish a uniform code of rules for the government of clubs holding dog shows or field trials, and the awarding of prizes, as in its judgment is best adapted to the conditions; adopt standards for judging the various breeds of dogs; promote the general interests of the fancy, and compel, so far as in its power lies, fair and honest treatment in all transactions connected with dogs, dog shows and field trials.

Sec. 2. Its powers are derived from the consent of the governed as delegated to it by the clubs composing its membership, and it shall only exercise such powers as are expressly given by the adoption of this constitution, or by such amendments as shall be made at a regular meeting of the league.

Article III—Membership—Section 1. All regularly organized bench or specialty clubs or associations in the United States or British American provinces which have held dog shows or field trials, or for the improvement of any breed of dogs, shall be eligible to membership in the league.

Sec. 2. Each show-giving club shall be represented by two delegates, and each specialty club by one delegate, to be chosen annually.

Sec. 3. The annual dues of clubs shall be ten dollars (\$10), payable on or before January 1 of each year. Any club failing to pay such dues within the specified time shall forfeit all right to representation in the Western Kennel League, and such club may be suspended or dropped from the roll.

Sec. 4. The Western Kennel League shall have the right to make one assessment during the year, not to exceed ten dollars.

Sec. 5. Each club holding membership in the Western Kennel League is entitled to hold one show during the year, for which current dues and assessments have been paid. For any additional shows an additional fee of ten dollars each shall be paid; the same shall accompany the application of the club to the Western Kennel League for reservation of dates.

Sec. 6. Applications of clubs for membership in the Western Kennel League shall be made in writing to the secretary of the Western Kennel League, accompanied by the applicant's constitution and by-laws and a list of officers and a full year's dues. An election by ballot shall be held at the next meeting of the Western Kennel League, or the executive board, provided the said application shall have been filed with the secretary of the league at least ten days previous to said meeting.

Article IV—Jurisdiction—The jurisdiction of this league shall be all territory in the United States and British America.

Article V—Officers—Section 1. The officers of the league shall be a president, a vice-president, an honorary vice-president in each state or territory and British American province, and a secretary-treasurer. These officers shall be elected at the annual meeting of the league, and shall hold office for one year or until their successors are elected. The president, vice-president and secretary-treasurer, together with one delegate from each club member, shall constitute the executive board.

Sec. 2. It shall be the duty of the president to preside at all meetings of the league and of the executive board, enforce a strict compliance with the constitution and rules of the league, direct the secretary to call meetings of the executive board, when, in his judgment, the affairs of the league demand it, or upon the written application of three clubs.

Sec. 3. It shall be the duty of the vice presidents to perform any and all the acts within the power of the president in case of his absence or disability. The vice-presidents shall hold rank in accordance with the seniority of the organization of their respective clubs.

Sec. 4. Any vice-president or member of the executive board unable to attend the meetings of the board or the league shall have the power to appoint a proxy to represent him, and such proxy shall exercise all the powers of his principal, but no one person shall represent more than one club.

Sec. 5. It shall be the duty of the secretary-treasurer to keep a true and correct account of all the proceedings of the league and of the executive board; grant dates for shows or field trials to clubs applying for the same, which have complied with the requirements of Article III of these rules, when not in conflict with dates already claimed; keep a record of all the awards made at shows held under league rules; collect all money due the league and disburse the same only as directed by the finance committee; serve all notices directed by the president and attend to all the correspondence of the league.

The office of the secretary-treasurer shall not carry with it any salary, but expenses incurred by this officer in the discharge of his duty shall be borne by the league.

Sec. 6. It shall be the duty of the executive board to meet at the call of the president, and during the recess of the league to sit as a court of review on all cases which would otherwise come before the league, and in such cases its acts shall be binding until reversed by the league. It shall have power to settle

all disputes between clubs, admit new members and perform all other acts which the league could perform in session, except to alter or amend the constitution. It shall make a report to the league at the annual meeting of all acts performed during the year, and submit the proofs and evidence on which its findings were made. A majority of the board shall constitute a quorum, but if no more than a quorum be present, then a two-thirds vote shall be necessary to decide any question involving the rights of any club or individual.

Sec. 7. A finance committee of three members shall be appointed by the president. The finance committee shall audit all bills and order the treasurer to pay same upon vouchers issued by it.

Sec. 8. Roberts' Rules of Order shall govern all meetings of the Western Kennel League.

Article VI—Violations, Trials and Penalties—Section 1. Charges for any violations of the rules of the league for issuing false pedigrees, or other reprehensible conduct in connection with transactions in dogs or dog shows or field trials, must be brought before the subordinate club nearest to where the offense was committed. Upon the receipt of said charges the president of said club shall appoint five members, in no way connected with the offense, to investigate the case and report to the club the facts and the evidence submitted, and the club, upon the receipt thereof, shall determine the penalty, if any, to be inflicted, and shall within five days thereafter forward to the secretary of the league a true copy of such findings together with the evidence submitted, and the league, or, during its recess, the executive board, shall review the same, together with any new evidence which may be presented, and either confirm or reverse such findings.

Sec. 2. Should the offense be one against the club and affecting that club only, then its decisions shall be final so far as it and its shows or field trials are concerned; but it may forward the evidence upon which its decision was based and ask the league to make the penalty general in its application.

Sec. 3. In case any dispute shall arise between clubs, then each club a party thereto shall, upon the application of either, appoint three members to act as arbitrators, and should they fail to arrive at a settlement of their difficulties to the satisfaction of both, then the same committee shall take evidence pro and con and submit it to the league for final action.

Article VII—Meetings—There shall be at least one meeting held each year, and such meeting shall be held during the show of some one of the member clubs, the selection to be made by a majority of the delegates present at the last previous meeting. At the time this selection is made an alternate place shall be selected, and in case the club at the place first selected should fail to hold a show, then the meeting shall be held at the alternate place.

Article VIII—Quorum—A majority of the delegates of all clubs shall constitute a quorum for the transaction of all business of the league.

Article IX—Amendments—This constitution can be amended only at an annual meeting of the league or at a special meeting called for that purpose and by a two-thirds vote of all accredited delegates.

Article X—Rules Governing Clubs and Shows—Section 1—Every club or association, a member of the Western Kennel League, shall be the arbitrator of its own internal affairs, and shall have power to suspend or expel its members, or disqualify any person from exhibiting at its shows, subject to appeal to the Western Kennel League. It shall have the right to hold shows under the rules of this league, offer such prizes as it sees fit and perform any other act not in conflict with the constitution of the league, or the powers it has delegated to the league by becoming a member thereof.

Sec. 2. Every club or association, a member of this league, shall hold its shows under the following rules, which it shall publish in its premium list:

SHOW RULES.

Rule 1. Every dog must be the bona fide property of the person or kennel making such entry on the day of the closing of entries, and the entry form must contain his or her name, or the name or names of the owner or owners of the kennel. The entry must clearly identify the dog to be exhibited by name, and, if known, the date of birth, name of sire and dam and the name of its breeder. Should any of these particulars be unknown to the exhibitor, it must be stated on the entry blank. If the dog is registered in the Field Dog Stud Book the number must be given. No entry can be accepted of a puppy, in the puppy class, whose age, sire or dam is unknown.

Rule 2. If the name of a dog which has won a prize be changed the old name must be given on the entry blank as well as the new name and inserted in the catalogue until such time as it wins a prize under its new name.

Rule 3. All dogs eligible for registration must be registered in the Field Dog Stud Book, or listed with the secretary of the Western Kennel League. The listing fee shall be an annual one of twenty-five cents, and clubs are hereby authorized to act as agents of the league in collecting such fees; but it should be distinctly understood that clubs shall be held responsible to the league for the listing fees of all dogs at their shows which are not already registered in the Field Dog Stud Book or listed with the secretary of the Western Kennel League. As duplication of names in the same breed is not permissible, exhibitors of dogs listed with the secretary of the league must be informed that in the event of their dog being listed by said secretary in a name already in use, the name of their dog must be changed after the show, or circuit of shows, by application to the secretary of the league.

Rule 4. The breeder of a dog is the person owning or leasing the bitch at the time of her being bred.

Rule 5. Entries in the show may be declined any entries they see fit, or may remove from the show any dog on account of disease, vice or any other good cause.

Rule 6. A castrated dog or spayed bitch shall be disqualified. Total blindness, deafness or lameness shall disqualify. If the judge or veterinary surgeon is satisfied that the deafness or lameness is temporary, the dog shall be allowed to compete. A deaf dog is defined as one that cannot hear the ordinary words of command.

Rule 7. A dog suffering from a contagious or objectionable disease shall be disqualified, and shall at once be removed from the building. The regularly employed veterinary surgeon shall alone decide as to the condition of the dog, and his decision shall be given in writing.

Rule 8. A judge may disqualify a dog which, in his opinion, has been improperly tampered with, subject to the decision of the veterinary surgeon. Should the judge's disqualification be not sustained by the veterinary surgeon, the class must be rejudged.

A judge, upon the complaint of anyone actually engaged in handling or showing a dog during the judging of a class, may, in his opinion the complaint is warranted, order from the ring any person guilty of intentional or deliberate interference with any dog therein competing. Any person so ordered from the ring shall be prohibited from further handling or showing in any class during the continuance of said show.

Rule 9. Discretionary power is given the judge of each class to withhold any or all prizes for want of merit, and appeals can only be entertained where misrepresentation or breach of the rules is alleged. The judge's decision shall be final in all cases affecting the merits of the dogs.

Rule 10. Should an appointed judge be unable to fill his engagement the bench show committee shall have the right to fill the vacancy.

Rule 11. In any case where there is a limit of weight, a dog entered in such class may at any time after the opening of the show, and before the judging, be weighed, and the weight of the dog shall be registered and sold good at the time of judging. Any competing handler or exhibitor shall have the right to demand the weight or measuring of any dog during the judging of the class, other than those whose weight has been officially registered. Any subsequent protest must be made in the formal manner provided for in these rules.

Rule 12. Special classes:

1. The puppy class shall be for all dogs over six months and under twelve months of age, and no entry can be made of one under six months, or whose date of birth, breeder, sire and dam is unknown.

2. Novice class, for dogs never having won a first prize in any W. K. L. show puppy class excepted.

3. The limit class shall be for all dogs never having won four first prizes in the limit or open classes under W. K. L. rules.

4. The open class shall be for all dogs of any age over six months. No prize winner shall be debarred from competing. A dog which has gained the title of champion under any rules can be shown in open class only.

5. The winners' class shall be open only to winners of first prizes in any class in the show, giving at least three of the before mentioned classes, one of which must be the open class. Where winners class is not divided by sex there must be at least eight dogs of the breed entered; where the class is divided by sex there must be at least five dogs of each sex entered. The winner of five wins in this class will thereby become a champion of record, will be so recorded in the Western Kennel League record of wins, and will be entitled to a Western Kennel League championship medal. The judge may withhold the award of first in this class should he be of the opinion that there is no dog of sufficient merit to justify the award. Before awarding "Reserve" in this class, the dog, or dogs, having been placed second to the winner in any of the regular classes must be brought before the judge for competition with the remaining dogs in said winners class. No class winner can be withdrawn or withheld from competition in the winners class, and no entry fee shall be charged for said competition in this class. The winners' class can be divided by sex, provided that the registered classes announced in the premium list are also divided by sex.

6. The miscellaneous class shall be open to all dogs of established breeds for which no regular class has been provided in the premium list; entries in this class must specify the breed of the exhibit. Failure to comply with this condition shall disqualify the dog and its owner.

Rule 13. Should a dog win a prize subsequent to the entry at some show held between the time the entry was made and judging at the show for which he has been entered, the committee shall transfer him to his right class and have him judged therein.

Rule 14. When a dog has been entered in the wrong class, and on account of weight limit or other cause, the committee, if satisfied that no fraud was intended, shall transfer him to be judged in the class in which he properly belongs.

Rule 15. Should a prize winner be disqualified, the next dog, as placed by the judge, shall be moved up to his place; provided that no dog be moved into any place where the prize has been withheld by the judge.

Rule 16. Equal first or equal second shall not be given, but the judge may divide third between two dogs, in which case the win shall count as a third for each dog.

Rule 17. Any dog entered for competition and received at the show building must compete in all classes in which he is entered, and, failing to do so, shall be subject to a fine by the Western Kennel League equal to the entrance fee in each class. No dog eligible for special prizes can be withdrawn from competition unless it has been stated on the entry blanks, "Will not compete for special prizes." No special prizes can be accepted or offered by a show committee after the advertised date of the closing of entries.

Rule 18. The age of a dog shall be computed up to the day preceding the opening of the show.

Rule 19. Any exhibitor or his or her representative may file an objection to any dog in writing, stating the reasons therefor, at any time prior to the closing of the show, and depositing with the secretary of the show the sum of five dollars, which shall be forfeited to the Western Kennel League if the decision is against him, in which case the show committee shall meet at once and decide the matter, and from its decision there shall be no appeal.

Rule 20. A person or club guilty of misconduct of any kind in connection with dogs, dog shows or field trials may be suspended by the president of the Western Kennel League, or, in his absence, by the secretary, or, in his absence, by the committee, or by the club, where the offense was committed. The disqualification or suspension of an owner shall apply to all dogs owned by him.

Rule 21. Should a prize winner be disqualified the next dog as placed by the judge shall be moved up to his place; provided, that no dog shall be moved into any place where the prize has been withheld by the judge.

Rule 22. The handler of a dog, or person whose name appears on the entry blank as the handler, shall be considered as the agent of the owner in all transactions, unless the club is otherwise notified.

Rule 23. Entries shall close not less than seven days before the opening of the show.

Rule 24. Dog show committees may provide such classes for dogs of recognized breeds as they choose, provided such classes do not conflict with the conditions of the foregoing classes.

Rule 25. The secretary of the Western Kennel League must, after careful investigation, cancel all wins when satisfied that these rules have been violated by an exhibitor, in the following classes: When the entry has been made after the advertised date of closing entries; when a dog has been entered in the name of the agent only; when a puppy is entered being under the age of six months; when a dog is entered in the novice class, having previously won a first prize, puppy win excepted; when a dog is entered in the limit class, having previously won four or more prizes in said class; when a dog is entered in the miscellaneous class, and the breed is not specified or recognized; when a dog, by authority of its owner, is led into the judgment ring by, or in charge of a person not in good standing; when a dog is entered by an owner or his agent, if either is not in good standing; when the dog is not of recognized breed.

Rule 26. Two advance proofs of copies of the premium list must be sent to the secretary of the Western Kennel League for approval and his certificate of same must be printed immediately preceding the rules governing dog shows, in such premium list, when issued. Failure to comply with this rule will subject the club to loss of membership.

Rule 27. The above rules must be published in all the premium lists of clubs holding shows under the Western Kennel League rules.

Rule 28. All prizes must be returned to the show officials in case a dog is disqualified by the Western Kennel League subsequent to the closing of the show.

Rule 29. The secretary of a club holding a show under these rules must furnish two catalogs of all entries in said show, showing the winners of first, second, third and reserve in all regular classes, and first and reserve in all winners classes, to the secretary of the Western Kennel League within ten days after the closing of the show. Failure to comply with this will subject the club to suspension; provided, that the club may be reinstated by approval of the executive board of the Western Kennel League, who shall impose such fine as they shall see fit.

Rule 30. The word "dog," as used herein, is used in its generic sense.

Manitoba Field Trials.

The Dorby and All-Age purses for the Manitoba field trials this year have been increased from \$325 to \$400. Dearly entries close July 1, 1904, \$5 forfeit and \$10 to start, first money \$175, second \$100, third \$75, fourth \$50. All-Age entries close August 1, 1904, \$5 forfeit and \$10 to start, first money \$175, second \$100, third \$75 and fourth \$50. Setters that have not won first place, in any previous year at the Eastern, Continental, United States or Manitoba trials are eligible. For the Champion Stake, Setters or Pointers, that have been placed in any field trials can compete, entries close August 1, 1904, \$5 forfeit and \$10 for starters. The purse will consist of the running fees

to which is added a gold medal donated by Mr. J. Lemon. The first heat in this stake will last one hour, succeeding heats at the discretion of the judges.

The trials will be run under the revised rules of the Manitoba Field Trials Club. Mr. W. W. Titus of West Point, Miss., and Mr. T. T. Ashford of Birmingham, Ala., are the judges selected.

All dogs from the United States that have been duly entered in any of the Manitoba Field Trials Club events are allowed to enter Manitoba, and remain for ninety days, free of all duty. In order to benefit by this arrangement, an accurate description of each dog is absolutely necessary, giving name, breed, sex, color, event entered in, owner's name, name of person having charge, and line of railway travelling by, must be mailed to the secretary one week previous to date of arrival at port of entry—Emerson or Greta.

The winter has been most favorable for the birds, and large numbers are seen all over the Province. The large, new, solid brick hotel built last season at Carman gives improved and increased accommodation. Handlers can be located on good training grounds in various parts of the Province, where they can easily reach Carman for the trials.

Any further information, rules, entry blanks, etc., will be promptly forwarded upon request to Eric Hamber, Secretary-Treasurer, Winnipeg, Man.

Trade Notes.

Some Winchester winnings are reported as follows: At the Knoxville Gun Club shoot, April 25, Fred Gibson, of Kirkwood, Ill., won high average, shooting Winchester shells. At the shoot held in Pattenburg, N. J., April 15, Harry Gano, shooting Winchester shells, broke 101 out of 105 targets, and made a straight run of 63, which is splendid shooting for anyone.

Lem Willard, a Chicago amateur, won the high average cup at the tournament given at Rensselaer, Ind., April 20 and 21, shooting Winchester shells. His average was higher than any of the professionals who participated.

At Paducah, Ky., April 21, Guy Ward, only 17 years old, did some remarkable shooting, using Winchester Leader shells. He broke 25 birds straight and 47 out of 50.

In the Paducah Handicap of 25 birds, P. C. Ward, Moso Starr and J. T. Armstrong tied on 24. Gentry Hillman and Robinson tied for second on 22. All these gentlemen used Winchester shells.

At the Oxford, Mich., shoot, held April 21, high professional average was won by Jno. S. Boa, and high amateur average was won by Harry Alexander, both using Winchester Leader shells.

J. A. R. Elliot did not win high average at the Herron Hill shoot at Pittsburg, April 26th and 27th. Through an error on the part of the Pittsburg management, a report was sent to the daily papers of the recent shoot at the Herron Hill Gun Club, under the auspices of the Western Penn. Trap Shooters League, held at Pittsburg, April 26th and 27th, stating that Mr. Elliot of Kansas City made high average for the second day, scoring 159 out of a possible 175 targets, giving Mr. D. A. Upson's, of Cleveland, score as 156. This notice should be corrected. Mr. D. A. Upson, an amateur, shooting the Parker gun, won high average for the two days, breaking over 90%. Mr. Elliot was one bird less to his credit for the two days. Mr. Upson, an amateur and admirer of the Parker gun, was the only man breaking over 90% for the two days shoot. Mr. Upson states that when they have a hard lot of targets, it takes the Parker gun to win. By reference to scores of other prominent shooters ranging about 80%, it will be readily seen that the shooting was some of the hardest that has been experienced this year. Mr. Upson's record, as an amateur with the Parker gun, in the above shoot, is convincing of the reliability of the famous old Parker gun; total two days, 316 out of 350.

Some other recent winnings of the Parker gun were: At Point Breeze, Pa., April 25th, Mr. C. Mink, shooting the Parker gun, broke 49 out of 50. At Newark, N. J., April 30th, Mr. C. Floyd, shooting under the name of "Jap," and using the "Old Reliable" Parker, broke 92 out of 100, winning high amateur average.

Houston, Texas, April 23d, Wallace R. Miller broke 98 out of 100 targets, shooting "E. C." powder.

Providence, R. I., April 23, E. C. Griffith, of Pascogg, R. I., 1st general average 120 out of 125 targets, run of 64 shooting "Infallible."

Pittsburg, Pa., at Herron Hill Gun Club, April 26th and 27, D. A. Upson, of Cleveland, Ohio, 1st general average, 316 out of 350, shooting Du Pont Smokeless. 2d high average, F. E. Mallory, of Parkersburg, W. Va., 310 out of 350, shooting Du Pont Smokeless.

Kalamazoo, Mich., April 26th, 27th and 28th, J. S. Fanning, 1st general average, 548 out of 600 targets, shooting "Infallible."

Kansas City, Mo., April 27th to 29th, C. M. Powers, of Decatur, Ill., 1st general average, 425 out of 500 from the 21 yard mark, shooting "New E. C." 2d average, Fred Gilbert, of Spirit Lake, Iowa, 419 out of 500, from the 22 yard mark, shooting Du Pont Smokeless.

Kansas City, April 29th, C. M. Powers, of Decatur, Ill., won "Elliott Individual Cup," 25 straight, from 31 yard mark, shooting "New E. C." 2d average, Fred Gilbert, 24 out of 25, from the 33 yard mark, shooting Du Pont Smokeless.

Americus, Ga., April 27th and 28th, 1st general average, C. G. Spencer, of St. Louis, Mo., 386 out of 400, shooting Du Pont Smokeless. 2d general average Harold Money, of Oakland, N. J., 383 out of 400, shooting "E. C." 3d general average, Walter Huff, of Macon, Ga., 377 out of 400, shooting Du Pont Smokeless.

At same tournament, H. D. Freeman, of Atlanta, Ga., 1st amateur average, 364 out of 400, shooting "New Schultz." 2d amateur average, Frank Heidt, of Charleston, S. C., 361 out of 400, shooting Du Pont Smokeless. 3d amateur average, J. M. Napier, of Americus, Ga., 358 out of 400, shooting "E. C."

THE FARM.

Stock, Soil and Climate.

[A. J. Wells.]

The *Sunset* Magazine has recently exploited the tule lands of the San Joaquin, and the remarkable income of the Riverside Dairy herd on Rough and Ready island. The discussion suggests how intimately soil and climate may be related to success in breeding stock, and to milk production in the dairy. California had already done enough in the breeding of fine horses to arrest the attention of the world, and the phenomenal success of the Holstein-Friesian herd on the Delta lands of the great central valley shows afresh that climate, and the conditions under which climate permits animals to grow up, is an important factor in their development. This herd is less than four years old and has broken the world's record in three classes. This fact attested by the experts of the University of California has exerted great interest in the East, in the Holstein as a producer of milk and in the climate. What is the secret? Stock, of course, is a first consideration. You cannot get "phenomenal records from a scrub." But feed is a factor also, and this runs back to the soil and the equable temperature of the air, for the natural food of the cow cannot be grown luxuriantly on poor soil, nor produced where winter and rough weather make up half the year. It has been shown that the Holstein, bred in the Eastern States outranks the Holstein in Holland and that the Holstein in California far outstrips her sister in the East in the production of milk rich in butter fat. The only explanation is the climatic one. Cows on Rough and Ready island this past winter were only housed five nights, and this outdoor life on grass as succulent in mid January as in June, makes for superb physical health, without which the highest milk production is impossible.

The soil of these Delta lands produce rye grass, Swedish clover, white and red clover and blue grass—a mixture that makes the finest pasturage in the world. James Lane Allen said of Kentucky blue

months of every year. It has been thought that good feed and plenty of it with warm housing in winter was sufficient, but if there is not something more, why has not the careful and experienced Hollander held his own? We bring the Holstein into the Middle West and beat Holland. It is a hint of climate. We bring her into California pastures and beat the world, and climate is the only explanation. The thoroughbred cow is not a machine, but a highly organized animal and her care involves more than warm housing and good feeding. This finely developed creature must be able to make the most of the food she consumes. What energy is expended in the production of butter fat must be returned naturally, habitually, constantly. The record-breaking milker must be kept in perfect health. It is at bottom always a

learn to reproduce climate in the fields, and green and succulent pasturage from November to November again.

The Delta lands of the Stockton Colonies are among the richest in the world; they are overhung by the mild and equable airs of the Pacific, and provided with so perfect a system of irrigation and drainage that the porous soil can be kept in exactly the right condition by percolation, neither too wet nor too dry. In other words here is combined rich soil, available moisture and abundant sunshine, and these are the prime factors in producing the natural meadows to which the highly bred cow is heir, plus all the improvement in selection and mixture of grasses by which man is able to improve nature's handiwork. Nature is an apprentice, man makes a journeyman of her, and the cow of the Riverside Dairy and

Floating Pumping Plant on San Joaquin River

question of the health of the cow or horse. The pace cannot be kept, the record broken on the track or in the dairy without perfect working of all functions and tip-top conditions of blood and nerves. Other things being equal, speed comes from nervous force. In the cow, phenomenal yield of good milk comes from an animal highly bred, deep in the flank, large in the udder, with capacious frame, immense digestive powers and then the best food, and the most healthful conditions of life. The best food is good grass; the best conditions are the natural ones, life in the open air, pure water in the field and green pasturage all the year. This insures perfect health, good digestion, vigorous life, and that means the conversion of food into milk and butter fat, storing in the

the meadow she feeds in are better every way than unaided nature ever did make or ever will.

It is worth while to get the reprint of the *Sunset* articles, with the added material, and see what riches of opportunity be at our very doors.

Grading Up a Herd.

Hoard's Dairyman says: The surest, quickest way for any farmer to grade up his herd and secure the "right kind of cows" is for him to select a bull from some one of the four dairy breeds of cattle. He should pay as much attention to quality as if he was buying for use on a registered herd, for he wants just as strong breeding power in the bull as he can get. Then let him keep the bull as long as he is efficient, breeding him to his own daughters provided they are strong. When the granddaughters come to be bred, select another bull of some breed, but retain the old one for use on the daughters.

At the same time, pursue a rigid course of selection and weeding out, keeping only the best females. In this way, in a few years, any man can easily build up a 300 pound lot of cows, if, in addition, he will feed and shelter well. Too many farmers want to sow poor seed in the form of a grade bull. They hold the penny of first cost to the eye so close that they cannot see a 300-pound cow behind it.

The sheep shearing machine is not in general use, though it is in favor where tried. The power is transmitted through a flexible shaft and the process is the same as with the horse clipper. A good sheep shearer one used to handling the old-fashioned shears, soon becomes an expert operator with the clippers and the work is performed much easier and faster than by hand. The expense is about the same.

The wool sale at Marysville last week resulted in the growers getting from 15 to 17½ cents for their spring clip.

Meat on the Farm.

It does not necessarily follow that a fat hog is healthy. Prof. Andrew Bass of the University of Minnesota, says:

"Fat animals are not always healthy. Nor can first class meat be obtained from animals poor in flesh. 'Never kill an animal that is losing flesh,' is the maxim followed by butchers. With failing flesh, the muscle fibers are shrinking in volume and contain correspondingly less water so that the meat is tough and dry. A better product will be obtained from an animal in medium flesh but gaining rapidly than from the over fat animal at a standstill. Fine bones, soft, luxuriant hair and mellow flesh are always desirable in an animal to be used as meat, as they are indications of small waste and good quality of meat. The flesh of very young animals frequently lacks flavor and is watery. An old animal properly fattened and in good health would be preferable to a young one in poor condition. The best meat will be obtained from cattle from thirty to forty months old. A calf should not be used for veal under six weeks of age; is best about ten weeks old and if raised on the cow. Hogs may be used at any age after six weeks, but the most profitable age is eight to twelve months. In the preparation of animals for slaughter it is important that they should be kept off feed for at least twenty-four hours. Otherwise the system is gorged and it is impossible to thoroughly drain the blood from the animal, resulting in a reddish colored, unattractive carcass. Food in the stomach also affects the carcass, where the dressing is slow. Water, however, should be given freely up to the time of slaughter. The treatment of animals previous to slaughter is an important thing, specially that they be not excited. Excitement prevents proper drainage of blood vessels, and if extreme will cause souring of the meat very soon after dressing. Neither kill an animal immediately after a long drive or a run. Bruises should of course be avoided."

The Profitable Swine.

It is difficult to convince farmers that more money can be made from a hog fed on a variety of food, having a fair proportion of lean meat, than one large and excessively fat one.

A hog weighing 150 pounds selling for 7 cents a pound will bring \$10.50, while a 200-pound hog will seldom bring more than 5 cents a pound, or \$10.

Of course, much depends on the quality of the smaller hog, but the saving is in the cost, as the smaller hog can be produced on less food and labor and also sent to market sooner.—*Exchange*.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Head Gate, Irrigation Ditch, near Stockton

grass that "it loved rich lands, and was apt to find out where they lie; that it was benevolent to flocks and herds, and paid taxes well, with profits to boot." The best grasses are of this kind, loving a fertile soil and doing best where moisture is abundant and sunshine unstinted, and stock that has access all the year to natural grasses of the most nutritious kind will do better than where fed on dry feed in close stables for four or five

tissues of the body only what is required for the vital functions.

So simple does the problem seem to us in the last analysis, the balance will not simply be in favor of the man who breeds the highest type of dairy cow, but who chooses a place where the herd can live most naturally, having fresh air and green nutritious grasses all the year.

This is California's immense advantage, and cannot be overcome until stockmen

Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz:

GOMBALT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blemish. The safest best filler ever used. Taken the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or Cattle.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

Salt for Animals.

One of the old questions discussed by farmers from the time of which the memory of man runneth not back to the contrary is whether salt is essential to the health of farm animals. Prof. Shepperd of the North Dakota Station, has collected a number of facts which may be of interest to our readers. These are:

That carnivorous animals do not use salt, the reason being that they eat the blood with the food and the blood contains the amount of salt necessary for the system.

The esquimaux of Greenland do not use salt because they live mostly on seals and carefully plug up the wound when a seal is killed so as to prevent the loss of blood. The blood contains more salt than any other part of the body.

Among the North American Indians the hunting and fishing tribes did not use salt, and for the same reason, while the Indians practicing agriculture along the Mississippi and in Mexico were salt consumers and fought for the possession of the salt springs.

Herbivorous animals universally require salt, and will travel long distances for it. The reason, according to Prof. Shepperd is that the cereals and legumes upon which these animals live contain very little salt, but a large proportion of potash. Potash, or, more properly speaking, the salts or combinations of potash, drives out the sodium chloride, or common salt through the kidneys, and hence an addition of common salt must be given to supply the lack of it in the food. Blood, flesh and milk contain but little of these potash salts, hence the small need of salt when animals subsist on either of the above.

Men and animals living largely on rice as a substitute for potatoes use comparatively little salt, the reason being that rice contains but little of the salts of potash, and, therefore, there is not a demand among rice eaters for common salt, the potash having a tendency to drive the small amount of common salt in potatoes out of the system, and hence a surplus must be given. This is an important suggestion to our readers who have kidney trouble and who would likely be relieved considerably if they were to abandon the use of potatoes and substitute rice.

The conclusion drawn is that all animals that live on grains and grasses should be regularly salted. Salt given in excess acts as a sort of poison, creating violent purging, but given in small quantities is helpful to all men who do not live on a flesh diet and to all herbivorous animals.

A high-spirited, mettlesome horse is generally an animal capable of enduring much hard usage if it is only properly managed and controlled; but very often these animals are made more excitable than they really are by nature, by the bad judgment and fussiness of the driver.

The profitableness of stock raising and feeding lies, to a considerable extent, in the selection of the breeders and feeders. A farmer can afford to pay considerable more for well bred and square, compactly built animals for breeding purposes than for lank, lean scrubs.

In an experiment by an Illinois dairy the most profitable cow gave 8949 pounds of milk a year. This made 472 pounds of butter. The poorest cow gave 1482 pounds of milk, which made 68 pounds of butter. The net profit on the first was \$57.22; the loss on the second was \$17.83.

The flesh of the sheep partakes of the flavor of its food more than that of any other animal and for this reason care should be taken to feed the fattening sheep on such food as will have a tendency to make sweet and well-flavored mutton.

The Schmidt treatment for curing milk fever is very simple. Dissolve 120 grains of iodide of potassium in one quart of water which has been boiled and allowed to cool to the temperature of the body. Introduce the funnel and pipette into the ends of a rubber tube and place in a bucket of antiseptic fluid. Milk the udder dry, then place under the cow a piece of oilcloth about a yard square or a carriage storm apron will answer, so that the udder will be about the middle of the cloth. Wash the udder and teats thoroughly with castile soap and warm water, rinsing carefully with antiseptic fluid. Then insert the pipette into the end of a teat and fill the funnel with the iodide of potash solution. By passing successively from one teat to another distribute the solution equally. Rub the udder from the teat toward the body and massage thoroughly in order to distribute the solution throughout. Eight or ten hours after the injection, or when recovery is assured, the udder should be carefully milked out and then bathed with water at 160 degrees. A second injection is rarely necessary but if so it should be done at the end of six or eight hours.

None of the dairy breeds are coming to the front faster than the Holsteins and the Guernseys, says *American Cultivator*. These breeds are in the hands of men with ample resources and a thorough belief in the merits of their favorites backed by enterprising associations and special papers devoted wholly to the breeds. There is some little rivalry between the two, as well as with other breeds, as a result of various public tests and the different conclusions drawn therefrom. The Holsteins, with their relatives, the Dutch Belted, illustrate the Holland type of dairy cattle, while the Guernsey, Jerseys and Alderneys represent the Channel Island type. The general public is probably not far wrong in its impression that whatever may be said of individual specimens or strains the strong points of the typical Holland dairy cow are vigor, size and the quantity of milk product, while the representative Channel Island cow is famous for docility, beauty and rich, highly colored milk.

Theodore Pidcock, a farmer of Washington township, New Jersey, has just come into possession of what he says is the oldest plow in America. According to tradition the plow is 250 years old, having been brought over by the Dutch to New Amsterdam in 1654. It remained in one family, that of the Terriherrys of School-ey's Mountain, for 200 years and then was purchased at an auction sale by Jonathan Pidcock, father of the present owner. It is built on the same principle as the plows of today except it has a wooden mold-board and a wrought iron share. All the nuts have tall burrs on them for tightening and loosening with a hammer, for in old days there were no wrenches.

"Blood will tell" in breeding live stock of any kind. It goes without saying that sire and dam bred true to a certain type for several generations will, without much doubt, produce offspring true to their type; also, and for this reason, animals of well known breeding are much more valuable in the breeding flocks and herds than those of doubtful breeding, although of equal merit otherwise.

Nothing on the farm pays better than treating the colts so that they will develop into the most valuable animals that their peculiar formations will allow.

A well bred animal always shows its blood in its fine, glossy hair, and if any animal shows a departure from this rule, it is either out of health or something is wrong with its breeding. A fine, bright, sleek, clean-haired horse always has nerve, action and endurance, generally coupled with a nervous but gentle disposition.

It is a mistake to stock the pastures to their full capacity during the best part of the growing season and expect them to furnish a full supply of feed all through the summer.

STALLIONS
Surer

Home of
JAY BIRD

GENTS:

I have been feeding "International Stock Food" to Jay Bird, Baron Wilkes, Jr., and Scarlet Wilkes, and it has been a great help to them. Jay Bird made a season of 82 and "International Stock Food" made him a surer foal getter. W.A. BACON, Jr., "INTERNATIONAL STOCK FOOD" makes stallions surer and your mares will raise stronger and more vigorous colts. It makes colts grow very rapidly. It makes a delicate feeder eat heartily. It gives race horses more speed and endurance and keeps them healthy. Will you try it without advancing a cent? Write us at once and we will mail testimonials and full information.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed. It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—a FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free. Don't fail to read "ad." giving information concerning Campbell's Iodoform Gull Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

PATENTEES-MANUFACTURERS.

BROOKLYN, N.Y.

During the past ten months the United States has sold to foreign countries meats to the value of \$175,000,000 at prices which, according to statistics, have been high. A British authority points out that this does not look as though the American farmer is meeting with serious competition from any source whatever. He then goes on to state that the meat-making belt is identical with the corn-growing belt, and concludes that the only possible competitor the United States can have is the Argentine, where, he says, both corn and beef can be matured more cheaply than in America. As Argentina has been exporting a lot of corn to Europe, where it has undersold the American article, the feeding of corn-fat beef may yet be a leading industry in the South American republic.

One sometimes desires to tan a sheep pelt with the wool on. The following method has proven quite successful: Cleanse the wool thoroughly by washing the pelt in warm soapsuds, rinse well and soak for twenty-four hours in a solution of alum and salt eight ounces of each in enough warm water to cover the pelt. Drain well, stretch on a board until half dry, sprinkle the flesh side with equal parts of salt-peter and pulverized alum. Fold together and keep in a dry place for about eight or ten days, turn the pelt two or three times a day in order to get the alum and salt-peter equally upon all portions of the skin. When thoroughly dry, rub well with pumice stone, until it becomes soft and white. It may then be trimmed according to the use you wish to make of it.

Can we produce hens that will lay 200 eggs per annum? Suppose we start with a hen that lays 120 eggs. Some of her chicks should lay 150 eggs a year. From these pick out the best layers and so on until 200 eggs or better result. At the same time it is just as essential to breed males from prolific layers as it is the females. If we look after the breeding of the females only we will produce on the male side blood which is lacking in proficiency and thus check every attempt in progress. It is just as essential that the male should be from a hen which laid 175 eggs and from a male bred from a hen that laid as many.

By soaking feed for pigs there is always a slight advantage gained over feeding dry; but soaking it must not be understood that it should be fed in the form of a thin soup. Better results are obtained by simply adding enough water to wet the food and letting the pig go to a trough or stream and help itself to clean, fresh water.

A lamb is perhaps the most difficult of all animals to recuperate after it has once started down hill and the better plan is to keep thrifty.

In buying cattle for feeding it is essential to secure a hardy growing animal, one not difficult to keep in a good condition.

14. Special for Local Horses (Entries to this Race to close August 17th)

Nominators in any race that should fall to fill may, on June 15th, transfer their entry in such Race to any other of the above Classes that filled in which their horse was eligible on June 1, 1904.

N. B.—It is not the intention of the management to give any special races (except for local horses) at this meeting, and if you want to start your horses they must be entered in the regular advertised events.

CONDITIONS.

Entries to close Wednesday, June 1, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Board of Directors may be declared off.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent, except for 2 and 3 year olds, which will be divided 60, 30 and 10 per cent.

Five per cent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided, 66 2/3 per cent to the first and 33 1/3 per cent to the second.

A horse distancing the field shall be entitled to first and fourth moneys (in colt stakes first and third moneys); but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to change the honor or date of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Board of Directors reserve the right to start any heat after

APPLICATIONS FOR MEMBERSHIP.

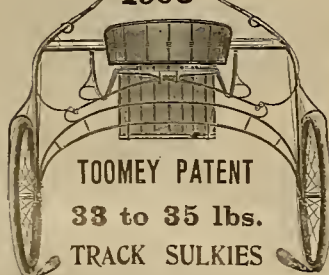

Persons desirous of making entries in these Stakes, and who have not as yet joined the P. C. T. H. B. A., should make application for membership to the Secretary by June 1, 1904.

AMERICAN OR KENTUCKY GAITED SADDLE HORSES

THE AMERICAN

SADDLE HORSE BREEDING FARM

has recently been established at San Diego, California
for the purpose of introducing the

Kentucky Type of Gaited Saddle Horse.

While our representative was in the East in search of
brood mares he found and purchased a few fine gaited
Mares and Geldings which were sent out with the
breeding stock. THESE ARE OFFERED FOR SALE
and several of them will be brought to

SAN FRANCISCO on MAY 25th

and will be exhibited at the stables of the San Francisco Riding Club, through the courtesy
of the manager, Mr. Edward S. Jones.

The American Saddle Horse Breeding Farm, American Park, Pacific Beach P. O. SAN DIEGO, CALIFORNIA.

Isn't He Worth Saving?

Why trade off or sell at a bargain price a good
horse just because he "goes lame," "throws a
curb" or develops some other blemish? There
is nothing in the way of Spavins, Curbs, Splints,
Windpuffs or Bunches which will not yield
readily and permanently to treatment with

**QUINN'S
OINTMENT.**

Dr. E. H. Havenport, a prominent physician of Sheridan, Ind.,
writes: "I have used a number of remedies for the removal of
curbs, splints, thickened tendons and tissues generally, but for
years I have not been without Quinn's Ointment. I have tested it thor-
oughly at different times, and say without hesitancy that it is the only reliable reme-
dy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or
sent by mail. Write us for
circulars, testimonials etc.

(Property of JOHN PARROTT, ESQ.)

Imp. Hackney Stallion

GREEN'S RUFUS 63 (4291)

Will serve a limited number of Approved Mares, Season 1904

FEE - - - \$75

Reductions made for two or more mares.

Manager, WALTER SEALY.

PETIGRU 2:10¹/₄

Son of Kingward by Onward (sire of 11 in 2:10) and Lemnade (dam of Bessie Wilton 2:09¹/₄, Petigru 2:10¹/₄, Lady Wilton 2:11¹/₄ and Lemonee 2:13¹/₄). PETIGRU'S record was made in a winning race of six heats. His dams for three generations are in the great broodmare list. For individuality and racehorse qualities he cannot be surpassed. FEE \$50.

CORONADO 2:18¹/₄

By the great McKinney 2:11¹/₄ (sire of 3 in 2:10 and 27 in 2:15); dam Johanna Treat (three-year-old trial 2:17) by Thos. Rysdyk; second dam by Venture, sire of dams of Directum 2:05¹/₄ and Sidney Dillon (sire of Loo Dillon 1:58¹/₄, world's champion trotter). CORONADO is one of the handsomest of the sons of McKinney. He won five races out of seven starts. FEE \$40.

SILVER COIN 2:11¹/₄

(Record made as a four-year-old in a winning race of five heats against aged horses. Sired by the great Steinway (sire of 4 in 2:10); dam, the fast race mare Jeany Mac 2:09 by McKinney 2:11¹/₄. SILVER COIN has every qualification for a great sire of speed. He has extreme speed, great gameness and endurance, and is a magnificent individual. FEE \$40.

Send for card containing tabulated pedigrees and full particulars of above Stallions. Address

W. G. DUFFEE, Bux 96, University P. O., Los Angeles, Cal.

SEARCHLIGHT 2:03¹/₄

Reg. No. 33657.

The Greatest Race Horse and the Fastest Stallion that was ever Owned or Stood for Public Service in California.

FEE \$75 FOR THE SEASON WITH RETURN PRIVILEGE

—AND—

LECCO 2:09³/₄ REG. No. 25885

One of the Handsomest, Fastest and Best Bred Stallions on the Pacific Coast. Has trotted a half in 1:00¹/₄. The only Stallion in the world whose dam has produced two trotters with records better than 2:10.

FEE \$50 FOR THE SEASON, with Return Privilege.

These two great Stallions will make the Season of 1904, February 1st to July 1st, at the

PLEASANTON RACE TRACK.

Best care given to mares. For terms, description, tabulated pedigrees, summaries of races of both horses and any other information address

ED MILLS, Pleasanton, Cal.

SIDNEY DILLON 23157

Sire of LOU DILLON 1:58¹/₄ (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06¹/₄ (the fastest mare of 1901), B. S. Dillon 2:10¹/₄ and Captivity 2:29¹/₄.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19¹/₄; dam Venus (dam of Adonis 2:11¹/₄, Leah 2:34¹/₄, Onpud 2:15 and Jono, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27¹/₄, sire of dam of Directum 2:05¹/₄. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$1 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm,

Santa Rosa, Cal.

Or IRA PIERCE, 728 Montgomery St., S. F.

NEERNUT 19810 Record 2:12¹/₄ (Sixth Heat 2:14)

Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09¹/₄ to 2:30. Neerut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neerut is by Albert W. 11333 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04¹/₄, MUCH BETTER 2:07¹/₄, DERRY PRINCESS 2:08¹/₄, DIABLO 2:09¹/₄, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasturage, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15¹/₄

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10¹/₄, Alta Vela 2:11¹/₄, etc., etc.); dam LULANEER (dam of Limonero 2:15¹/₄, Lion 2:19¹/₄) by Electioneer 125.

LIMONERO 2:15¹/₄, bred at the Pain Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15¹/₄ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. E. P., Baroo Dillon, Axinite and Futurity. LIMONERO 2:15¹/₄ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07³/₄

(Winner of \$11,450 in 1903) Will Make the Season of 1904, to a Limited Number Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS JUNE 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides. His dam, Mary Lou 2:17, beat a great race mare and own sister in the well known race horses slylock 2:15¹/₄ and Ned Winslow 2:12¹/₄. Mary Lou is by Tom Beaton out of Brown Jenny (dam of 3 to 1 list) by Dave Hill Jr., next dam by Black Hawk 766. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address
BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09¹/₄, champion 4 y. n. of 1903 (half mile 59¹/₄), OUR LADY (trial 2:20¹/₄), and full brother to JOHN A. McKERRON 2:04¹/₄ (the fastest trotter of the Wilkes family).

Season of Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16¹/₄, sire of John A. McKerron 2:04¹/₄, Who Is It 2:10¹/₄, Stanton Wilkes 2:10¹/₄, Glandius 2:13¹/₄, George B. 2:12¹/₄, Bob Ingersoll 2:14¹/₄, Tidal Wave 2:13¹/₄, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04¹/₄, Nearest 2:22¹/₄ and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05¹/₄, Direct 2:05¹/₄, Direction 2:10¹/₄, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462, sire of Echora 2:23¹/₄ (dam of Direct 2:05¹/₄) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:22¹/₄, sire of Our Dick 2:10¹/₄, Homestake 2:14¹/₄ and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15.3 hands and 1280 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season.

Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¹/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28¹/₄ (trial 2:23); The Bonnet (4 y. o. trial 2:17¹/₄); Majella 2:29 (4 y. o. trial 2:13¹/₄).

Sired by Sabie Wilkes 2:18, sire of 33 in 2:30. Dam, Fidelia (dam of Fidelite 2:28¹/₄, dam of Mary Celeste 2:17¹/₄) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Laocet, son of McCracken's Blackhawk. FEE \$50 for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¹/₄, James L. 2:09¹/₄, Edith 2:10, etc.); dam Woodflower (dam of Seylex 2:15¹/₄) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30¹/₄ (dam of Anita 2:18, Wildflower (3) 2:21 and 8 producing daughters) by St. Clair 1895. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had n shoe on is in training at Pleasanton and can beat 2:30 easily. FEE \$30 for the Season.

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

IDIRECT 2:12 1-2

(Officially Timed in Race in 2:08¹/₄)

SIRE, DIRECT 2:05¹/₄, sire of 54 in the list, including Directly 2:03¹/₄, Direct Hal 2:04¹/₄, Bonnie Direct 2:05¹/₄, Prince Direct 2:07, Direct Kelly 2:08¹/₄, Trilby Direct 2:08¹/₄, King Direct 2:09¹/₄, Ray Direct 2:10, etc.

DAM, FRANCISCA (dam of I Direct 2:12¹/₄, Sabie Frances 2:15¹/₄, Guyesca 2:26 and Earl Medium, sire of May Bud 2:18¹/₄, Tom Martio 2:14¹/₄, Kanawah Star 2:14¹/₄, Lucy Stokes 2:19¹/₄, Gonerril 2:24¹/₄, Pearl Medium 2:27, etc.) by Almost 33. Second dam, Frances Breckenridge (dam of Maximus 5:17¹/₂, sire of 3 in list) by Sentinel 2:30; third dam by Bayard 52; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by Imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E Streets, near Agricultural Park, Sacramento.

Fee \$50. I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

For cards containing tabulated pedigree and full particulars address

Or MARRY McMAHAN, Owner,

207 Sansome St., San Francisco.

PROF. H. B. FREEMAN, Manager,

19th and E Sts., Sacramento, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it, ex-champion three-year-old gelding of the world, reduced his record to 2:10½. John A. McKerron 2:04½ (2:12½ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Apply to or address

BONNIE DIRECT 2:05 1-4

Will serve a limited number of approved mares during the season of 1904. Fee \$100 for the season. The owners of BONNIE DIRECT have at the Pleasanton Track three two-year-olds from his first crop of colts, and three yearlings. These can be seen at any time.

BONNIE STEINWAY, 4 Y.O.

By STEINWAY 2:25½, dam BON BON 2:26 (dam of Bonnie Direct 2:05½, etc.), will serve a few mares during the season of 1904 at \$25 for the season.

Mares bred to either horse not proving to be with foal can be returned in 1905 free of charge, or service fee refunded, at option of owner of mare. Best of care taken of mares, but no responsibility assumed.

Full pedigree of either or both Stallions mailed on application.

C. L. GRIFFITH, Pleasanton, Cal.

SILVER BEE 2:27 3-4

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:20)

1st dam BELLE MC (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27½) by Ensign Goldust Jr.

2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18½ and 58 more in 2:30).

3d dam Thoroughbred Mare by imp. Trustee.

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

Fee: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grand-sire Robert McGregor sired that wonderful horse Orceus 1:52½, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

SEYMOUR WILKES REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12½ and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 707. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his got are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

9. 3-Year-Olds, 2-30 Class..... 500	18. 2-Year-Olds (Mile Heats 2 in 3)..... 400

The above Stakes Close Wednesday, June 1, 1904, when horses must be named and eligible.

Entrance due as follows: 3% June 1, 1904; 1% additional if not declared out before July 1, 1904; 1% additional if not declared out before July 20, 1904.

Declarations (to declare out) must be made in writing and will not be accepted unless accompanied by the amount due at the time the declaration is made.

NOTICE—Nominators have the privilege of naming two horses from the same stable or owned by the same person on one entrance fee.

N. B.—The program will be arranged as far as possible so that horses entered in several events will have an opportunity to start in each.

THE STANFORD-OCIDENT PACE.

For three-year old pacers that were originally entered in either the Stanford or Occident Stakes.

\$50 entrance and \$100 added by the State Agricultural Society for each starter over three and up to six.

Colts must be named June 1, 1904, and entrance money due and must be paid August 12th, as follows:

\$40 from those having made first payment, \$25 from those having made first and second payments, nothing from those having made first, second and third payments in the Occident Stake. \$45 from those having made first payment, \$40 from those having made first and second payments, \$30 from those having made first, second and third payments in the Stanford Stakes.

Only pacing colts having been entered in the Occident and Stanford Stakes of 1904 are eligible to this Stake.

SPECIAL CONDITIONS.

Five per cent of the amount of the stakes closing June 1st (except the Stanford-Occident Pace) will be deducted from money winners.

All races mile heats, three in five, except otherwise stated.

Moneys to be divided 50, 25, 15 and 10 per cent, unless otherwise specified in conditions.

All races to fill satisfactory to the Board of Directors or they may be declared off.

Distance in all heats 80 yards, but if the field is more than eight, 100 yards. A horse not winning, or making a dead heat in three, to be ruled out, but will retain his position in summary, except otherwise stated.

If there are less than four starters the Society may, if they so decide, allow them to contest for the entrance moneys only paid in, to be divided 60, 30 and 10 per cent.

Stakes are for the amount guaranteed—no more, no less.

When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the first and 33% per cent to the second.

A horse distancing the field will only be entitled to first and fourth moneys.

Hoppers barred in trots, but allowed in pacing races, except where otherwise stated.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

The Board of Directors reserve the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry. The right reserved to declare off or postpone any or all races on account of weather or other sufficient cause.

Racing colors should be claimed with entries, must be named by 5 P. M. on the day preceding the race, and must be worn on the track in all races. Colors will be registered in the order in which they are received, and if not named, or when colors conflict, drivers will be required to wear colors selected by the Secretary.

Drivers must weigh in by 12 o'clock noon day of race they are to drive.

The Board reserves the right to inflict penalties for non-compliance with the above conditions.

Cyberwise than herein specified, National Trotting Association (of which this Society is a member) rules to govern.

It is not intended to give any specials. If you want to start your horses or secure stalls enter in advertised races.

L. R. MILLER, Sec'y.

B. F. RUSH, President

NOTICE TO OWNERS AND TRAINERS.

SPECIAL.—Owing to the demand for stabling, the Society will only provide stalls for horses entered in races. Special stalls for horses shown for premiums.

It is not intended to give any specials. If you want to start your horses or secure stalls enter in advertised races.

STATE AGRICULTURAL SOCIETY.

STANFORD STAKE of 1906

TROTTING STAKE FOR FOALS OF 1903.

To be Trottled at the CALIFORNIA STATE FAIR of 1906.

Entries to Close Wednesday, June 1, 1904,

With L. R. MILLER, Sec., at the office in Sacramento.

Fifty dollars entrance, of which \$5 must accompany nomination, June 1, 1904; \$5 November 1, 1904; \$10 June 1, 1905; \$10 June 1, 1906, and \$20 on the tenth day before the first day of the State Fair of 1906. \$300 added by the Society. Mile heats, three in five, to harness.

The stakes and added money to be divided 50, 25, 15, and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66% per cent to the winner, and 33% per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell.

Your colt entered in the Occident Stake for 1906 is eligible for entry in this stake.

Remember the date of closing is Wednesday, June 1, 1904.

L. R. MILLER, Secretary.

HACKNEYS.

GREEN'S RUFUS.....The Baywood Stud, San Mateo

THE ANNUAL MEETING of the members of the Pacific Coast Trotting Horse Breeders Association will be held at the office of the association, 36 Geary street, San Francisco, on Monday evening, June 13th, for the purpose of electing a Board of Directors for the ensuing year, and the transaction of such other business as may come before the meeting. So reads a notice that has been sent out to the members of this organization. There is an earnest desire on the part of the present Board of Directors that the members of the association will on this occasion turn out in force and make the meeting a representative one. Harness racing in this State has been kept from dying out entirely this year, by the efforts of the officers of this organization, who have arranged for

two meetings to be held, and induced other associations to give meetings at places where the associations were inclined to make no effort as long as the State aid to district fairs was cut off. The horse owners and trainers have responded nobly with big entry lists to every meeting where purses have so far closed, and those to close June 1st also promise large lists. Harness racing is not dead on the Coast by any means, but that it is making such a good showing in California is due to the Breeders Association more than to anything else. However, the officers of that association would like the members to take a little more interest in the annual meetings than has been shown in recent years, and asks every member who can possibly afford the time to attend on Monday evening, June 13th. Several of the old members of the Board of Directors desire that their names be not again balloted for, as they cannot attend the meetings owing to a change in business or residence and new men in their places are absolutely necessary. Every member of the organization should be interested in the selection of the new board, and it is hoped there will be a large attendance.

MR. WILLIAM O'BRIEN MACDONOUGH of this city will have the sympathy of all true sportsmen in California over the loss of his great stallion Ormonde, purchased by him nearly twelve years ago at a cost of \$150,000. The fact that Ormonde, magnificent individual and great race horse though he was, proved almost impotent after his long sea voyages from England to South America and back, and thence to California, was a very severe loss to Mr. Macdonough, and was of course something that could not be foreseen. But for this Ormonde would have been a good investment at the price paid as at a service fee of \$1000 per mare, his book could have been filled for several years after his arrival in America. In fact Mr. Macdonough was offered \$30,000 in 1894 to breed thirty mares to Ormonde, but declined the offer. It is to be regretted that "the horse of a century" should have proven such a failure, although he has left progeny that will keep his name alive for generations to come in the stud. Mr. Macdonough has a magnificent son of Ormonde that is destined to be one of America's great sires with reasonable opportunities and we hope will yet realize all that had been planned for his sire by the gentleman who had the pluck to pay \$150,000 for what was considered at the time to be the greatest horse in the world.

A DOZEN SADDLE HORSES from American Park, San Diego, the farm recently established by Mr. A. G. Spalding & Son of Chicago, have reached this city and are offered for sale. They are all gaited horses and can be seen at the San Francisco Riding Club stables at Seventh avenue and C street. Much interest has been awakened among the devotees of horseback riding in San Francisco by the arrival of this consignment of saddle horses which are a fine average lot, several being magnificent individuals and trained to all the gaits.

WE ARE INDEBTED to Mr. Alfred Reeves, Secretary of the Road Drivers Association of New York, for one of the handsomely illustrated catalogues of the fifth annual speedway parade held in that city May 14th. We are also under obligations to Mr. W. Thordike of 17 West 103d street, New York, for a collection of fine photographs taken on the speedway during the parade and while the "brushes" were being held.

A Peculiar Case.

BUTCHERS' BOARD OF TRADE
SAN FRANCISCO, May 26, '04.

ED. BREEDER AND SPORTSMAN, Dear Sir:—A question has come up for decision in regard to the disqualification of the horse Krueger at the butchers' races at Oakland on the 18th of May. After the race had started the horse halted at the first turn and received assistance from two men, one of whom led him for a few yards until he again started straight; he won the heat, the judges disqualified him, placing him last. Was the decision right or wrong?

Yours respectfully,
B. L. FISHER, Race Track Committee,
By J. M. Gilbert, Secy.

The decision of the BREEDER AND SPORTSMAN is that the decision was wrong. There is no rule of the National Trotting Association (under which the races were advertised to be held) which will justify the judges in disqualifying Krueger in this race. At the start he had the outside position, and halted to the outside fence, where he was taken by the hit and turned straight when he again started although far behind the other horses. He outpaced them and won, and did not interfere with any other horse. The only precedent for a case of this kind that we know of was established at the races held by this same

organization last year, and strangely enough in a race where the same horse did almost the same thing. On that occasion Krueger bolted at the first turn, overturned his sulky and threw his driver and owner Mr. Consini, to the ground. The horse did not run, the sulky was righted and Mr. Consini remounted and drove after the other horses that were then an eighth of a mile in the lead. Krueger overhauled them, reached the wire first in 2:30, and was awarded the heat. The BREEDER AND SPORTSMAN stated at the time that this was a world's record inasmuch as it was the first time to our knowledge where a horse had paced a heat in 2:30 during which he had bolted, thrown his driver, and waited until the sulky could be righted and his driver again seated.

Vallejo Entries.

Seven of the ten races advertised for the Vallejo Race meeting have filled with a good list of entries. The 2:13 trot failed to fill, but as a few entries to this race were mailed too late, Manager Thos. Smith will probably reopen the stake to close about July 1st, with the hope of filling it then. Neither of the three-year-old stakes filled, but if those who have made entries are willing to go for a smaller purse, Mr. Smith will give them a chance to start their colts. As will be seen by the entries herewith, there is an excellent prospect for good contests and fast time at the Vallejo meeting this year:

2:24 class trot, \$1000—Sonoma Girl, Telephone, Harvey B., Talisman, Golden Gate, Lady Madison, Rita H., Jupiter B., Gertie H., Alcacista, T. C., D. E. Knight, Sadie Thompson, Little Babe, H. D. B., Princess W., Abe Miller, Morisco—18 entries.

2:30 class trot, \$500—Una K., Millbrae, Erosmont, Princess Belle, Harvey B., Husky, Talisman, Monocrat, Jupiter B., Mamie R., Little Bate, Princess W., Morisco, Galena—14 entries.

2:16 class trot, \$500—Red Skin, Louise Croner, Cuete, Verona, Ole, Hank, Rozell, Briney K., Cicero, Sutter, Ring Rose, Idlewood, Dollican—13 entries.

2:20 class pace, \$1000—Billy Red, Norda, Kid, Hattie Croner, Mildred O., Gertie A., Tom Carneal, Harold D., Tammany, Cavaliero, Henry N., Dr. J., Sunny Jim, The Mrs., Gigler, Dart, Rose Thorn, Venus Derby, Baby Ellis, Lady Petrina—20 entries.

Green class pace, \$500—Miss Idaho, Blackwood, Corset Maker, Dr. W., Cavalier, Flora G., Lady Shamrock, Dr. J., The Mrs., Ruby A., Rose Thorn, Venus Derby, Prince Almo—13 entries.

2:15 class pace, \$500—Tidal Wave, Clinwood, Harry Hurst, Alta Geneo, Rey del Diablo, Tammany, Gaff Topsail, Polka Dot, Edwin S.—9 entries.

2:10 class pace, \$600—Oma A., Daedalion, Dictatress, Cuckoo, Kelly Briggs, Polka Dot, Zolock, Highball, Edwin S., Alone, Topsy, Delphi, Fredericksburg—13 entries.

Detroit Driving Club Changes Dates to Week of July 25th.

At a meeting of the Board of Stewards of the Grand Circuit held recently in New York, it was agreed that the Detroit Driving Club could advance the date of their meeting from the week of July 18th to the week of July 25th. This change was brought about by the adverse legislation in Ohio, which resulted in necessitating the Cleveland Driving Park Association to abandon their intention of giving a Grand Circuit meeting on those dates. The horsemen in general urged the Detroit Driving Club to advance their meeting one week and take the Cleveland dates, thus closing up the gap in the Grand Circuit. They argued that this procedure would furnish an ideal circuit and instead of the horses laying idle one week, which is very expensive to the owner, an opportunity to earn money was offered. The appeal of the horsemen to change the dates was unanimous and President Daniel J. Campau and Secretary Snyder desire at all times to act in favor of any proposition which will benefit the horsemen in particular, and the trotting interest in general, they have agreed to accept the dates originally awarded to Cleveland, July 25, 26, 27, 28 and 29. Horsemen are requested to guide themselves accordingly and remember the change. By Detroit agreeing to move up one week, an ideal circuit is the result. Columbus will start the racing with the summer meeting week of July 11th. Windsor will follow the next week, July 18-22, and then the scene will shift to Detroit where the Grand Circuit will open and the busy season will be in full swing. By this arrangement horsemen will be able to give their horses two races before starting in racing in the big ring. Horsemen are certainly benefitted considerably by this plan, and should avail themselves of the opportunity offered to begin earning money with their horses.

Strike!—If they don't give you Jackson's Napa Soda when you ask for it.

JOTTINGS.

PACIFIC COAST HARNESS RACING will be of considerable class this year. The entry list received by the associations in California, Oregon and Washington for their early closing stakes show a big increase in numbers over the lists of last year, and I believe that on the average higher classes of horses have been named in nearly all the principal events. There were a few crackerjacks out last season—namely Geo G. 2:12½, among the aged trotters, and Almaden 2:22½, among the two-year-olds—but there were not so many likely 2:15 performers as have been developed on the training tracks this spring, and which promise to give a class to the Pacific Coast of 1904 that will make the season a memorable one. The list of entries received for the early closing stakes at Salem, North Yakima, Seattle and Walla Walla, which will be found on another page of this paper, show that the California horses will be well represented up north this year. The fact that the California State Fair will close one week before the Oregon State Fair at Salem opens, has resulted in swelling the Northern entry lists to much larger proportions than would have been the case had our State Fair not been advanced two weeks this year. This gives an idea of what could be done for harness racing on this Coast were a Pacific Coast Circuit organized. The North Pacific Circuit, which was organized last year by the associations in Oregon and Washington, has set an example which the California people interested in harness racing should follow. That organization selected Mr. Robert Leighton as Secretary of the circuit, and it was made part of his duties to visit the training tracks all along the coast, soliciting entries and giving horsemen information in regard to cost of shipment, track and hotel accommodations, and other things necessary for persons to know who contemplate racing on the associations' tracks. It has been suggested that California be taken into this circuit and it would be a very sensible and proper thing to do. As the northern season is so much later than ours, the circuit in this State could end with the State Fair during the first week in September, and from here all the big stables could ship direct to Salem as they will do this year, while a fall circuit of the smaller tracks in California could be arranged for the horses that were kept at home.

Six or seven of the leading towns in California would be sufficient to take into this main circuit. Los Angeles, Fresno, Pleasanton, San Jose, San Francisco, Santa Rosa, Woodland and the Sacramento State Fair would furnish eight weeks of racing, which would open the racing season at the first mentioned place early in July, or about the same time racing begins on the Grand Circuit over East. Such a circuit would put harness racing on a better basis than it has ever been on this Coast, and would be of vast benefit to the harness horse industry.

Dash races for good purses seem to be popular with the owners on this coast, judging from the entry lists received to the two stakes offered by the Seattle association for its September meeting. There are 26 entries to the mile and a half dash for 2:11 class pacers, and 17 entries to the two mile dash for 2:15 class trotters. \$1500 is the amount of each of these stakes. There has never been a time previous to this year when a stake for 2:11 class pacers would attract so many entries on this coast, and the conclusion is irresistible that there are more fast horses in training and to be raced on this coast this season than ever before.

The pool rooms are putting up a strong fight against the authorities in New York, and even though the Western Union Telegraph Company has experienced an eleventh hour repentance and refused to any longer furnish reports of the races, many of the pool rooms are doing business at the old stands. The two greatest enemies that horse breeding and legitimate racing have in this country are continuous meetings and the pool rooms. These are the principal causes of a very rapidly growing and strong sentiment against racing that has developed among the people in all parts of the country, and the sooner racing organizations recognize this fact the better for them and all concerned in legitimate racing. The New York Jockey Club realized the situation years ago, and with excellent tact and judgment has secured the enactment of a racing law in that State that has tended to elevate the sport and eliminate many of its bad features. The New York people hold that the professional gambling element must be kept in the background and never be permitted to dominate or direct the affairs of the associations in any way, and

that the wagering of money on races is only an incident and not the principal feature of the sport. This is the correct view to take of the situation and legislation that is not founded on that idea will not be successful. The fight of the New York authorities against the pool rooms will be a hard one, but with the aid of the New York Jockey Club's endorsement, and the maintaining of its present position by the Western Union Company, the fight will be won.

The withdrawal of so many of the California horses consigned to the Blue Ribbon Sale was a disappointment to breeders and owners out here on the Coast, as they expected to see several of them sold at long prices. Robizola 2:12½ consigned by J. W. Clark of Santa Rosa was considered the star of the sale, and I cannot but believe would have brought close to her value had she been put up. Mr. Geo. W. Ford's string of Neernuts also contained some real crackerjacks and it is not probable that they would have been sold at sacrificial prices had they been led into the auction ring. There was not a California horse sold that had been advertised or hooded to any great extent, and the fact that rain spoiled the Glenville track so that high speed could not be shown, placed the owners in a bad predicament, the idea prevailing that none but "shaw me" horses would bring good prices. The full report of the sale has not yet reached us, but judging from the first days sales the three hundred and odd horses sold during the week must have averaged about \$300 per head which is a good average for that many horses without any bright particular stars among them.

Having in mind the hard work that was necessary to make the managers of American racing associations give the Australian starting gate a trial even, and the immediate success of the machine and its almost universal adoption by these same associations after it was once tried, I am led to believe that the Australian totalisator will meet with the same endorsement if it can be once given a trial at some of the big tracks in this country. The bookmaking question is now causing a lot of trouble all over the country, and many States are legislating against racing for no other reason than bookmaking has brought the sport into disrepute. If the Cleveland Driving Club would unite with other racing organizations in Ohio, and advocate the passage of a bill permitting the use of the totalisator on race tracks in that State, giving two per cent of the profits to charity, and prohibiting all other systems of betting on races, I believe the people of the State would endorse, the Legislature pass and the Governor sign the bill. The totalisator has built up racing in Australia so that the purses and stakes are larger than under the old system, and there are no long continued meetings, but every race course has a prosperous few-days racing during the year.

The Horse Race and the Fair.

It is the custom of some people, says the *Breeders Gazette*, to rail unreservedly at the racing end of a fair, calling it all that is bad and attacking the management for fostering such a dangerous menace to the welfare of the young. Again the racing is classed with the objectionable mid way side-shows and chuck-a-luck games, which some fairs encourage for the sake of the revenue derived, and the result is that many, believing these writers without investigation for themselves, form an altogether wrong opinion as to the merits of harness racing as a sport and as an amusement and entertainment. It is also usually sought to show that at the greatest of the British and American shows there is no horse racing, but still the management of each makes money.

With the folk who hold such views relating to the race course on fair grounds there is generally no such thing as argument—assertation takes its place. But let us inquire briefly into the merits of the matter. To start with is there anything even objectionable per se to horse racing? There is not, let alone anything actually wrong. One reads every now and again of the cruel manner in which the horses are lashed in the heat of the struggle and the sufferings they must bear. Does any one for an instant think that a race horse does not love to race? Can a driver abuse a race horse and stay out on the circuit with him? Winning speed is never the product of hard usage. Instead of being ill-used race horses get the finest care imaginable. After a heat they are bathed in warm water and soothing liniment, rubbed dry, bandaged, watered carefully and judiciously given a bite of toothsome grain in order that there may be no gnawing at the stomach. When the race is over race horses are most carefully cooled off, for they get very warm indeed. It often takes till midnight to properly cool off a horse after a race. Not a particle of sweat or dirt is allowed to remain on the leg or

body, the purest and coolest water, the best of grain and hay are used and a bite of fresh green grass is always given the race horse out on the circuit every evening. Does care of this kind sound like cruelty?

Frame the picture of the good-gaited trotter rushing down the home stretch. His ears are laid back tight to his neck, his mouth is wide open as he strains at the bit and rein, every fiber of his body is strained to get ahead, to go faster. A more magnificent sight can hardly be imagined. The horse makes such a showing because he likes to go, his ancestors for generations have liked to go and his progeny will likewise like to go. But here comes a rival. More speed is necessary. Urging by voice and rein does not suffice and the driver draws his whip. Instantly perhaps the horse surges ahead, perhaps not, and the lash falls again with a sharp snapping sound. A few strides and the race is over. The judges having given permission to dismount the horse is led away to be cooled out and prepared for the next heat. His harness is whipped off in a moment. Examine his body. Is there any evidence of the cruelty of the whip? None. In ninety-nine cases not a single mark will be found. The most of the force of the blows was taken up by the shaft and the striking of it produced the snapping sound. A horse "cut all to pieces" with the whip in races would soon lose all courage and be worthless for racing.

American people are proud of the American trotter and pacer—the standard-bred, the National horse.

He is the envy of all foreign nations. He was originally developed at the unimportant fair and to this day the grand majority of all the horses which achieve greatness on the harness turf make their first starts at such meetings. To deprive the breeders of the opportunity to race at such fairs would be to do them a serious damage, to take from them that which is theirs by right. The trotting breed cannot be perpetuated in its highly improved and improving state without the aid of the track. On the track the chaff is winnowed from the grain. Actual test alone can guide us in the matter of speed. And as the great oak must grow from the little acorn so must the champion trotter graduate from the unimportant meeting. Regular racing meetings are when compared to racing meetings held in connection with fairs very scarce indeed.

Men who breed trotters as a main or a side issue must pay their taxes just as the men who breed Short-horn cattle or Berkshire swine. The latter require no track on which to develop their animals, the former do. Should the breeders of horses be deprived of their rights because these differ from the rights of others? Any management can keep its racing clean if it tries. That there are bad characters on the turf all know, but that is true also of every business and profession under the sun. Bookmaking in some states is not allowed at fair meetings. That is right. But that men will bet among themselves we all know and not more on horses racing than on various other sports and pastimes. And the people like the races. They throng the stand and shout for their favorites. They enjoy the sport thoroughly and not one in a thousand ever sees anything wrong in it or is harmed by it. Why then assail the races as a part of the fair?

Editor Neal of the *Western Horseman* writes as follows of the young California bred stallion which Mr. Sterling Holt, of Indianapolis, purchased from Ches. Durfee a year or so ago. The colt is now a four-year old. He is by McKinney, dam Twenty-third by Director 2:17, grandam Nettie Nutwood (dam of Hilledale 2:15) by Nutwood: "When we first saw the young stallion Sterling McKinney last year we thought he would develop into a grand looking stallion, but were of the opinion that he would not mature under six or seven years of age. But the improvement in his development the last year has been wonderful, and now, at four years of age, he is almost a model. In color, size, form and general conformation he is growing really grand and imposing, and Trainer James H. Hazleton, who is beginning to give him stiff jog work, declares that 'he is a trotter born.' He surely looks it."

W. W. Mendenhall has recently purchased from David Young of Stockton what he considers the best bred colt by Iran Alto ever foaled. It is a bay colt, two years old, and has been named Hannibal. The colt's dam is the well bred mare Alma Wilkeswood by Alcantare; second dam Emma Nutwood (dam of Lottery Ticket 2:21½ and Pilot Prince 2:22½, both producing sires) by Nutwood; third dam Lady Emma, one of the best and gamest of the early California trotters, by Black Hawk 7:67; fourth dam Newby Mare by the thirty-mile champion, Gen. Taylor; fifth dam Rosalie by Williamson's Belmont. Mr. Mendenhall also purchased of Mr. Young at the same time a bay gelding full brother to Nora McKinney 2:12½, that is a promising green horse. He only kept this horse a few days before he sold him at a profit.

Jackson's Napa Soda untangles the feet.

North Pacific Circuit Entries.

There should be great racing up north this year. The entries for stakes offered by the associations at Salem, Oregon, and North Yakima and Walla Walla, Washington, which we find in the *Rural Spirit*, show that nearly every stake has filled well. California is largely represented; in fact without the generous patronage of California horsemen the North Pacific associations would not have such splendid prospects for successful meetings. The Spokane entry list has not yet been received, but it is said that it has received 16 entries in the 2:10 pace, 23 in the 2:17 pace, 9 in the 2:25 pace, 9 in the three-year-old pace, 12 in the 2:20 trot and 10 in the 2:30 trot. The list will doubtless reach us next week. The 2:12 and 2:13 classes for trotters did not fill at Spokane, Walla Walla or Salem; neither did the three-year-old class for trotters fill, and all these classes will be reopened.

Robert Leighton, Secretary of the North Pacific circuit, deserves great credit for the manner in which he has handled the entry lists for the associations on the circuit. His visit to this State resulted in the number of California entries being about double what they would have been had he not called on the horsemen here. We should like to see Mr. Leighton made Secretary of a Pacific Coast Circuit that would take in California, Oregon and Washington.

Following are the entries made at Salem, North Yakima, Walla Walla and Seattle. The two stakes at the last named place are dashes, the trot one of two miles and pace one mile and a half:

OREGON STATE FAIR.

Greater Salem Stake, 2:15 Pacers \$2000.

L Hudson, blk m Monowhip by Woodman-unknown.
C P Webb, blk g Prince Tom by Tom V-Duroc Prince.
J L McCarthy, h g Cavalier by Welcome-Steinway.
Van De Vanter Stock Farm, b g Adamont by Altamont-Adirondack.

Robert Prior, h h Garven Wilkes by Bezant-Red Wilkes.

J G Morgan, hr m Chehalis Maid by Chehalis-Silas Wright.

James Erwin, b m Ollie M by Westfield-Caution.
Gus La Fontaine, b g Hassalo by Westfield-Altamont.

E J Dyer, b g Jack Wilmot by Doc Bunnell-Katherine W; blk h Merry Monarch by McKinney-Altamont.

N K West, b m Hallie Hinges by Pricemont-Antrim.
Robert Niles, ch m Derbertba by Charles Derby-Bertha.

M J Zahner, b m Maud W by Waldstein-Grand Moor.

S S Bailey, ch h Tidal Wave by Nutwood Wilkes-McKinney.

G L Taft, hr g Starkey by Chehalis-Oscelea Chief.
M K Thompson, hr h George D by Del Norte-Altamont.

William Walker, ch h Glengary Patchen by King Patchen-Juaneta.

L B Lindsey, h m Queen B by Count-Sagwa.

H W Goodall, h g Uncle John by Charles Derby-Balkan.

J D Springer, b g Billy Red by Glenelg-Ingraham.
Silva & Wright, b m Polka Dot by Mendocino-Antevolo; b m Economizer by Charles Derby-Echo.

E A Servis, ch g Edwin S by Dr Hicks-Laharp.
C H Thompson, h h Osmont by Altamont.

F R Garnsey, hr g Sunny Jim by Ketchum-Christ-mas.

Sanford & Donohue, b m Norda by Mercury-Brown Hal.

J H Vance, g g Henry N by Raymond-A W Richmond.

Marcia M Pender, blk m Annigita by Antrim-Blackwood.

E E Smith, ch h Prince Charles by Charles Derby-Dorlisby Memphis.

A W Wiley, b h Cavaliero by Stanton Wilkes-Electioneer.

Lewis and Clark, Stake for 2:17 Trotters, \$2000.

Thomas H Brents, h m Belladi by Chehalis-Caution; h m Helen Norte by Del Norte-Caution.

E J Dyer, h g Roy Benton by Benton Boy-Anteeo.
N K West, b h The Commonwealth by Shadeland Onward-Onward.

Robert Burress, b g Golden Gate by Bay Bird-Western.

S S Bailey, ch g Red Skin by Red Cloak-unknown.

J R Kennedy, ch m Lady Hare by Colonel Hare-unknown.

H C Ablers, br g Telephone by Direct-Philosopher.

J D Springer, br m Sonoma Girl by Linwood W.-Anteeo.

Silva & Wright, ch g Talisman by Steinway-Nutwood; h g M. J. by Bay Bird-Cornelius.

F R Garnsey, h m Alacita by Red Cloak-Alcazar.

S Siljan, hr m Bird Catcher by Direct-unknown.

W G Durfee, b g Briney K by Strathway-unknown.

Mrs Emily Ward, b m Lady Madison by James Madison-Nepew.

A C Froom, blk m Lady Jones by Captain Jones-Director.

J H Vance, g g Rozell by Bob Mason-A W Richmond.

Rural Spirit Stake, 2:11 Pacers, \$1000.

John Lance, ch g Sam Bowers by Joe Simpson-Hambletonian Mamhrino.

J B Turner, br g Vision by Vanquish-unknown.

E J Dyer, blk h Merry Monarch by McKinney-Altamont.

Charles W Welby, b h Yukon by Bay Bird-Algonia.

Woodland Farm Company, b g Buford by Wilkes-wood-Harkaway.

M B Lynch, b g Francisco by Caution-Antelope.

S S Bailey, h m Oma A by Dictatus-Director.

J Snyder, br h Jonesa Basler by Robert Basler-Hanford Medium.

Jesse Brown, h h Pathmark by Pathmont-Tybal.

L B Lindsey, h g Le Roi by Altamont-Ophir.

H W Goodall, h g Uncle John by Chas Derby-Balkan.

J D Springer, b h Billy Red by Glenelg-Ingraham.

Silva & Wright, b m Polka Dot by Mendocino-Antevolo; br g Kelly Briggs by Bayswater Wilkes-Algonia.

E A Servis, ch g Edwin S by Dr Hicks-Laharp.

Sanford & Donohue, hr h Zolock by McKinney-Gossiper.

W G Durfee, b h Silver Coin by Steinway-McKinney.

J H Vance, blk h Highball by Silkwood-Star Sultan.

Inland Empire Stake for Three-Year-Old Pacers, \$500.

William Hogoboom, h f Bessie R, by Francisco-Beduin.

Van De Vanter Stock Farm, br c Jules Redel by Westfield-Cour d'Alene.

A L Richardson, blk c Pbalto Norte by Del Norte-Blacksmith.

H C Davis, b c Sunny Jim by Ladis-Altamont.

J Merrill, h g Muggins by Erect-Buelah.

J R Kennedy, h m Meta Hail Cloud by Hail Cloud-unknown.

J E Reeves, h c Alto Lace by Lovelace-Altamont.

G J Rohse, ch g Free Love by Lovelace-Planter.

H H Holman, h f Lovelass by Lovelace-Rockwood.

John Green, Mamie C by Montana Director-Rosie C.

WASHINGTON STATE FAIR, NORTH YAKIMA.

Cooley-ku-l-tan Stake for 2:11 Pacers, \$1000.

John Lance, ch g Sam Bowers by Joe Simpson-Hambletonian Mamhrino.

J P Turner, br g Vision by Vanquish-unknown.

Charles W Welby, h h Yukon by Bay Bird-Algonia.

Woodland Farm Company, h g Buford by Wilkes-wood-Harkaway.

M B Lynch, b g Francisco by Caution-Antelope.

S S Bailey, b m Oma A by Dictatus-Director.

J Snyder, br h Jonesa Basler by Robert Basler-Hanford Medium.

Jesse Brown, b h Pathmark by Pathmont-Tybal.

L B Lindsey, h g Le Roi by Altamont-Ophir.

J D Springer, h h Billy Red by Glenelg-Ingraham.

Silva & Wright, h h Kelly Briggs by Bayswater Wilkes-Algonia.

Sanford & Donohue, br h Zolock by McKinney-Gossiper.

E J Dyer, br h Jack Wilmot by Dr. Bunnell-Katherine W.

N K West, h m Hallie Hinges by Pricemont-Antrim.

Robert Prior, h h Garven Wilkes by Bezant-Red Wilkes.

Gus La Fontaine, b g Hassalo by Westfield-Altamont.

James Erwin, h m Ollie M. by Westfield-Caution.

Van De Vanter Stock Farm, b g Adamont by Altamont-Adirondack.

J L McCarthy, hr g Cavalier by Welcome-Steinway.

M K Thompson, hr h George D. by Del Norte-Altamont.

A W Wiley, b h Cavaliero by Stanton Wilkes-Electioneer.

J H Vance, blk h Highball by Silkwood-Star Sultan.

Merchants' Stake for 2:11 Pacers, \$500.

John Lance, ch g Sam Bowers by Joe Simpson-Hambletonian Mamhrino.

J P Turner, hr g Vision by Vanquish-unknown.

E J Dyer, blk h Merry Monarch by McKinney-Altamont.

Charles W Welby, b h Yukon by Bay Bird-Algonia.

Woodland Farm Company, h g Buford by Wilkes-wood-Harkaway.

M B Lynch, b g Francisco by Caution-Antelope.

S S Bailey, b m Oma A by Dictatus-Director.

J Snyder, br h Jonesa Basler by Robert Basler-Hanford Medium.

Jesse Brown, b h Pathmark by Pathmont-Tybal.

L B Lindsey, h g Le Roi by Altamont-Ophir.

Silva & Wright, h m Polka Dot by Mendocino-Antevolo; hr g Kelly Briggs by Bayswater Wilkes-Algonia.

Sanford & Donohue, br h Zolock by McKinney-Gossiper.

J H Vance, blk h Highball by Silkwood-Star Sultan.

James Erwin, b m Ollie M by Westfield-Caution.

Gus La Fontaine, b g Hassalo by Westfield-Altamont.

Garden City Stake for 2:17 Trotters, \$1000.

Thomas H Brents, b m Belladi by Chehalis-Caution; h m Helen Norte by Del Norte-Caution.

E J Dyer, h g Roy Benton by Benton Boy-Anteeo.

N K West, b h The Commonwealth by Shadeland Onward-Onward.

Robert Burress, h g Golden Gate by Bay Bird-Western.

S S Bailey, ch g Red Skin by Red Cloak-unknown.

J R Kennedy, ch m Lady Hare by Colonel Hare-unknown.

J D Springer, hr m Sonoma Girl by Linwood W.-Anteeo.

Silva & Wright, ch g Talisman by Steinway-Nutwood; b g M J by Bay Bird-Cornelius.

W G Durfee, b g Briney K by Strathway-unknown.

Mrs Emily Ward, b m Lady Madison by James Madison-Nepew.

A C Froom, blk m Lady Jones by Captain Jones-Director.

J H Vance, g g Rozell by Bob Mason-A W Richmond.

J A Baddeley, br m Oveta by Caution-Gold in Grl.

WALLA WALLA FAIR.

Walla Walla Stake, for 2:15 Pacers, \$1000.

C P Webb, blk g Prince Tom by Tom V-Duroc Prince.

J L McCarthy, hr g Cavalier by Welcome-Steinway.

Van De Vanter Stock Farm, b g Adamont by Altamont-Adirondack.

Robert Prior, h h Garven Wilkes by Bezant-Red Wilkes.

James Erwin, b m Ollie M, by Westfield-Caution.

Gus La Fontaine, b g Hassalo by Westfield-Altamont.

E J Dyer, Spokane, b g Jack Wilmot by Dr Bunnell-Katherine W.

N K West, b m Hallie Hinges by Pricemont-Antrim.

Robert Niles, ch m Derbertba by Chas Derby-Bertha.

M J Zahner, h m Maud W by Waldstein-The Moor.

S S Bailey, ch h Tidal Wave by Nutwood Wilkes-McKinney.

M K Thompson, br h George D by Del Norte-Altamont.

L B Lindsey, b m Queen B by Count-Sagwa.

J D Springer, b g Billy Red by Glenelg-Ingraham.

Silva & Wright, b m Polka Dot by Mendocino-Antevolo; b m Economizer by Chas Derby-Echo.

C H Thompson, h h Osmont by Altamont.

Sanford & Donohue, h m Norda by Mercury-Brown Hal.

J H Vance, g g Henry N by Raymond-A W Richmond.

Marcia M Pender, blk m Annigita by Antrim-Blackwood.

E E Smith, ch h Prince Charles by Chas Derby-Dorlisby Memphis.

A W Wiley, h h Cavaliero by Stanton Wilkes-Electioneer.

SEATTLE MEETING.

Puget Sound Stakes, 2:11 Pacers, \$1500.

Tidal Wave, ch s, S S Bailey, Seattle.

Queen B, h m, L B Lindsey, Spokane.

Pathmark, b s, J Brown, Corvallis, Oregon.

Silver Coin, h s, W G Durfee, Los Angeles.

Ollie M, b m James Ervin, Walla Walla, Wash.

Mona Whip, blk m, L Hudson Lacy, Wash.

Cavalier, hr g, J L McCarthy, Portland, Ore.

Sam Bowers, ch g, John Lance, Cheney, Wash.

Merry Monarch, blk s, E J Dyer, Spokane.

Hassalo, hr g, G La Fontaine, Pendleton, Ore.

Le Roi, h g, L B Lindsey, Spokane.

Francisco, b g, Martin B Lynch, Walla Walla.

Garvin Wilkes, b h, Robert Prior, Tacoma.

Glencary Patchen, r h, P Ripplinger, Lander, B C.

Zolock, hr h, J Sanford, Los Angeles.

Jonesa Basler, br b, C T Snyder, Hanford, Cal.

Kelly Briggs, b g, Silva & Wright, Sacramento.

Billy Red, h g, J D Springer, Pleasanton.

Vision, hr g, J P Turner, Dayton, Wash.

Starkey, br g, G L Taft, Spokane.

Adimont, br g, Van De Vanter Stock Farm, Kent, Wash.

Yukon, h h, Chas. Welby, Portland, Ore.

Cavaliero, h h, A Wiley, Los Angeles.

Buford, h g, E J Lane, Everett, Wash.

Highball, blk g, J H Vance, Los Angeles.

Annigita, blk m, Mrs Marcia M Pender, Salem, Ore.

Northwestern Derby Stake, 2:15 Trotters, \$1500.

Telephone hr g, H C Ahler, San Francisco.

Red Skin ch g, S S Bailey, Seattle.

Belladi h m, Thomas Brents, Walla Walla, Wash.

Briney K. h g, H N Berry, Los Angeles, Calif.

Gyr Falcon h k s, E H Dwyer, Spokane.

St. Patrick c g, Oscar Hartnagel, Seattle.

Arketa g m, S Maddison, Vancouver, B. C.

Belle Storm g m, James McGuire, Victoria, B. C.

Lady Hare g m, J R Kennedy, Boise City.

Bird Catcher hr g, S J Siljan, San Jose.

M. J. h g, Silva & Wright, Sacramento.

Sonoma Girl hr m, J D Springer, Pleasanton.

Torreon, C H Thompson, Salt Lake.

The Commonwealth h b, N K West, La Grande, Ore.

Coronado, W G Durfee, Los Angeles.

Rozell gr g, J H Vance, Los Angeles.

Lady Jones bk m, A C Froom, Portland.

Another Entry in the Crowley Stake.

ED BREEDER AND SPORTSMAN:—I was much interested in Mr. T. J. Crowley's article in your last issue in regard to the Breeders Futurity No. 4. I think his suggestion a good one, and I hope the nominators to this stake will come forward and make it the most valuable stake in America. It would add greatly to the trotting industry of California. As for myself I answer, "Ready." I have an entry, namely, bay filly by that grand race horse and great young sire Stam B. 2:11 (I trust this will not get in the daily papers so my friend Sam Gamble reads it); first dam Elsie Downs by Boodle 2:12, second dam Linda Oak 2:18, by Guy Wilkes 2:15, etc.; this is a half sister to "Farmer" Bunch's good two-year-old Alto down and she is a beauty full of speed inheritance and racing qualities. Now, if Bro. Crowley will be magnanimous enough not to shut us all out in the first heat with his Monterey-Lottie Parks, I will make an effort for a place or show and that will do me. I hope the Breeders of California will fall in line. My twenty-five is up. Respectfully,

W. W. MENDENHALL.

W. H. Gocher has been re-elected secretary of the National Trotting Association for the ensuing two years. Headquarters of the National are in Hartford, Conn.

Death of Ormonde.

Ormonde, "the horse of a century," was put to death at the Menlo Stock Farm last Saturday. He had been attacked by paralysis and to keep him from suffering and end his life painlessly Mr. William O'Brien Macdonough ordered him put to death by the means above mentioned.

Ormonde was probably the best known horse in the world. He was bred by the Duke of Westminster, and was unbeaten as a race horse. He became a roarer, however, and the Duke sold him to Senor Bocau of Buenos Ayres. Ormonde left London for Buenos Ayres on the 1st of October, 1889. In 1891 and 1892 his son Orme was the champion colt of England and then began a rivalry between several wealthy breeders to possess Ormonde. Chas. Reed of Gallatin, Tenn, who had paid \$100,000 for St.

ORMONDE

Blaise, offered \$135,000 for Ormonde, but Mr. Macdonough of this State outbid him and the horse became his property. Dr. W. G. Ross was sent to South America to buy and bring the great horse to California and after taking him to England, buying ten mares and mating them with the stallion Ormonde was shipped to America and landed in California September 4, 1893. He proved a disappointment in the stud and left but a few foals. In England he had sired Orme, winner of the Derby that in turn sired Flying Fox, also winner of that great classic. Ormonde was a bay horse standing 16 hands and an inch. He was foaled in 1883, making him 21 years old at the time of his death. He was by Ben d'Or and his dam the great mare Lily Agnes. His total winnings on the turf were \$145,000.

Ormonde won three times at two years old, a Post Stakes, Brethly Stakes Course, with 124 lbs up; the Criterion Stakes, Criterion Course, 124 lbs, and the Dewhurst Plate, seven furlongs, with 125 lbs up, all at Newmarket. At three years old started ten times. At Newmarket, won the 2000 Guineas, Rowley Mile, 126 lbs up; Minting, second; Mephisto, third, and three others; won by two lengths. At Epsom, with 126 lbs, won the Epsom Derby, 1½ miles; The Bard, second; St. Mirin, third; nine ran; won by a length and a half. At Ascot, 126 lbs up, won the St. James Palace Stakes, mile, and the Hardwick Stake, Swinley Course, 120 lbs up; five started. At Doncaster, won the St. Leger, 1½ miles, with 126 lbs, beating six others. At Newmarket, with 130 lbs up, won the Great Foal Stakes, across the flat; four started. Same place, won the Newmarket St. Leger, with 134 lbs up. Same place, with 120 lbs up, won the Champion Stakes, across the flat; with two others behind him. Same place, won handicap, across the flat, 123 lbs up; with two behind him. Same place, walked over for a sweepstakes, The Bard and Melton paying forfeit. At four years old started three times, winning the Rouse Memorial, one mile, 134 lbs up, and the Hardwick Stakes, Swinley Course, with 136 lbs up, beating Minting, Bendigo and Phil, at Ascot. The last race of his career was for the Imperial Cup, six furlongs, Newmarket, which he won with 139 lbs up. In short, Ormonde won sixteen races during his three seasons on the turf, never met defeat, and his earnings were \$142,325, which have only been eclipsed by Donovan, who was winner of \$275,770.

A Chicago paper says: The sale last week at the Union stock yards, Chicago, demonstrated that the market for all kinds of horses was never in a better condition. The sale was unusual, in that it embraced not only speed horses, but carriage horses, good roadsters, saddlers and ponies, as well as breeding stock, and all were equally sought at profitable prices. It would be difficult to say just what class sold the best, so uniform was the demand. The 300 head sold, including the yearlings to aged horses, brought an average of \$225, a showing that, considering there were no really great stars included, was really remarkable. The sale company, considering the demand, have concluded to give a fall sale earlier than usual, and the next vendue will be held either the last week in September or the first week in October.

Parade and Matinee at Los Angeles.

[Los Angeles Times, May 23.]

Lovers of sport who attended the Driving Club matinee Saturday afternoon and returned unsatisfied were hard to find that night. Though the free treats given by the horsemen who compose that popular organization have almost invariably called forth big crowds and attained unqualified success, it was the desire of the directors to surpass all previous efforts in the closing meeting of the season and create a last good impression that would stay with the public all summer. How well the attempt succeeded may be guessed when it is said that not a seat in the big grand stand at Agricultural Park was empty at mid-afternoon. The crowd that came to see the horse show parade stayed to watch the races, and a majority did not depart until dinner time. The combination of horse show, polo, pony dashes, team, pacing and novelty racing left nothing to be desired, and the constant changing of attractions retained the interest of the spectators as no one kind of sport could have done, however good.

It being the occasion of the annual horse show society turned out in unusual force for even a Driving Club matinee. The "400" had set the official seal of its approval on the project and in accordance the elite participated with vigor. Los Angeles' most stylish turnouts were in line; the pick of the prize-winners were under saddle and to enliven the scene gay polo players and brightly-garbed little children, mounted on the tiniest of little ponies, threaded their way hack and forth.

After the parade was over the races were held and resulted in very close contests. The summaries follow:

First race, 2:25 pace. Laura G. h. m. (G. L. Pierce) 1 2 1
Robinson, h. g. W. Bordwell. (Gates) 2 1 2
Roy K. b. g. (C. G. Willis) 3 3 3
Time—2:29½, 2:25, 2:27.

Second race, 2:30 pace. Glen, ch. g. (G. A. Ponner) 2 1 1
Rondo, h. g. (J. H. Snowden) 1 3 2
Otto Z., h. g. J. S. Burns. (Gates) 3 2 3
Time—2:18½, 2:27.

Third race, half-mile dash, polo ponies: R. L. Bettner's blk g Chamate (M. E. Flowers.) won; W. E. Pedley's ch m Queen Rucker (T. D. Hudson, 155.) second; Thomas Weiss, Jr.'s br m Molite Murphy (M. G. Bomester, 155.) third. Time, 0:33½. Lady of Quality, ch m. H. Weiss (D. Edmonds, 125.) also ran.

Fourth race, 300-yard dash, polo ponies: W. E. Pedley's Little Joe (H. Wright.) won; F. D. Hudson's Oregon Jane (Hudson.) second; W. Wilson's Alice (W. Wilson.) third. Time, 0:13. Cyclops, Dr. J. A. Edmonds (D. Edmonds.) and Crescent, B. N. Smith, Jr. (Smith.) also ran.

Fifth race, Novelty, three-minute class, won by W. A. Glasscock with Gray Bess, time, 3:01½; Allan Hunter with Actor, second, 3:02½; Dr. William Dodge with Jimmie D., third, 2:55.

Sixth race, free for all pace, for cup. Toughnut h. g. (Dr. Bryson) 1 1
Billy K., h. g. (R. V. Cooke) 2 2
Time—2:17½, 2:27.

Seventh race, mile dash for teams: Jessie Del, h. m. and Ketchum, h. g. Boaz Duncan, won; Leota, blk m. and Prince Roy, gr g. R. Hynes and S. W. Lide, second; Lord Lovel, blk g. and Jingle, h. k. K. V. Redpath and Gen. H. G. Otis, third. Time, 3:14.

F. L. Howard, Secretary of the Central California Fair at Hanford writes that his association has taken October 10th to 15th as its dates for this year. The fair will be the best in the history of this successful association and the speed program larger and better than ever.

Decoration Day Racing.

A program of five races has been arranged for the joint meeting of the Golden Gate Park Driving Association and the San Francisco Driving Club to be held at Ingleside track on Monday next. One of the races will be a handicap in which the horses will be handicapped in distance by a committee made up of W. J. Simpson, John Holland and James O'Kane. This race will be from a standing start. All the other races will be two best heats in three, the winner of the first heat to be awarded first money and not to start in the second heat. The entries to the races are as follows:

First race—Joseph W. McTigue's Mike, A. Ardelson's Robin, T. Corcoran's Mission Boy, J. J. Donovan's Jim, Victor Verilhac's Little Victor.

Second race—F. W. Thompson's Ruth S., H. Schottler's Dynamite, J. Holland's Prince B., G. Lindauer's Homeway, Frank Schmitz's Dock.

Third race—J. Pastene's Billy F., S. Sprague's Clara L., James O'Kane's Sandow, M. M. Donnelly's Flora G., J. Doran's Della McCarthy.

Fourth race—E. A. Buck's Zulu Lass, E. Ferrari's Lulu S., H. Schottler's Lee Roy, F. Lauterwasser, Jr.'s Broomcorn, John Garrity's Harry B., John Lawlor's Gracie McKinney.

Fifth race—Victor Verilhac's Harry Hurst; H. H. Dunlap's King Cadenza, Dr. A. McLaughlin's Sable. The officials—Judges, John Lawlor, Elias Williams and Joseph Windrow; starter, T. J. Crowley; timers, Fred Vetter and L. E. Clawson; marshal, Thomas F. Bannan; assistant marshal, John Holland; secretaries, F. W. Thompson.

Answers to Correspondents.

W. T. MORTON, Oakland.—Kindly give me the breeding of Lady H. by Sidney, through the columns of your valuable paper.

Answer.—Lady H. bay mare foaled 1888, by Sidney, dam Sultana by Del Sur, grandam Madam Ferguson (dam of Sir Guy 2:28½) by Stormy John, a half-mile running horse of Lummock stock. Lady H. has a pacing record of 2:15.

WM. MEAD, Santa Monica.—Kindly give me in your next issue the breeding of the stallion Signal, his record and where owned.

Answer.—Signal 3327 sire of Prussian Maid 2:19 and others, was by Bunday's Roh Roy, son of Bennetts Roh Roy. His dam's pedigree was untraced. He was bred by William Walker, Racine, Wis., passed through several hands and was brought to California where he died in the early 70's. He had no standard record but was a trotter with considerable speed.

The auction sale of trotting bred horses from the Haggin ranch took place at Sacramento last Tuesday and drew a large crowd. Over a hundred horses were sold at an average of \$102 per head, which shows the market is in good condition as many of the animals were only halter broken, and some were young colts. The highest price was \$365 paid by Mr. F. E. Wright of Sacramento for a brown mare, five-years-old by Bay Bird, dam by Knight, second dam by Bellfounder #2. W. H. Sherburn of Sacramento was the auctioneer.

A Sunday Scene in Golden Gate Park

Notes and News.

ENTRIES CLOSE.

California State Fair Meeting..... June 1
Pleasanton..... June 1
Breeders Meeting Santa Rosa..... June 1
Stanford Stake..... June 1
See advertisements of all of above meetings in this paper.

Vallejo races filled well.

\$32,000 for Bingen 2:06½

Oregon and Washington entries are record breakers.

The Forbes Farm horses brought \$116,440, an average of \$1332 each.

Name your yearling in the Stanford Stake of 1906. Entries close next Wednesday.

King Willis 2:16½ by Bright Bell worked a nice mile in 2:12 at Pleasanton, last Saturday.

Woodshed 2:09½ died a few days ago. He was a son of J. R. Shedd 2:19½ and Triumph by McGregor Chief.

Nancy Hanks 2:04 only brought \$4000. She is eighteen years old, and is due to foal next month to Bingen.

The Salisbury string reached Empire City track in fine shape without a sick horse among the 26 in the two cars.

Lord Derby 2:05½ is reckoned the greatest money winning trotter in races. In three years he put \$74,825 to his credit.

'Dad' Trefry is nursing a sore hand. He tried to part two dogs that were fighting and was quite badly bitten by one of them.

Dr. Hammond, owner of the mare Blue Bells by San Diego, has given her foal of 1904 by Bert Logan the name Young Miss Logan.

Geo. W. Kingsbury has registered his yearling stallion by Daedalion out of Ada Owis by Silver Bow as Billy Edgeworth No. 39541.

Dan Leiginger will go to San Jose next week with a string of a half dozen trotters and pacers that he has in training, some of which will be raced this year.

It is announced that the wonderful campaigner Effie Powers 2:03½ will be raced again this season. She has won 221 heats in standard time, and is fourteen years old.

The Charter Oak \$10,000 stake received thirteen nominations this year. It is for 2:09 class trotters. East View Farm has taken a nomination probably for Judge Green 2:10½.

Don't miss entering at Pleasanton. See the big list of purses advertised in this issue. Pleasanton opens the circuit and entries to these purses close on Wednesday next, June 1st.

The Montana State Fair offers two \$2000 stakes this year. One is for 2:18 class trotters, the other for 2:18 class pacers. Entries close July 1st. The meeting will be at Helena in October.

Silva & Wright have twelve or fourteen horses in their string at Agricultural Park, Sacramento, headed by that good pacer Kelly Briggs 2:10½. They have several green horses that will be heard from in the races this year.

The proper thing to do is to enter your trotting yearlings in the Stanford Stake for 1906, entries for which close with Secretary Miller at Sacramento on Wednesday, June 1st. There are no substitutions in this stake, so your colt can't win unless he is entered. It will be a rich stake.

One of the best pacing prospects in California is the mare Star Bitters owned by Mr. T. E. Richardson of Sacramento. She is by Strathway, dam by Algona, and with what training her owner, who is an amateur, has been able to give her has been able to show a quarter in 30 seconds.

Mr. W. J. Dingee's mare Lucy Shaw by Cropsy's Nutwood foaled a healthy looking colt on the morning of May 25th that is by Sidney Dillon, sire of the world's champion trotter, and is expected to go out with the gong sounds for the Breeders Futurity of 1907 and draw down the big end of the purse.

Kinney Lou 2:07½ has been bred to about twenty-five mares so far this season and has quite a number hooked. Mr. Doble is highly pleased with the class of mares sent to his great horse and is confident that Kinney Lou will be a sire of extreme speed. He will race him next year and believes a mark of 2:03 is within his reach.

At the Vancouver, B. C., meeting held last week Mamie C., a daughter of Montana Director and Rosie C. (the dam of Prince Direct 2:07), won the three-minute trot in 2:47 for both heats. J. Green was the driver. This was considered very good time as the track is a rough half mile ring and it was the first time out for the filly.

Several horses were knocked out by being trotted over the Emeryville track at the Butchers' Day races. The track there is very hard on harness horses, although it is one of the best running tracks in the country.

The Breeders meeting at Santa Rosa will be one of the best meetings on the Coast circuit this year. Enter your horses and get some of the money in the big stakes. Entries close next Wednesday. Santa Rosa track is the fastest in the State and the crowds are always large there. Don't miss Santa Rosa.

Mr. George A. Mitchell of 323½ Seventh street, this city, is the proud owner of the yearling colt whose picture appears above. The colt is by Antrim, the sire of Anzella 2:06½, and is one of the kind that never tires and never quits acting devilish. Mr. Mitchell has great hopes of beating Anzella's record with this youngster when it has reached maturity, as it is good gaited and a natural trotter.

Lord Roberts bay colt, four years, old by Arion 2:07½, dam Nancy Hanks 2:04 brought \$4000 at the Forbes Farm sale. He was raced last year, starting four times, but did not get a record, although he got money in every race. He was in one race timed a mile in 2:13½, but was not quite fast enough to beat Sadie Mac and Ethel's Pride.

The joint meeting of the Golden Gate Park and the San Francisco Driving Clubs to be held at Ingleside track on Monday next, Decoration Day, will be for the benefit of the new athletic amphitheatre in Golden Gate Park. An excellent program of six races will be given, and as the admission is but twenty-five cents, there should be a very large attendance.

The annual meeting of the members of the Pacific Coast Trotting Horse Breeders Association will be held at the office of the association, 36 Geary street, San Francisco, on Monday, June 13, 1904, at 8 o'clock p. m., for the purpose of electing a board of directors for the ensuing year, and the transaction of such other business as may come before the meeting.

The Stanford Stake should receive a big list of entries when it closes on June 1st, Wednesday next. This is the last of the stakes for foals of last year and there will be no others offered for colts that are now yearlings except a few of small value. Every owner of a trotting bred foal of 1903 should send in an entry to Secretary L. R. Miller of the State Agricultural Society at Sacramento on or before Wednesday next.

Dan Leiginger, the well known trainer, this week sold for Prof. E. P. Heald, the mare Myrtle Thorne 2:18 by Grandissimo, to Mr. L. Barlow of Oakland. Myrtle Thorne has trotted many a good game race on the California Circuit, and is one of the best road mares that has been driven over the road in this city. She can be driven by anyone and her new owner is highly pleased with his new purchase.

Over \$13000 worth of stakes for harness horses have been offered by the State Agricultural Society for the State Fair races at Sacramento this year. Read the list in our advertising columns and enter liberally. The State Fair will be a big improvement over former fairs this year. More attention will be shown the harness horses than heretofore and they should respond liberally with entries which close on Wednesday next, June 1st.

There is a two-year-old pacer at Two Minute Farm in Ohio by Star Pointer 1:59½, dam Javelin 2:08½ that is said to be showing phenomenal speed. Javelin will be remembered as the fast pacing mare by Creole 2:15, dam Flash, the dam of four in the list by Egmont, that Ben Chaboya campaigned for Oakwood Park Stock Farm in 1895, giving her a three-year-old record of 2:13½ at Los Angeles that year. She was afterwards sold to eastern parties and reduced her record to 2:08½ as a five-year-old.

The two \$10,000 trotting stakes for horses of the 2:14 class offered by the Empire City and Brighton Beach tracks are the sort horsemen should patronize. They are guaranteed to be worth not less than \$10,000 and all money paid in over and above that amount will be added to the stake. Entries for these stakes close Thursday next, June 24. Send your entry to Alfred Reeves, Secretary, 390 Washington street New York. The advertisement of these stakes will be found in last week's BREEDER AND SPORTSMAN on page 15.

C. A. Harrison, formerly proprietor of the Hotel Roslyn at Los Angeles, is now proprietor of the Hotel Driad at Victoria, British Columbia. We recommend the Driad to the traveling public and especially to the horsemen of California and the East who may be visiting Victoria. Few men are more popular landlords than Mr. Harrison and there is no more enthusiastic amateur horseman in North America.

Several applications have been made to Secretary Kelley of the Breeders Association for nominations in the stakes to be trotted at the San Jose meeting. All having entries in any of those events, whose horses have gone wrong, or who do not expect to start, should notify Mr. Kelley and transfer their nominations. By so doing they will save being suspended and confer a favor on several parties who were unable to secure entries at the time the stakes closed.

By his half-mile in 1:01 at Pleasanton last week George G. 2:12½ has set all the tongues wagging again. Budd Doble drove him a quarter the other day in 31 seconds, having been invited to get up behind him by Mr. Albertson, his trainer. There is one universal opinion among the Pleasanton horsemen and that is that George G. could not be in more perfect condition than he now is. Mr. Albertson has three or four more in his string and they are all in good shape, showing that he is a most excellent care taker as well as a good conditioner and speed maker.

The Meek Estate will send about thirty head of yearlings, two and three year olds, by Welcome 2:10½ and William Harold 2:13½ to the auction ring on the 28th of June. The sale will be held by Fred H. Chase & Co. at the salesyard 1732 Market street, this city. The reputation of The Meek Estate for sending nothing to sales but animals of choice breeding and in good condition is well known, and these will all be just as represented. The Meek Estate is retiring from the breeding of trotting stock, having sold all its fine broodmares last September.

At the races held on Butchers Day at Emeryville a horse that started in a pacing race hoked to the outside fence and came to a stop while all the other contestants went on. The other horses were two or three distances ahead of the holer when some kind friends took him by the bit, led him from the fence and started him after the leaders. To the surprise of the ten thousand onlookers the horse showed wonderful speed, overhauled the others and finally reached the wire first, but to their greater surprise the heat was taken away from him on the ground that he was "assisted."

Notice the big advertisement in this issue of three early closing events for the Oakley Park Grand Circuit meeting at Cincinnati. Secretary Campbell writes us that the track is in the best possible condition. The heavy coating of fertilizer placed upon it last fall, together with the frost of the past winter has thoroughly annealed the new top dressing and left it firm and elastic. No faster or safer mile track will be encountered during the Grand Circuit meetings of 1904. The following stables are in training: Mr. Doug. Squires, Mr. Thomas H. Griffin, Mr. Joe Greer, Mr. John C. Warth, Mr. Clarence Penguely, Mr. John Ryland and Mr. Harry Verge. Mr. Scott Hudson of Lexington, Ky., has engaged stabling for twenty-five head to arrive June 1st.

The black gelding that Al McDonald sets behind in the above picture is the Zombro colt known as Peter, which, however, is only a stable name, as the cognomen which this trotter will start under in the races has not yet been selected. Peter was bred by Mr. M. A. Murphy, formerly of San Bernardino, and is one of the best gaited trotters that has shown up at Pleasanton this year. He has trotted a mile in 2:11½ and is a 2:10 horse just as certain as no accident befalls him.

One of the most magnificent individuals among California stallions is Tom Smith 2:13½, the horse whose picture adorns the front page of this issue of the BREEDER AND SPORTSMAN. Tom Smith took his record in a race at Denver last year and could have lowered it a second or two at the time according to his trainer and driver Mr. J. W. Zibble. Tom Smith is not only a grandly proportioned horse but he is bred in as strong producing lines as any horse in California, as his sire was the great McKinney 2:11½, leading sire of his age in the world, and his dam Daisy S. by McDonald Chief is the dam of four in the list and has two colts that can trot in 2:30 or better this year. Prof. E. P. Heald, the popular President of the Pacific Coast Trotting Horse Breeders Association, and member of the Pacific District Board of Appeals of the National Trotting Association, is the owner of this handsome horse.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

Last season Direct 2:05½ was bred to six mares with pacing records that average 2:07. He was bred to 17 mares whose records average 2:10.

Que Allen 2:09½, owned by M. H. Reardon, of Indianapolis, Ind., recently foaled a fine filly by McKinney 2:11½.

The International Stock Food stud has sixty broodmares; forty of them are producers of 2:30 speed and eight are 2:10 producers.

Angeline, the dam of Online 2:04, and Ontonian 2:07½, recently foaled a bay colt by Klatawah 2:05½, at the farm of J. G. Danforth & Son, Washington, Ill.

The pacing stallion Sidney Pointer 2:07½, was so severely injured by a kick from another horse recently that there is some doubt about its complete recovery.

Reports from Buffalo are to the effect that Secretary C. R. Bentley has arranged for an exhibition mile by Major Delmar 1:59½, against his wagon record of 2:03½, driven by Mr. Smathers. He also intends starring a 2:01 pace on his late-closing program.

The grand event of the spring trotting meeting, which opened at Vienna, Austria, May 1st, was the Anton Poschacher Prize, for three-year-olds, worth 12,000 kronen (about \$3000). It was won by Mr. Lacroix's colt Cadi by Caid 2:07½, out of Ernsie 2:14½ by Wilkes Boy 2:24½, who trotted the distance of 2675 meters (1 mile plus 1066 meters) in 4:13, almost an exact 2:30 clip.

Morning Star, trial last season 2:05, is in all of the pacing stakes and should be a sensation if a good actor. He is by Star Pointer 1:59½, dam by Egthorne 2:12½. McDonald paid close to \$9000 net for him and deserves to win. He will sell a lot of record horses at Boston this month, but rest assured he will have something to race. In the green trotter Baron Wedgewood, he has what many believe to be the season's kingpin green class trotter and one apt to duplicate the deeds of Billy Buck last season. Time alone will tell. He must meet some crackerjack trotters for there will be out such as Alexander, Stanley Dillon, Burrnut, Lord Roberts, Barada, Jolly Bachelor, and the veteran Salisbury has a few that probably will be fast enough to keep any trotter busy.

Trainer Eddie Lockwood secured a verdict for \$2213.10 in his suit against Edgar Bronk for breach of contract.

It is reported that Al Thomas has refused an offer of \$8000 for his three-year-old filly, Alta Axworthy 2:15½.

Bertie R. 2:12, whose European ringling tour to Adria is internationally famous, is now owned in Coatsville, Pa., and being used as a broodmare.

W. P. Murray's Italia 2:23½ by Zombro will probably be driven in the M & M., and thereafter down the circuit by Ben Kenney. She is being prepared for the season by Charles Tanner, but the latter has never coveted driving honors, and it is known that he has a warm spot in his heart for Ben, as well as abundant confidence in Ben's skill as a reinsman.

W. O. Foote, the Texas trainer, who was seriously injured in a railroad wreck last year, will be seen down the Grand Circuit this season. The man from the Lone Star State has discarded his crutches and is working his horses.

That it requires months and often years to develop great race horses is too evident to need mentioning, it would appear, yet there are a number of owners who still profess to believe that six weeks to two months is sufficient time to devote to preparing a green horse for racing. Not so long since it was stated of a Western colt that he had been in training only a few weeks, yet he was stepping miles in 2:30, and was expected to race well the coming season. Last year another Western colt started in a race after five weeks' track work, winning first money and a record of 2:25 pacing. How the "short-time" fellows howled as they heard of the performance! They still refer to the performance, but never mention the fact that this same colt started in four other races later in the season without so much as winning fourth money in either event. A careful preparation is necessary if successful race horses are expected, and if twelve months, or twenty-four months, is necessary, grant the trainer that length of time and do not worry.

It is said John Kelly will train a public stable in California next year.

Lord Derby 2:05½ and Billy Buch 2:07½ are reported to have gone wrong at Louisville.

There are twenty-nine entries to the Roger Williams stake for 2:12 trotters at Providence.

Alta McDonald claims that Major Delmar 1:59½ never was in as good condition as he is this spring.

A daughter of Chimes owned by Mr. Swigert of Muncie, Ind., has foaled a horse colt by McKinney.

An offer of \$7000 was refused by John Cockerell for Swift 2:07. It is reported that the offer came from J. D. Callery of Pittsburgh.

The trotting stallion Electro 2:29 by Electioneer 125 is dead. He was owned by H. J. Bennett, Magnolia, Ill., and was twenty years old.

The combined ages of Lady Ham and Jay Bird, when they were recently mated, was forty-five years. The produce will be a full brother or sister to Hawthorne 2:06½.

The well known actor, Johnny Ray, has four good prospects in Geo. W. Saunders' stable at Cleveland. They are Belle Sentinel by Bow Bells 2:19½, dam Sorrento, dam of four, by Grand Sentinel; King Ali, a three-year-old by Rex Americus 2:11½; a three-year-old by Bow Dean, son of Bow Bells 2:19½, and a green pacing mare by Acolyte. Mr. Ray will use all of these horses in the matinees.

Somebody who saw Fereno 2:05½ at Memphis recently was greatly impressed with her appearance and says she will prove a greater mare than ever this year. This daughter of Moko has been regularly raced since she was a three-year-old, and is sound as she was the day she was foaled. She took a record of 2:17 in her two-year-old form, and the following year reduced it to 2:10½. In her five-year-old form she trotted to a record of 2:07½ which she last year reduced to 2:05½. Ed Benyon has handled and trained this mare since she was broken to harness. It is generally believed that she will beat her record this year.

C. K. G. Billings last week rode the trotter Charlie Mac 2:07½ to saddle a mile in 2:22½, time for the last quarter being in 33½ seconds. Mr. Devereux has been using Charlie Mac to saddle and the chances are that the son of McKinney will be used to break the record for trotters under saddle.

Judge John T. Moore, one of the oldest jurists in the South, died in Marion, Ala., a short time ago. Judge Moore was the father of John Trotwood Moore, one of the most popular writers of Tennessee, editor of the Pacing Department in the *Horse Review*. Judge Moore served for twenty-eight years continuously as judge on the Circuit Bench in Alabama. He was attacked by sickness when hearing a case and died a few hours later.

At its meeting in New York the Board of Review of the National Trotting Association was formerly asked to interpret and construe Section 9, Rule 2, of the rules governing harness racing, and in response to the demand held that the said section cannot be suspended or modified by a member and that not more than one horse can be named on one payment. Heretofore it has been the custom with most secretaries to permit owners to name two or more horses on one payment and later elect which they would start. Hereafter if an owner desires to name two horses in one race he will be compelled to pay two entry fees.

At the combination sale held last week in the Dexter Park Pavilion at the Union Stock Yards, Chicago, good prices were paid for all desirable horses. Several horses sold for between \$950 and \$1000. A feature of the sale was that most of the best horses offered were taken on private account, the men who wished to use them being able apparently to offer more money for them than the professional dealers. Fanciers and dealers from many distant cities were on hand.

Secretary J. C. Simpson of the Iowa State Fair says that a very satisfactory list of entries has been received for the early closing purses which will be trotted and paced for at Des Moines this summer. A total of 150 nominations was received or an average of 25 in each event.

The fact that H. M. Hanna of Cleveland was elected one of the stewards of the Grand Circuit means, so Secretary Dietrich says, that Cleveland will retain its membership in the Grand Circuit in spite of the fact that it is probable that no meeting will be held there this year or next. The track will not be sold.

Pinchem Wilkes 2:07½ is judged to be just as fast as he was last year, when he showed a trial in about 2:04. The horse wintered well under Will Estes' care and is taking his preparation satisfactorily.

Chester Dare, the noted saddle stallion, twenty-two years old, died suddenly May 16 of indigestion, at the barn of his owner E. W. McCormack, near Shelbyville, Ky. He was the sire of the famous Gypsy Queen, which was sold as a three-year-old for \$3000. As a four-year-old Chester Dare won the saddle stallions' stakes at St. Louis. He was the sire of more premium saddle stallions and fancy roadsters and saddle horses than any other horse in Kentucky. He was valued at \$5000.

A good many of our exchanges are hewailing the fact that Governor Herrick's veto of the Chisholm bill has "sounded the death knell of racing in Ohio." We hope the situation in not as had as this, and we can not see that it should be. At the very worst all that the governor's veto has done is to leave the affairs in the condition that they were before interfered with in the state except in a few instances. The existing law has been ignored for years. Public sentiment has not demanded its enforcement, and its provisions have only occasionally been called into effect at the instance of some overzealous official like the mayor of Glenville, actuated either by motives of higntry or revenge — *Trotter and Pacer*.

BLUE RIBBON SALE.

Many California Horses Withdrawn on Account of Slow Bidding.

While the average prices obtained for the horses sold at the Blue Ribbon sale at Cleveland last week were good, the first horses offered were not bid on in a very lively manner and sold for small amounts. This caused two of the star consignments to the sale to be withdrawn—those of Millard Sanders and Geo. W. Ford of Santa Ana. Mr. Sanders' consignment consisted of Robizola 2:12½, Snap Shot, a good green trotter, and Happy Hooligan, a green pacer. Mr. Ford's horses were twelve in number, and all by Neernut 2:12½. There were several very fast green trotters among them, and Mr. Ford did not care to take the chance of having them sacrificed, so withdrew them from the sale.

During the day there were sold sixty-four lots of horses, including sixty-two single and two teams, for a total of \$24,005, an average of about \$385 a head for the animals.

The highest price of the day was \$2000 paid for Prince Direct 2:07, the little pacer formerly known as Freddie C. He was purchased by Mr. C. K. G. Billings, owner of Lou Dillon 1:58½, Sir Albert S. 2:03½ and many other fast ones. Only two other horses brought over \$1000 during the day—Baron De Shay 2:08½, consigned by M. E. Sturges, New York, which was purchased by Joseph Hubinger of Hartford, Ct., who will use him on the Grand Circuit this season, for \$1300, and Billy Foster Boy 2:11½, consigned by David Westwater, Columbus, O., this trotter being purchased by C. W. Frazier of Frazeyburg, O., for \$1800. He will probably be used on the Grand Circuit, the horse being entered in the 2:12 class trot at the Detroit blue ribbon meeting.

The California horses sold during the day were as follows:

Consignment from Charles S. Frost, Pasadena:
Miss Kinney, trotter, 1896, by McKinney—I. C. Cossack; Frank Cares, agent, Detroit, Mich. \$650
From Dr. C. Edgar Smith, Los Angeles:
Eagletta, pacer, 1898, by Ketchum-Lady Mack; John Jones, Cleveland, O. 500
From Dr. Le Moyne Wills, Los Angeles:
Bonnie Carlotta, pacer, 1899, by Conifer-Bonnie Elai; P. W. Grall, Bennett, Pa. 400
Cœur de Lion, pacer, 1895, by Gold Bell-Heffner Mare; Roddy Patterson, Glenville O. 500
From A. G. Shippee, Stockton:
Monica 2:17, pacer, 1895, by McKinney-Maggie Thorne; R. C. Hopkins, Glenville, O. 360
Castor, pacer, 1899, by Dictator Wilkes; J. W. Barrack, Barborton, O. 245
From J. C. Kirkpatrick, San Francisco:
Chow Chilla, trotter, 1901, by Teheran; W. Strangward. 240
From Palo Alto Farm, Menlo Park:
Dextermont, trotter, b g, 1900, by Dexter Prince-Wildmont; Jack McClew. 130
Nazette, trotter, b f, 1900, by Nazote-Mano; J. M. Foster, Allegheny, Pa. 100
On Wednesday, the second day of the sale, prices were a little better, Sonata 2:15, a seven-year-old trotting mare by Red Chute, going to the bid of John Hawley of Cleveland for \$3000, and the trotting mare Alfonso Maid 2:12½ by Alfonso bringing \$2500, C. M. Lytle of Pittsburg, Pa., being the buyer. Alula, the eight-year-old mare by Altivo, dam Lulu Wilkes, was sold for \$530. William Bentley of Parkersburg, W. Va., was the purchaser.

Concessions to Non-Winners.

[Frederick Watson in American Horse Breeder.]

It has long been an acknowledged drawback to the system of classifying harness horses by their records, that a horse once marked is marked for life, and oftentimes a record obtained is the means of forever putting a horse out of business as far as a money earner is concerned. To arrange some system that would do away with this drawback has long puzzled track managers and racing associations, and as a suggestion of a gentleman who is pretty well posted on the trotters, although not an active participant as a campaigner, seems to me to suggest a very good method for in part removing this system of "marked for life," I will submit it for the consideration of up-to-date track managers who are ready to adopt new ideas that will benefit the sport of harness racing, and give otherwise outclassed horses a chance to earn a dollar once in a while.

The idea is to give non-winners of a certain number of races, or parts of the money, concessions of one or more seconds in classification, somewhat on the following plan. For instance, supposing there is a 2:20 class for trotters open at a half-mile track meeting, the conditions might be made to read as follows:

2:20 class, trotting, purse \$500. Horses that have not won any part of the money in their last three starts over half-mile tracks this season allowed one second in classification, and for each race beyond the three races that they have not won any part of the money, allowed one second additional in classification, up to five seconds in all.

Under such conditions as these a horse that is eligible only to the 2:15 class would be allowed to enter and start in this 2:20 class, provided he had not won any part of the money in the last seven races in which he had started that season. The fact that he had failed to win any part of the money in that number of races in which he started in succession, shows that his record had outclassed him, that he was unable to win in his class, and so the concession of allowing him to go back and start in a 2:20 class gives him some chance to get in company where he has some chance of winning. Just as soon as he does win he has to go right back in his own original class, unless he strikes a meeting where the conditions are such that he is only penalized part of the way, as it were, and this he would hardly be likely to find, until these kind of condition races become very general indeed.

By making it conditional that the losing races should be over the same kind of a track, would prevent owners from losing three or more races over mile tracks for the purpose of getting concessions over half-mile tracks, and the conditions might be carried still further by making the time allowance subject to the amount of money offered in the various races, in which the horse desiring to claim allowance had competed and in which he had been beaten, thus preventing an owner from claiming allowance, when he shifted his horse from \$500 purse meetings to those where much smaller purses were offered, and therefore presumably a cheaper grade of horses were competing, in fact there is practically no limit to which these conditions might be made, and become of benefit to the owners of horses that had got marks that made it very hard for them to find a place where they could win a dollar.

Provision might even be made for horses losing their right to the full time allowance they were entitled to at the time of making their entries, by having won a part of the money between the time of making the entries and the time of the race. To cover this point they might be penalized one or more seconds according to the next nearest class to that to which they claimed the right to start, on account of having lost three or more races, and this provision duly arranged for in the conditions of the various events, so that even after the publication of the lists of entries it should be legal for the secretary to move a horse to a faster class if his winning a part of the money in a race between the time the entries closed and the time of the race in which he was first entered, changed his allowed time classification and record allowance.

Under such conditions no one could possibly be injured if the time allowances were not too freely made, for even the man who deliberately lost races to gain time allowance would find it a bad investment, as he would have to lose so many before he gained enough time allowance to give him any real advantage, and fraud of this class which might be tried might be still further protected against by making the conditions so read that only losing races counted, wherein the horse started in the class to which he was eligible by his record, so losing performances in races wherein he was accepting more or less time allowance would not count at all, and the horse would have to be beaten in his own class to gain any advantage of this time allowance.

By making the conditions read losing races of this

season only, it would compel every horse to show that he was outclassed "at the time" he claimed the time allowance, as his races of the previous year might have been in different company, and in races where the purses were larger, and the class of horses competing consequently of a higher grade, and this might also be provided against from a money grade standpoint, as suggested above. By making the provision that the losers claiming time allowance must not have any part of the money it absolutely bars the "second money" drivers from reaping any advantage, and makes the man who is actually entrance money out the only one who can obtain any benefit from the time concession.

There is absolutely nothing in the rules to prohibit the formation of races under these conditions, as the very conditions themselves made the horses with records faster than the class first indicated by the race eligible on account of non-winning performances, and if necessary all that can be printed in the public conditions of the race as follows:

The 2:20 class for trotters, excepting as follows: horses eligible to the 2:19 class that have not won any part of the money in their last three starts over tracks of the same character as that on which this event is to be trotted, and in which the purses have not been more than the amount offered for this race, will be allowed to start; horses eligible to the 2:18 class that have not won any part of the money in their last four races, under the same conditions as mentioned above, will be allowed to start; horses eligible to the 2:17 class that have not won any part of the money in their last five starts, under the same conditions as mentioned above, will be allowed to start; horses eligible to the 2:16 class that have not won any part of the money in their last six starts and horses eligible to the 2:15 class that have not won any part of the money in their last seven starts, under the same conditions as mentioned above, will be allowed to start. All of the above losing races referred to must have been competed in during the current season, and must have been in the respective classes to which the said horses were eligible by their respective records at the time.

Such conditions fully cover the case as far as eligibility to the class by their records is concerned, as it makes the race virtually one of six different classes all in one, and that there is nothing in the rules to prohibit this is shown by the combining of two different classes in one race, one for trotters and the other for pacers; so if it were allowable to combine two classes it is also allowable to combine six classes.

By adopting such conditions as suggested, it would open opportunities for horses that had obtained records that actually outclassed them, to resume the business of competing in races after they had proven, by being beaten in a specified number of races, that they were no longer able to compete successfully in the class to which their records only permitted them to start, and it would permit horses that had become outclassed through the natural deterioration of speed, due to increase of age, to get a race or two occasionally, wherein they did have some slight chance of getting a piece of the money. Furthermore, with such races in vogue, the dread of taking a record would be reduced, and many a horse might be sent for a heat that he would not otherwise be sent for on account of getting too fast a mark, and he would have to prove that the record actually did outclass him by being beaten in three or more consecutive races.

The benefit of these races would be demonstrated mostly in the latter end of the season, when horses had been raced enough to show in what class they really did belong, and the horses that had been driven to win the earlier races of the season, and had obtained records that proved effectual bars against their money earning capacity, would have a chance to earn their winter's keep in these races where time allowances were made.

More American Saddle Horses.

The American Saddle Horse is destined to become very popular in California and we are pleased to note that parties residing at Porterville, Tulare county, have recently imported to this State from Missouri eleven head of registered American saddle horses. The Porterville Enterprise says in regard to this importation:

Thanks to Dr. Hardeman the opportunity for raising good saddle stock will be given those who wish to take advantage of it, as he in conjunction with J. H. Williams and Sus Mitchell have invested in a carload of horses, all blooded and registered. The car contains eleven head, comprising three geldings, seven mares and one stallion. Two of them were purchased in Clinton, Henry county, Missouri; four at Sedalla, Pettis county; one at Pilot Grove, Cooper county; three at Higginville, Lafayette county; and one at Columbia, Boone county.

In talking with the doctor about the shipment he said they were as fine a lot of horses as were ever brought to this county. They are all thoroughly broken and go all the required saddle gaits, showy and very fancy stock.

The stallion Squirrel Rose is said to be the best bred horse in Missouri, stands sixteen hands high, weighs 1250 pounds, four white feet, star in forehead, dark mabogany bay, extra heavy mane and tail, goes all saddle gaits, and as a show horse has been shown nine times with seven firsts and two seconds. His pedigree is excellent. He was sired by Forrest Squirrel 801, World's Fair first premium three-year-old saddle Stallion, and he by the best sire of saddle and show horses in the world Black Squirrel 58, he by Black Eagle 74. Dam, Kittie Hughes by Cromwell 72, he by Washington Denmark 64, he by Gaines' Denmark 61, by Denmark, the foundation stallion of the Denmark family of horses. Second dam by Hughes' Edwin Forrest. Dam of Squirrel Rose was by Montrose 106.

In the shipment are two for J. H. Williams and two for Sus Mitchell of Visalia and the balance will be retained by Dr. Hardeman and J. H. Williams for the present. One of the mares for J. H. Williams, Montie Evans is what is called a high school mare, particularly well trained in all saddle gaits. It kneels for mounting or dismounting, has the Spanish trot, park walk, side trot, Spanish canter, rack, fox trot, and running walk. It is five years old and is from Clinton. She has won over \$650 in premiums and only beaten in show once. Those for Sus Mitchell are also very good, one of them being broken to drive as well as ride and also goes all the saddle gaits. It is 16.1 hands high and is very showy in harness and under saddle. The other is a fancy bay mare and goes all the saddle gaits, but is broken only to riding.

Space precludes the description of all the horses, but it goes without saying, they all compose a very fine bunch, and will be a credit to their owners and Tulare county.

A Horse's Wisdom.

[Lodi Herald]

A thoroughbred running horse owned by Mr. Dougherty and bearing the name of "Happy Hooligan" is being pastured at the ranch and his constant companion is a brown pacer. These two may always be seen together and are veritable chums. Where one goes the other will always be seen and as comrades, they evidently share each others joys and sorrows.

While browsing in the young vineyard a few days ago the young pacer, while enjoying a roll on the soft ground, got into a predicament by getting into a dead-furrow between the rows of vines on his back in such a manner that he could not roll over far enough to regain his feet. Time and again he made the attempt but to no avail. He was "ditched" in dead earnest and the outlook was rather "gloomy" for the pacer. There was no telling how long he would have to lay in that furrow on his back before human help would arrive. If the pacer had as good sense as his "side-kicker" he probably realized that he was in serious trouble, and no doubt was somewhat worried.

But help was near and from an unexpected source, for "Hooligan" had taken in the situation and had reasoned correctly that something must be done to relieve his partner. "Happy" was equal to the occasion and getting down on his knees by the side of his prostrate companion he succeeded after several attempts, by placing his breast against the body of the other, in rolling him over so he could get his feet to the ground and thus get up.

The witnesses of this incident do not claim to understand horse talk but they say from the actions of the pair afterward they judge the pacer was profuse in his thanks for the timely assistance, while "Hooligan" walked away with a "pray-don't-mention-it" air.

The Horse's Friend.

Many horse owners are indifferent to the needs of their faithful servants. When they neglect to provide Craft's Distemper Cure and keep it on hand as a preventive they stand in their own light. All who have used it have learned that it is money in their pockets, as it keeps the horse vigorous and immune from all germ diseases. This liquid cure is guaranteed by the manufacturer of money back if it fails. The reader should note the advertisement in our columns and consult his druggist or write direct to the manufacturer, the Wells Medicine Co., 13 Third street, Lafayette, Ind.

Suits have been filed in the Superior Court of Ventura county by the Donlon brothers and Henry Delancy, well known horsemen of Ventura, to recover \$2500 damages from the Southern Pacific Railway Company, which sum is alleged to be due them for the death of race horses in 1902. The horses were en route to the State Fair in Sacramento when a wreck occurred and two were killed. The better known of the horses was Charley D., belonging to the Donlon brothers. Delancy's horse was so badly injured as to be rendered useless for further use upon the track.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Conducted by J. X. De WITT.

Reports from Sonoma, Lake and Mendocino counties are that trout fishing is improving every day. The numerous streams are getting low and clear and fish are plentiful.

Bear Hunting in Lake County.

Sportsmen of this city who have a penchant for hunting big game do not always find it necessary to take long and expensive trips for indulgence in the excitement and sport of the chase, particularly when in quest of Bruin. In some sections of Lake county, for instance, both black and brown bears are numerous and predatory enough to make their presence exasperatingly felt by the ranchers and stock raisers of that region.

For some months past the herders of sheep who care for their flocks in the lowlands south of the Humming Bird mountains in Lake county have had much reason to feel chagrined because of the nightly visits of bears which scattered the bands, causing the herders no end of annoyance besides killing many valuable sheep.

Word reached Clyde Colwell, a noted bear-hunter who resides at Glenbrook, that both black and brown bears were causing trouble to sheep men, and with his father, who is responsible for the death of many a Lake county "varmint," a quick start was made for the mountains in question. A well-trained pack of dogs, which had been broken to hunt bear and cougar only, accompanied the hunters to the big mountains, and on the morning of the second day after the sportsmen had made camp the dogs were turned loose at the foot of a very steep and heavily timbered canyon by Colwell Jr. Young Colwell had previously ridden to a high and open point that commanded a good view of the surrounding country. The dogs had not covered much ground before "Old Nellie" gave tongue, and Colwell Sr., knowing what this meant, rode as fast as his horse could travel to a point of vantage. Before he had reached half way to the place where he had intended taking his stand every dog in the pack of eight was in full cry and traveling in the direction of the point where Colwell Jr. was on duty.

In relating the experience of the day Clyde Colwell said that, notwithstanding the fact that he had killed several bears and mountain lions, he never felt as interested in a hunt as he did on this occasion. "Such music from the pack I never heard before," he said, "and the smashing and crashing of the heavy brush was enough to stimulate the nerves of any old hunter. The dogs, especially the leader, were close up to their quarry, and you can imagine how I felt when the largest brown bear I had ever seen broke from the heavy brush into the open not fifty yards from where I stood. Bruin was followed by two six-months-old cubs. One shot immediately back of the shoulder, knocked the dam down, and, to make certain of my prize, I gave her a second, which ended her sheep-killing expeditions. The cubs 'treed' soon afterward and I found little difficulty in bowling them over. Father arrived just too late to be in at the killing. The old bear, which dressed 310 pounds, had been hunted several times, but invariably eluded her pursuers; but this time she courted death by refusing to leave her offspring. There are some other sheep-killing 'varmints' in those mountains which we propose to attend to this summer."

Fly-Casting Club Banquet.

The bi-monthly dinner and meeting of the San Francisco Fly-Casting Club at the California Hotel Tuesday evening was, as usual, a pleasant reunion of the anglers and their friends. Carlos G. Young presided as toastmaster, and during the session speeches and song enlivened the gathering.

Walter D. Mansfield, the retiring president of the club, was presented with an elegant testimonial emblematic of the esteem of his fellow-members for his unremitting zeal and efforts in behalf of the organization. The token was a beautiful silver and Bohemian glass pitcher and silver salver, both suitably engraved. The presentation was made by Alex T. Vogelsang in behalf of the club. Among the speakers during the evening were Chairman C. G. Young, Walter D. Mansfield, Alex T. Vogelsang, J. Homer Fritch, who graphically described pleasant angling experiences in Alaskan waters; W. W. Richards, who entertained the company with a description of the trout fishing possibilities of Rogue river, Oregon; W. C. Lawson, president of the Scotch Bowling Club; James Watt and others. J. Beatty sang several songs in an appreciative style that brought forth much applause. Reuben C. Haas, a well known local angler, was unanimously elected to membership. Early during the evening the chairman called attention to the absence of the late Herman Muller and after a brief and fitting eulogy a standing and silent toast was drunk in memoriam.

Among those present were Carlos G. Young, Dr. W. E. Brooks, J. C. Lawson, A. L. Coombs, J. Homer Fritch, J. A. S. Low, James Pendergast, J. Beatty, Dr. C. W. Hibbard, W. W. Richards, J. X. Dewitt, Charles H. Kewell, Walter D. Mansfield, J. Peltier, F. H. Raed, Fred J. Butler, Jr., Hon. J. M. Seawell, E. B. Sperry, A. Muller, J. S. Turner, M. J. Geary, Alex T. Vogelsang, James Watt, T. C. Kieruff and others.

Salmon are running in Monterey bay and have attracted the attention of a number of anglers during the past week. But, however is rather scarce; sardines costing the angler 25 cents per dozen.

Saving Black Bass.

Some years ago black bass were placed in a chain of ponds on the Del Paso Rancho, near Sacramento. The fish evidently found a congenial habitat for they have thriven prodigiously. Not only in the original locality have they multiplied, but in many other places in the Sacramento valley they can be found. The fish have from year to year been able to reach other waters by reason of the overflows in the spring. This spring the flood was unusually high and myriads of small fry were enabled to reach the shallows of the vast inland lake formed by the heavy rains and melted snows of but a few weeks ago. In other years the fish have also spread about until now they are quite plentiful in many places. As to size, we are informed by reliable authority, that some bass have been taken that weighed eight and nine pounds, incredible as this statement may appear. These fish put up a grand fight before being landed. Some of our anglers are inclined to look with indifference upon these transplanted bass, for the claimed reason that "they have

Possibilities of Bear Hunting in Lake County

no flavor." Of what particular weight this assertion may be we are not at present able to elucidate. But one thing we are certain about, of two wise fishermen who claimed to be experts on black bass flavor; they never saw, caught or ate a bass, if any at all, outside of their own native State. Of one or two other critics, we will say that it has been so many, many years since they tasted those famous Eastern black bass that they are disqualified by the statute of limitations. We have black bass now in many waters in our State, and the fish of certain localities are very well thought of; they are, we opine, all good, some of one locality may be better than those of another. The black bass of the Sacramento river are worthy of attention and protection.

The following taken from a Sacramento exchange is an exemplar of George W. Neale's enthusiasm in his calling and worth as a game officer:

"Game Warden George Neale of Sacramento county has made arrangements with the State Fish and Game Commissioners whereby they will give him a deputy to aid in seining out all of the deep pools left by the overflow in order to save the thousands of young black bass left in them when the water recedes."

The saving of these fish is considered by the game warden as one of the most important duties at this season of the year, and he makes a weekly inspection of the dozens of pools of standing water that are scattered through the brush along the Twelfth street road and across the American river in order to keep informed as to the depth of water and the size of the young fish.

At the present time the pools of water are spread over so much territory and the young fish are so minute that it is useless to attempt to do anything with them, but later on as the water recedes into deep pools the game warden and his assistant will clear away the brush and debris out of the pools and run a seine through them, placing all of the young fish in cans and convey them to permanent waters, where they will be planted for a future food supply.

In this work several hundred thousand healthy young fish are to be saved that would otherwise die as soon as all the water in the pools dry up. At the present time these inclosed waters are swarming with young fish, and Warden Neale expects to get all that is needed for local waters and as many as are required by the Fish Commissioners.

A day's trip with the official when he is making his rounds through the surrounding country is much sought for by those who are conversant with Mr. Neale's knowledge of localities, as he seemingly knows where every bunch of quail have their abiding place, where every gray squirrel has its home, and where every wild flower and native grass can be found in its perfection. He knows where the wild ducks nest, and, for that matter, where every other wild bird that affects his locality can be found, and can show one more bits of beautiful scenery than one would dream existed in the vicinity of the Capital City."

Striped bass are now being caught daily, with hood and line, at Black Point, Marin county. Some good catches have also been made recently at Greenbrae.

Striped bass anglers are still making good catches in the waters along the eastern shores of San Pablo bay.

DOINGS IN DOGDOM.

Mrs. Bradley-Dyde of Saturna, B. C., has had the misfortune to lose her sterling good Scottie Ch. Fighting Mac. Mac will be remembered by local fanciers, he won a first here—as did his kennel mate Scottie O'Brae, in 1900. He was a sire of winning progeny and met his end in a fight, not at all a bad way for a Dielhard to pass on. Scottish Jewel, one of his puppies, won second at New York. Mac was by Rsglan Bell-Seafield Nettle. We are glad to hear that Mac left a good litter behind him, we believe out of Scottie O'Brae.

Tuphills Judith and Tuphills James are two blue belton English Setters that were sent from England to T. P. McConnell of Victoria, B. C., last February. They are by Ammonite (Ch. Mallowd James-Electra) out of a bitch by Sir Bentinck-Countess of Richmond. Both dogs were winners on the recent W. K. L. circuit.

Count Rego, a lemon ticked dog owned by Mr. McConnell has been injured and it is now possible his bench career is over. He was beaten at San Jose and Los Angeles by Cole's Black Prince, but was sadly out of shape at the time.

A Santa Rosa correspondent writes: This city has the most up-to-date method of dispatching vagrant canines yet developed on the Coast. Recently an electric plant has been installed at the city pound, and dogs which fall into the hands of the pound-master and are not redeemed by their owners are quickly dispatched by means of the electric current. A small collar is attached to the dog's neck, and the batteries are then connected with this collar. When the switchboard is turned on a current of 2300 volts is given the dog. The method is painless, the victims simply falling to one side when the current is applied, and so quickly are their lives snuffed out that not a howl or groan escapes them.

Formerly the canines were placed in a large box and lowered into water and permitted to drown. Later they were shot by policemen, but the electric device has superseded these methods and is an institution that has come to stay. The plan of using an electric current to terminate the lives of the dogs was a suggestion from Poundmaster George Triplett, whose duty it was to see that they were put out of the way where their owners failed to pay the usual license for their pets.

All very good, and necessary for some useless curs, but just the same, we will state again that the execution of dogs is illegal. Dogs are personal property and a license for the maintenance of a canine pet, if not paid voluntarily can only be collected by civil process. Owners are responsible for their keeping and conduct of their dogs.

The present method and system of conducting dog pounds is a relic of barbarism and is open to the perpetration of abuses and fraud. When dog owners will combine and assert their prerogatives and insist upon the observance of their rights there will ensue a better condition of affairs all round—for owner and dog, and there will be a corresponding decrease in the visible supply of "yaller dorg."

At a recent meeting of the Executive Committee of the American Spnial Club, the following offer was made to the club by Mr. Howard Willets and accepted with thanks.

To give the sum of two hundred and fifty dollars to purchase five cups, at \$50 each, to be known as the "Gedney Farm Cups," and to be awarded under the following conditions:

One cup to be offered each year. This year's cup to be for the best two Cocker Spaniels born after January 1, 1902, bred by exhibitor; next year's cup to be for the best two Cocker Spaniels born after January 1, 1903, bred by exhibitor, and so on through five successive years.

The cups each year to be offered at at least three shows, to be determined by the Executive Committee. The cup to be awarded at the end of the year to the exhibitor having the greatest number of wins thereon. In case of a tie the cup to be put up at some show in the following year, to be determined by the Executive Committee, and former winners who are "tied" permitted to show for same. The winner at such show to be awarded the cup absolutely.

We beg to acknowledge the courtesy of Secretary Vredenburg in sending us Volume 20 of the A. K. C. Stud Book. The volume contains 1476 pages, an increase of 106 pages over volume 19 and listing 6595 registrations for 1903.

The Produce Stake of the Bull Terrier Breeders' Association has filled with twenty nominations. These nominations include a number of the best bitches in this country. Frank F. Dole has made a large entry, Mr. R. H. Elliott of Ottawa, Can., has four entries in whelp to Rudyard Kipling and Ch. Faultless, and Mr. Clair Foster has several bitches entered.

Mr. J. W. Pegg has written Mr. Clair Foster, secretary of the Bull Terrier Breeders' Association, expressing his satisfaction that his judging at New York in February has been looked upon as being of much assistance to breeders here and for the breed in general.

Spratts' "Commonsense of Dog Doctoring" says, rheumatism is rather common in dogs, especially amongst the sporting breeds that are exposed to all kinds of weather. The parts affected are sometimes hot and very tender to the touch. The treatment should be a warm kennel, a dose of purgative medicine and all parts of the body should be well rubbed with a liniment. Complete instruction on all fits of canines will be found in the handy little volume.

Coracle Fishing on the Towy.

Midland visitors to Welsh seaside resorts will have occasionally pertaken at dinner of a delicious pink-colored fish known as the sewin, a finny creature which seems to partake of the qualities of the salmon and the trout, but to be clearly identifiable with neither. It is a habitant of tidal rivers, and specially those of the Welsh Coast and one of the best fishing grounds, for it is the Towy, which, rising in the Black Mountains, meanders for about sixty miles of deeps and shallows through the counties of Brecon and Carmarthen, and empties itself in the sea about nine miles from the town of Carmarthen. Three or four dozen hardy men residing in this locality devote themselves during the proper season to the fishery, which is principally carried on at night, and with the aid of a frail, shallow boat known as the coracle.

There are comparatively few references to the sewin in books. In R. D. Blackmore's "Maid of Sker" we read: "Sewin are the very best fish I catch." In a book which was published in 1858 there appears, in a chapter concerning the county of Carmarthen, "In the Gwill, down to Abergwill and thence to its junction with the Towy, there is, I am informed, plenty of trout, and in the latter river one of the trout genus, called sewen or seuen. Holland thinks that these are the sea-trout or whiting of Scotland, and the white trout of England and Ireland. They are taken with a gaudy fly, weight from two to six pounds. He says they are more round and thicker than the salmon, and is of opinion that the Fordwich trout of the Stour, near Canterbury, are of the same species; but these latter trout seldom, if ever, it is said, take the same bait." It is true that the fish can be taken with a good fly, and they provide excellent sport; but they are now captured in far greater numbers by the drift-nets used by the coracle fishermen than by the wielder of the rod, and they are taken more easily at night and when the tide is on the ebb. It is then that the fishermen journey down the river from the town to the sea, in pairs, with their nets. The latter are arranged on the same principle as gill-nets except that they are allowed to drift with the ebbing tide instead of being secured to stakes. They are about 30ft. or 40ft. in length and are shot or paid out from the coracles in a straight line across the current, and are kept perpendicular by buoys along the top and leads at the bottom, while regulation from coracle at either end keeps the net travelling straight.

The coracle is a shallow boat of wickerwork, covered with tanned hides or canvas. It is used on many parts of the Irish Coast, where it is known as the curachan or curragh. C. Elton, in his "Origins of English History," remarks of the Southern Britons that "What little commerce they undertook was carried on in the frail curragh in which they were held enough to cross the Irish Sea." The Welsh coracle is usually a home-made article and so light that it can be carried with one hand or upon the back. It is practically an oval basket of ash and willow twigs covered with calico, oilcloth or hide, thickly tarred to render it waterproof and durable. The vessel is about 4 feet long by 3 feet wide, with a seat for one, and when loaded has but a very few inches of gunwale above the surface of the water. Having no keel, it is anything but stable, and the occupant has need to enter skillfully and to sit steadily. When once successfully placed and "manned," the coracle glides along beautifully. To propel it—or, rather to regulate its course—a paddle is used and this is also of ash. The writer has often heard of hairbreadth escapes from drowning resulting from an unwarrantable intrusion into these frail boats. The fishermen are practical men and know from experience when it is advisable to alter the position of the body in the boat, and how that alteration is to be properly effected. A false movement means precipitation into the water. To know how to accurately use the paddle is absolutely essential for safety. The conservators of the Towy fisher district grant a coracle licence for one net, two men, for £2 2s. 6d. for the season, extending from April to September. In these months the nets are busily plied, and the sewin are sold to dealers, who in turn dispose of them to the local gentry and middle class, a small number finding their way to the provincial markets, where they obtain a high price.

The advantages of having such a light boat as that above described are manifest to the fishermen, although they may not appear so to the general body of outsiders. The sewin is a wary fish, and if you would catch him, you must do so circumspectly. There must be no noise, not a whisper, no splashing of oars, nothing but perfect peace. As the fishermen moved down the river with the ebbing tide, there is the faint sound of the ripple of the smoothly-parted waters as the light fabric of hide and ash glides through them. Above the bluesky, and when the nets are free, the spirits of the silent fishermen soar among the starlets of the milky way. A bewildered sea-bird, its fine susceptibilities deeply touched by the approach of the sewin catchers, will frequently pass by, giving utterance to a long wail in resentment of this nocturnal intrusion. No mist hangs over the water meadows. The moonlight gleams on the rippling waters, and deep shadows presently chase the rare white beams beyond the hills. As the men are quietly carried down the river, the whistle of an otter calling to its cubs comes from the silent pool at the head just ahead. Now and again an owl, sailing on soft, slow wings, utters a weird cry. The corncrake in the grass gives a harsh cruel note. These are the voices that mingle with the gurgling of the waters as they travel gently down with the tide.

Suddenly the men are disturbed from their reverie. They realize that a fish is entangled and struggling for its life. Pressing gently forward they draw in to

one another, and in a twinkling a clean speckled beauty of four pounds is lying in the bottom of one of the boats. The men sit and admire him, puffing their pipes, and then with a smile they prepare for the next move, end onward once more. Ten minutes pass away, then another drawing in of the nets, and one grand fellow of perhaps three pounds is safely secured. And so they go on for half a dozen miles, and then they leave the river and wait for the first streak of dawn, when they make their way back to the town, following the hilly high road, and perhaps, pausing to pluck a handful of wild flowers for they know some one at home who will be glad to welcome them.

A tramp of a few miles, and then they choose a soft, grassy mound, and lay their "bag" thereon. A dozen fresh swim! None less than two pounds, and one grand fellow scaling four! Not at all bad. They long for other eyes to see them as they lie there—the eyes of the wife and children—for the fish mean money for the maintenance of the home. They hear the birds flooding the woods with song in the early morning. Pigeons coo from cottages. The starling descends his melancholy little scale when clinging to a chimney-pot or some lofty branch of a tree. Among the hawthorns in the hedge blackbirds and thrushes sing to their mates. Goldfinches and linnets fly from twig to twig. The men plod onward, and at last arrive at their thresholds, their legs stiff and weary, very hungry but their hearts full.

At evening again they stand by the side of the river, and look away to the valley over the distant hills—and beyond. They dream for a little space, then, picking up their coracles and nets, they again sally forth. The night perhaps is dark and sultry and the catch is disappointing. They fish to live but they love their work. Men may hunt and men may shoot, but they will seek the river and will fish. Year by year these men net by the Towy and walk back home. Summers may come and go, but the coracles will go on, loved and cherished even more than the birds and flowers so often seen. It must not be supposed that the sole requirements to success in the capture of the sewin are unlimited patience with some share of dexterity. This description may partly apply to the punt-fisherman in dirty water, and even to many trout and chub fishermen whose gaze is supposed to be equally divided between a gaudy float and a jar containing "Scotch" or other refreshment. The man who would capture the sewin must centre on the task all his faculties, and if he would excel must be fairly well endowed with physical strength and endurance. To sewin fishing in coracles a long apprenticeship has to be served, but the fishermen evidently take pleasure in their occupation, and their joy when successful is of the keenest. There is in these coraclemen a roving Celtic spirit that dislikes the confines of a well built street, but delights in the slowly moving river, the night netting, and the early morn.

Coming Events.

Rod.

April 1-Sept 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open

May 1-Sept. 1—Close season for shrimp.

June 11—Saturday Contest No. 7. Class Series, Stow lake, 2:30 P. M.

June 12—Sunday Contest No. 7. Class Series, Stow lake, 10 A. M.

July 1-Jan. 1—Open season for black bass

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

May 28, 29, 30—Northern California Blue Rock Tournament. Kimball and Upson grounds. Sacramento

May 29, 30—Pacific Trap Shooting Association. Blue rock tournament. Ingleside.

June 5—California Witz Club. Live birds. Ingleside.

June 5—College City Gun Club. Blue rocks. North Berkeley.

June 12—Union Gun Club. Blue rocks. Ingleside.

June 12—Empire Gun Club. Blue rocks. Alameda Point.

June 19—Golden Gate Gun Club. Blue rocks. Ingleside.

June 26—Millwood Gun Club. Blue rocks. Mill Valley.

July 1-Feb. 15—Dove season open.

Nov. 1-July 15—Deer season closed.

Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.

Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

June 3, 4—Ladies Kennel Association of Massachusetts. Braintree, Mass. Lelia M. Speed, Secretary.

June 11—Wissahickon Kennel Club. Wissahickon, Pa. J. Sergeant Price Jr., Secretary.

June 22, 23—Ladies Kennel Association of America. Minneapolis, L. I. Miss Gertrude De Coppel, Secretary, New York City.

June 25—Long Island Kennel Club. Brighton Beach Race Track, Coney Island. Jos. M. Dale, Secretary.

Sept. 12, 13—Newport Bench Show. Newport, R. I. F. M. Ware, Secretary.

Sept. 28, 29—Valley Fair Kennel Club. Initials show. Brattleboro, Vt. H. C. Rice, Secretary.

Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas Mortimer, Superintendent.

Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. W. K. L. Oct. 10—Brunswick Fur Club. Foxhound show. Barre, Mass. B. S. Turpin, Secretary.

Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.

Nov. 8, 11—World's Fair Dog Show, St. Louis, Mo. F. D. Coburn, Chief of L. S. Dept., St. Louis, Mo.

Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.

Nov. 22, 23—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Aug. 22—Nebraska Field Trials Association. 3d annual trials. O'Neill, Neb. M. H. McCarthy, Secretary.

Aug. 30—Iowa Field Trials Club. ———, S. D. George Cooper, Secretary, Des Moines, Ia.

Sept. 9—Manitoba Field Trials Club. 18th annual trials. Carman, Man. Eric Hamber, Secretary, Winnipeg, Man.

Oct. 31—Monongahela Field Trials Club. ———, A. C. Peterson, Secretary, Homestead, Pa.

Nov. 7—Independent Field Trials Club. 6th annual trials. ———, H. S. Humphrey, Secretary, Indianapolis, Ind.

Trade Notes.

Luverne, Minn., April 28th and 29th, C. B. Adams of Rockwell City, Iowa, high professional average, 358 out of 400, using "Infallible." First amateur average, W. S. Hoon of Jewell, Iowa, 361 out of 400, shooting "Infallible." Second amateur average, Russel Klein of Spirit Lake, Iowa, 351 out of 400, shooting Du Pont Smokeless. Third amateur average, S. A. Smith of Hartley, Iowa, 349 out of 400, shooting Du Pont Smokeless.

Franklin, Ohio, May 2d, C. A. Young of Springfield, Ohio, first general average, 193 out of 200. Second average, A. W. Kirby and C. F. Miller, 188 out of 200. Third average, Max E. Hensler of Battle Creek, Mich., 185 out of 200. All used Du Pont Smokeless.

Franklin, Ohio, May 3d, C. O. Le Compte of Eminence, Ky., 99 out of 103, shooting "Infallible," run of 92. Second average, H. N. Kirby, 83 out of 100, using Du Pont Smokeless.

Derry, Pa., May 3d and 4th, R. S. Deniker, shooting Du Pont, and Ed. Hickey, shooting "Infallible," first general average, 329 out of 350. Second average, L. B. Fleming, 327 out of 350, shooting Du Pont, May 2d, L. J. Squier, 165 out of 175, run of 93, shooting Du Pont.

St. Paul, Ind., May 4th, C. O. Le Compte, first general average, 141 out of 150, shooting "Infallible." Second average, Max E. Hensler, 140 out of 150, shooting "Infallible." First amateur average, Alonzo Harcourt, 127 out of 150, shooting "Infallible." Second amateur average, Dr. O. Britton, shooting "Infallible," and Du Pont, and George N. Kanouse, shooting Du Pont, 126 out of 150.

Nashville, Tenn., May 4th and 5th, Chas. G. Spencer of St. Louis, first general average, 332 out of 350, shooting Du Pont. John Fletcher of Birmingham, Ala., first amateur and second general average, 329 out of 350, run of 62, shooting Du Pont.

At the Golden Gate Gun Club Shoot, held at Ingleside on Sunday the 15th instant, there were 31 contestants shooting through the program. Out of the 31 contestants 23 used the Union Metallic Cartridge Company's "Magic" shells, 1 used the Union Metallic Cartridge Company's "Majestic" shells, 2 used the Union Metallic Cartridge Company's "Monarch" shells, 1 used the Union Metallic Cartridge Company's "Acme."

Mr. A. J. Webb was high average, breaking 143 out of 150 birds, making 95%, using the U. M. C. "Magic" shells. C. A. Haight and G. Sylvester tied on the second high average. Mr. Haight broke 70 out of 75 birds, making 93%, shooting the California Powder Works loaded shells, loaded in U. M. C. "Magic" shells.

The medals offered were won as follows: Championship class medals—First medal was won by C. A. Haight, second by Otto Feudner. Both shooting U. M. C. "Magic" shells. First class medals—First medal was won by E. Kleversahl, second by G. Sylvester. Mr. Kleversahl used U. M. C. "Majestic" shells and Du Pont powder. Second class medals—First medal was won by Mr. H. Kleversahl, second by Mr. J. Clark. Both gentlemen shooting U. M. C. "Majestic" shells.

There were some unusually good scores made at the College City Gun Club shoot held at Berkeley on Sunday, May 22, '04. Out of 26 participants, 24 used the Union Metallic Cartridge Company's "Magic" and "Acme" shells. There was but one straight run of 25, which was made by Mr. R. C. Reed, using a Remington shotgun and the U. M. C. "Magic" shells loaded by the Selby Company. Mr. Reed made an average of 93% for the day.

At the Millwood Gun Club shoot, held at Mill Valley, on Sunday, May 22, '04, there were 20 contestants, out of that number 17 used the Union Metallic Cartridge Company's shells "Magic," "Majestic" and "Monarch." The best score of the day was made by Mr. G. Frazer, breaking 23 out of 25 targets. He used the U. M. C. "Magic" shells loaded by the Selby Company.

Big doings in "the big State" are reported for Winchester "Leader" shells. At the Texas State Tournament, held in Houston, May 2, 3, 4, 5, 6, Edgar Nalle won the \$450 diamond medal, emblematic of the live bird championship of the State; F. K. Sterritt being second. The \$400 diamond medal, emblematic of the inanimate target championship of Texas, was won by F. M. Faurote; Dr. H. Hann being second. Needless to say the above quartet of shooters used Winchester "Leader" shells, and Mr. Faurote also shot a Winchester "pump" gun.

At the big Kansas State Shoot, held at Junction City, May 3, 4, 5, 6, "Old Reliable," Fred Gilbert captured the high average, shooting, as he always does, Winchester "Leader" shells.

At the South Side Gun Club shoot, which took place at Newark, N. J., April 30th, J. A. R. Elliott won the high average and L. W. Colquitt the State Cup. Both Mr. Elliott and Mr. Colquitt used Winchester "pump" guns and the "Leader" shells.

At Cordele, Ga., April 29th, Messrs. Spencer, Huff and Money won first, second and third expert high averages, and J. R. Marbury, D. Powell and S. Lloyd high amateur averages, all shooting Winchester "Leader" shells.

At Americus, Ga., April 28th, Messrs. Spencer and Money captured first and second high averages, shooting the "Leader" shells.

At Pocomoke City, Md., April 27th, J. M. Hawkin won first high expert average. He also captured the high average at Prospect Park, Baltimore, April 26th; Dr. F. Carruthers being second and Dr. W. Baker third, all using Winchester "Leader" shells.

At Greenville, Ohio, May 13th and 14th, R. L. Trimble won the high average using a Winchester "pump" gun and the "Leader" shell.

Mr. E. C. Griffith, who like many others uses the Winchester "Leader" shells exclusively, won the high average at the big Providence, R. I., tournament, which was held on May 7th, and came out on top again at the Narragansett Pier shoot of May 14th.

THE FARM.

How to Judge Beef Cattle.

No knowledge has greater value to the farmer than that which gives him the ability to select profitable feeding animals. The animal is a machine, and as there are great differences in different machines, so are there great differences in the efficiency of different animals. There are some beef animals that will consume corn, hay and grass and produce therefrom an unfinished carcass which will sell for five cents, live weight, on the market. There are other cattle fed on exactly the same kind of food for the same length of time that will bring from five and one-half to six cents per pound live weight. This difference is not altogether a difference of condition or fatness, but depends upon the conformation of the animal. The correct conformation which must be present in the better class of beef animals can be accurately described and can be learned by any farmer of average intelligence. The profitable feeding cattle that brings the high prices on the market all possess certain characteristics. They have a straight top line, with broad, deep bodies and short legs. If the head and legs were cut off, the remaining portion of the animal's body would resemble a box with rounded corners. Especially important evidences of good feeding ability are a clear, bright eye and broad forehead, with moderately short head and short thick neck, a well-sprung rib, strong loins and long, level rump. The whole animal should be smooth and evenly covered with thick flesh. A moderately large pannich on a healthy, vigorous steer should be regarded as a desirable indication. Moderately fine bone is also an indication of a good feeding quality. On the contrary, a coarse bone with long body, large head and general appearance of coarseness is always to be considered an undesirable characteristic. Cattle possessing the desirable characteristics mentioned above will fatten more quickly and will distribute their flesh on those portions of the body where the highest-priced cuts are located. It is impossible here to give all the information one will need in applying these principles.—F. B. Mumford.

The first baby born in the New Jerusalem at the World's Fair came about 10 o'clock Friday night, May 6th. It is a diminutive donkey colt, and its arrival caused a general rejoicing among the dark-skinned inhabitants of the reproduced Holy City. The residents of Jerusalem, to the number of nearly five hundred, had a big feast and dance in honor of the donkey baby, and with much pomp and ceremony christened the woolly-headed little animal "David." The jennet that bore the colt together with a big lot of donkeys and camels from Palestine, had arrived only a few hours before. The Jewish colony considers the arrival of the donkey a good omen, and the little beast will be treated as a mascot in the future. When the news was spread all the people in the 11-acre enclosure gathered in the triangle west of the Mosque of Omar, and the subject of a name was taken up immediately. As fast as they were suggested they were voted upon until the majority voted for the name it now bears. They all adjourned to the restaurant and sang and danced until a late hour. There are now 16 donkeys in Jerusalem and 17 camels, with the same number of attendants for each.

When any animal becomes hungry and is allowed to fret for food the process of fattening is retarded.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

New Method of Preserving Meat.

A German professor claims to have discovered a process for preserving meats that will revolutionize the packing industry, and go far toward solving the problem of supplying armies in the field. Public tests were held in Berlin recently, and a correspondent who was present thus describes the process:

"A young ox was slaughtered, skinned and disemhowed in the usual manner, contents of the head removed and feet cut off, so that only the carcass remained. After the blood had been allowed to flow out, Prof. Emmerich, discoverer of the process, injected his solution of acetic acid in the arteries and veins of the carcass, applying it in both upward and downward directions, using a funnel for the downward injections and an irrigator for the upward course. Then the acid having impregnated the flesh, was permitted to filter out, drop by drop, and the professor pronounced the meat 'preserved' and proof against heat, cold, age or varying climate conditions."

"For meat to be preserved for a short time, say two or three weeks," remarked Prof. Emmerich, "a weak solution of my acid preparation suffices. If the meat is to be kept from two to four months a stronger application is required and the carcass needs to be treated in the same way. The whole proceeding, as you have seen, is extremely simple, but needs to be watched, since there are certain tricks of manipulation, such as tying up of veins, that need to be applied."

"Meat so prepared has been shipped to Durban, South Africa, from German ports and found, after usual culinary preparation, to be delicious in flavor and quality. Another shipment was recently made to South America, retained there a fortnight and then reshipped to Germany. Notwithstanding the fact that the meat had been purposely placed near the boilers of the ship and had twice passed the equator it arrived there in perfect condition, the only difference from fresh meat being that the surface, which had been sprayed with acetic acid, had taken on a somewhat darker hue and had hardened superficially so that before eating, a thin slice from the outside had to be cut off."

Prof. Emmerich's process is said to be no more expensive than the simple process of dry-salting. It obviates, however, the costly necessity of refrigerating, while from a hygienic point of view it is pronounced by conservative German experts absolutely harmless.

Baron von Asch, Bavarian minister of war, in reporting upon the official experiments conducted in Munich, says: "Emmerich's process enables us to offer soldiers meat from sound, well-fed animals equaling in quality meat from entirely fresh slaughtering. It has the further advantage, from the standpoint of transport, of compelling us to carry many less cattle with a moving army, saving the time, space, labor and annoyance incident to caring for live stock on the march. It would seem to be possible, finally, to preserve for future use the meat of cattle which might be threatened by pestilence; if they are slaughtered immediately the danger of pestilence becomes apparent."

For years a great hubbub has been going on between the Holstein and Jersey breeders over the milk tests of their respective breeds. A Holstein breeder was boasting about the rich milk his cows were giving. The Jersey man said: "Friend, are you sure your cows are full-blooded Holsteins? I have a sure test for determining Holstein cows." The Holstein man wanted to know what his test was. He said "When you begin to milk put a silver dollar in the pail. If the milk is thin enough so that you can see the dollar when the pail is full you may be sure that you have a Holstein cow." The Holstein breeder replied that he had a test that never failed to detect a Jersey. "Put a silver dollar in the milk pail when you begin to milk, and if the

dollar is not covered when you are through you can be sure you have a Jersey cow."

"Montana can not retain its leadership as a wool and mutton producing State long unless conditions change," said a man from that country the other day. "The present prospect is that there will be a rapid decrease, as a large number of leading sheepmen are cutting out breeding. It is safe to estimate that at least forty per cent of the sheep breeding of Montana has been eliminated owing to the fact that it has been found unprofitable in consequences of losses by inclement weather during the lambing season and inability to secure competent help. Dry sheep can be run more economically and do better on poor range. We have found it more profitable to buy sheep than raise them. Like the cattlemen, we will from now on be compelled to look to other States for stock to replenish the range."

Dried leg of mutton makes a very palatable dish. Legs from well-fed sheep only should be cured. A good method of curing is as follows: Wipe with damp cloth and dry with a clean towel. To each leg of about ten pounds allow a half pound of brown sugar, one pound salt, and one ounce of saltpeter. Mix while holding the vessel over a kettle of hot water. Put legs on a draining board and rub thoroughly with this mixture each day for three days. Then rub in like manner with a mixture of one-half pound brown salt and one ounce of ground cloves. Before applying, the mixture should be warmed. Put legs in tub and for two weeks turn and haste several times with liquid that forms. After this treat them as pork hams by smoking, drying, etc.—*American Sheep Breeder*.

The Arizona supreme court has decided that users have a right to water without either purchasing or renting a license to buy from the canal companies. The court holds that a canal company is a quasi-public servant and therefore can not arbitrarily discontinue service in whole or in part and must deliver water to everybody so long as it delivers water to other non-stockholders or water-right owners. The court holds that once supplied, the right can not be taken away from a claimant, although he can forfeit such right by refusing to purchase the water.

The contract for butter for the United States Navy Department is divided this year between James Rowland & Co., New York, and Swift & Co., Chicago, each furnishing 250,000 pounds. Swift & Co.'s price is 25.45 cents per pound, James Rowland & Co.'s 27.2 cents. The specifications call for fresh butter made between May 15th and July 1st, made from pasteurized cream packed in three-pound tin cans, with not to exceed 13 percent water and 3 per cent salt, no preservative to be used. The tins must be packed in wooden boxes holding 24 cans each.

On February 15th of this year, at Chicago, the highest price for cattle was \$5.85 per 100 pounds for 15 head of Aberdeen-Angus steers averaging 1588 pounds. On the same market, 15 head of plain good cattle, just as fat as the others, averaging 1536 pounds, sold at \$5 per 100 pounds. Allowing both bunches to be of the same weight, for the purpose of doing the fair thing between them, the difference in value was \$13.05 per head in favor of the high bred cattle in market.

Following is a quotation published in a Chicago daily, hearing on the condition of the beef trade: "Notwithstanding the recent liberal receipts of cattle, packers find it impossible to keep pace with the extraordinary demand. The manager of the beef department of one of the largest dressed beef companies in the business told us this week that it was absolutely

impossible to keep any beef in the coolers. He said cattle killed Monday were already shipped out. In years past they had been able to keep two or three weeks' stock of beef ahead, but he said it was impossible to do it this year. He said there in no telling what would happen if cattle receipts some time should fall under expectations instead of always being in excess of their anticipations. It is such views as these given on absolutely reliable authority that makes one feel that there is a good time coming in the cattle market."

More eggs can be hatched, or rather a greater percentage will hatch, in the incubator than under the hen if the incubator works well and has good attention, but the average farmer succeeds far best with the hen. We do not say this because incubator men do not advertise with us, but because it is a fact. The incubator is a scientific success but it can be relied on to work absolutely automatically. It requires a whole lot of attention. The hen requires attention in the way of clean nests, freedom from vermin, food and water, but it is not half the trouble to care for the hen as it is an incubator. But of course the hen hatches but few chicks while the incubator should hatch a big covey. Attention is the watchword of success in any business.

The Experiment Station record describes a test made in Italy of the vaccination of 301 cattle against blackleg, only one of which died from the disease. Of the 28 other cattle not so vaccinated, five died. In other instances 3621 cattle were vaccinated, only eight dying. The black-leg vaccination which has been conducted under the Department's direction in the United States have also proven the method to be almost a certain remedy for the disease.

Don't let your ranch work get you where you cannot take an hour or a day off occasionally for recreation and visiting. It is often a very good investment of time to take a trip around your section and see how crops look and whether any of your neighbors have better methods than yours. An exchange of ideas among men who have ideas is always profitable to one and often to both.

Plenty of clean, fresh water costs little, provided conveniences for supplying it are at hand. Hens require a great deal of water in proportion to their weight, probably more than any other farm animal. Much suffering is caused by an insufficient or a foul supply of water. It should not be given once a day, but should be continually before them in clean, wholesome fountains, conveniently placed.

Warranted to Give Satisfaction.

Gombault's
Caustic Balsam

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Swollen, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. \$2.50 sent for descriptive circular, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

Alfalfa and Cows.

The California Promotion Committee has received the following instructive letter from Mrs. May C. Gammon of Lodi. Mrs. Gammon has engaged in diversified farming with success:

"Yours of recent date at hand and contents noted. In the first place, you ask what I think of farming in California, as compared with Eastern farming. I would not like to attempt to farm in a country where one has to raise enough in three or four months to feed himself and stock eight or nine months.

On my farm I have some 1500 almond trees, which have just come to an age when they pay. I believe, with good care and plenty of fertilizing of soil, almonds are a paying crop. My main business is alfalfa and cows. I get five good crops of alfalfa, and usually a sixth crop that is smaller. Then I have a pasture to about Christmas which is a good saving of feed. There is something satisfactory about alfalfa raising. One can see it grow, and it makes one feel prosperous. It is claimed one acre, if cut and fed, will keep two cows the year around. I feed my cows rather more than many, and so have not been able to make one acre do for two cows. If a man has a few acres of alfalfa, a few cows and energy to keep at it, and intelligence to read and keep abreast of the times, he is assured of a living. It is a poor cow that will not bring in \$8 or \$10 per month. Of course, her feed comes out of this, but when the hay is raised on the place, it makes the expense light. During a part of the year I feed crushed barley. The cows do better if they have straw or grain hay once a day. The rations are better balanced. Hogs do well on skim milk and alfalfa, only needing grain to finish them before selling. With a hand separator, which does not cost much, one can make calves and pigs thrive.

"Yours truly,

"Mrs. May C. Gammon,

"Lodi, California."

Mules out of well bred mares are able to endure more hardships and stand more work than those from cold blooded mares.

JOHN MACKEY, Superintendent.

CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE, SORES and SADDLE GALLS there is now superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALES, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the feet which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c; 1 LB. BOX, \$1.00.

For Sale. COAL BLACK FILLY BY A son of Diarcum 2:05 4; is very handsome and stylish. Would make a very fine saddle animal. Broke to drive. Apply to J. H. RAYKES, San Leandro.

Meat on the Farm.

Much of the sheepy flavor of mutton, according to Mr. Boss of the Minnesota College of Agriculture, comes from the generation of gases in the stomach after the sheep is killed. For this reason sheep should be dressed as rapidly as possible. A platform six or eight inches high is a convenient thing to work on and aids in keeping the blood away from the body, insuring a cleaner carcass. A clean, dry place is necessary for neat work. Water or blood on the wool makes it very difficult to dress the animal nicely.

If the sheep is an old one it may be stunned before bleeding. If a young one the same purpose is served by dislocating the neck after cutting the throat. This is accomplished by putting one hand on the poll or top of the head and the other hand under the chin, giving a sharp twist upward. Lay the sheep on its side on the platform, with its head hanging over the end. Grasp the chin in the left hand and stick a knife through the neck just back of the jaw. The cutting edge of the knife should be turned toward the spinal column and the flesh cut to the bone without cutting the windpipe.

Mr. Boss describes the "legging out" of the sheep by splitting the skin on the back of the front leg from dew claws to a little above the knee and on the hind legs to the middle line. The latter are skinned around the hocks and down to the hoofs, and the feet are cut off at the toe joints. Next the knife is run between the cords and boneback of the shins, and the legs are tied together just above the pastern joints. The skin is opened from brisket to chin.

The sheep should be hung up by the hind legs before starting to skin above the hock. Start at the brisket to "fist off" the skin by grasping the edge of the pelt firmly in one hand, pulling it up tight and working the other with fist closed between the pelt and the body. The "fisting off" is downward over the fore quarters and upward and backward over the hind quarters. It is unwise to pull down the skin over the hind legs, as the membrane covering the flesh is sure to be ruptured and an unsightly appearance given to the carcass. The wool should always be held

away from the flesh for the sake of cleanliness. The skin on the legs should be pulled away from the body rather than toward it in order to preserve the covering of the meat. When the pelt has been loosened over the sides and hack it should be stripped down over the neck and cut off close to the ears. The head may then be removed without being skinned by cutting through the atlas joint.

For home use split the breast-bone and remove the heart, lungs and diaphragm together. For marketing it is best not to split the breast and to leave the liver attached to the diaphragm. Wipe off the blood from the carcass with a cloth wrung nearly dry out of hot water. Double up the front legs and slip the little cord found by cutting into the fleshy part of the forearm over the ankle joints.

Our Horses for Japan's Cavalry.

After spending nearly a month in Oregon and California, examining horses suitable for use in the Japanese cavalry and artillery, A. M. Fleming of Cape Town, South Africa, has returned to Seattle more than pleased with the results of his investigations, and it is probable that he will shortly place an order in Portland for 5000 head. These will be shipped to the Orient, ostensibly for the use of private parties, but in reality, it is said, for the purpose of refilling the depleted ranks of the cavalry and artillery arms of the imperial Japanese army. Mr. Fleming has left an agent in Portland who will attend to the purchase of the stock in case an order is secured from the Japanese government—or from private individuals in the Orient.

Prior to coming here he sent an agent to Australia and one to the Argentine Republic for the purpose of examining the horses in those countries. He says it is his intention to secure 10,000 horses to ship to the Orient. It now seems probable that half this number will be bought here and the balance in one of the other two countries. Mr. Fleming stated last night that while he was greatly pleased with the looks of American stock, the prices were a trifle higher than he at first anticipated, and this fact may result in the order being cut somewhat. When seen at the Hotel Butler last night Mr. Fleming said:

The horses that I saw while in the south pleased me greatly, and, after returning to Japan, which I will do on the Tremont, which sails Thursday, if I secure the order I anticipate getting, it is probable that I will communicate with my buyer here and have the big shipment forwarded from the Pacific Coast.

The price is a little high I find, but the quality of the stock is excellent, and that is the principal thing. While I will not say that I am an agent of the Japanese government in this matter, I am expecting to secure orders in Japan for the stock, and if the horses eventually get into the army, that is none of my business. As I stated when in Seattle a month ago, at the present stage of the game, all the private stock of horses in the empire that are any good have been impressed in the army and still the government wants more. As the horses I have seen here are far superior to those now in the army, it is, of course, possible that the authorities may see fit to impress these I am purchasing, or contemplate purchasing the same as they did the others. The army horses in Japan are, as I stated during my former visit here, in a wretched condition and of inferior stock. The army cannot get too many good horses.—*Seattle Post-Intelligencer.*

Poultry Points.

No one need undertake raising poultry expecting to devote a little time to it. It takes much time.

Turkeys are inclined to roost in trees, but they will roost in an open-front shed, fronting south preferred.

Some use moth balls to keep lice out of the nests and out of the hen house. Put them in cloths and tie where they are needed.

It is believed that gapes and other diseases will do little damage to chicks if they are kept in a thoroughly growing condition.

Few are adapted to raising fancy poultry. If they have had no experience there is a great danger of losing birds capital and courage.

One condition unusually fatal to poultry is damp quarters. Whatever else is lacking their quarters should be dry. The

chicks will droop and die if their feet are wet.

Raising poultry is an exacting business. Those who succeed devote much time to feed, housing and control. The time it requires is more than the money invested.

There is money in the poultry business if thoroughly managed. It does not require much capital, but that capital must be like the nimble sixpence—kept jumping in order to make it pay.

Selling directly to the consumer is the ideal method of marketing both eggs and fowls. First-class prices cannot be obtained from the middle man. When this cannot be done, one has to do the best he can.

Fattening stock should be fed quite often, but regularly, but not more at a time than will be eaten up clean.

Sober up on Jackson's Napa Soda.

INGLESIDE RACE TRACK

Where the Golden Gate Park and San Francisco Driving Clubs will hold a joint meeting Decoration Day for the Benefit of the new Athletic Amphitheater and Speed Track.

Fruit Shipments Begun.

The California deciduous fruit season opened April 30th, with the shipment of a box of Sacramento Valley cherries on that date. The first box, which was grown near Vacaville, Solano county, was closely followed by a box of cherries grown near Sacramento and others grown in the Winters district in Yolo county and in the Newcastle district of Placer county. Following these, shipments were made from various fruit districts of the Sacramento Valley.

Notwithstanding the fact that ripe California cherries are usually shipped earlier in the season, sometimes as early as March, the initial shipments brought very fancy prices. The first box was sold in Chicago for \$25, \$3.12 a pound. The second sale was made in New York and the figure was \$21. The third sale, made in the city of Philadelphia, at auction, was a record breaker, eight pounds of cherries bringing the remarkable price of \$70.

These shipments marked the beginning of California's fruit season. Carload shipments from Sacramento Valley districts began May 13th, when a carload of cherries was shipped from Vacaville.

The fruit crop of California will probably be slightly below the average in quantity this year. The Sacramento Valley fruit districts, which provide the bulk of California deciduous fruits, report heavy crops of pears, but slight shortage in most other fruits. Apricots are already ripening.

How Oleomargarine Failed.

When the oleomargarine bill was before Congress it was claimed by those who fought against it that the attempt to tax it was nothing more nor less than an effort to throttle a promising industry in the interest of the farmers. Its defendants claimed, on the other hand, that they had no objection to the manufacture and sale of oleomargarine as such, but decidedly objected to its being colored in imitation of butter without being labeled as an imitation. To the credit of the national law makers, he it said, the bill was passed, which provided that oleomargarine colored to imitate butter should be taxed at 10 cents a pound and when not colored at 1.4 cent a pound. The justness of the law as passed is shown by the report of the Commissioner of Internal Revenue to the effect that at the close of the fiscal year after the law went into effect, no manufacturer or dealer had qualified, as the law directed, to manufacture or market colored oleomargarine and pay the tax. This is conclusive evidence that the claim made while the bill was before Congress that the consumer would rather have oleomargarine than butter was false. A few more victories like this and both farmers and consumers will be on the road to moderate prosperity; the one because he obtained a fair price for his product, the other because he is not, unknowingly, filling his stomach with adulterated foods.

Most sheep south of the Caucasus mountains in Asia are black (in reality dark brown) with now and then a white or yellowish one in the flock. They are cared for by shepherds, and it is interesting to notice the confidence which the sheep have in their shepherds. Here the sheep are not driven, they are led, the shepherd walking ahead of his flock, which follows closely in his footsteps. Here the sheep know their shepherd. Here the shepherd leads his flock to the pasture. As we saw the shepherd walking slowly and carefully, followed by the meek-eyed sheep with implicit obedience, we understood better than ever before the Biblical references to the relation of the shepherd to his sheep. Here we are in a land where the oriental customs have changed but little in the last 2000 years.—Chas. E. Bessey, of the University of Nebraska.

Pacific Coast Trotting Horse Breeders Association RACE MEETING Santa Rosa

AUGUST 17, 18, 19 and 20, 1904.

WEEK BEFORE THE STATE FAIR.

GUARANTEED STAKES ENTRIES TO CLOSE WEDNESDAY, JUNE 1st

EXCURSION DAY.

11. Two-Year-Olds, Trotting..... \$ 300
12. Sonoma County Stakes (2:19 Class Trotting)..... 1500
13. Free-for-All Pacing..... 600
14. Special for Local Horses (Entries to this Race to close August 17th)

Nominators in any race that should fail to fill may, on June 15th, transfer their Entry in such Race to any other of the above Classes that filled in which their horse was eligible on June 1, 1904.

N. B.—It is not the intention of the management to give any special races (except for local horses) at this meeting, and if you want to start your horses they must be entered in the regular advertised events.

CONDITIONS.

Entries to close Wednesday, June 1, 1904, when horses are to be named and to be eligible to the class in which they are entered.

Stakes not filling satisfactorily to the Board of Directors may be declared off.

Stakes will be divided into four moneys: 50, 25, 15 and 10 per cent.

Five per cent of the amount of the Stake will be deducted from each money won.

The Board of Directors reserve the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided, 66 2/3 per cent to the first and 33 1/3 per cent to the second.

A horse distancing the field shall be entitled to first and fourth moneys (in colt stakes first and third moneys); but in no other case will a horse be entitled to more than one money.

The Board of Directors reserve the right to change the hour or date of any race, except when it becomes necessary to ante-date a race, in which instance the nominators will receive three days' notice by mail to address of entry. Right reserved to declare off or postpone any or all races on account of the weather, or other sufficient cause.

The Board of Directors reserve the right to start any heat after

APPLICATIONS FOR MEMBERSHIP.

Persons desirous of making entries in these Stakes, and who have not as yet joined the P. C. T. H. B. A., should make application for membership to the Secretary by June 1, 1904.

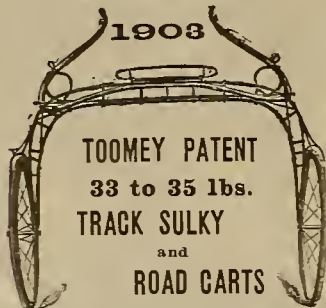

Send all communications to the Secretary.

AMERICAN OR KENTUCKY GAITED SADDLE HORSES

THE AMERICAN

SADDLE HORSE BREEDING FARM

has recently been established at San Diego, California
for the purpose of introducing the

Kentucky Type of Gaited Saddle Horse.

While our representative was in the East in search of
brood mares he found and purchased a few fine gaited
Mares and Geldings which were sent out with the
breeding stock. THESE ARE OFFERED FOR SALE
and several of them will be brought to

SAN FRANCISCO ON MAY 25th

and will be exhibited at the stables of the San Francisco Riding Club, through the courtesy
of the manager, Mr. Edward S. Jones.

The American Saddle Horse Breeding Farm,
American Park, Pacific Beach P. O.
SAN DIEGO, CALIFORNIA.

Take It In Time

If you have the remedy on hand, and are ready to
act promptly, you will find that there is nothing in
the form of Spavins, Splints, Curbs, Windpuffs and
Bunches which will not yield promptly and perma-
nently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's
cart and the broken-down horse market. Mr. C. B. Dick-
ens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest,
writes as follows: I have been using Quinn's Ointment for some time and with the greatest
success. I take pleasure in recommending it to my friends. No horseman should be with-
out it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal.
Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars,
testimonials, etc. Sent free for the asking.

SIDNEY DILLON 2:31:57

Sire of LOU DILLON 1:58¹/₄ (the Fastest Trotter and Greatest Record Breaker in the world), Dolly Dillon 2:06¹/₄ (the fastest mare of 1901), B. S. Dillon 2:16¹/₄ and Captivity 2:28¹/₄.

SANTA ROSA STOCK FARM
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19¹/₄; dam Venus (dam of Adonis 2:11¹/₄, Leah 2:24¹/₄, Cupid 2:18 and Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27¹/₄, sire of dam of Directum 2:05¹/₄. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny.

Terms for the Season, \$100.

Only a limited number of approved mares taken. Usual return privilege. In case horse is sold service fee will be returned if mares have not proven in foal. Season ends July 1, 1904. Pasturage \$4 per month. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For particulars regarding shipment of mares, etc., address

FRANK TURNER,

Supt. Santa Rosa Stock Farm,

Santa Rosa, Cal.

Or IRA PIERCE, 728 Montgomery St., S. F.

NEERNUT 19810 Record 2:12¹/₄ (Sixth Heat) 2:14

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinee records or public trials from 2:09¹/₄ to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 1133 (son of Electioneer), dam Clytie II by Narwood. He will make the Season at my place in Santa Ana

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$60. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

CHARLES DERBY 4907

Record 2:20.

THE LEADING SIRE ON THE COAST.

Sire of DON DERBY 2:04¹/₄, MUCH BETTER 2:07¹/₄, DERBY PRINCESS 2:08¹/₄, DIABLO 2:09¹/₄, OWYHEE 2:11, etc.

\$50 the Season.

Terms: Cash at the time of service. All bills to be paid before the animal is removed.

Pasturage, \$5 per month. Hay and grain, \$10 per month. Accidents and escapes at owner's risk. Mares consigned to the Farm should be shipped to Danville Station S. P. R., via Martinez. Correspondence will receive prompt attention and should be addressed to

OAKWOOD PARK STOCK FARM,
DANVILLE, CONTRA COSTA COUNTY, CAL.

LIMONERO

RECORD (3) 2:15¹/₄

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10¹/₄, Alta Vela 2:11¹/₄, etc., etc.); dam LULANEER (dam of Limonero 2:15¹/₄, Lion 2:19¹/₄) by Electioneer 125.

LIMONERO 2:15¹/₄, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big young and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15¹/₄ got his record as a three-year-old in the fourth heat of a six heat race for a \$5000 purse which he won at Lexington, heating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. LIMONERO 2:15¹/₄ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,

University Station, Los Angeles, Cal.

The Fastest Trotting Son of McKinney KINNEY LOU 2:07³/₄

(Winner of \$11,450 in 1903) Will Make the Season of 1904, to a Limited Number Approved Mares, at

AGRICULTURAL PARK, SAN JOSE.

Service Fee, \$100.

SEASON ENDS JUNE 1, 1904.

KINNEY LOU was one of the great race winners of 1903 on the Grand Circuit, and is a high class race horse, game as a pebble and perfectly gaited. He is from race-winning and producing families on both sides. His dam, Mary Lou 2:17, being a great race mare and own sister to the well known race horses Shylock 2:15¹/₄ and Ned Winslow 2:12¹/₄. Mary Lou is by Tom Benton out of Brown Jenny (dam of 3 in list) by Dave Hill Jr., next dam by Black Hawk 786. Kinney Lou's oldest colts are two-year-olds and all have size, good color, and are natural trotters with good dispositions.

For further particulars and card containing tabulated pedigree, address

BUDD DOBLE, 1030 Pacific Ave., Alameda, Cal.
or San Jose, Cal.

NUTWOOD-DIRECTOR AND WILKES STALLION

NEAREST

Reg. No. 35562. Record 2:22 1-2.

Sire of ALONE 2:09¹/₄, champion 4 y.o. of 1903 (half mile 59¹/₄), OUR LADY (trial 2:20¹/₄), and full brother to JOHN A. McKERRON 2:04¹/₄ (the fastest trotter of the Wilkes family).

Seas of Stables of T. W. Barstow on the Alameda near Race Track San Jose, Cal.

By NUTWOOD WILKES 2:16¹/₄, sire of John A. McKerron 2:04¹/₄, Who Is It 2:10¹/₄, Stanton Wilkes 2:10¹/₄, Claudius 2:13¹/₄, George B. 2:12¹/₄, Boh Ingersoll 2:12¹/₄, Tidal Wave 2:13¹/₄, and 21 other standard performers.

Dam INGAR, the greatest producing daughter of Director (dam of John A. McKerron 2:04¹/₄, Nearest 2:22¹/₄ and Thursday 2:24) by the old champion Director 2:17, sire of Directum 2:05¹/₄, Direct 2:05¹/₄, Direction 2:10¹/₄, etc.; second dam Annie Titus (dam of Annie C. 2:25) by Echo 462 sire of Echora 2:22¹/₄ (dam of Direct 2:05¹/₄) and 16 others in list; third dam Tiffany mare (dam of Gibraltar 2:22¹/₄, sire of Our Dick 2:10¹/₄, Homestake 2:14¹/₄ and others) by Owen Dale, son of Williamson's Belmont.

NEAREST is a dark bay, 15.8 hands and weighs 1200 pounds; well formed and of kind disposition. In his blood lines are represented the greatest strains of the American trotter.

Terms, \$40 for the Season. Usual return privilege. Excellent pasturage at \$4 per month. No wire fences. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

Telephone: Red 1431.

T. W. BARSTOW, San Jose, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¹/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28¹/₄ (trial 2:22); The Boquet (4 y.o. trial 2:17¹/₄); Majella 2:29 (4 y.o. trial 2:13¹/₄).

Sired by Sahle Wilkes 2:18, sire of 38 in 2:30. Dam, Fidelia (dam of Fidelite 2:28¹/₄, dam of Mary Celeste 2:17¹/₄) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancelot, son of McCracken's Blackhawk. **FEE \$50 for the Season, limited to 40 outside mares.**

PRINCE ANSEL 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¹/₄, James L. 2:09¹/₄, Edith 2:10, etc.); dam Woodflower (dam of Seyler 2:15¹/₄) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30¹/₄ (dam of Manzanita 2:16, Wildflower (2) 2:21 and 8 producing daughters) by St. Clair 16675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can heat 2:30 easily. **FEE \$30 for the Season.**

The above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

IDIRECT 2:12 1-2

(Officially Timed in Race in 2:08¹/₄)

SIRE, DIRECT 2:05¹/₄, sire of 54 in the list, including Directly 2:03¹/₄, Direct Hal 2:04¹/₄, Bonnie Direct 2:05¹/₄, Prince Direct 2:07, Directum Kelly 2:08¹/₄, Trilby Direct 2:08¹/₄, King Direct 2:09¹/₄, Ray Direct 2:10, etc.

DAM, FRANCISCA (dam of I Direct 2:12¹/₄, Sahle Frances 2:15¹/₄, Guyesca 2:26 and Earl Medium, sire of May Bud 2:18¹/₄, Tom Martin 2:14¹/₄, Kanawah Star 2:14¹/₄, Lney Stokes 2:18¹/₄, Goneril 2:24¹/₄, Pearl Medium 2:29, etc.) by Almost 33.

Second Dam, Frances Breckenridge (dam of Maximus 5:175, sire of 8 in list) by Sentinel 2:30; third dam by Bayard 2:34; fourth dam, Luna by Snigert's Lexington; fifth dam, Eagles by imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E Streets, near Agricultural Park, Sacramento.

Fee \$50.

I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

For cards containing tabulated pedigree and full particulars address

Or MARRY McMAHAN, Owner,

307 Sansome St., San Francisco.

PROF. H. B. FREEMAN, Manager,

19th and E Sts., Sacramento, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who is it, ex-champion three-year-old gelding of the world, reduced his record to 2:10½. John A. McKerron 2:04½ (2:12½ as a three-year-old) is the fastest trotter of all the famous tribe of George Wilkes.

NUTWOOD WILKES will make the Season of 1904 at the
NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50

Nutwood Wilkes 22116

IS THE SIRE OF

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

Apply to or address

Or TED HAYES,

D. W. DONNELLY, Agent.

SILVER BEE 2:27 3-4

(RECORD MADE AT TWO YEARS OLD)

Season of 1904 at

VORDEN, SACRAMENTO CO.

FEE: \$30 FOR THE SEASON.

SILVER BEE is a handsome, well developed horse, stands 16 hands high and weighs about 1200 pounds. He is a model of symmetry, fine head and neck, short back, legs and feet like iron, perfect disposition and has great intelligence. No more perfectly gaited trotter stands for service and his record is no measure of his speed, as he can show a 2:30 gait at any time. In his blood lines he represents the most fashionable strains. His grandsire Robert McGregor sired that wonderful horse Crecoos 1:59½, and on his dam's side he carries the blood of the Goldust family, the most beautiful of all trotting tribes, besides that of the sire of Nutwood, the greatest of sires. His only foal to be trained is Glide, one of the handsomest young horses in Sacramento county, that has trotted a trial in 2:22. Good pasturage at \$3 per month. Every care taken to prevent accidents or escapes but no liability assumed. All bills to be settled before mares are removed. Address communications to MCKINNON & GREEN, Vorden, Sacramento Co., Cal. or to W. O. (JOE) BOWERS, Capital Hotel, Sacramento.

By SILVER BOW 2:16

(Sire 2 in 2:15, 8 in 2:20)

1st dam BELLE Mc (dam of Worthwood (1) 2:59 and Silver Bee (2) 2:27½) by Essign Goldust Jr.
2d dam LITTLE BELLE (grand-dam of 2 in list) by Belmont (sire of Nutwood 2:18½ and 58 more in 2:30).
3d dam Thoroughbred Mare by Imp. Trustee.

BAYSWATER WILKES 2:25½

Sire of KELLY BRIGGS 2:10½

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

S. H. HOY, Winters, Cal.

MONTEREY 2:09 1-4

Reg. No. 31706

By SIDNEY (Grandsire of LOU DILLON 1:58½)

Dam HATTIE (also dam of MONTANA 2:16).

WILL MAKE THE SEASON OF 1904 AT

SAN LORENZO SATURDAYS, SUNDAYS, MONDAYS, TUESDAYS. MILPITAS WEDNESDAYS, THURS. DAYS and FRIDAYS.

Fee \$50 FOR THE SEASON. Good pasturage at \$3 per month. Best of care taken of mares, but no responsibility for accidents or escapes. Send for card containing pedigree and full particulars. Address P. J. WILLIAMS San Lorenzo, Cal.

FERNDALE STOCK FARM

Stallions at Stud.

Longworth, \$25.

Sable Czar, \$25

Ringwood, \$25.

Mahomet, \$20

LONGWORTH 2:19 (Reg. No. 18452), sired by Sidney, grandsire of the champion Lou Dillon 1:58½. Dam, Grey Dale by American Boy Jr., he by American Boy, sire of Williamson's Belmont; second dam by Winfield Scott; third dam, So rel Pol by Sir Henry. LONGWORTH is a very high-class horse in form and disposition; is a very dark bay or brown. He has sired Alfred D. 2:12½, El Moro 2:13½, A. C. 2:15½, Esmeralda 2:18, etc.

RINGWOOD by Sidney; dam, Alma by Dashaway, he by Belmont, son of American Boy. RINGWOOD is a dark bay.

SABLE CZAR by Sable Wilkes, he by Guy Wilkes; dam, Olivette by Whipple's Hambletonian, he by Guy Miller, he by Hambletonian 10; second dam, Belle by Easton's David Hill, he by Black Hawk; third dam, Lady Almack by Almack, he by Monmouth Eclipse, son of American Eclipse. SABLE CZAR is a black horse.

MAHOMET, color white, with bay and blue spots. His sire is Longworth, dam Sonoma Maid, said to be by Arabian horse; second dam by Whipple's Hambletonian.

The above Stallions will make the Season of 1904, ending July 1st. Pasture \$2.50 per month. No responsibility assumed for accidents or escapes.

For further particulars inquire of or correspond with

A. C. DIETZ, Prop., Santa Paula, Cal.

SEYMOUR WILKES REG. NO. 0232.

Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12½ and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, hard-ome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

Alta Vela 22449

RECORD 2:11½

INTERNATIONAL STOCK FOOD

3 FEEDS FOR ONE CENT

IT MAKES
STALLIONS
Surer

Home of
JAY BIRD

GENTS—

I have been feeding "International Stock Food" to Jay Bird, Baron Wilkes Jr., and Scarlet Wilkes, and it has been a great help to them. Jay Bird made a season of \$2 and "International Stock Food" made him a sure foal getter.

W. A. BACON, Jr., "INTERNATIONAL STOCK FOOD" makes stallions surer and your mares will raise stronger and more vigorous colts. It makes colts grow very rapidly. It makes a delicate feeder eat heartily. It gives race horses more speed and endurance and keeps them healthy. Will you try it without advancing a cent? Write us at once and we will mail testimonials and full information.

American Park, Pacific Beach P. O.
SAN DIEGO CALIFORNIA.

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds due to its use.

It is a CERTAIN CURE for THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

Sold by all Dealers in Harness and Turt Goods. If not in stock ask them to write any Jobber for 1.

PALACE HOTEL, SAN FRANCISCO, CALIFORNIA.

TOURISTS and TRAVELERS will, now, with difficulty recognize the famous COURT into which for twenty-five years carriages have driven. This space of over a quarter of an acre has recently, by the addition of very handsome furniture, rugs, chandeliers and tropical plants, been converted into a lounging room—the FINEST IN THE WORLD.

The EMPIRE PARLOR—the PALM ROOM, furnished in Cerise, with Billiard and Pool tables for the ladies—the LOUIS XV PARLOR the LADIES WRITING ROOM and numerous other modern improvements, together with the unexcelled Cuisine and the Most Convenient Location in the City—all add much to the ever increasing popularity of this most famous HOTEL.

GREEN'S RUFUS.....The Baywood Stud, San Mateo

THE FUND being raised for the new amphitheater and speed track in Golden Gate Park is growing, and it will not be long until the entire amount needed will be in the hands of Secretary Frank O'Kane. The races held by the Golden Gate and San Francisco Driving Clubs last Monday added quite a sum to the fund, and other entertainments planned to come off during the next few weeks will still further increase the amount. The committees having in hand the raising of the needed \$25,000 have worked like Trojans and deserve great credit for the splendid efforts they have made. The horsemen and all who are interested in outdoor sports of any kind do not propose to rest until the entire subscription has been secured and placed in the hands of the Park Commissioners, who have promised to begin work on the grounds as soon as the money is paid over. There has been no project hatched in years that will do more for the horse interests in San Francisco than the building of

this speed track. It will be a place for amateur trotting and pacing races, polo games, horse shows, etc., and will be so arranged that thousands of people can enjoy these sports. There should be a resolve made by every person identified with the horse business in any way to aid by every means in his power the raising of the sum required to build this new pleasure ground.

CALIFORNIA HAS LOST by death another of her great imported thoroughbred stallions. Last week we chronicled the demise of the great Ormonde and this week we are called upon to announce the death of Sir Modred, one of the greatest sires ever brought to this country. He died at Rancho del Paso on Thursday, June 2d, from the infirmities of old age, having rounded out twenty-seven years. Sir Modred was a bay horse with two small white spots in the forehead, the off hind foot white to fetlock, and a little white on the near hind heel. He was foaled in 1877 and bred by Middle Park Stud Company, New Zealand. His sire was the English stallion Traducer and his dam Idalia by Camhuscan. Sir Modred was a great race horse, a winner at two, three, four and five years of age, his Australasian victories including the Canterbury Derby, Canterbury Cup, Dunedin Cup, Metropolitan Stakes at Sydney, etc. He is full brother to imp. Cheviot, sire of Rey El Santa Anita, and a host of other good winners, and to imp. Idallum and imp. July. Their sire, Traducer, bred in England, was the best stallion that ever stood in New Zealand. From 1867 to 1881 he got nine winners of the Canterbury Derby, the greatest event in that country. Idalia, dam of Sir Modred, produced the high class stake winners Betrayer, Sir Modred, July, Liverpool and Cheviot. In Australia Sir Modred sired the superior stake winner Sir William, and in America Tournament (\$18,773), Sir John (\$31,800), Connoisseur (\$22,192), Moderocia, Dr. Hashrouck (\$43,055), Sir Matthew (\$33,955), Comanche (\$23,210), Dorian, Gloaming (\$25,310), Sir Excess, Grand Prix, Simmons, Mary Stone, Sir Galahad, Masterlode, Lizetta, Marie Lovell, Sir Lancelot, Fatality, Shelly Tuttle, Aurelian, Ballarat (\$22,500), Reginald, Sykeston, Motto, Wheeler, Annie Bishop, Trinculo, Fagin, Manchester, Lucania, King Bors, Manatee, Briar Sweet, Counsellor Wernherg, Sir Guy, Bendoran, Lady Lindsey, McDrine (14 wins), Pupil (Nat. Stallion Stakes, etc.), Tantris, El Mido (27 wins), Hermoso (21 wins), Kenilworth (50 wins to 1904), Klondyke, Passaic, Momentum, Laura Marie, Siroister, Contestant, New York II, Arizona II, Moderator, Duke of Kendal, Serge, Straggler, Sir Voorhies, etc. Sir Modred was purchased in Sidney, Australia, in 1885, for Mr. J. B. Haggin of Rancho del Paso and brought to California that year. The amount of money his American owner has received for the get of this great sire must be very large, and will probably reach a half million dollars.

RED WILKES, one of the greatest of the sons of Geo. Wilkes, died at Shadeland Farm, Pa., April 29th. He was thirty years old and a vigorous mare up to this year, having been bred to several horses this spring. He was bred by Crit Davis and took a record of 2:40 as a four-year-old. His list of standard performers is a long one and will receive quite a number of additions during the next few years as he has left quite a number of youngsters from weanlings to five-year-olds that will be trained for records. Nine of his get took records last year, giving him a total of 120 trotters and 46 pacers in the list. His sons have made a good showing as producers, there being 104 of them that have sired 319 trotters and 257 pacers. His daughters have also produced well, 105 having produced 112 trotters and 44 pacers. Red Wilkes himself is the sire of 24 that have taken records below 2:15, the fastest trotter being Ralph Wilkes 2:06½, and the fastest pacer Ithuriel 2:09½. There are 33 of the 2:15 performers that are out of daughters of Red Wilkes, the most noted trotters being Walnut Hall 2:08½ and Kingmond 2:09, and among the fast pacers are Coleridge 2:05½, Casonda 2:05½, Sally Toler 2:06½, Dr. Medara 2:08, Bert Oliver 2:08½ and others. Red Wilkes was sired by Geo. Wilkes when the latter was 17 years of age. His dam, Queen Dido, was by Mamhrino Chief 11, and his grandam a daughter of Red Jacket, son of the thoroughbred horse Comet. At the close of 1903 he was the greatest living sire of trotters.

BRAVE HEARTS is the title of a volume just issued by Scribner & Sons. It is from the pen of W. A. Fraser and consists of twelve good short stories, in all of which the modern race horse is a feature. The scenes range from the United States and Canada to England and India, and make a thoroughly interesting hook. The publishers' price is \$1.50.

State Board of Agriculture Meets.

At the meeting of the Directors of the State Board of Agriculture, held last Saturday, the following Directors were present: President B. F. Rush, William Land, William Johnston, Charles W. Paine, Thomas Fox, J. W. Wilson, C. E. Howard and James Whitaker.

A report was submitted by Secretary Leon R. Miller which embodied the idea of fitting up the rooms over the Directors' office as reception rooms for the Woman's Council and the various woman's clubs of Sacramento, which, the Secretary stated, had become an important factor in the development of the city and prove a decided aid to the Fair if their sympathies were properly enlisted.

Secretary Miller's report proposed the putting in of an electric fountain in the agricultural implement building as an agreeable feature and the establishment of a children's playground on the outside, where the poultry show was last year, in order to attract and interest the little ones and their parents. In this connection he proposed having donkeys for riding, swings, etc. He said that as yet he had not had time to ascertain if these features could be added at reasonable cost, but he thought the suggestions worthy of consideration.

The matter was referred to Director Land to ascertain the probable cost.

The subject of a chicken exhibit was taken up and was thoroughly discussed, with the result that it was decided to hold one and that the services of Henry Berrar of San Jose should be engaged as judge of this feature.

The suggestion of Director Wilson to the effect that the main floor of the Pavilion be turned into an arena, where prize-winning cattle and horses might be displayed, met with general approval and a committee consisting of Directors Wilson, Land and Paine was appointed to ascertain the cost of constructing the arena.

In elucidating his idea, Director Wilson said that the public had got tired of having the same old exhibits presented to them year after year and he thought that a series of riding tournaments for ladies, bicycle races, displays of fine horses and cattle would be a pleasant innovation and would prove a good drawing card.

The art gallery will not be maintained this year.

Professor W. L. Carlyle of the State Agricultural College of Colorado was engaged to do the judging of stock, and the board again voted to allow the premium list for California cattle exclusively.—Union.

The Luckiest Day of the Year: Thursday, June 9, 1904.

By perusing the advertisement of Oakley Park's early closing events, you will be enabled to avail yourself of an indulgence that will redound to your financial benefit prior to going into winter quarters for 1904. The dates of our Grand Circuit Meeting, September 26th to October 1st, are seasonable for the foregoing comment. The owner or manager for every stable of campaigners may have lost the opportunity of the season to redeem misfortunes by not heeding timely notice of the \$10,000 worth of events fixed for Oakley Park. We fear no contradiction to the statement that Oakley Park's new track is the safest and speediest track outdoors.

Those who enlist on Thursday, June 9th, will combine pleasure and profit. The invitations will be mailed at an early date, and should you not receive yours, it will not be the fault of Oakley Park. In that event address for entry blanks,

P. M. CAMPBELL, Sec'y,
Station O., Cincinnati, Ohio.

Answers to Correspondents.

READER, Stockton.—Will you kindly inform me if St. George, the sire of Constellation, is the same St. George that is the sire of T. G. Ferguson's Bearcatcher?

Answer—St. George, sire of Constellation, was by War Dance out of a mare by imp. Knight of St. George. The sire of Bearcatcher is imp. St. George by Cremorne, dam Strategy by Adventurer.

SUBSCRIBER, San Francisco.—Will you please give pedigree of Lady Emma 2:38½ who was the dam of Emma Nutwood and grandam of Lottery Ticket 2:19½.

Answer—Lady Emma was by Blackhawk 767, dam Newby Mare by Gen Taylor, grandam Rosalie by Williamson's Belmont.

A Fine Blister and Leaves No Blemish.

Bodie, Cal., Jan. 29, 1903.
The Lawrence-Williams Co., Cleveland, O.
I used your medicine's Caustic Balsam on a flacc horse whose legs were swollen from near the knee down to the hoof, the ankles nearly double their natural size. The enlargement was very hard, caused by strain and hitting, making the horse sore but not very lame. I have used it twice about two weeks apart. I can say that I never saw a flacc blister, and the swelling has much subsided, and the hair has come back easily.
HARVEY BOONE.

JOTTINGS.

CALIFORNIA TRAINERS have seven weeks more in which to get their horses ready to step out for the money when the circuit opens at Pleasanton, and from present appearances there will be very few of the trotters or pacers already entered, but will be in shape to score down for the word. The first race of the season will be the 2:20 pace for a stake of \$1000, for which the Pleasanton Race Meeting received twenty-three entries, out of which there will doubtless be a dozen starters. There are at least half a dozen horses among those entered that have beaten 2:15 in their work this year, and two or three that beat 2:10 last year but got no record. Some of the fastest have been sold and taken East and one or two are laid up for repairs to injured tendons or muscles, so that it will be a very difficult matter to predict just what horses will start, to say nothing of the difficulty of picking the winner. I will venture this prediction, however, that the race will be won in slower time than many of the owners are now confident their horses can show.

The selling of Miss Georgie, the fast daughter of McKinney, to Mr. W. A. Clark, Jr., took one of the fastest out of this race, but the nomination was sold to Mr. J. R. Springer of Pleasanton, who has named Billy Red, a green pacer that has never started, in her place. Billy Red has worked a half in 1:02 at Pleasanton and should be up close to first money when the race is over. Capt. Goodall's Rajah, another entry, worked a mile in 2:07½, but failed to win a heat out of four starts. If he should act well he might put in three heats below 2:10, but his stable companion, Uncle John, is a steadier if not a speedier horse, and will, doubtless, carry the colors of the Goodall stable in this race. Little is known up in this neck of the woods of the two Southern California representatives of the Pointer family—Sky Pointer Jr. and Hail Pointer; but as the winning habit is a Pointer family trait, they will bear watching. Henry Dunlap's Harold D. by Dexter Prince has worked a mile in 2:15 at Pleasanton, and must be reckoned with in any race he starts in. Charley Whitehead's mare, The Mrs., has been very close to winners in fast time, but has thus far failed to place a heat to her credit. I believe she started in seven races in 1902, and about the best heat she paced was at Woodland, where she was a pretty fair third to Alone when that mare took her record of 2:09½. There are two or three more of the pacers entered in this race that are accused of 2:10 speed, among them Cavalier by Welcome and Tom Carnal by Diahlo. It will make a good contest, and its an even money bet that it will be a split heat affair.

More interest is manifested over the California Circuit opening this year than has been apparent for several seasons. Pleasanton will certainly have a very successful meeting and the capacity of the town for entertaining visitors will be tested to the utmost. The trains from San Francisco run so that with ordinary promptness in getting the races started and finished, the last heat can be seen every day in time for residents of the metropolis who so desire to take the evening train and reach home by 7:30. There will be more than enough stay in Pleasanton during the entire four days to fill every available bedroom and make the dining-rooms work overtime, and it is hoped that the management will make an extra effort to get the racing program finished every day by 5:30. Nothing induces a patron to stay at home the second day like a long drawn out program on the previous day that compels all those staying until the last heat to miss their dinner or train. The way to get the crowd every day is to carry out the program with promptness.

I guess that Sidney Dillon horse down at Memphis called Stanley Dillon will make good this year. He has been touted a great deal in the papers and due allowance must always be made for the statements of enthusiasts who write for the papers, but the gelding showed the other day that he was somewhat of a trotter and a repeater as well. They had a sort of work-out natienee on the 18th of May, and while the horses were not driven for all there was in them, they were sent along as fast as they could show without being pressed to the last notch. Ed Geers drove Stanley Dillon against trainer Banta's Chase 2:07½. They went two heats and the Dillon horse finished in front both times in 2:13½ and 2:13. If that is not enough to class Stanley Dillon as a coming 2:10 performer for his sire then coming events cast no shadows. On the same day trainer James drove Rohizola in a bunch of five trotters and won both heats, the time being 2:15½ and 2:16. The event of the day, however, was the workout between Ed

Geers' Walter Direct and Banta's Bessie Drake 2:11½. They say the Direct horse made her look like an out-classed road horse as he stepped the miles in 2:10½ and 2:08½. It will surprise some of the boys who can't wait to know that Geers does not propose to start Walter Direct this year, but will reserve him for the slow classes next season. "Everything comes to him who waits" seems to be Geers' motto and the fact that he wins the races and gets the money is evidence that the old proverb fits his style of beauty pretty well.

The secretary of a race meeting has to listen to many complaints and kicks during the season, many of which are righteous ones, although there is quite a proportion that are of the mule variety—made from a hereditary tendency and not because there is any cause for them. I knew of once instance where a man who trained trotters was kicking vigorously because at one meeting there was not a class for his horse. He wrote to all the secretaries on the circuit calling attention to the fact that his horse had been excluded from the program offered at a certain meeting and asking that a class be opened to which he would be eligible. Nearly every secretary thereupon arranged to provide a class for this horse and when the entries were opened the name of the horse or his trainer did not appear. He had heard of another horse in his class having worked a fast half and was afraid to meet him. Had the purses arranged to suit this individual been given for a different class they would have received a larger list of entries and made a better race. Moral: Never put yourself out to provide races for kickers, but make up your program for the good actors.

The State Board of Agriculture is considering the advisability of giving a horse show in the pavilion during the State Fair. It should prove a big success if properly managed and not drawn out during too many evenings. A gentleman who owns quite a number of show horses told me he would like to exhibit at Sacramento, but could not spare two weeks of his time to do so. Several cattle breeders have expressed the same opinion. If the State Fair would return to the old plan of a one week exhibit, it would receive the endorsement of all exhibitors, and pay a bigger profit.

There is a probability of trotting racing under saddle being revived this year at the matinees, and it would be a great thing for the sport. Mr. Billings and Mr. Devereux of Cleveland are both practicing a little at the old time game and I believe both have ridden miles under 2:25 this year. There is probably not a person interested in trotting, but is familiar with the old picture of Budd Doble astride his great trotter Dexter finishing a mile in 2:18, and it would be a nice thing if Mr. Doble could be induced to repeat the scene this year, using Kinney Lou or some other well known trotter. If the Pacific Coast Trotting Horse Breeders Association could announce that on a given date at its San Jose meeting Budd Doble would try to beat the record of 2:18 he made with Dexter in 1866, I believe the sign "standing room only" would have to be hung out. It might be that Mr. Doble would not consent to making the trial, as he has not been any saddle miles for many years, but I believe it would be easy for him and Kinney Lou to set a new mark that it would take a good many years to reduce.

Speaking of Kinney Lou, every horseman that visits San Jose comes back filled with enthusiasm over his looks and his gait. Mr. Doble exercises him regularly and once in a while lets him step a hundred yards or so at a fair rate of speed. On my last visit to the Garden City, he clucked to him at the last end of a two-mile jog, just to let me see Kinney Lou's action, as I had never before seen the great trotter in harness. I have seen some trotters that I call good gaited but never one that had any better gait than this son of McKinney and Mary Lou. His action is as near perfection as that of any living trotter. It is smooth, regular, just quick enough and long enough to get over the ground fast without that extra effort that so many horses seem to be making when at speed. His driving power is tremendous. Doble says he seems to have more power in reserve no matter how fast he is asked to go. Croseus may have to establish that 1:59½ to be the champion stallion next year if Kinney Lou starts to beat 2:02½. A fine lot of mares have been sent to his court this season.

Hartford, Conn., June 18, 1903.
Dr. S. A. Tuttle, Dear Sir:—Please send me a copy of your 100 page book. I have used a number of bottles of your liniment on a mare of mine which has a weak tendon behind and is inclined to stumble at times which is much to my annoyance. Will you please state for a case of this kind how the liniment should be used to obtain the best results?
About three months ago I suffered everything with neuralgia in the face. I went to the dentist and then to our family physician, but obtained no results, and as a last effort I thought of a bottle of Tuttle's I had in the closet. It seems like a fairy tale, but it is an actual fact that I was relieved within five minutes from all pain, and have not had a return of it since. That bottle was just worth \$500 to me at that time.
Very truly, F. E. KING.

The Boston Sale.

Through the kindness of Mr. Geo. W. Kingsbury, proprietor of the Lick House in this city, who was in Boston when the horses belonging to the estate of the late J. Malcolm Forbes were sold, we have received an account of the sale which shows that good prices were paid for nearly every horse put up. Although Nancy Hanks brought but \$4000, this is a pretty fair price for an eighteen-year-old mare, no matter how fast she has trotted or how many standard trotters she has produced.

Naturally the greatest interest centred in Bingen and everybody was expecting a big price. It was known that \$25,000 had been offered by J. M. Johnson and it was reported that several men were willing to pay a substantial advance over this to secure the great stallion. Mr. Johnson, therefore, did not hesitate a moment when the first bid was called and offered \$10,000. The bidding grew lively at once, the second bid being \$16,000. Then came \$20,000 and \$30,000 bids in quick succession, and Mr. Johnson stepped in with a bid of \$31,000. Above that he would not go, for the next bid was by Mr. Parker and the grand horse was knocked down to him at \$32,000.

Arthur H. Parker, the purchaser of Bingen, is a young man who, within the past five years, has been collecting a first-class stable at his farm in Bedford. He has a magnificent estate with every opportunity for breeding race horses. There is a half-mile track on the estate. Mr. Parker has been an exhibitor at the Boston Horse Show for several years. He has devoted much attention for some time to breeding, and the purchase of Bingen indicates that Mr. Parker has an ambition to make his farm the home of some notables. He is the owner of the stallion Alliewood.

Nancy Hanks' yearling filly by Bingen sold for \$3600; her three-year-old Markala by Peter the Great brought \$3800, and her four-year-old Lord Roberts by Arion brought \$4000. Vice Commodore, a three-year-old by Bingen out of Narion (daughter of Arion and Nancy Hanks) was sold for \$6900, and Albia, a yearling by Bingen out of the same mare sold for \$3300. Narion herself sold for but \$1300, showing that buyers nowadays, those that pay the big prices, would rather buy good prospects than try to breed them. Susie J. 2:06½ was knocked down to a bid of \$2300, made by Francis Parker. Zambia 2:20, a mare that Mr. A. B. Spreckels bred was sold for \$1950. She is by Cupid out of Gallata by Stamboul, second dam old Jenny, the dam of Hulda 2:08½, etc. Mr. Forbes intended to race this mare this year and believed she would get a mark below 2:10. She was not bred last year, but raised a filly by Arion which sold for \$475.

Margaret Bathgate 2:11½, by Silent Brook, was one of the sought after ones in the sale. She brought \$4500. Totara, that took a two-year-old record of 2:17½ last year, by Bingen out of Nowaday (3) 2:14½ by Lookaway, sold for \$3600, and Tonga, a five-year-old mare by Bingen out of the dam of Nico 2:08½ brought \$3200.

On the second day the horses of the late Geo. S. Wellman of Boston was sold. There were three, all California bred. The first was Rowellan, three-year-old record 2:15½, five-year-old record 2:09½. Rowellan is a sixteen hands bay gelding by Adbell, dam Rowena by Azmoor, and was bred at Palo Alto Stock Farm. Chas. A. McCarthy got him for \$3550 after some spirited bidding. The next two were bred by Geo. A. Davis of Pleasanton and sold last year at the Blue Ribbon sale. They were Happy Madison, a trotter, by James Madison, and Reybel, pacing mare by Rey Direct out of Mabel (dam of Directly 2:03½) by Naubuc. Happy Madison brought \$2275 and was purchased by Mr. McCarthy, the same gentleman that bought Rowellan. Reybel brought the biggest price of the day. There were many bidders but A. H. Merrill of Danvers got her at \$5400.

A large consignment from Village Farm was sold at a good average, although there were no very high prices paid, \$625 being the top price for a black mare by Athanio 2:10. A two-year-old colt by Chimes brought \$500 and a two-year-old colt by Dare Devil the same price.

No Equal—Recommended to All Horsemen.

Hemlock, W. Va., Feb. 18, 1904.

Dr. B. J. Kendall Co., Enosburg Falls, Vt.
Dear Sir:—I have been using Kendall's Spanish Cure on my horses for several years and find no equal for sprains, bruises and spavins to which draft horses are subject. I heartily recommend it to horsemen. Please send me a copy of your "Treatise on the horse and his diseases."
Very truly yours,
J. J. ZICKFOOSE.

Dates for three-day meetings under the auspices of the League of Amateur Driving Clubs have practically been decided on for the coming season. The ball is started rolling at Cleveland, Aug. 30 to Sept. 1, on one of which days the \$5000 gold cup will be raced for. Syracuse comes next on Sept. 6, 7, 8, which is during the New York State Fair, and then comes Pittsburg on Sept. 13 to 15. Columbus, O., is undecided whether to take the week ahead of Cleveland or after Pittsburg.

Good Racing at Ingleside Track.

The best racing that the local driving clubs have furnished San Franciscans for a long time was seen at the Ingleside race track on Monday last, Memorial Day, when the Golden Gate Park and the San Francisco driving clubs united in a program for the benefit of the fund being raised to build a new speedway and athletic amphitheatre in Golden Gate Park. The track was in had condition, and a very strong wind was blowing, otherwise heats below 2:15 would have been paced, but the sport was good, and the large crowd present saw some very exciting and close finishes. A rule these clubs should make and enforce is one that would prohibit any horse not out on time from starting in any heat. The delays were too numerous and dragged the program out until nearly dusk when the day's sport should have ended at 5 o'clock.

The first race went to J. Corcoran's Mission Boy in straight heats, the horse being driven by James O'Kane with excellent judgment.

The second race was quite an exciting one. A big gray pacer called Doc and owned by Frank Schmitz, brother to San Francisco's Mayor, was the winner of this race, and but for the splendid drive given him by Dan Lieginger would have lost the race to Homeway, a son of Strathway, that was not in condition for a split heat race, but made an excellent showing in trainer Miller's hands. The second heat of this race was so close that many thought Homeway had won, but the judges doubtless placed them right.

The 2:40 class was won by a diminutive little hopped pacing mare called Gracie McKinney by McKinney. She was driven by a youth of about seventeen, son of her owner, John Lawlor. Young Lawlor has given this mare all her training and drove her well. She lost the second heat through a break, but landed the other two very handily.

There was quite a plunge on the chestnut mare Flora G., owned by M. M. Donnelly of this city, that started in the 2:20 class. Dan Lieginger landed her winner in the first heat, but her condition told on her and she lost the next two to Clara L., the favorite.

The handicap race was not pulled off until so late that a majority of the crowd had started for home. It was on the European plan, the horses getting the word from a standing start. Arthur F. was scratch horse, Billy F. back ten yards, Clara L. fifty yards, and Harry Hurst one hundred and thirty yards. The last named should have won as he seemed to outclass the others more than his handicap, but he got off so badly that he was out of it from the start although he made up a lot of ground and showed some of his great speed. He has a record of 2:14½ made at Portland last year and has worked miles at the San Jose track this year in 2:12½.

A running race was on the program but it looked so bad to the judges that they declared all bets off.

The starting was done by Mr. T. J. Crowley, one of the Directors of the Pacific Coast Trotting Horse Breeders Association, who did very well considering the hard task he had. When there are one or two drivers in every race who do not understand the rules of racing it is no easy task to get them to score down to a fair start, but in nearly every instance Mr. Crowley succeeded in getting them off well lined up.

John Lawlor, Elias Williams and Joseph Windrow acted as judges, while the time was taken by L. E. Clawson and Fred Vetter. Thomas F. Bannan was marshal and Jack Holland assistant marshal.

First race.	
T. Corcoran's Mission Boy.....	(J. O'Kane) 1 1
V. Verilhac's Little Victor.....	(V. Verilhac) 2 3
J. J. Donovan's Jim.....	(J. J. Donovan) 3 2
J. W. McTigue's Mike.....	(J. W. McTigue) 4 5
A. Anderson's Robin.....	(A. Anderson) 5 4
Time—0:39, 1:17, 1:56½, 2:39¼.	

Second race.	
Frank Schmitz's Doc.....	(D. Lieginger) 1 1
H. Schottler's Dynamite.....	(J. Garrity) 2 3
G. Lindauer's Homeway.....	(G. Lindauer) 4 2
F. W. Thompson's Ruth S.....	(J. W. Ramage) 3 4
J. Holland's Prince B.....	(L. Richardson) 5 5
Time—0:35, 1:11, 1:46, 2:24½.	
0:35, 1:10½, 1:44½, 2:24½.	

Third race, handicap.	
Arthur Jacob's Arthur F. (scratch).....	1
J. Pastene's Billy F. (10 yards).....	2
S. Sprague's Clara L. (50 yards).....	3
V. Verilhac's Harry Hurst (130 yards).....	4
* Disqualified for fouling and placed last.	
Time—0:43½, 1:17½, 1:56½, 2:34½.	

Fourth race—	
John Lawlor's Gracie McKinney.....	(J. Lawlor) 1 2 1
H. Schottler's Lee Roy.....	(W. Todd) 4 1 2
F. Lauterwasser, Jr.'s Broom Corn.....	(F. Lauterwasser, Jr.) 2 6 3
John Garrity's Harry B.....	(J. Garrity) 6 3 4
E. Ferrari's Lulu S.....	(E. Ferrari) 3 5 6
E. A. Buck's Zulu Lass.....	(E. A. Buck) 5 4 5
Time—0:37, 1:14½, 1:51½, 2:32.	
0:38, 1:14½, 1:51½, 2:35.	
0:37½, 1:14, 1:50½, 2:30½.	

Fifth race, running, three-eighths of a mile—Won by J. O'Connor's Brown Jim, H. Danz's Pajamas second, William Harney's Silver Dick third. Time—0:40½.

Sixth race.	
S. Sprague's Clara L.....	(S. Sprague) 3 1 1
M. M. Donnelly's Flora G.....	(D. Lieginger) 1 2 2
J. Doran's Della McCarthy.....	(J. Doran) 2 3 3
J. O'Kane's Sandow.....	(J. O'Kane) 4 4 4
J. Pastene's Billy F.....	(J. Pastene) 5 5 w
Time—0:35, 1:09, 1:52½, 2:21½.	
0:35½, 1:10½, 1:54½, 2:23.	
0:35½, 1:10½, 1:54½, 2:24.	

Big Entry Lists for Spokane.

The North Pacific Circuit, which opens (so far as the big stakes and mile tracks are concerned) with the Oregon State Fair's meeting at Salem, will furnish some great harness racing for the lovers of this sport. Last week we printed the lists of entries received by the associations at Salem, North Yakima, Walla Walla and Seattle, and this week we give the big list received for the Spokane Inter-State meeting. The California horses are numerous in these lists and will doubtless give a good account of themselves. As the majority of them will have raced on the California Circuit before going north, our northern friends will be able to get a line on them and have some idea of just how fast their horses must trot or pace to win first money. The list of entries for Spokane is as follows:

Inter-State Fair Stake, 2:17 Pacers, \$1200.
L Hudson, Lacy, Wash., blk m Monowhip by Woodman-unknown.
C P Webb, Portland, Ore., blk g Prince Tom by Tom V-Duroc Prince.
J L McCarthy, Portland, Ore., b g Cavalier by Welcome-Steinway.
Van De Vanter Stock Farm, Seattle, Wash., b g Adamant by Altamont-Adirondack.
J G Morgan, Seattle, Wash., br m Chehalis Maid by Chehalis-Silas Wright.
E J Dyer, Spokane, Wash., b g Jack Wilmot by Dr Bunnell-Katherine W.; blk h Merry Monarch by McKinney-Altamont.
N K West, La Grande, Ore., b m Hallie Hinges by Pricemont-Antrim.
Robert Niles, Fair Grounds, Ore., ch m Derbertha by Charles Derby-Bertha.
M J Zahner, Fair Grounds, Ore., b m Maud W by Waldstein-Grand Moor.
M K Thompson, Albany, Ore., br h George D by Del Norte-Altamont.
L B Lindsey, Spokane, Wash., b m Queen B by Count Sagna.
J D Springer, Pleasanton, Cal., b g Billy Red by Glenelg-Ingraham.
Silva & Wright, Sacramento, Cal., b m Economizer by Charles Derby-Echo.
F R Garnsey, Santa Ana, Cal., br g Sunny Jim by Ketchum-Christmas.
Sanford & Donohue, Los Angeles, Cal., b m Norda by Mercury-Brown Hal.
J H Vance, Los Angeles, Cal., g g Henry N by Raymond-A W Richmond.
Marcia M Pender, Salem, Ore., blk m Annigito by Antrim-Blackwood.
Dr M A Nels, Walla Walla, b g Major Del by Del Norte-Billy Reed.
Thos H Brents, Walla Walla, blk m Miladi B by Chehalis-Antelope.
B M Turner, Dayton, Wash., b m Annie Turner by Glenelg-unknown.
Jas McCormack, Tacoma, b h Garven Wilkes by Bezan-Red Wilkes.
H H Helman, Portland, b h Byron Lace by Lovelace-Wallace.
Bolster Stake for 2:10 Pacers, \$700.
John Lance, Cheney, Wash., ch g Sam Bowers by Joe Simpson-Hambletonian Mambrino.
J P Turner, Dayton, Wash., br g Vision by Vanquish-unknown.
E J Dyer, Spokane, b g Jack Wilmot by Dr. Bunnell-Katherine W.
Woodland Farm Company, Granite Falls, Wash., b g Buford by Wilkeswood-Harkaway.
M B Lynch, Walla Walla, Wash., h g Francisco by Caution-Antelope.
J Snyder, Hanford, Cal., br h Jonesa Basler by Robert Basler-Hanford Medium.
Jesse Brown, Invervale, Ore., b h Pathmark by Pathmont-Tyalt.
L B Lindsey, Spokane, Wash., h g Le Roi by Altamont-Ophir.
Silva & Wright, Sacramento, Cal., b m Polka Dot by Mendocino-Antelope; br g Kelly Briggs by Bayswater Wilkes-Algona.
Sanford & Donohue, Los Angeles, Cal., br h Zolock by McKinney-Gossiper.
J H Vance, Los Angeles, Cal., blk h Highball by Silkwood-Star Sultan.
James Erwin, Walla Walla, b m Ollie M. by Westfield-Caution.
Gus Lafontaine, Pendleton, b g Hassalo by Westfield-Altamont.
N K West, La Grande, h m Hallie Hinges by Pricemont-Antrim.
G L Taft, Spokane, br g Starkey by Chehalis-Osceola Chief.
Idaho Stake for 3-year-old Pacers, \$350.
William Hogoboom, Walla Walla, Wash., b f Bessie R by Francisco-Beduin.
Vac De Vanter Stock Farm, Seattle, Wash., br g Jules Redel by Westfield-Coeur d'Alene.
A L Richardson, La Grande, Ore., blk c Phalto Norte by Nel Norte-Blacksmith.
H C Davis, Portland, Ore., b c Sunny Jim by Ladies-Altamont.
J R Kennedy, b m Meta Hall Cloud by Hall Cloud-unknown.
J E Reeves, Cornelius, Ore., b c Alto Lace by Lovelace-Altao.
G J Rohse, Portland, Ore., ch g Free Love by Lovelace-Planter.
H H Helman, Portland, Ore., b f Loveless b Love lace-Rockwood.
Greater Spokane Stake for 2:20 Trotters, \$1200.
E J Dyer, Spokane, Wash., b g Roy Benton by Benton Boy-Antee; blk h Gyr Falcon by Zombro-Altamont.
Robert Burress, Red Bluff, Cal., b g Golden Gate by Bay Bird-Western.

F R Garnsey, Santa Ana, Cal., b m Alcacia by Red Cloak-Alcazar; b h Murray M by Hambletonian Wilkes-Dawn.

Mrs Emily Ward, Los Angeles, Cal., b m Lady Madison by James Madison-Nephew.

A C Froom, Portland, Ore., blk m Lady Jones by Captain Jones-Director.

J L Cagle, Meyers Falls, Wash., blk h Ringman by Licena-Kansas Wilkes.

J H Vance, Los Angeles, h m Una K by McKinney-Gen Grant.

W G Durfee, Los Angeles, h m Reta H by McKinney-Prompter; blk h Monocrat by Woodman-Nora D.

Montana Stake for 2:30 Trotters, \$500.

E J Dyer, Spokane, blk h Gyr Falcon by Zombro-Altamont.

M B Lynch, Walla Walla, b m Kitty Clover by Pricemont-Caution.

N K West, La Grande, blk m Lena Andwies by McKinney-Venture; Satin Royal ch s by Bunner N B-Minnie M.

J L Cagle, Meyers Falls, Wash., blk h Ringman by Licena-Kansas Wilkes.

C H Thompson, Salt Lake, Amarea (not given.)

Aug Erickson, Portland, b m Alma Mack by McKinney-Altamont.

J D Springer, Boise, Idaho, br m Sonoma Girl by Linwood W-Antee.

W G Durfee, Los Angeles, br m Reta H by McKinney-Prompter; blk h Monocrat by Woodman-Nora D.

Kootenai Stake for 2:25 Pacers, \$500.

E J Dyer, Spokane, blk h Merry Monarch by McKinney-Deta.

Mills & McCormick, Medical Lake, Wash., b h Helena S, by Hilcan-C F Clay.

F G Kassemeyer, Cour de Alene, Idaho, ch g Dr Luhn by King Altamont-Prompter.

Wm Hogoboom, Walla Walla, b h Teddy by Diablo-Elmorice.

Walter Cadman, Walla Walla, blk m Lady Cad by Del Norte-Caution.

Jas McCormick, Tacoma, b s Garvin Wilkes by Bezan-Red Wilkes.

L Hudson, Lacey, Wash., b m Monorship, by Woodman-unknown.

J D Springer, Boise Idaho, ch h Miss Idaho by Nutwood Wilkes-Eorest Clay Jr.

E E Smith, Salem, Ore., ch h Prince Charles by Derby-Dorlisky.

Prince Direct a Great Pole Horse.

C. K. G. Billings, firemaster among the amateur reinsmen, added the pony pacer Prince Direct 2:07, to his stable during the Cleveland sale last month, paying \$2000 for him.

Mr. Billings said that the purchase was made with the idea of driving the Prince to the pole with Hontas Crook 2:07. They will undoubtedly make the greatest pair of small horses ever put together, and with their true way of going—neither of them knows how to make a break—it should not be much trouble for them to set a new double team record for pacers with amateur driver. Prince Direct has been fully tested as a pole horse, as last fall he was hooked with Direct Hal during the Memphis meeting, and Geers drove the pair a mile in 2:05½ at the first time of asking. At the finish of the journey the Prince was right up in the collar and pulling the whole load, Direct Hal breaking just before the wire was reached. In case Hontas Crook should for any reason prove an unsatisfactory mate for Prince Direct, the black horse can be hitched with another fast pacer in the Billings string which is even nearer his own size. This is Home Circle 2:07, a record made to wagon last year. Dr. Monical 2:08½, of the Billings stable, is also on the small order, but it is not thought he would make as reliable a pole horse as either Hontas Crook or Home Circle.—H. T. White in Chicago Tribune.

Oakley Park.

P. M. Campbell, secretary of Oakley Park, announces the early closing events for the Grand Circuit meeting. Three stakes for \$10,000 are on the program, for 2:09 and 2:20 trotters and 2:20 pacers. The usual conditions prevail, while bopples are not barred. Entries to these stakes close Thursday, June 9. They are The Ohio, 2:09 trotting, \$5000; The Queen City, 2:20 trotting, \$3000; The Buckeye, 2:20 pacing, \$2000.

Payments are as follows: The Ohio, 2:09 trot, \$50 June 9th, \$50 July 7th, \$70 August 8th, \$80 September 6th. Horses must be eligible June 9th and starters named September 6th.

The Queen City, 2:20 trot, \$20 June 9th, \$30 July 7th, \$30 August 8th, \$30 September 6th.

The Buckeye, 2:20 pace, \$20 June 9th, \$30 July 7th, \$30 August 8th, \$20 September 6th.

All the above entries are in harness, mile heats, best three in five. Liability of nominator ceases when written declaration of withdrawal is lodged with the association.

Entrance five per cent and five per cent additional from winners of each division of purses. Division of purses 50, 25, 15 and 10 per cent. Liberal purses to complete program will be duly announced to close September 6th.

Notes and News.

Henry Hellman moved his string of horses from Portland to Salem this week.

Vallejo received an average of over fourteen entries to seven stakes which closed on May 16th.

Sir Albert S. 2:03½ is jogging sound and has been a mile in 2:25. Doc Tanner is training him.

The San Jose track is in fine shape for training and the horses working there are all doing well.

Ed Geere worked his horse Alexander a mile in 2:11 last week and will start him in the M. & M. at Detroit.

Fred H. Chase & Co. will have a sale of draft and work horses at 1732 Market street, next Tuesday evening at 8 o'clock.

Three purses for Solano county horses will be given at the Vallejo race meeting, classes and conditions of which will be announced soon.

Jo Bowers, proprietor of the Capital Hotel at Sacramento, claims the name Silveretta for a chestnut filly by his good horse Silver Bee.

An eastern association advertises two per cent to enter and eight per cent additional from money winners. This ought to be popular with owners.

Miss Georgie by McKinney worked a mile over the Denver track in 2:12 this week. She is acting nicely and will be a winner when the Denver races start.

Robert Christie of 1801 J street, Sacramento, claims the name Joy Bells for a bay colt foaled April 23, 1903, by Monbells 2:23½, dam Malden 2:23 by Electioneer.

Doc, the gray pacer of unknown breeding that Dan Leiginger drove to victory for his owner Frank Schmitz, of this city, at Ingleside last Saturday has a gold tipped tooth.

Golden Gate, the bay gelding by Bay Bird that William Brown is training at Pleasanton, worked two good miles last week, trotting one beat in 2:15 and repeating in 2:14½.

The 2:13 trot baying failed to fill at the Vallejo meeting, Manager Thos. Smith has opened a \$500 stake for 2:12 class trotters, to close June 20th, two weeks from Monday next.

Don't forget the annual meeting of the members of the Pacific Coast Trotting Horse Breeders Association which is called for Monday, June 13th. A new Board of Directors is to be elected.

Thursday, June 9th, is the day for closing the Oakley Park stakes—The Ohio 2:09 trot, \$5000; The Queen City 2:20 trot, \$3000; and The Buckeye pace, \$2000. See the advertisement in this issue.

James Thompson, who is now at the Glenville track, will race some of his horses over the half mile tracks in Ohio before the Grand Circuit opens. He will not start on the big ring before the Buffalo meeting.

Not since the boom days in trotting horses have prices averaged better than they did at Boston last week. Seventy-six head sold for \$116,450 an average of \$1532.50 per head. These were the Forbes borses.

Entries for the State Fair, Pleasanton and Breeders Santa Rosa meeting will probably be ready for publication next week. At this writing there is a prospect that nearly all the classes advertised have filled well.

Ray Mead of 1842 Fifteenth avenue, this city, is driving a very handsome four-year-old by Falrose out of a mare by Alexander Button that is one of the best looking roadsters in the city and one of the best mannered.

Mr. R. W. Peterson's trotter R. W. P. by Linwood W. worked a mile over the Santa Rosa track one day this week in 2:18, last quarter in 32 seconds. R. W. P. is entered in the 2:19 and 2:24 trotting events at the Santa Rosa meeting of the Breeders Association.

Black saddle horses are in great demand for the Knights Templar Conclave which meets in San Francisco in September. Any one of the BREEDER'S readers who owns a handsome black charger that is "gentle to ride" can find a purchaser among the knights.

C. A. Duffee has sold the two-year-old Covey by Mendocino 2:19½, dam Rose McKinney (dam of Almaden 2:22½) by McKinney, to Dr. De Foe, the well known veterinarian of San Jose. Covey is a fine looking large two-year-old and a better bred one is hard to find.

The Rural Spirit says that the business men of Salem are anxious to offer \$2000 for a free for all trot to be decided at the Oregon State Fair this year. This would bring together the best trotters on the Coast and would be a great drawing card. Who will be the winner?

Thirty head of colts and fillies from the Meek Estate farm, all by Welcome and William Harold, will be sold by Fred H. Chase & Co. of this city on the evening of June 28th.

About the most pleasant Saturday trip an admirer of harness horses can make is a ride to Pleasanton, on the 7:30 train from this city, a few hours spent watching the fast work at the famous track and a good dinner at the Rose Hotel.

Mr. A. L. Dowler and Thos. Bonner have purchased the Santa Rosa stables at 11th and Market streets from Dan McCarthy, and will conduct the same under the firm name of Thos. Bonner & Co.

Mr. A. B. Spreckels has sold to Budd Doble a black mare by Cupid 2:18, dam by McKinney 2:11½, that is one of the best pacing prospects on the Coast. Sandy Smith has educated this mare at the Aptos Farm and would have been mighty bappy had he been allowed to take her on the circuit this year as he believes she would have won all the money.

Flora G., the chestnut mare that won the first heat of the 2:20 class at Ingleside, stepping the mile in 2:21½, driven by Dan Leiginger, is a great prospect for a 2:10 mare. Good judges reckoned the track as ten seconds slow, as it was deep in sand the entire length, and the wind blew almost a gale during the races. Flora G. is by El Echo, a son of Ecbo.

F. Gomet of this city reports that Miss Gomet by Seymour Wilkes 2:08½, has a fine filly foal by Alta Vela 2:11½, and Mamie Wilkes by Guy Wilkes a colt by the same horse. Both foals are very much like their sire, even to the left white ankle behind. They are strong handsome youngsters and represent the Electioneer-Wilkes cross, one of the most popular with up-to-date breeders.

The Kentucky Farmer and Breeder offered \$12,000 in cash prizes to those of its paid in advance subscribers who would guess nearest to the three first horses in Brooklyn Handicap. Over ten thousand guesses were made and six of them picked the first three as they finished. E. L. Hale of New York was awarded the first prize \$2666, whose selection was received May 20th, six days before the race was run.

Linwood W. 2:20 by Guy Wilkes

Cbas. W. Fox of 1303 Steiner street, this city, has sold the very handsome pacing horse Sable Le Grande 2:17½ by Sable Wilkes, dam Theo by Le Grande, to Mrs. S. Kraus of this city. Mrs. Kraus purchased Sable for a road horse, but he is showing so much speed and looks to be in such good shape that she may turn him over to a trainer and have him raced. He is certainly one of the finest roadsters in San Francisco.

M. M. Donnelly, the well known horse shoer of this city, who sold the stallion Young Salisbury to Mr. John Teddy of Ohaupo, Australia, has received a letter from Mr. Teddy, giving an account of a two-mile handicap won by Young Salisbury at Auckland recently. The horse finished forty yards in front of his nearest competitor, pulled up to almost a walk. The time was 5:24 for the two miles. He was trained by Mr. Price, owner of the champion pacer Ribbonwood.

Mission Boy, the bay gelding by Sultan Jr. that won the first race at Ingleside track on Decoration Day, is offered for sale by his owner, Mr. T. H. Corcoran of 1201 Valencia street. Mission Boy stands sixteen hands and an inch high, weighs over eleven hundred pounds, and is a handsome horse. He is stylish in action, and a good driver. His easy win of the 2:30 pace at Ingleside Monday was a very creditable performance as he was not trained for this race. He can beat 2:20 on a good track any day.

A stock company formed of Woodland farmers and stock breeders, has purchased of Dunham, Fletcher & Coleman of Wayne, Illinois, the four-year-old Belgian stallion Mastie, paying \$2500 for him. Mastie was imported from Belgium in 1903 by the Illinois firm and shown at the big show in Chicago in September, where he took second prize in a class where there were over forty competitors. He is a light bay with black points and those who have seen him since he reached Woodland say that he is one of the best foreign Belgians ever brought to California.

At the present writing there is every prospect of a big list of entries having been received by the Breeders for their Santa Rosa meeting and by the State Fair and Pleasanton for the harness races advertised to close June 1st. We shall know all about it next week.

The stallion season is about over and has been a very good one for most owners. Breeding has fallen off on the big farms, but the small owners have become more numerous. This is better for all concerned.

Neither of the three-year-old stakes offered by the Vallejo Race Meeting filled, and were declared off. The big demand for colt races that was voiced by breeders does not seem to materialize when entries close.

Kenney, the bike man, is very busy these days getting the old eulikes fixed up for the circuit races, or selling new ones. He knows how to make them run true so that tires will not wear out so often. Better see him about yours.

The Driving Club members over in Pueblo, Colorado, are dead game sports. They had a race there the other day in which seven owners put up \$150 each and raced for the entire amount. Mr. Sol Bergerman won with his horse Jo Jo in three straight heats. The best time was 2:33.

Geo. T. Beckers is getting some high class mares for his great stallion Zombro at Cleveland. Zombro is the only horse in Mr. Beckers' stable that was not affected by the change in climate from Los Angeles to Glenville. The American Sportsman refers to Zombro as one of the grandest individual stallions living.

The thoroughbred stallion Del Norte by imp Green back, a trotting bred stallion by Altamont, a fine jack, and one hundred mares with mule colts, seventy head of two and three year old mules and a hundred head of horses, one, two, three and four years old are offered for sale to close an estate. For particulars address Mrs. D. Burris, Santa Rosa, Cal.

If you want a pair of sulky wheels made, the kind that will go through the circuit and stand the wear of all sorts of tracks, see Kenney, the bikeman at 531 Valencia street. He made a pair for Jerry Driscoll of Watsonville this week. He also sold a No. 30 McMurray cart to Mr. F. H. Gay, of San Francisco, who is driving a handsome two-year-old colt to it.

Says the Salinas Journal: There is a movement on foot to form a trotting horse association or club for the purpose of giving a race meeting at Salinas this fall. It is pretty well settled that our agricultural association will not undertake the job of pulling off a race meeting but will content themselves with giving an agricultural exhibit, and perhaps a pavilion display, at the same time that the racing club gives its meeting.

The Pueblo, Colorado, papers are claiming a world's record for a yearling pacer that paced a quarter at the track there Decoration Day in 35½ seconds, a 2:23 gait. As the pacing filly Belle Acton by Sheldand Onward paced to a yearling record of 2:20½ for a mile in 1892, and Rosedale by Sidney took a yearling record of 2:22 in 1893, the quarter by the Pueblo pacer is not fast enough to smash any records, even though there were any recognized ones at that distance, which there are not.

Catalogues will soon be out for the Meek Estate Sale. There are thirty head of yearlings, two-year-olds, and three-year-olds all by Welcome 2:10½ and William Harold 2:13. Here is an opportunity to get something good at your own price. The Meek Estate is closing out its horse breeding department and this is the final sale. The mares were all sold last year. Send to Fred H. Chase & Co., 1732 Market street, San Francisco for a catalogue. The sale will take place June 28th in the evening by electric light.

While no regular trotting meeting will be held at Cleveland this summer, "Marque" says that Messrs. Devereux and Tanner are arranging for a gala day some time in August. Every stunt on the record-breaking repertoire will be attempted including a try at the saddle record, the pacing and trotting team records, the world's record to sulky, etc., etc. An admission fee will be charged and several professional races given so as to make the records legal. The funds accruing will be used for the benefit of the track.

Announcement has authoritatively been made, says Trotter and Pacer, of a change in the Grand Circuit dates, by which the Blue Ribbon meeting at Detroit has been set back from the week of July 18th to that of July 25th. As is probably well understood, this change has been made to avoid a vacant week, occasioned by the decision of the Cleveland Driving Park Association to abandon its meeting in consequence of Gov. Herrick's veto of the pool-selling bill in that State. As soon as this determination was definitely reached, President Campau and Secretary Snyder of the Detroit Association proceeded to secure the consent to a postponement of their meeting from the horsemen who had made engagements in events already closed, and this was very easily obtained, as a week's lay-up after the circuit had opened was obviously an inconvenient and expensive thing for everybody. The readjustment of Detroit's dates will enable horsemen to give their pupils the advantage of racing experience at two good meetings prior to the more serious work of the big line, as Columbus, O., will hold the week of July 11th, and Windsor, Ont., the following week, with meetings at which very good purses are offered, and then the caravan will move to Detroit. This should be a very convenient and satisfactory arrangement all around.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

Ed Geers thinks that Onward Silver 2:05½ can trot to a record of 2:04 or better.

Dolly Dillon 2:06½, now in Austria, is in the steeple of the former Buffalo trainer, George Bodimer.

Don Derby 2:04½ beat Nathan Streus 2:05½ a neck in a fast brush over the New York speedway last week.

At this time of year one too-fast move is apt to ruin a horse's chances. Time to ride fast is when out for the money.

Bonnie Russell, an M. & M. starter last year, is showing lots of speed for Harry Benedict, et the Lexington, Ky., track.

Winfield Stratton 2:06½ will be sent down the line this summer in greater fettle than ever. He is doing easy miles around 2:12.

P. P. Johnston, president of the National Trotting Association, denies that he owns or controls the Kentucky Breeder and Farmer.

Magnus Flaws, the Chicago catalogue and pedigree compiler, has been elected Secretary of the Gerfield Park Matinee Club in that city.

Millard Sanders is working at Memphis a full brother to the pacer Al Bock 2:08½, that is said to be equally as fast as his brother.

Trainer John Kelly, who is now located at the Empire City track, will get the stallion Idolita 2:09½ ready for the late races this fall.

James Hanley has decided to start Prince Alert in no races this season and the hopped champion will be restricted to contests with Fether Time.

Frank Reynolds and George Dustin, two well known Eastern trainers, have purchased the half mile track at Unity, Me., and will train there this season.

Andy Welsh bought Vice-Commodore at the Boston sale for \$6,900. It is understood that James Hanley, of Providence, takes a half interest in the colt.

Omer Singmaster of the draft horse importing firm of Charles F. Singmaster & Sons, Keota, Ia., sailed on the 17th inst for Europe to buy stock for the Maplehurst stud.

On account of her dickey leg—the near hind one—Millard Sanders is going very slowly with Anzella 2:06½, but expects to have her ready to race late this season. She is looking superbly.

E. E. Smathers will make his first start with his \$40,000 gelding Meior Delmar 1:59½ at the Grand Circuit meeting in Buffalo. He will start to wagon to beat 2:03½, his wagon record at Lexington, last fall.

Careful investigation shows that out of over a million horses in Iowa there are but twenty docked carriage horses. Of this number two came from Illinois, four from Minnesota, two from Canada and one from Missouri.

The stallion Crescent Route 2:08½ will be returned to Ed Allen, at Lexington, as soon as his present stud duties are over. It is believed this son of Cresceus will be able to go a mile better than 2:06. He may be raced late in the fall.

An episode of the Cleveland sale which caused much amusement to onlookers was afforded by a lame buyer who bid off a trotter and then proceeded to pay up by sitting down and quietly producing the green backs from a cavity in his wooden leg.

Ilive, the Highwood mare that showed so good in her two-year-old form, is one of the best gaited trotters at the Memphis track. She was very erratic last year, but now she is going square, does not pull a pound and a mile in 2:15 is easy for her.

Three well known knights of the sulky are already out of the contention. Dick Benson is sick at Kansas City with pneumonia, Frank Loomis was thrown out of a road cart at Denver and damaged in the hip, and Lon McDonald is laid up at Poughkeepsie, N. Y., from an operation for appendicitis.

MEMPHIS, Tenn., May 25—Lou Dillon, trotting queen, made her second appearance in public this year to-day during the harness racing at Billings Park, and stepped the easiest sort of a mile in 2:09½ without trouble. Meior C. 2:04, King Direct 2:09½ and Baron Grattan worked a heat together, the latter leading to the wire by a narrow margin in 2:07½.

They are predicting that the 2:10 trots this season will be the greatest ever seen in the Grand Circuit. Judge Green 2:10½, John Taylor 2:10½, Gov. Strong 2:09½, Rowellan 2:09½, Norrie 2:10, Topsy 2:09½, Authores 2:09½, Grace Kellar 2:10½, Allabrieve 2:10½, Uncle William 2:10½, Kamares 2:10½, Ide Highwood 2:09½, Queen Wilkes 2:10½, Robert Mac 2:10½, Judge Cullen 2:10½ and Mery D. 2:10½ are among the eligibles that will make it interesting.

The New York Driving Club has reduced their dues to \$50 a year.

It is said that an effort—fortunately frustrated—was recently made to poison Kremlin 2:07½ and other horses at Allen Farm, Pittsfield, Mass.

Eight thousand dollars was the amount that A. R. Peacock, Pittsburg, Pa., paid the Fiss, Doerr & Carroll Company for three coaches last week.

"There's one thing about my husband's new automobile that I can't help liking." "I didn't know he had one." "Oh, yes; he's had it two weeks, and whenever he invites me to ride in it, it takes him so long to get it to go that it's too late to start out, so of course we never have to walk back."

Millard Sanders worked John H. Shults' two creek Axworthy colts, Tom Axworthy and Ben Axworthy, miles at Memphis in 2:15 and 2:17½, respectively, going the last half in 1:05 in each instance. Axworthy cost Mr. Shults but \$500, and is the cheapest, as well as the best, sire he has ever had at his breeding farm.

Governor Herrick's recent edict against speculation at Ohio trots has driven not only Cleveland, but Sandusky, out of the field. The latter town has long held banner meetings, and had claimed dates for the season, July 13-15th. It is hoped that something may be served up as a relief measure in the Buckeye State, but the outlook is very unfavorable at present.

Andrew McDowell, who marked Alix 2:03½ and Azote 2:04½, won the Spring International event at Vienna last month with the former Grand Circuit mare Belle Kuser 2:08. She was raced by Scott Hudson last season. McDowell sold her on an order to parties abroad and went over to drive her in her foreign engagements. It was her second win on foreign soil.

At a meeting of the directors of the Gentlemen's Driving Club of Toledo recently, a difficult question to decide precipitated itself. A lady road driver, owner of fast ones and skilled in the manipulation of the reins, applied for membership. It was finally decided that to be an ideal "gentlemen's club" it could not well refuse the fair owner, and so she was elected to membership.

George Spear, who is at Louisville with the Smathers horses, will ship to Detroit, June 1st. Jolly Bachelor, who will represent the stable in the M. & M., has been a mile in 2:18½. Neither Billy Buch 2:07½ nor Lord Derby 2:05½ have been asked to step any fast miles. The fastest mile to the credit of the stables being a mile in 2:17½ by John M. 2:09. All of the horses are working satisfactorily.

About 350 animals went under the hammer at the Blue Ribbon sale, the total sales aggregating \$110,000. The sale did not come up to previous events at the Fasig-Tipton mart in point of high class horses and high prices, but animals of medium quality brought good figures—in some cases remarkably good. The inference seems to be that high class horses are in greater demand than ever and are being held by their owners, while animals of fair quality are bringing good money, their new owners hoping to make stars of them.

Secretary P. M. Campbell announces in this issue the program of the early closing events to be contested for at the Grand Circuit meeting at Oakley Park, Cincinnati, the week of September 26th to October 1st. The stakes are three in number, consisting of The Ohio, \$5000, for 2:09 trotters; The Queen City, \$3000, for 2:20 trotters, and The Buckeye, \$2000, for 2:20 pacers. All three races are to be best three in five, and entries close Thursday, June 9th. Liberal purses, completing the week's program, will be announced in due time.

Will the Buffalo idea prevail? Here it is: Instead of the old stereotyped subdivision of 50, 25, 15 and 10 percent of the purse, according to the summary of the race, every heat will be a race, in which the winners get 60, 25 and 15 percent. The winner of the first heat gets 60 percent of the purse, and goes to the barn, the winner of the second heat gets 25 percent of the stake and retires, and the winner of the third heat 15 percent and the race is finished. Under this system of division of moneys there is no incentive to lay up heats.

Crusader, sire of the fourth dam of Cresceus 2:02½, was a thoroughbred son of Sir Archy. Kosciusko, a full brother of Crusader, got Woodford, sire of the great broodmare Woodhine, the dam of Wedgewood 2:19 and Woodford Mambrino 2:21½. Saxe Weimer, a full brother of Crusader and Kosciusko, got Nance, the second dam of the great broodmare Dolly, dam of Onward 2:25½, Director 2:17, etc. The second dam of Ben Franklin, sire of the dem Dolly, was also by this same Saxe Weimer. The second dam of Hamlin's Almont Jr. 2:26 was by Boner's Saxe Weimer, a son of Saxe Weimer. "Blood will tell."

A Useful Book Free.

To supply the demand for their useful veterinary book of thirty-two pages entitled "The Horse: His Disease and Treatment," the Wells Medicine Co. of Lafayette, Ind., have been compelled to issue an additional edition of 50,000 copies. All our readers can have one of these books by merely sending their name and address to the above firm. This firm is the manufacturer of Craft's celebrated "Distemper and Cough Cure" which is used by all our leading stock farms and racing stables, and which has behind it the most complete array of testimonials from leading breeders and horsemen of any remedy in existence. Write for this book and mention BREEDER AND SPORTSMAN.

Strike!—If they don't give you Jackson's Naps Soda when you ask for it.

Another View of the Cresceus Case.

[Chicago Horseman.]

Criticism on the action of the officials of the American Trotting Association in allowing the records made at Wichita, Kansas, last fall on the same day that Cresceus performed has been based on such misinterpretation of the rules, or rather such utter ignorance of them, that it is possible that the general public may become confused as to the construction of these rules. This is the more apt to be the case from the fact that the critics pose as having a complete knowledge of racing and all that pertains thereto and because of this latter fact the criticisms are the more astounding. That the public may have a thorough understanding of the case it is well to bear in mind that the officials of the American Trotting Association and the American Register Association have adopted rules for the especial safe guarding of all records made against time. At one time the fad of securing time records was so prevalent that records were made under conditions which aroused suspicion as to their correctness, and it was the idea of surrounding all such time performances with conditions so stringent as to allow no question as to their correctness that special rules in relation to time records were made. Race records, as a rule, have given the associations comparatively little trouble. In fact, the latter are more apt to be slow rather than too fast. But suppression of time is little practiced as compared with other deys. As a matter of fact more liberty is given promoters of race meetings in regard to records made in races than is the case in regard to time records. That there is not the incentive to fraud in the latter case has been recognized by turf authorities ever since the inception of racing, and it is expressed in rule four of the American Association, which reads as follows:

Rule 4—The hour for closing the entries for all purses or premiums offered by any of the associated courses shall be 11 o'clock P. M., except for stakes and purses for horses to be named at the post, the entries to which shall close one hour before the time fixed for the race.

It is possible under this rule to name horses just previous to the race, and records made under these conditions will be recognized just as much as though they had been made a week, a month or six months previous. Again the definition of what constitutes a public race is simple and much more liberal than the conditions surrounding events especially against time. This is defined as follows:

Rule 118—Any contest between horses for purse, premium, stake or wager, or involving admission fees, on any course and in the presence of judges and timers, shall constitute a public race.

The definition of a public race and the rules regarding performances against time are as different as the space which they occupy in the manual. The rules to what constitutes a public race is brief, while the rules guarding time records are numerous and explicit. Time made in a public race is accepted by the Register Association with little question while time records can be made only at "regular meetings," and regular meetings are defined at length. Entries in a public race can be made at any time up to the hour of the race, while performances against time have to be made under certain rules. The question is of such importance that the rules regulating time performances are given in full, that all who are interested in the subject may study and digest them at their leisure.

Rule 126—Must be made at a regular meeting of a society in membership with the National Trotting Association or American Trotting Association, said performances to be conducted by the regular appointed Judges and Timers for the day, strictly in accordance with the rules of said National or American Trotting Association, adopted by the members.

Rule 127—No animal shall be permitted to start against time ending a heat or trial by another animal, nor until the result of a heat or trial shall have been duly announced.

Rule 128—Time shall be taken by three Timers engaged in the stand during the performance.

Rule 129—There shall be three Judges in the stand during such performances, who shall not act as official timers.

Rule 130—No performance against time shall be earlier than ten o'clock A. M.

Rule 131—There shall be no performance against time at a postponed or continued meeting, unless such postponement or continuance is made in accordance with the rules of the National or American Trotting Association to which the member belongs.

Rule 132—In performances against time the animal must start to equal or beat a specified time and a losing performance shall not count time a record or a bar.

Rule 133—A regular meeting is hereby construed to mean a meeting advertised in at least one newspaper not less than one week before the commencement of said meeting, and at which meeting no less than two regular events are advertised for each day.

These rules are so explicit that further comment on them seems superfluous. After a reading of them and a comparison of what constitutes a public race and what is required for a performance against time it would seem apparent to the merest novice that the criticisms against the officials of the trotting associations who are striving diligently to safeguard the good name of the sport in every manner possible are based on a most superficial knowledge of these rules, despite the statement of one critic that he has secured eminent legal counsel in the matter. Legal criticism is of little value when it is founded on a wrong construction of the rules. That the officials who formulated the rules of the American Association were wise when they took special pains to safeguard time records is evident from those who profess to be in full accord with the best interests of the sport, who make their living out of it, and who, if there professions are to be believed, are well versed in the rules governing such sport.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.
April 1-Nov. 1—Trout season open.
May 1-Sept. 1—Close season for shrimps.
June 11—Saturday Contest No. 7. Class Series. Stow lake.
2:30 P. M.
June 12—Sunday Contest No. 7. Class Series. Stow lake. 10 A. M.
July 1-Jan. 1—Open season for black bass.
Aug. 15-April 1—Open season for lobsters and crawfish.
Nov. 1-Sept. 1—Open season for crabs.
Sept. 10-Oct. 16—Close season in tidewater for steelhead.
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

June 5—California Wing Club. Live birds. Ingleside.
June 5—College City Gun Club. Blue rocks. North Berkeley.
June 12—Union Gun Club. Blue rocks. Ingleside.
June 12—Empire Gun Club. Blue rocks. Alameda Point.
June 19—Golden Gate Gun Club. Blue rocks. Ingleside.
June 26—Millwood Gun Club. Blue rocks. Mill Valley.
July 1-Feb. 15—Dove season open.
Nov. 1-July 15—Deer season closed.
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.
Feb. 15-Oct. 15—Closed season for quail, ducks, etc.

Bench Shows.

June 3, 4—Ladies Kennel Association of Massachusetts. Braintree, Mass. Lelia M. Speed, Secretary.
June 11—Wissahicon Kennel Club. Wissahicon, Pa. J. Sergeant Price Jr., Secretary.
June 22, 23—Ladies Kennel Association of America. Minneola, L. I. Miss Gertrude De Coppet, Secretary, New York City.
June 25—Long Island Kennel Club. Brighton Beach Race Track, Coney Island. Jos. M. Dale, Secretary.
Sept. 12, 13—Newport Bench Show. Newport, R. I. F. M. Ware, Secretary.
Sept. 23, 29—Valley Fair Kennel Club. Initial show. Brattleboro, Vt. H. C. Rice, Secretary.
Oct. 4, 7—Danbury Agricultural Society. Danbury, Conn. Jas Mortimer, Superintendent.
Oct. 5, 8—Spokane Kennel Club. Spokane, Wash. W. K. L.
Oct. 10—Brunswick Fur Club. Foxhound show. Barre, Mass. B. S. Turpin, Secretary.
Oct. 18, 21—Frederick Agricultural Society. Frederick, Md. Roger McSherry, Secretary.
Nov. 8, 11—World's Fair Dog Show, St. Louis, Mo. F. D. Cohnru, Chief of L. S. Dept., St. Louis, Mo.
Nov. 16, 19—Boston Terrier Club. Specialty show. Boston, Mass. Walter E. Stone, Secretary.
Nov. 22, 25—Philadelphia Dog Show Association. Philadelphia, Pa. J. Sergeant Price, Secretary.

Field Trials.

Aug. 22—Nebraska Field Trials Association. 3d annual trials. O'Neill, Neb. M. H. McCarthy, Secretary.
Aug. 30—Iowa Field Trials Club. S. D. George Cooper, Secretary, Des Moines, Ia.
Sept. 9—Manitoba Field Trials Club. 18th annual trials. Carman, Man. Eric Hamber, Secretary, Winnipeg, Man.
Oct. 31—Monongahela Field Trials Club. A. C. Peterson, Secretary, Homestead, Pa.
Nov. 7—Independent Field Trials Club. 6th annual trials. H. S. Humphrey, Secretary, Indianapolis, Ind.
Nov. 14—Illinois Field Trials Association. 6th annual trials. Robinson, Ills. W. R. Green, Secretary, Marshall, Ill.
—Indiana Kennel Club. Field trials. Clay City, Ind. C. F. Young, Secretary, Clay City, Ind.
Dec. 3—Continental Field Trials Club. 10th annual trials. Thomasville, N. C. John White, Secretary, Hempstead, L. I.

L. K. A. Show.

The premium list of the first show to be held by the Ladies' Kennel Association of Massachusetts, writes Lelia McAlister Speed, the secretary, on the grounds of the New England Kennel Club at Braintree, Massachusetts, provides for 301 classes, giving all the more popular breeds extended classification and divided winner classes. As the show is sure to reach the two point grade, it would seem to afford an excellent opportunity to put one's dog so much nearer the coveted champion title. The prizes this time will be handsome ribbons with suitable lettering, and a handsome rosette for winners. A bronze medal will be given for the best team in every breed. But this is not half the story, for the ladies have been delayed with specials, both cash and material, so that it has been difficult to ballot them with due regard to impartiality. Those breeds which do not seem to have many friends have been taken care of by the association, so that no winner will return home empty-handed. A number of specials were promised in addition to those announced in the premium list. The entry fee will be one dollar. The lovely grounds of the New England Kennel Club lend themselves admirably to this sort of outdoor function. There is the pretty clubhouse and verandas which overlook the show, and here luncheon will be provided each day. The dogs will be benched under the trees and in case of bad weather, they will be housed in the kennels of the N. E. K. C. A special train will leave Boston for the grounds, which are eight miles from the city, and return at 5 P. M. The show will be a two day affair this week, June 3d and 4th.

The judges will be: Mrs. Charles Whitney, Milton, Mass., Yorkshire and Maltese Terriers; Miss Anna H. Whitney, Lancaster, Mass., St. Bernards, Great Danes, Newfoundland, Pugs; Mr. C. F. Sullivan, Boston, Mass., Boston Terriers; Mr. George S. Thomas, Hamilton, Mass., Bulldogs, Fox Terriers, Airedale Terriers, Irish Terriers, Toy Terriers, Toy Spaniels, Pomeranians; Mr. James Mortimer, Hempstead, L. I., all other breeds.

A. K. C. Rejects W. K. L. Overtures.

At the American Kennel Club regular quarterly meeting in New York on May 20, 1904, during an executive session of the Delegates, Mr. A. P. Vredenburg in the chair, the following action was taken in respect to the propositions submitted by the Pacific Kennel League, now the Western Kennel League. Mr. Vredenburg reported that the following resolution had been adopted by the American Kennel Club: Resolved, That the Chairman of the Executive Committee, here in session, now reports to the Chairman of the Board of Delegates the following result of the executive session: That the minutes of the Pacific Advisory Board be spread on the minutes of the regular meeting, and that the Secretary of the American Kennel Club be instructed to write to the Pacific Kennel League, through the Pacific Advisory Committee, that the American Kennel Club must decline the proposition from the Pacific Kennel League to join the American Kennel Club, for the reasons stated in the minutes of the Pacific Advisory Board; also, that if the Pacific Kennel League will submit a proposition in conformity with the recommendations contained in the minutes of the Pacific Advisory Board, the American Kennel Club will be glad to entertain it. Report accepted.

Copy of the adjourned meeting of the Pacific Advisory Board, held March 15, 1904, follows:

Present: De Ruyter, chairman; Carlton, Harley, Norman.

Minutes of previous meeting read and approved.

The secretary read a letter from Norman J. Stewart, replying to the invitation of this committee. The letter being marked confidential and containing a statement of his inability to attend the meeting and giving reasons therefor, was ordered filed, without being spread on the minutes of the committee.

On motion the unfinished business of the previous meeting was taken up.

It was moved and seconded that the "conditions" submitted by the Pacific Kennel League be considered and discussed seriatim. Carried.

Condition No. 1.—That the American Kennel Club recognize all wins hitherto made by the dogs under Pacific Kennel League rules, including those wins made under the Canadian Kennel Club rules in British Columbia, which have been recognized by the Pacific Kennel League.

Voted that the committee recommend the rejection of this condition.

Condition No. 2.—That the Pacific Advisory Board shall consist of one delegate from each club, which is a member of the Pacific Kennel League, together with the members of the said Board now acting under the authority of the American Kennel Club.

Moved that this committee be made representative and elective in the following manner: That any show-giving club on the Coast, a member of the American Kennel Club, shall have the power to request this committee to nominate to the American Kennel Club for appointment to this committee, any delegate, a resident of San Francisco, that they may select, and this committee shall nominate such delegate so designated to it. Seconded and carried.

Condition No. 3.—That the Pacific Advisory Board of the American Kennel Club, as above organized, be empowered with full authority to arbitrate and regulate the internal affairs of the Pacific Coast Clubs; that its findings in the event of an appeal being taken by an exhibitor, be absolute and final.

Moved that this committee cannot recommend that it be endowed with the right to interfere in the internal affairs of any club. This committee already possesses the power to regulate and decide disputes between clubs and clubs or between clubs and exhibitors, but the committee cannot recommend that its decisions be made absolutely final, without allowing the recourse of an appeal to the parent body. Seconded and carried.

Condition No. 4.—That each club be empowered to elect its own member to such Advisory Board, and that each member of the Pacific Kennel League shall be entitled to one representative on such board, to be elected as herein provided.

Moved that this condition being apparently in conflict with condition No. 2, the committee repeats its recommendation under that condition with the understanding, that no club, not being a member of the American Kennel Club, can be represented on the committee. Seconded and carried.

Moved and seconded that the secretary be instructed to transmit with the least possible delay to the American Kennel Club, the foregoing recommendations as the result of the mature deliberations and consideration of this committee. Carried. Meeting adjourned. J. P. Norman, secretary.

We are advised by Mr. Norman J. Stewart, Secretary of the Western Kennel League, that the W. K. L. rules as published in the issue of the BREEDER AND SPORTSMAN of the 28th inst., and also in the American Field, were incorrect and "that when the rules are finally approved of and adopted" copies will be given out for press publication. We published the rules as we got them (unofficially) and without comment. If there were inaccuracies, and the rules published have not been yet adopted or finally approved, the W. K. L. is to be congratulated for there is opportunity for a number of changes that will be of benefit to exhibitors and Coast dogdom under W. K. L. administration.

The Big Basin Opens for Campers This Season.

The many outing parties who intend to camp in the Big Basin this summer will be interested in knowing that the commissioners of the Big Basin park have just issued a set of rules to protect the State's new pleasure ground in Santa Cruz county that has been opened this season to the general public. Dangers from fire and the ravages of vandalism are always possible. The commissioners have chosen to warn in mild terms the people that visit the Big Basin park and have appealed to them to co-operate in the preservation of the venerable forest that has existed for thousands of years. The defacement of trees by carving upon them initials and the placing or painting of advertisements on trees or rocks in the park will be regarded as a serious misdemeanor to be dealt with severely, says the San Jose Mercury.

The committee on rules consists of William H. Mills and H. F. Kron. One paragraph reminds all persons that the park belongs to the State and that they, therefore, have an interest in its preservation. "It is the desire of the commission," so it is set forth, "that all visitors shall be granted the utmost freedom consistent with the preservation of the park in its natural state and its protection from fire. It is also highly desirable that the birds and animals found in the park shall be treated with such indifference and kindness as to accustom them to the presence of man, to the end that a condition of semi-domestication shall ensue."

Thousands of visitors will be in the Big Basin park during the summer. A stage line is already in operation from Boulder Creek. A road is in construction from Santa Cruz. This is the first open season. Visitors will come from all sections. The rules for the guidance of the public are here published for general information, as follows:

1. The park will be open to visitors, who shall be subject to the rules governing the park, and to such direction as may be given by the warden.
2. No visitor will be allowed to carry firearms within the limits of the park.
3. No dogs will be permitted within the park limits.
4. Permission to camp in the park may be obtained from the warden, but such permission will carry with it such location only as may be designated by the warden, and camps may be maintained only under the rules prescribed by that officer. No visitor shall be permitted to build any fire except in the camping ground described in his permit.
5. All campers will be required to preserve the prescribed sanitary regulations around camp grounds.
6. When horses are kept at the camps their owners must make such disposition of the straw and offal as the warden of the park may require.
7. Visitors are requested to register their names with the warden.
8. The privilege of fishing in the streams of the park will be granted under the direction of the warden.
9. Dead limbs of fallen timber may be used for fuel for domestic purposes and for camp fires.
10. The defacement of trees by carving the names of visitors, or otherwise, and the placing of painting upon rocks, trees or other prominent objects, of advertisements, will be regarded as a serious misdemeanor. The commission earnestly solicits the co-operation of those who entertain sentiments of veneration for the forest in the enforcement of this rule.

Trimming Dogs.

The intimations given below are not in the way of suggestions but to inform and are given away by the English Stock-Keeper:

Unfortunately for the good name of the dog world, the gentle art of illegitimately improving the appearance of dogs is largely practiced by members of both the exhibiting and non-exhibiting communities. Some of the "improvements" to which the animals are subjected are unquestionably of a most reprehensible character, whilst others, though prohibited by the letter of the law which govern dog shows, are by comparison quite trivial offenses. Still, the very mildest form of improvement is calculated to mislead the uninitiated, and consequently would be purchasers not blessed by much experience should use every endeavor to discover if any trimming has been resorted to before they conclude a bargain with a stranger of whom they know nothing. At the same time is a subject of very great regret to many practical dog owners that the framers of the anti-trimming regulations used no effort to classify the offenses in such a way that the importance of each would be realized by the public. For instance, no reasonable man could possibly regard as equally objectionable malpractices the dyeing of a dog's coat and the rubbing of a few drops of oil on the jacket; yet both operations are disallowed by the laws of dog shows, and each is liable to be visited by the severest penalties.

Among the common offenses in the dyeing line is the disguising of superfluous hairs by the application of walnut juice or other coloring matter the shade of which assimilates with that of the coat. Red-colored dogs, such as Irish Terriers, are bathed in water which is tinged with permanganate of potash in order to produce the tint desired; objectionable tan hairs in Black and Tan Terriers are concealed beneath a coating of lunar caustic; and in the case of Toy breeds the art of the illicit animal painter is practiced freely. Such practices cannot be too strongly condemned; and on the face of it it is absurd to regard the application of a few drops of brilliantine or oil to the hair of a long coated dog as a serious offense. The coats of dogs, just as the hair of human beings, are apt to become dry and dull at times, and, if neglected, will become completely out of order, and yet if we are to follow the laws of dog shows implicitly, the owner who takes such a simple precaution is as culpable as the man who wilfully stains the jacket of his dog.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Pacific Coast Tournament.

Nearly one hundred shooters altogether participated in the two days' initial blue rock tournament of the Pacific Coast Trap Shooters' Association; of these 86 men faced the traps on the first day, last Sunday. The first target was broken by Dr. W. S. George of Antioch, President of the Association. Besides local sportsmen there were present shooters from Fresno, Hanford, Antioch, Vallejo, Santa Rosa, Oakland, Berkeley, Alameda, San Jose, Watsonville, Monterey, Pacific Grove, Martinez, Los Angeles, Sacramento, Pinole, Windsor, etc.

Weather conditions on the first day were excellent, on Monday afternoon, however, a brisk west wind made the "white flyers" take erratic flights that played havoc with a number of ambitious scores. The general average of shooting was good, in a number of instances some remarkably clever scores were shot, notably so, three 20 straight by C. C. Nauman on Monday shooting from the 18 yard mark, and a straight 20 at 16 yards in the team shoot. The high average men the first day were J. W. Bradrick 108 out of 120; Edg. J. Forster 107, C. C. Nauman 107, W. H. Varlen 106, M. O. Feudner 106, R. C. Reed 105, A. J. Webb 104. For both days, the high average men were: C. C. Nauman 219 out of 240, A. J. Webb and J. W. Bradrick 211 each, W. H. Varlen 208 and R. C. Reed 207.

All contestants started at the 16 yard mark on Sunday and shot through three 20 target events, subsequently a distance handicap prevailed as follows: Each day was divided into two sections of 60 targets each, beginning with the second section on Sunday afternoon the handicaps were: 90% average, 20 yards; 85% to 89% inclusive, 18 yards; 80% to 84% inclusive, 16 yards; less than 80%, 14 yards. Regular events were shot Sergeant system, five men up, three expert traps; unknown traps, unknown angles. The money division was under the "Rose system."

The program for each day consisted of six 20 target races, \$1 entrance, \$10 added, 5 moneys. Side pool, \$1 entrance, 4 moneys, high guns, optional. Targets 2 cents, deducted from all events.

In the first event, J. J. Ryan of Hanford and Clarence Ashlin of San Francisco scored straight, first moneys were \$2.50 each. Tenshooters with 19 breaks received \$2.00 each; nine 18's paid \$1.50 each; eleven 17's received \$1.00 apiece; 16 breaks paid 50 cents each to 15 shooters. Side pool first money to Ryan was \$13.60; eight 19's received \$2.55 each. Eight 19's in the second race got \$2.10 each; nine 18's \$1.65 apiece; eight 17's \$1.25 each; fifteen 16's 85 cents each and twelve 15's 40 cents each. Side pool purse paid seven 19's \$4.70 each.

Event three paid one straight, G. Stone of Fresno, \$3.50; two 19's won \$2.80 each; 18 breaks paid ten shooters \$2.10 each; the 17 men, 17 of them, won \$1.40 each; 16 breaks paid 14 shooters 70 cents each. Side pools paid Stone \$13.20; Fanning, 19 breaks, \$9.90 and nine 18's \$1.20 each. There were 85 entries in each of the foregoing events.

The winners in the fourth event were "Pop" Carr of Monterey (14 yards), S. Slusser (18 yards), S. Holdscaw of Fresno (14 yards), straight scores, \$3 each. Three 19's, \$2.40 each; \$1.80 apiece for eight 18's; 17 breaks paid sixteen shooters \$1.20 each; the 16's, thirteen in number won 60 cents each. In the side pool two 19's, Bradrick and Barker, won \$9.45 each and three 18's won \$2.70 each.

One straight in the fifth event, E. J. Forster received \$3.60; for 19 breaks, W. J. Golcher won \$2.90; 18 breaks paid six men \$2.15 each; the 17's, seventeen of them won \$1.45 each; 90 cents apiece went to eleven 16's. The side pool, first money, \$10.60, was won by Golcher, 19 breaks; four 18's won \$4.05 each.

The winners in the sixth race were: W. J. Golcher, C. A. Haight, Ed Donohoe and E. J. Forster, 19 breaks, \$2.10 each; eleven 18's, \$1.65 each; twelve 17's, \$1.25 each; the 16's, nine of them won 85 cents each and eleven 15's, 40 cents apiece. Side pool, Golcher (19 breaks), \$11.20, first money; Dr. Hutton, Bradrick, Green and Feudner (18), \$4.20 each. There were 80 entries in event four and 78 in events five and six.

In the first race Monday the winners were: C. C. Nauman (18 yards), C. Sylvester (16 yards), Dr. Petris (16 yards), Hesse (14 yards) and W. S. Wattles (14 yards), straight scores, \$2.35 each; 19 breaks paid four shooters \$1.85 each; 18 paid seven \$1.35 each; 17 paid twelve 90 cents apiece, 16 paid 45 cents to eight men each. First two moneys in the side pool paid Nauman and Petris \$10.15 each, three 19's received \$2.90 each.

Second event: M. O. Feudner and D. Daniels, 19 breaks, \$2.60 each; 18 paid eight men \$2.15 each; seven 17's \$1.55 each; eight 16's \$1.05 each and five 15's 55 cents each. In the side pool Feudner and Daniels received \$9.45 each and five 18's \$1.60 apiece.

For event three, first money \$3.40 was won by G. Sylvester, 19 breaks, six 18's received \$2.70 each; four 17's \$2.00 each; seven 16's paid \$1.35 each; ten 15's 65 cents each. G. Sylvester won first side pool money \$10.80, four 18's received \$4.05 each.

Fourth event: Nauman (18 yards) R. C. Reed (16 yards) 20 straight, \$2.80 each; 19 breaks \$2.20 apiece to three shooters; 18's \$1.65 each to eight entries; 17's six \$1.10 each; 16's seven 55 cents each. Side pool: Nauman and Reed, \$5.95 each; Varlen, Bradrick and Sears (19) \$1.70 each.

Fifth event: Nauman (18 yards) straight, \$2.90; three 19's \$2.30 each; 18's \$1.75 each; 17's \$1.15 each; 16's 60 cents apiece. Side pool: Nauman \$6.80, C. A. Haight, G. Sylvester and W. Sears \$3.40 each.

Sixth event: Nauman (18 yards) straight, \$3.50; one 19 \$2.80; 18's, seven \$2.10 each; 17's, six \$1.40 each; 16's, nine 70 cents each. Side pool: Nauman \$6.80, G. Sylvester \$5.10, Forster and Bradrick \$2.55 each. There were 59 entries in the first three events on Monday and 44 entries in the last three regular events.

Eight five-men teams entered the team contest on Sunday for the Union Gun Club trophy. Golden

Gate Gun Club No. 1, composed of Nauman (20), Wehh (20), Reed (20), Klevesahl (18) and Feudner (17) won on a total of 95 out of 100.

On Monday the "Cinch Brothers," Feudner (18), Nauman (20) and Wehh (19) won the Union Gun Club trophy for three-men teams with a score of 57 out of 60, nine teams competed. The team shooting for both days was particularly good. The concluding event of the tournament was a shoot for the Bekeart trophy of which mention is made on another page.

The smooth running of the tournament was due to the efforts of Managers Thos. L. Lewis and Edg. J. Forster, assisted by Mr. W. S. Wattles, chairman of the reception committee.

The entries, distance handicaps, scores and team shoots for both days are given in the following summary:

May 29—First, second and third events, 20 targets each, 16 yards—

George, Dr. W. S.	9	12	15-36
Daniels, D.	18	17	17-52
Mitchell, C. T.	15	12	14-41

Five men team shoot for Union Gun Club Trophy, 20 targets per man, high teams to win, entrance \$5, four moneys, 16 yards.

Golden Gate team No. 1—Feudner 17, Nauman 20, Wehh 20, Reed 20, E. Klevesahl 18; total, 95. Trophy and 40% of purse.

Union team No. 1—Bradrick 18, Iverson 17, Daniels 18, G. Sylvester 19, Haight 18; total, 90. 30% of purse.

Hercules team—Moore 15, C. Sylvester 18, Hansen 19, Kincannon 18, Lowrey 17; total, 87. 20% of purse.

Watsonville team—Barker 15, Green 16, Varlen 20, Carr 19, Work 16; total, 86. 10% of purse.

Golden Gate team No. 2—Potter 16, H. Klevesahl 14, E. J. Forster 17, Wattles 18, Gamble 18; total, 83.

Fresno team—Fanning 17, G. Stone 18, F. Stone 16, Holdscaw 14, Ryan 14; total, 79.

Union team No. 2—McCutchan 17, Jacobson 14, Herring 16, Hoyt 15, Lewis 13; total, 75.

Vallejo team—Magistrini 12, Drake 17, Clark 16, O'Hara 15, Hirschel 11; total, 71.

May 30—First, second and third events, 20 targets each, distance handicap—

Three men team shoot for Golden Gate Gun Club trophy, 20 targets per man entrance \$3, four moneys, high teams to win, 16 yards—

Golden Gate team No. 1—Feudner 18, Nauman 20, Webb 19; total, 57. Trophy and 40% of purse.

Union team No. 1—Iverson 18, G. Sylvester 20, Daniels 18; total, 56. 30% of purse.

Union team No. 2—Bradrick 18, Dr. Petries 17, Gamble 20; total, 55. 20% of purse.

Golden Gate team No. 2—E. Klevesahl 17, Reed 17, Forster 19; total, 53. 10% of purse.

Watsonville team—Green 18, Carr 14, Varien 19; total, 51.

Hercules team—Hanson 14, C. Sylvester 17, Kincaunon 19; total, 50.

Fresno team—Stone 18, Fanning 16, Wattles 13; total, 47.

Union team No. 3—Shields 18, Walpert 13, Barney 12; total, 43.

College City team—Chick 12, Juster 16, Hutton 12; total, 40.

At the conclusion of the blue rock tournament last Monday a contest for the Phil B. Bekeart perpetual challenge trophy took place that was worth going a long way to see. Eight shooters participated: C. C. Nauman, the winner at the prior shoot, A. J. Webb, W. H. Varien, R. C. Reed, J. W. Bradrick, Fred J. Stone of Fresno, M. J. Iverson and George Sylvester.

The shooters shot 25 targets at a time. In the first section three straights were made by Varien, Reed and Iverson, who each shot in great form, centering every target nicely. Bradrick missed his eleventh bird, a left quarterer from No. 3 trap. Webb surprised himself and everybody else by losing his third bird. Nauman fell down on two birds in succession, five and sixth, and then missed his tenth, this was the second surprise of the first section of targets. Stone seemed to be entirely out of form, missing his first two, then the ninth and tenth, twelfth and again losing his eye on the twenty-first. Sylvester, tho' shooting in good style, slipped the twelfth and twentieth targets, much to his chagrin.

After the first round, the spectators looked for a warm race, but 13 targets were missed out 200, and that is pretty good trap shooting at 16 yards, unknown traps, unknown angles.

In the second section of 25 targets, Bradrick seemed to have struck his stride until his eighteenth, he then closed with 24 breaks. Varien could not find his twenty-fourth bird, he also ended the section with 24 breaks. Webb missed his 13th and last target and ended with 23 to his credit. Reed lost four birds in the round beginning with his third target. Nauman added two goose eggs to his score in this round, missing the eighteenth and twentieth targets. This falling off, after shooting three straights, in the regular events, at eighteen yards was disappointing to many of the spectators. Stone could not line 'em up and ended with 18 breaks. Iverson also struck a bad gait losing four out of his twenty-five. Sylvester also followed with a quartette of goose eggs. The average in the second twenty-five targets fell almost 100%, for 25 out of the 800 shot at were not found—not so bad when the totals for the round are scanned, however.

When the squad lined up for the third round, the respective positions were: Varien 49, Bradrick 48, Webb 47, Reed and Iverson 46 each, Nauman 45, Sylvester 44 and Stone 37. This left the race in nature of a guess for the leaders were shooting in excellent form. Varien failed to connect with his thirteenth target—unlucky number it was. Bradrick seemed to go to pieces in this round as he missed four targets, the tenth, twentieth, twenty-second and twenty-fourth. Webb proved the comments of some of the veterans by shooting a straight in apparently easy form. Reed shot himself out of the race, ending with 18 out of his string. Nauman lost three birds in the round. Stone followed with a score of 18. Iverson lost only his tenth disc. Sylvester lost three targets.

Results in the third round left practically three men in the race. They were Varien 73, Webb 72 and Iverson 70; Bradrick trailed the leaders with 69. When the last round began the interest among those present was intense. Varien had developed surprising form, although he always was a steady shot. Webb was cool and unconcerned and looked like a winner. Iverson was shooting a steady gait. Bradrick was a new shooter here, and showed class to a great degree. A breakdown of the leaders would put two new Richmonds in the field.

Webb missed his first bird, this left Varien two birds ahead. Bradrick missed his third (and later his sixteenth) when Varien missed his fourth target and then his ninth, he and Webb were high men and even, both shot straight until the finish. Iverson missed his twenty-third bird and Sylvester shot a straight score. Varien was out of shells when he was up to shoot his last shot, placing a borrowed shell in his "pump" he fired and scored. The match ended with Webb and Varien tied on 96 breaks. It was at first agreed to shoot off the tie, the many shooters present arguing, and truly, that the trophy was put up under perpetual challenge conditions, and that if it were left under the ban of dual ownership it would tend to and for the time being prevent what has always been a strongly contested race. It was finally agreed to divide the purse by the two high guns, and the high score of either in the next race to count for the win.

It is to be regretted that the trophy is at present tied up. A number of shooters have suggested that the two winners shoot a 100 bird race for the trophy in the near future, for a match between Varien and Webb would certainly be a good one.

As it was the Bekeart trophy shoot last Monday was the liveliest 100 target shoot that ever took place at Ingleside.

The scores in sections of 25 made by each of the contestants follows:

Varien, W. H.....	25	24	24	23-95
Webb, A. J.....	24	23	25	24-66
Iverson, M. J.....	25	21	24	24-94
Bradrick, J. W.....	24	24	21	23-92
Nauman, C. C.....	23	23	22	25-82
Sylvester, G.....	23	21	22	25-91
Reed, R. C.....	24	21	18	22-83
Stone, F. J.....	19	18	23	18-78

AT THE TRAPS.

The California Wing Club live bird shoot for June will take place at Ingleside to-morrow.

The Alameda Gun Club members will shoot blue rocks to-morrow on the club trap grounds at the foot of High street. Shooters from this city and elsewhere are cordially invited to shoot with the Alameda sportsmen.

The College City Gun Club blue rock regular club shoot for June is scheduled for to-morrow at the North Berkeley trap grounds.

Hip Justins, a popular and well known sportsman, formerly of this city but now located in Los Angeles, made his appearance on Sportsman's Row this week. Mr. Justins attended the Sacramento shoot and stopped over en route to Los Angeles. Mr. Justins has won hosts of friends, social and business, since he made Southern California his headquarters.

B. T. Harrison, a Martinez trap shooter, offers to raffle an L. C. Smith gun and leather case. Tickets, of which there will be issued 100, are \$1 apiece and the winning card will be determined by terminal numbers in the June Mexican lottery drawing. Thos. L. Lewis, 86 First street, will furnish further particulars.

Trade Notes.

The following summary of shooting averages are interesting to trap shooters generally:

Spirit Lake, Ia., May 11th, 12th and 13th, Fred Gilbert, first general average, 616 out of 650, shooting Du Pont Smokeless. First amateur average, C. M. Powers of Decatur, Ill., 581 out of 650, shooting "E. C." Second amateur average, Ed O'Brien of Florence, Kansas, 570 out of 650, using "Schultze" powder.

Vicksburg, Miss., May 17th and 18th, Harold Money and Chas. G. Spencer, first general average, 385 out of 400, shooting "New E. C." First amateur average, E. Brady of Memphis, Tenn., 380 out of 400, shooting Du Pont Smokeless. Second amateur average, J. A. Skannall of Shreveport, La., 379 out of 400, shooting Du Pont Smokeless.

Toledo, Ohio, May 18th and 19th, George Volk of Toledo, first general average and first amateur average, 295 out of 320 targets, shooting Hazard Smokeless. Second general average, R. L. Trimble of Covington, Ky., 290 out of 320 targets, shooting Du Pont Smokeless. Third general average, Max Hensler of Battle Creek, Mich., 285 out of 320, shooting Du Pont. Second amateur, F. E. Foltz, 282 out of 320, shooting Du Pont. Third amateur average, Kenton Johnson, 281 out of 320, shooting Hazard.

The Savage 22 caliber single shot rifle has just been placed on the market by the Savage Arms Company, Utica, N. Y. It shoots the C. B., short, long and long rifle cartridges and, as with all Savage rifles, has some new mechanical features. It is an excellent

little gun to take into camp or away on your vacation as a companion piece to your big game rifle. It goes nicely into your pack and is well worth the price for which it sells—namely \$4. The same "Savage Quality" all through.

Parker Bros., the oldest makers of shotguns in the United States, feel justly proud of the victory recently won by Mr. Edgar J. Nalle. Mr. Nalle, shooting the Parker gun at 30 yards rise at the State shoot at Houston, Texas, May 3d and 4th, won the diamond medal, emblematic of the live bird championship of the State of Texas, with a straight score of 20 live birds, shooting at 30 yards rise. As live bird shooting is the most severe test that a shotgun can be put to, Parker Bros., the renowned makers of the famous "Old Reliable," have reason to feel proud of the performance of Mr. Nalle, shooting the Parker gun.

At the Houston shoot above referred to, Mr. M. E. Atchison of Giddings, Texas, won the high average May 2d to 6th inclusive, heating out the whole field of amateurs and professionals. Mr. Atchison is a strong advocate of the Parker gun, and loud in its praises of its merits.

At Junction City shoot on May 6th, for the Kansas State Championship, 20 live birds, Mr. S. L. Paxton, with the Parker gun, of Great Bend, Kansas, carried off the honors, and was high man, winning the State Championship. This is another State Championship won by the Parker gun in the same week, making two State Championships at live birds. Live bird shooting is the severest test of a shotgun, and the Parker heads the list.

A sweeping U. M. C. victory. The initial shoot of the Pacific Coast Trap Shooters' Association was held at Ingleside, May 29 and 30, 1904. There were 94 contestants; of this number 79 used U. M. C. paper shells exclusively, 15 used U. M. C. and various makes.

A notable feature of the tournament was the repetition of straight scores of 20 targets made by many

contestants. The Golden Gate Gun Club five-men team, consisting of Messrs Nauman, Webb, Feudner, Reed and Klevesahl made a total of 95 out of 100, and won the Union Gun Club trophies, using the U. M. C. "Magic" shells. The Golden Gate Gun Club three-men team, consisting of Messrs. Nauman, Feudner and Webb made a total of 57 out of 60, winning the Golden Gate Gun Club trophy, using U. M. C. "Magic" shells.

C. C. Nauman, of San Francisco, Cal., shooting from the 18 yard mark made a continuous run of 85 breaks, thereby making the longest straight run of the two days' shoot, using U. M. C. "Magic" shells.

The first day highest average was made by Mr. J. W. Bradrick, of San Francisco, Cal. The second day highest average was made by Mr. C. C. Nauman, of San Francisco. The highest average for the two days was made by C. C. Nauman. Both shooters used U. M. C. "Magic" shells.

In the extra event, the contest for the Bekeart trophy at 100 birds, eight shooters entered, six of whom used U. M. C. "Magic" shells; the shoot resulted in a tie between W. H. Varian, of Pacific Grove, and A. H. Webb, of Emeryville, scoring 96 out of 100 birds, each using U. M. C. "Magic" shells.

The contestant at this open-to-all tournament came from all parts of the State, and the remarkable showing made is conclusive of the wide and deserved popularity of the U. M. C. goods, demonstrating that no purely local causes contended in any way to this most successful use of the above ammunition.

At the live bird shoot of the Kimball-Upson Tournament, held at Sacramento, Cal., on Saturday, May 23, '04, there were 35 contestants, 13 of whom used U. M. C. "Magic" shells. The second and third days of this tournament were devoted to blue rock shooting. There were 74 contestants, 32 of whom used U. M. C. "Acme," "Magic" and "Monarch" shells. Mr. Glen W. Gibson of Williams, Cal., was the second high average with 83%. He also made the remarkable run of 77 straight breaks in pool shooting, using the U. M. C. "Magic" shells.

Shooters of Winchester goods, as usual, carried off the honors at the seventh annual Northern California Trap Shooting Tournament. Of the 78 shooters that faced the traps at this tournament, 57 shot the Winchester "Leader" shells and 28 used the Winchester "pump" gun. The live bird championship medal, emblematic of the champion live bird shot of Northern California, which was shot for on the first day of the tournament, May 25th, was tied for on straight scores by F. J. Rushtaller, Jr., of Sacramento, D. L. Gray of Shingle Springs, D. Barrett of Lincoln and J. W. Humble of Gridley. In the shoot off Mr. Rushtaller, shooting a Winchester "pump" gun and Winchester "Leader" shells, won. Three of the four above named gentlemen who tied on this medal shot the "Leader" shell. The Kimball-Upson Co. Trophy, shot for on the second day of the tournament, May 29th, was captured by J. W. Humble of Gridley after shooting off a tie with "Jones." Mr. Humble shot a Smith gun and "Leader" shells. The first prize in the big merchandise event of the first day, which was a Winchester "Trap" grade "pump" gun donated by the Kimball-Upson Co., was captured by M. E. Phillips of Colusa shooting a Smith gun and the "Leader" shells. Mr. Phillips made the only twenty straight in this event. Of the remaining twenty-three prizes in the merchandise event, nineteen were won by shooters using Winchester "Leader" shells. The inanimate championship medal, emblematic of the champion target shot of Northern California, shot for on the closing day of the tournament, May 30th, was won by O. Hellman of Dunsmuir with a Winchester "pump" gun and Winchester "Leader" shells. Mr. Hellman made the only twenty straight in this event. The first prize in the merchandise event of the last day, which was an L. C. Smith Hammerless gun, donated by the Kimball-Upson Co., was captured by F. Burgi of Willows, with a Winchester "pump" gun and the "Leader" shells. Of the remaining twenty-two prizes in the merchandise event, seventeen were won by shooters who shot the "Leader" shells. The team trophy (five men to the team) was won by Gridley with the score of 68 out of the possible 75. This team was composed of J. E. Haugh, J. W. Humble, A. Johnson, G. Thomason and H. Hazelbrush. Three of the five men on this team shot the "Leader" shells. The high average medal of the tournament was captured by O. Hellman of Dunsmuir with a Winchester "pump" gun and Winchester "Leader" shells. Mr. Chas. Baird, the armless "pump" gun shooter, gave exhibitions of shooting each day of the tournament. On the first day he scored 21 out of 25 at single targets and 6 out of 10 at doubles. On the second day he scored 23 out of 25 at single targets and 7 out of 10 at doubles, and on the closing day he scored 22 out of 25 at singles and 7 out of 10 at doubles. Mr. Baird's work with the "pump" gun is wonderful. He is the only known armless shooter in the world. Through an accident in a thrashing machine some ten years ago he lost his right arm close to the shoulder and his left arm above the elbow. His Winchester "pump" gun is especially equipped with straps, metal framework, trigger pulling lever, etc., to fit his requirements and the way he operates the gun and shoots is a most wonderful exhibition.

An American duchess is among the titled patrons of the British Ladies' Kennel Association. The list of ladies who have consented to act as vice-presidents for that association is as follows: H. H. Princess Victoria of Schleswig-Holstein, H. H. Princess Dolgorouki, the Duchess of Marlborough, the Duchess of Newcastle, the Duchess of Sutherland, the Countess of Galloway, the Countess of Shaftesbury, the Countess of Londale, the Lady Algernon Gordon Lennox, Lady Gordon Cathcart, and the Hon. Mrs. Alwyn Greville.

Jackson's Napa Soda does not tangle the feet.

The Law is Constitutional.

WASHINGTON, May 31.—The Supreme Court of the United States in an opinion by Justice White to-day upheld the constitutionality of the margarine law.

Leo W. McRay used the Government in the Southern District of Ohio to recover \$50 paid by him as a penalty for the sale of a fifty-pound package of colored oleo-margarine containing a stamp-tax of three-quarters of a cent a pound instead of 10 cents a pound. McRay's counsel argued first, that, although the "oleo," was colored to look like butter, the color was obtained by the use of butter which was by itself artificially colored, but the use of which as an ingredient in the manufacture of "oleo" was authorized by law; and, second, that the tax of 10 cents a pound was prohibited and confiscatory and an attempted federal usurpation of the police powers of the States.

The court said that the tax contemplated the finished product and not the details of manufacture. If the "oleo" was colored it should have the higher tax

validity of the law and the tax. The Chief Justice and Justices Brown and Peckham dissented.

To Meet at Sacramento.

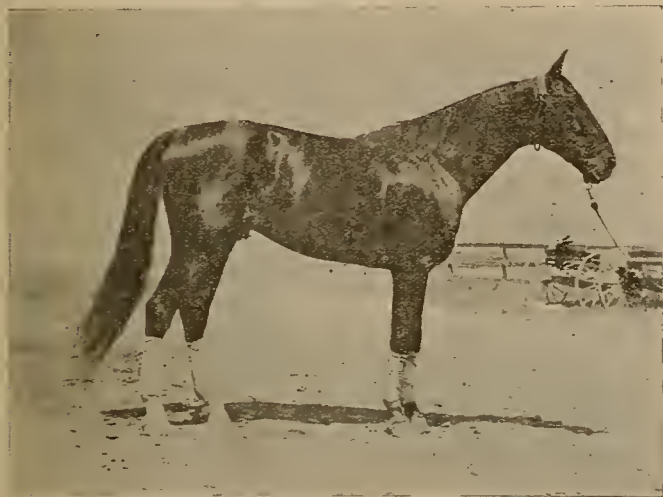

The California Promotion Committee has called a meeting of the executive officers of all the commercial organizations of California to be held on Saturday June 18th, at Sacramento, in the Senate Chamber.

There are in California more than 140 organizations engaged in development work, and as the officers have been urged by the California Promotion Committee to attend this meeting, it is expected that a large attendance will be present.

The object of the meeting is to bring together all those engaged in development work for the exchange of ideas, and for bringing about a more effective means of advertising the State. Governor Pardee and other leading men will address the meeting. Subsequent meetings will be held in various parts of the State.

Col. Marzen Retires.

Col. Marzen of Lovelock contemplates disposing of his Nevada holdings, which will probably mean the dispersal of a herd all too rarely found in the West. He will make his home in California.

YOUNG SALISBURY BY JUDGE SALISBURY.

An American Trotter that has been winning races in Australia.

and if uncolored the lower tax, regardless of how obtained. As to the amount of the tax, the court said that it was settled that the court could not consider the amount of any tax fixed by Congress, this being purely a political function.

The court therefore affirmed the judgment of the lower court, upholding the

The *Livestock and Dairy Journal* commenting upon this fact says that it is not surprising that after a life of activity Mr. Marzen should look with longing eyes toward that Golden State which first attracted him, and decide to retire from business. He will no doubt retain that interest in the establishment of a standard of Shorthorn and Hereford excellence which has been so fascinating to him.

It takes time to establish a herd and get everything in order, unless a man has large capital. Take a walk through a dairyman's stable or pen and see there twenty, thirty or even forty good milk cows, all well trained and filling the milk pails with rich milk and commence to figure out what it would cost to buy such a herd. Several animals for their butter products alone will be worth to their owners \$100 or more while others are worthless and to a poor man it seems impossible to get such a herd together to call his own, but it is one of the easy things in dairying, only of course it will take time and much judgment in the way of breeding.

A factory is to be started in Fresno which will grind dry alfalfa in such a manner that it will be reduced to an almost powdered form and then sacked and put on the market to feed to all kinds of stock. With it will be mixed the necessary ingredients to make the feed substantial enough to take the place of other stock foods.

NORICE BY CHAS. DERBY.

A California mare that has struck a winning gait in New Zealand.

Acting under the terms of the irrigation reclamation law, the Secretary of the Interior has set apart \$8,100,000 of the reclamation fund in connection with the following projects. For the Yuma project on the Colorado river, covering about 85,000 acres in Arizona and California, \$3,000,000. The Belle Fourche project in South Dakota, 60,000 acres, \$2,100,000. The Malleur project in Oregon, 75,000 acres, \$2,000,000. The Fort Buford project on the Yellowstone river, \$1,200,000. This appropriation will leave only about \$6,000,000 of the reclamation fund of \$27,000,000 to be disposed of.

The dairy output of California increased \$2,212,596 in 1903 as compared with 1902. Counties that produced 1,000,000 pounds of butter or more in 1902-3, were as follows: Humboldt, 3,935,786; Marin, 3,922,318; Sonoma, 2,540,489; Los Angeles, 1,996,438; San Luis Obispo, 1,369,186; Sacramento, 1,241,897; Fresno, 1,293,168; Stanislaus, 1,162,561; Tulare, 1,090,448.

A calf is at its best for veal when from 6 to 10 weeks old, and it has been raised by its mother. In some States there is a law against selling veal less than six weeks old. Hogs may be used at any age, but are more profitable when killed at from 8 to 12 months old.

The Black Minorca is not liked by some because of the black legs, but it makes a very fine table fowl and the black pin feathers they have may easily be seen. They have a fine velvety, white pink skin that is much liked by many.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

For meat purposes the market calls for an animal which will, first of all, dress without excessive offal or waste.

Sober up on Jackson's Napa Soda.

WILL NOT SCAR OR BLEMISH.

GOMBAULT'S CAUSTIC BALSAM

is the safest and most effective lotion or blister for ailments of

HORSES and CATTLE

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Gombault's Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

A Shorthorn Milk "Pedigree."

Mr. Robert Ashburner, of Lakeville, Sonoma county, writes for the *Dairy and Produce Review* as follows: A man wants to breed cattle for special dairy purposes, of a kind that will keep in better condition than special dairy-bred cattle generally do, i. e., easier kept, thinks that the dairy-bred Shorthorn will come nearer to his ideal breed than any other, provided he can buy just what he wants to make a right beginning with, which will not be an easy matter. Most people know that Shorthorns that have been bred for dairy purposes are not easily found, and then it is not often that a breeder will sell his best cows at any reasonable price, if at any price, but as hulls bred in a herd of that kind are mostly for sale for breeding purposes, it is upon the whole easier to get a hull bred that way than to buy first-class cows of the same breeding.

We hear a good deal nowadays about tabulated Shorthorn pedigrees, on paper. I give one on milk bucket performance as follows:

A hull calf has for its dam a young cow that gives fifty-five pounds of milk a day, and a half sister out of the same cow gives fully as much. The dam of these two cows, and the grandam of the hull calf, gives regularly when fresh sixty to sixty-five pounds of milk a day, when grass is good, and her dam gave in thirty days—May 10 to June 9, 1893—1503 pounds of milk, and a poor, sandy land pasture and a little grain, about seven or eight pounds of bran and barley a day. By a judicious increase in the grain ration I think her milk might have been increased about 100 pounds for the thirty days. The dam and grandam of this cow did not give as much milk, but I have no record of the quantity they gave, but it was five gallons a day or over, but the next dam, the sixth from the hull calf above mentioned, gave twenty-eight quarts of strained milk a day, after she came into my possession in 1871. That is as far as I know, of my own personal knowledge, but I was informed by responsible parties that the next two dams, the seventh and the eighth, were very good cows and also great milkers. The ninth dam was bred by Mr. Robert Ball, England, and imported by Mr. George Vail of New York, some fifty years ago. Mr. Vail was a great stickler for milking qualities and imported cattle from the herd of Thomas Bates, of Kirklevington, as early as 1835.

As regards the hulls used, they have all been out of cows that were good milkers, giving six to seven gallons of milk a day. The sire of the calf has two half sisters out of the same cow; one gave fifty-five pounds of milk a day and the other one forty-five pounds a day in September, when there were no green feed, and another half sister, all out of the same cow, made nine and nine-tenths pounds of butter, when a two-year-old, in a seven days' test at the State Fair in 1895.

All animals referred to above are, or were, good shaped beef cows, say 1300 to 1400 pounds live weight, without any extra feeding for beef purposes. The hulls used have also been good beef animals, two of them that were out of cows that gave six or seven gallons of milk a day, respectively, being winners of Sweepstakes premiums at the State and other fairs, while other hulls used were out of cows that gave six gallons of milk or more a day when newly calved and for some time after. In regard to the quality of the milk, the only tests I have had made were made at Sacramento, when some of the dams referred to above, as well as some others, tested 4% fat, while three old cows in another year tested as low as 3.50%, but that was no fair test considering the circumstances under which it was made; there seemed to be more than usual to excite the cows that year. One of the cows that was giving over fifty pounds of milk a day before leaving home gave over thirty pounds a day by the time

the testing had fairly got under way, and it is generally the case when a cow gives less milk, through some exciting cause, her milk is poorer in cream, so that the loss counts in both ways.

In an experiment conducted by Mr. E. C. Salisbury, who is making a study of bacteria in their relation to cleanliness in the dairy, a dipper was thoroughly scalded by steaming and then allowed to dry. With this as a standard, says *Farmer's Guide*, the following results were obtained: After wiping with a new, clean cloth, there were three and a half times as many bacteria on the dipper as when the dipper was allowed to dry without wiping. When wiped with a slightly dirty towel, there were 295 times as many as when unwiped, while with a soiled towel, there were 3,932 times as many as when allowed to dry without wiping. Professor Van Norman says: "While the vessel allowed to dry is not as bright as the one wiped with the towel, its sanitary condition will be better if left unwiped. Since the keeping quality of milk depends on excluding the bacteria and keeping the milk cool so that those which get in, in spite of care, can not grow rapidly, it is evident that care and attention in the proper cleaning of vessels is an important factor in quality of milk."

From Vienna, in Austria, comes the news of an invention which is exploited by several factories there. They are said to use up daily 20,000 quarts of skimmed milk to make substitutes for marble, ivory, celluloid, hard rubber, etc. The milk otherwise almost valueless is treated with formalin and other substances, which process causes it to form into a white, easily handled stone which is unaffected by either fire or water. It is entirely elastic, and can easily be cut. All sorts of articles for use and ornament are made of this substance, among others paper boxes, billiard balls, cigar holders, knife handles and many other articles.

While there is considerable difference of opinion as to the advisability of grinding grain for some farm animals, it is generally conceded that it pays to grind for the dairy herd. A cow giving a large flow of milk needs all her energy to secrete her milk and to digest the large amount of feed which must be used for that purpose. It is for this reason important to make the process of digestion as easy and rapid as possible. A good grinder, with suitable power to run it, should be part of the equipment of every well conducted dairy farm.—*Missouri Experiment Station.*

Prof. W. H. Henry in his observations among a lot of Wisconsin farmers tells that out of fifty who supplied a local creamery with milk, twenty-six read a farm paper with a dairy department, the others did not. The reading dairymen made an average of \$51 per cow and the others \$16. Reading and studying is not very hard work, but it surely seems to pay from the above figures. The trouble with our farmers is that they work too much, but don't work intelligently, but if that State will keep on turning out over 600 students from its agricultural college each year, a change is sure to come.—*Dairy and Produce Review.*

Broilers for city market are quickly obtained by breeding some of the lighter fowls. A Mediterranean will mature quicker than an American or Asiatic. For early winter broilers the Leghorn is strongly favored by some breeders.

The color of feed influences the color of the yolk of eggs. Yellow corn makes yellow yolks and white corn produces yolks of a lighter color. Breeders of white poultry are of the opinion that feed affects the color of the feathers and quills.

WESTERN MEAT COMPANY

Packers and Exporters, SAN FRANCISCO, U. S. A.

A New Clod Masher.

J. H. Backus of this place is operating a clod masher in his orchard that is a very unique implement. It was constructed by his father-in-law, T. C. Estee, and consists of two round drums or rollers of about two feet diameter, in a frame. The front roller is studded with three-inch iron spikes which stab or break the clods, while the rear roller has a fluted or ridged surface, which completes the work, leaving the ground well pulverized and in fine condition. The draft is light and those who have seen it in operation pronounce it a success.—*Sutter Farmer.*

The breed of a fowl determines its usefulness along certain lines. For broilers some of the best and most satisfactory results have been obtained from Leghorn crosses. Leghorn crossed on the common mongrel has produced good broilers.

The meat of poultry is darker in summer when the fowls run out and get all the green food they want. In this way they obtain considerable iron in soluble form.

For Sale. COAL BLACK FILLY BY A son of Directum 2:05¼; is very handsome and stylish. Would make a very fine saddle animal. Broke to drive. Apply to J. H. RAYKES, San Leandro.

Horses will drink several times a day, while being worked. This argues that they should have it, if it is convenient.

It is claimed that crops of hemp will drive all weeds off from land, and trials will be made in Nebraska this year to see if it cannot also be made profitable for rope and twine.

Secretary of Agriculture Wilson has issued an order, prohibiting the importation of hay and straw from Continental Europe, on account of the danger of the introduction of foot and mouth disease.

The old theory that sour swill is necessary to the welfare of hogs is being abandoned. They eat it and seem to relish it. But the best results are from clean, sweet, wholesome food, in clean places.

It is growing quite common to haul the cream to the creamery, instead of the milk. It takes a heavy wagon and a good team to haul much milk to and from the skimming station. Hand separators are being largely used, and the milk left at home.

While a good deal may be told about a milk cow from her general appearance, the final test is at the pail. One may judge something of a horse by his appearance, but the test is on the track. Fill the pail, and test the milk, is the only safe way to tell what a cow is worth.

The United States Department of Agriculture has issued Bulletin No. 190 on the disposal of animals dying of contagious diseases. It says: "The most effective means of disposing of such bodies are, deep burying with the free use of lime, and burning. We advise the latter method in all cases of death from black-leg, glanders, anthrax or hog cholera. It is almost no trouble to burn a hog, a few sticks of wood and a quart of coal oil being sufficient to start the carcass to consuming itself. A horse or steer can be rolled upon four or five old fence posts to make a draught under it and then with an old ax cut holes to allow the pouring of coal oil into the abdominal cavity and lungs. Two gallons will be as much as necessary in ordinary sized animals. Let the body lay an hour to allow the oil to penetrate, throw on a few arm loads of old boards or any kind of wood, also a few bundles of corn stalks or some straw. Sprinkle with another half-gallon of oil and fire."

When a horse is shod, the wear of the old shoes should be carefully noted, that the new shoes may be set so as to counteract any defect.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.
It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. I thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.
will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.
TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

LIMONERO

RECORD (3) 2:15½

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By PIEDMONT 904 (sire of 6 in 2:20 list and of dams of Fanny Wilcox 2:10½, Alta Vela 2:11½, etc., etc.); dam LULANEER (dam of Limonero 2:15½, Bion 2:19½) by Electioneer 125.

LIMONERO 2:15½, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. LIMONERO 2:15½ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Azinite and Futurity. LIMONERO 2:15½ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,
Owner.

J. H. WILLIAMS,
University Station, Los Angeles, Cal.

NUSHAGAK 25939

Sired by Sable Wilkes 2:18, sire of 35 in 2:30. Dam, Fidelia (dam of Fidette 2:28½, dam of Mary Celesta 2:17½) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancet, son of McCracken's Blackhawk. **FEE \$50** for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08½, James L. 2:09½, Edith 2:10, etc.); dam Woodflower (dam of Seyler 2:15½) by Ansel 2:20, son of Electioneer; second dam Mayflower 2:30½ (dam of Manzanita 2:16, Wildflower 2:21 and 5 producing daughters) by St. Clair 1675. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. **FEE \$30** for the Season.

Tha above horses will make the Season at WALNUT GROVE STOCK FARM.

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08½)

SIRE, DIRECT 2:05½, sire of 54 in the list, including Directly 2:03½, Direct Hal 2:04½, Bonnie Direct 2:05½, Prince Direct 2:07, Directum Kelly 2:08½, Trilby Direct 2:08½, King Direct 2:09½, Rey Direct 2:10, etc., etc.

DAM, FRANCOISCA (dam of I Direct 2:12½, Sable Frances 2:15½, Gaycessa 2:26 and Earl Medium, sire of May Bud 2:13½, Tom Martin 2:14½, Kanawah Star 2:14½, Lucy Stokes 2:18½, Goneril 2:34½, Pearl Medium 2:39, etc.) by Almont 33.

Second Dam, Frances Breckenridge (dam of Maxims 5:15, sire of 8 in list) by Sentinel 280; third dam by Bayard 58; fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by imp. Glencoe.

Will make the Season of 1904 at Dennison's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee \$50. I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

NEERNUT 19810

Record 2:12¼ (Sixth Heat) 2:14

Sire of Neeretta 2:09 1-4

NEERNUT has proven a great sire. His colts are all fast. He now has eighteen colts with race records, matinas records or public trials from 2:09½ to 2:30. Neernut and his colts are of the very best disposition and have good size, looks, feet, legs and style. We can show as fine a lot of colts as can be found in California. Neernut is by Albert W. 11333 (son of Electioneer), dam Clytie II by Nutwood. He will make the Season at my place in Santa Ana.

Terms: SINGLE LEAP, \$25; SEASON (with return privilege) \$40. To insure a living foal, \$50. He is a sure foal getter. Address

GEO. W. FORD, Santa Ana, Cal.

A. C. DIETZ, Prop., Santa Paula, Cal.

SEYMOUR WILKES REG. NO. 0232.
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12 1/4
and Joe Eviston (3) 2:22

Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and innearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 787. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

BAYSWATER WILKES 2:25 1/4 Son of Sable Wilkes 2:18
and Fanny Bayswater,
Dam of 2 in 2:30

Sire of KELLY BRIGGS 2:10 1/4

WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL.

Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Aristo, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Breed to BAYSWATER WILKES and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address

CAMPBELL'S

EMOLLIO IODOFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is no superior.

The horse CAN BE WORKED AS USUAL.
For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING.

In this respect there is no Gall Cure offered which can justly even claim to be a competitor.

We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year.

This increase was entirely due to the MERITS, and from it was fully justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the feet which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Cincinnati.....Sept. 26 to Oct. 1
Memphis.....Oct. 17 to Oct. 27

OVER TWO PAGES OF TYPE are required in this issue to print the big lists of entries received for the Breeders Santa Rosa meeting, the Pleasanton meeting, and the State Fair harness races. The San Jose and Vallejo entries, which had the same generous lists, have been printed in previous issues. A glance at the long lists will make every admirer of harness racing feel good, and will drive the pessimists to the tall timber who said there could be no California circuit arranged this year. These big entry lists mean profitable meetings from a financial as well as a racing standpoint, and will encourage the associations giving them to be in line next year, and will also encourage other associations to hold meetings. The circuit of harness racing through California, Oregon, Washington and Idaho, which has been arranged by the enterprise and pluck of a few organizations in each of the states mentioned, is the best ever arranged on the coast. The wonder is that it is so extensive and that the dates are so well arranged as it just happened so, as far as California is concerned, as the associations here had no understanding with those of the north. The dates come in just right, however, so that after our State Fair ends, the Oregon State Fair will begin, allowing a full week between the two meetings, giving California horsemen plenty of time to ship north. There has never been a better feeling among harness horse owners, trainers and the associations than exists this year and all are pulling for a successful circuit and good racing. With such enthusiasm there is certain to be a good attendance at every meeting on the circuit. The Pleasanton people say they will have a record breaking crowd; San Jose's live citizens who took such interest in securing the first Breeders meeting promise that the gate receipts will be the largest for many years; Manager Thos. Smith says the Vallejoites will fill his grandstand every day and the infield will be well filled with carriages and other vehicles; Santa Rosa will have the best meeting in its history, and the horsemen there say they will have the largest gate receipts of any other place on the circuit except the State Fair; the big entry list received for the harness races at Sacramento will draw the best atten-

dance the State Fair has seen in years. It is going to be a successful circuit. The racing will be high-class and the contests close. Miles below 2:10 may be trotted, and will be paced. If you want a vacation that will be the most enjoyable you ever had, take a few weeks off and make the trip through the California circuit.

AFTER THE STATE FAIR is over quite a number of the California horses will be shipped to Salem, Oregon, to race at the Oregon Fair and on through the northern circuit. There will be many strings that will not make the northern trip however, and these owners and trainers should read the Hanford program printed in this issue. There are good big purses offered at Hanford this year. The wise horseman will not overlook them.

THE ANNUAL MEETING of the Pacific Coast Trotting Horse Breeders Association will be held at the office of the Secretary, 36 Geary street, in this city on Monday evening next. A new Board of Directors is to be elected. Every member should attend this meeting. It will be an important one for many reasons.

More Stakes in the North.

The King County Fair Association, Seattle, Wash., has announced two additional stakes for its harness meeting, Sept. 19th to 24th. The entries will close July 2d. The new stakes are the Seattle stakes, for 2:11 trotters, \$1250, two-mile dash; and the Evergreen stakes, for 2:14 pacers, \$1250, one mile and a half dash. This makes a total of nearly \$6000 offered by the Seattle association for early closing stakes. There will be two or more harness races each day.

The opening of a liberal stake for 2:11 trotters is one of the best moves made by any of the North Pacific associations, as it is about time the big stakes were being offered for horses which have proven themselves high class. For the past few years a trotter or pacer with a low mark has been a poor money-making proposition, there being but little opportunity to race him. This should not be, as a good horse certainly ought not to be rendered useless on the race tracks because he has a fast mark, and a horse must necessarily get a fast record to be considered a good horse by the general public. It is said the Oregon State Fair will also offer a big stake for fast trotters, and should this be done, horsemen will undoubtedly show their appreciation by entering liberally in these stakes.

The advertisement of the Seattle stakes appears on another page and horsemen should read the conditions carefully.

Mr. Chas. W. Capplemann, of Victoria, B. C. writes us under date of June 4th, that the three-year-old filly Crosscut, by Beau B. 2:16½, dam Pacita 2:26, that he purchased last July at the Santa Rosa Stock Farm sale in San Francisco is rapidly going to the front and he has been offered a nice figure for her, which he has refused as he intends to develop her. She is greatly admired by the Victoria horsemen. Mr. W. G. Stevenson's colt Capt. John by Tennysonian, dam Fanny Putnam 2:13½ is a remarkable colt and will "be there" next year. Both these colts are being worked by John Wellington a good man. Mr. Capplemann adds that C. A. Harrison, who is a valued friend and correspondent of the BREEDER AND SPORTSMAN, has the swell hotel of Victoria in the Hotel Driard, and is doing well.

It begins to look as if the sweepstake adjunct to the Breeders Futurity for the foals of 1901, as suggested in these columns by Mr. T. J. Crowley of this city, will be a go. A dozen or more owners have expressed their willingness to enter such a stake and it is thought at least fifty will come in and make payment by the time the date of closing, August 1st, arrives. Fred Hahn of Oakland, says his \$25 is ready and he thinks he will be able to beat Mr. Crowley's colt to the wire. Chas. Durfee never refused to go in a stake of this kind in his life and will be on hand with his \$25 and is willing to make it \$50 or an even hundred. Mr. R. P. M. Greeley says his Searchlight colt out of Minnie Wilkes is good enough to enter in any stake and like Barkis he "is willin'." Mr. Crowley's \$25 will not take cold for want of covering on August 1st.

Secretary Robert Cosgrove of the Spokane Interstate Fair Association writes us that a fire on the evening of May 31st destroyed their grandstand, betting room, judges stand, timers stand, vaudeville platform, ticket offices and three large tents stored in the grandstand. The Spokane High School held an athletic meet at the track on that day and it is presumed the fire originated from a cigar stub or cigarette thrown down carelessly by some one. Mr. Cosgrove adds: The loss was a little more than half covered by insurance, and we will at once rebuild our grandstand, and will endeavor to make it more convenient and somewhat larger than it was before. We will have it ready for occupancy at least three or four weeks before our Fair commences so that we shall be in good shape for the meeting this fall in spite of this severe loss.

Bonnie Belle by Williamson's Belmont out of the famous old race and broodmare Liz Givens by Imp. Langford, was one of two or three mares with which the breeding of trotters and pacers was begun years ago on the Meek Farm at Haywards. A big list of standard performers trace to this old mare, among them Janice 2:08½, Clipper 2:06 and Dan Burns 2:15. Bonnie Belle has founded a family that will become more famous in the future. Get some of the fillies descended from her that will be sold at the closing out sale of the Meek Estate horses at Fred H. Chase & Co.'s salesyard, 1732 Market street, Thursday evening June 28th. Send to Chase & Co. for a catalogue. Thirty-four head of yearlings, two and three-year-olds will be sold.

Was On the Right Track.

That J. Malcolm Forbes laid the foundation of his breeding establishment on correct lines is more and more apparent each day. The recent sale furnished convincing proof that such was the case, for the public was asked to pass on the question and the answer was overwhelmingly in the affirmative. The public is not apt to be mistaken in matters of this kind; as a rule its judgment is unerringly correct. In the matter of successfully conducting a great breeding farm the most important question to confront the proprietor is that of the elimination of the "culls." In other words, the successful breeder is the one who more nearly succeeds in making every colt a perfect one. Just so soon as it is possible for a breeder to find a fair market for each and every foal, just so soon the establishment is placed on a paying foundation. The rearing each year of a few colts which find new owners at high prices is not a sign that the breeder is an unqualified success. There have been instances without number where a nursery of trotting stock has turned out phenomenal youngsters, but accompanying these have always been a lot which have sold for a mere song. Of course it has not always been the case that the high-priced ones have turned out to be the great race horses and money earners. But in accounting for the deficit at the end of the year it has too often been found that the raising of a lot of no account youngsters of no particular merit has turned what might have been a profitable business into more or less of a lottery with the blanks greatly predominating.

These youngsters, of royal lineage, have too often proved to be of no value either for race, road, business or family use. Barring their pedigree they have turned out to be just plain, ordinary scrubs. The ideal ever present in the mind of the breeder is to turn out annually a crop of foals of individual excellence. It is an Utopian fancy but nevertheless one eagerly striven for. Just how near this can come to being attained was demonstrated last week. The average for the Forbes horses was a large one and was in part accounted for because of the number of high class horses that had demonstrated their worth on the race track and in the harness. But there was another highly important factor and that was the superb condition shown by the youngsters. Of all these there was but one that could not show individuality of a high order when harnessed. That one was out of the running because of an accident. Here then was a bunch of colts each and every one of which possessed individual merit enough to attract favorable notice of critical purchasers. And in this connection it is well to bear in mind that the colts sold represented the entire output of the farm. None were held back for future development. They were thrown on the market absolutely as they were.

It was a remarkable showing. Perhaps the more so from the fact that it was not many years ago that the breeding venture of Mr. Forbes was more or less openly derided. He had paid the top price for a trotting stallion and had made other high priced investments. Up to that time he had produced nothing sensational. Hardly anything that was more than ordinary. But with the coming of Nico there was a change in the tone of the critics. And from that time out the Forbes horses were prominently before the public. The secret of this success was that Mr. Forbes was ruthless in weeding out his stock. If a high priced mare proved not to be his ideal as a matron she was sold regardless of what she had cost. He was rid of her and on the lookout for something to take her place. Occasionally he made a mistake in selling as he did in purchasing. But he was on the right track. He demanded the best and paid the price. Last week it was shown that he bred the best. Every colt had an individuality of its own which made it of value in some one's eyes. Others can accomplish as much if actuated by the same high purpose and disregard for the every day critic. During the fifteen years Mr. Forbes was engaged in breeding trotters he accomplished much. How much greater would have been his success had he lived fifteen years longer?—Chicago Horseman.

Strike!—if they don't give you Jackson's Naps Soda when you ask for it.

JOTTINGS.

SANTA ROSA TRACK is in fine shape for the breeders meeting which is to be held there from August 17th to 20th. Never has this popular track been in such perfect condition as now, and the many improvements made during the last few months under the supervision of the owner, Mr. Ira Pierce, have made it the most complete of all the training grounds for harness horses in the State. Several of my Santa Rosa friends had told me of the order of things at Santa Rosa Stock Farm, but I must admit that I was agreeably surprised on a visit to the track last Saturday to see so many improvements. The new three quarter mile track inside the mile ring, which was built especially for winter training, is complete in every detail. A substantial new fence has been built around it and the grading finished so that the surface is as near perfection as possible. The sandy clay soil of which this winter track is made was hauled several miles at a big cost, but it has made a wet weather training course that cannot be excelled anywhere. The trainers who have worked their horses over it all say that no matter how heavy a long continued rain may fall, horses can be worked at speed over it within an hour after rain ceases falling. With such a track Santa Rosa should be one of the leading training centers on the Coast next winter.

The mile track has also been greatly improved. Six inches of new loam was put over its entire surface a few months ago, new fences have been put up, all the buildings neatly whitewashed, and a general cleaning has been done, until the grounds have a surprisingly neat appearance. The mile track is being thoroughly worked and is now in condition to step fast miles over, but Superintendent Frank Turner states that work will be continued until the day of the meeting when it will undoubtedly be the fastest track on the Pacific Coast and at the same time perfectly safe. The tall hedge of cypress trees that grow the entire length of the back stretch has been trimmed and cut back so that none of the limbs project onto the track, but the trees were left tall enough to make a perfect wind break, a purpose they have fulfilled for many years and been an important factor in making Santa Rosa track one of the fastest in the country.

One of the prettiest sights in the animal world is a bunch of sleek, handsome broodmares with foals at their sides from a few days to a few weeks old, and there is now in a big paddock at Santa Rosa Stock Farm about thirty such mares that have been sent to the court of Sidney Dillon, sire of the world's champion trotter. Seven or eight of them are the property of the farm, and the others have been sent from all parts of the State. They have foals by Stam B., Bonnie Direct and other high class sires at foot, and are running in grasses that are knee high. I never saw so many in one bunch without one poor one among them, and Superintendent Turner must give them all special attention. There was one slashing looking youngster that seemed, like Abou Ben Adam, to "lead all the rest." A snap shot was made of him which is reproduced on the front page of this issue of the BREEDER AND SPORTSMAN. No one ever saw a more magnificent looking baby trotter, and when Mr. Turner said he was By By's colt by Sidney Dillon we were ready to reply that he looked the part. By By, it will be remembered, is the \$10,000 broodmare by Nutwood. She is an own sister to Lookheart 2:08½, Nutwood's fastest trotter, and is the dam of Marengo King 2:29½, that worked a mile in 2:13 for Ed Geers at Memphis a few weeks ago. By By's dam was Rapidan, dam of three in list, by Dictator, her second dam Madam Headley, dam of Expert Prince 2:13½ and grandam of five in list, by Edwin Forrest and third dam by Mambrino Chief II. By By is a very handsome mare, and all her foals inherit a share of her good looks, but this youngster by Sidney Dillon struck me as about the most perfect young baby I had seen in a long time. If he don't make a fast one and produce fast ones, all these theories of breeding to the best to get the best go for naught. Keep your eye on this colt and see if he does not live up to his present prospects.

There must be about fifty horses in training at the Santa Rosa track. J. W. Zibble has fifteen head, John Quinn a dozen, Frank Turner, Dick Ables and Mart Rollins three or four each, and there are several stabled outside that are worked at the track. Among the latter is Mr. R. W. Peterson's trotter R. W. P. by Lynwood W., that will be seen on the circuit this year and is just now one of the "talked about" horses. I did not see him on my trip, but I noticed that every trainer and groom had a good word to

speak of him and they all agreed he would be a factor in his classes this year.

John Quinn has a string of a dozen, the property of different owners, and all looked in fine shape. Among them are a full brother and sister to Sonoma Girl, the mare by Lynwood W. out of Maud Fowler by Anteeo, that are owned by Mr. S. B. Wright of Santa Rosa. The filly is a three-year-old and very much like Sonoma Girl in conformation. Both these youngsters are great prospects. Quinn is also training a couple of youngsters by Lynwood W. out of May Ayers 2:23½, sister to Jasper Ayers 2:09. They belong to H. B. Smith of Ukiah, who owns their dam. The three-year-old has trotted a quarter in 33 seconds. Dumont S., the young stallion owned by Thomas Charlton of Ukiah, has grown into a handsome horse and is quite a trotter. A mile in 2:29 is the best that Quinn has given him this year, but he is a trotter that will get quite a low mark. He is a full brother to Sonoma Girl. And, by the way, this family of trotters are bound to be one of the famous ones before long. There must be four or five full brothers and sisters that have shown speed enough to take records with a little training. Maud Fowler is out of old Eveline by Nutwood that never had a colt that was not fast. Eveline is the dam of Rohlet 2:12, Ole 2:15, Tietam 2:19 and Maud Fowler 2:21½ and has three or four more that will enter the list. The bay gelding Wilmar by Wildnut, out of Sweetwater by Stamboul, owned by Mr. Williams of the Palace Hotel of Ukiah, is a handsome big three-year-old and a trotter "from the old home." As he was bred at Palo Alto, the slang phrase quoted has more significance than is apparent at first glance. The pacer Rose Thorn by Hawthorne out of a mare by Dexter Prince has been entered through the circuit in the slow pacing classes and acts like one that would more than pay her way. She is owned by Thos. Charlton and Mr. Quinn thinks well of her.

Dick Ables has a couple of good ones belonging to Mr. Geo. Kingsbury, proprietor of the Lick House, San Francisco. D. E. Knight is a five-year-old trotter by Lynmont, and Della K., a three-year-old by Silver Bow. Both are well entered on the California circuit and showing up well. Mart Rollins, the veteran horseman and trainer, is working a five-year-old gelding of his own that someone who wants an extra good road horse, should try to buy from him. The gelding is a nice large bay and is by Lynwood W. out of a mare by Silas Skinner 2:17. He is a trotter, having been a mile in 2:21, without much work. I don't know where there is a better all around horse for the road, and he'll do to race as he has speed enough to win, and never yet found a road too long for him.

J. W. Zibble, who has a string of fifteen horses at the track that he is being assisted in training by his son, spent more time telling me about the fine condition of the track, its many conveniences and the advantages of Santa Rosa as a place of residence, than he did about his horses. Mr. Zibble is very enthusiastic over Santa Rosa as a training place, and says the track is "the best ever." Prof. Heald's grand stallion Tom Smith 2:13½ is looking superb. Blackwood, a pacer by Baywood 2:10½, and owned by Mr. Mini, of Vallejo, will be seen in the big pacing stakes on the circuit this year. He looks like a good one. A five-year-old sorrel mare by Geo. Washington is a good green one and a bay two-year-old by Nutwood Wilkes out of a McKinney mare is one of the stable favorites. A black mare by Secretary is a promising trotter, and a five-year-old gelding by Prince Almont 2:13½ is carded to beat his sire's record. Mr. Zibble is handling several likely ones owned by Mr. George Warlow, of Fresno, that will be at the races this year and will doubtless give a good account of themselves as they look right and act right. Alessandro is a fine looking three-year-old, and a filly by Athabla and a two-year-old by Strathway are both in good shape. Mr. Zibble Jr. is giving his personal attention to some youngsters that will start in the stakes this year that look as if they will do.

Frank Turner, superintendent of the farm, knows a good thing when he sees it, especially if it is a horse. He saw a couple of Sidney Dillon yearlings for sale not long ago and bought them. One is out of Eveline by Nutwood, and the other out of her daughter. They look like miniature racing machines and are just being broke to harness. Mr. Turner is entitled to a lot of credit for the condition he has put the entire Santa Rosa Stock Farm in. It never looked better and every person at the track is speaking a good word for it and claiming it to be the fastest and safest track in America.

Dr. J. J. Summerfield the deservedly popular veterinary surgeon of Santa Rosa put me under obligations, as he always does, by devoting several hours of

his valuable time to showing me around and telling about all the good horses there are in Santa Rosa owned by other people. He had a good word to say for Sidney Dillon, Lynwood W., Stone Robin, Westington McKinney, McPherson, Frank S. Turner and every other stallion there is in a radius of fifty miles. I asked about his own horses, knowing he had two or three and we went around to his stable to have a look at them. In Don Sonoma 36459 he has one of the best bred trotters in the country. This horse was bred at Santa Rosa Stock Farm, but had the misfortune to break his off hind leg between the hock and ankle when a yearling. It was a compound fracture, but the Doctor made a pretty good leg out of what looked at first to be beyond repair. The sire of Don Sonoma is Valotta (sire of Frank S. Turner 2:28, trial 2:22, and Wayola, trial 2:20), by Geo. Norval, he by Norval, one of Electioneer's greatest sons. The dam of Don Sonoma is Belle Isle, dam of Palo Belle 2:24½, by Piedmont, second dam a producing daughter of Hambletonian 10, and third dam by American Star 14. This horse is a good looking and will sire speed. Dr. Summerfield's big imported French coach horse Darnetal II is looking the best I ever saw him. He is a grand big fellow, has won eighteen blue ribbons and beaten the best in the show ring on two continents. He was bred to quite a large number of mare last year and got every one to foal but one. The Doctor's pride, however, is a three-year-old Suffolk Punch that he bought as a yearling and has named Cotati. He is a very handsome sorrel of good size and splendid bone and will mature close to a ton. He is by imported Eneign out of Blossom by the imported Short horse.

The Kind that Bring the Money.

The New York Herald of May 7 contains an extended report of a recent sale of trotting bred carriage horses held by W. D. Grand at the New York Horse Exchange, during which thirty-four head, consigned by Tichenor & Co., of Chicago, sold for \$32,629, an average of \$959 per head. At this sale not a high-priced horse stood 16 hands, and this fact is mentioned as having a strong bearing on the statements lately made in this department, that: "The average good horse for carriage stands less than 16 hands." Among the thirty-four head sold by Tichenor & Co. only two horses stood at 16 hands, and they sold at an average of \$550, which was \$409 less than the general average. A black gelding, standing 14½ hands, sold at \$1000. A pair of 15½-hand geldings brought \$3725. A four-in-hand sold for \$9100, the wheelers standing 15 hands 2½ inches, while the leaders stood 15½ hands. The lesson taught by this sale of Tichenor's is this: Quality and individuality are essential; height should be right around 15½ hands, and the animal must be trotting bred. The horse standing 15½ hands appears to be the one in demand at present. In order to secure a fair average profit for the horses produced upon their farms, western breeders should produce horses of quality, size and conformation. This refers solely to the trotting-bred horse. Tichenor & Co. handle only trotting-bred horses and sell at New York, for the reason that good horses bring more money in that market. And why? Because New York is the wealthiest American city. Western breeders should produce what dealers term "a New York horse." Trotters alone are considered in connection with this term, pacers not being wanted at any price by dealers in high-class road and carriage horses. Aside from speed, the horse that commands a fancy price is trotting-bred and a natural trotter; must not mix gait under great excitement or for any cause; must possess quality and the proper conformation and should stand right around 15½ hands. As to conformation, the horse should be round and full made, not leggy, gross or too effeminate.

Bellingham Entries.

The Whatcom County, Washington, Agricultural Association will hold a meeting Sept. 5th to 10th, at Bellingham, and of the five early closing stakes advertised, three have filled as follows:

Pacing, 2:11 class, \$500—Jack Wilmot, Jonesa Basler, Pathmark, Buford, Vison and Le Roi.

Pacing, 2:25 class, \$500—Glengary Patchen, Merry Monarch, Byron Lace, Monowhip, Frank Benton, Chehalis Maid, Garvin Wilkes, Major Del, Annie Turner and Queen B.

The 2:19 and 2:40 trot failed to fill.

At the Tranter-Kenney sale in Boston three hundred and sixty-eight horses brought a total of \$229,235, an average of \$622 per head. This settles the question as to the condition of the market for good trotting bred horses. There has been, no such an average for that number of horses at a sale for years.

Billy Bridg'd It Over.

Bill wouldn't join the union, he swore he would be free, Any to any walking delegate he'd never how his knee; He'd settle his own wages, and he said he'd go alone. He swore he'd run his business, and let others mind the town; Then Bill swelled up right chesty and made quite hold to state He'd never be honsrogged by a walking delegate.

The union men all said to Bill they'd make an awful fuss. Bill answered, "Do your worst, old boys, we do not care a cuss; My friends and I are strong enough to hold up our own end Against all scheming, unjust games the union boss defends." And with a merry "Ha, ha," Bill kept tolling early, late; He said he'd take no nonsense from a walking delegate.

Bill furnished every comfort that man or beast could need, Each boarder had the best of care, each horse groom had good feed; Enough to eat, a place to sleep, their hearts were full of glee, Their slumbers were disturbed somewhat by the honery flea; And when they get their wages, which is no starvation rate, They know they never will be displaced by a walking delegate.

The business boomed, the horses laughed, for they had men enough, While the fellows with the banners looked seedy, thin and tough. Bill set the pace and kept his stride, and treated all so kind, Although his health was very poor and he was almost blind; He'd grit enough and speed enough to outpace all that kind, And leave all walking delegates a thousand miles behind.

Now union men do all agree they wish they hadn't struck; This act has caused them to get free, their union's hustling up. The union pings who stood for strike can't find their running mates— The ash men all have better jobs than these banner carrying skates. HOB—May 22, '04.

The Rail Birds' Dialogue.

[As Heard by a Recent Visitor to Pleasanton Track.]

"What's that greyhound thing that Geo. Ramage has there? She don't look as though she'd had anything to eat for a month."

"Oh, she is a four-year-old filly that's owned by a Portuguese who lives out in the country. She is by Don Derby 2:04 out of a mare by Guide 2:16. George has only had her about a month and she is a wonder for the work she has had; stepped a mile the other day in 2:19, last eighth in 0:15. If she ever gets strong she will make a crackerjack."

"What old hobbled pacer is that?"

"That's King Willis; got a record of 2:16 over a half-mile track. Time him this mile; he is going to step him. Henry Sanders trained him last year; couldn't heat 2:10. Joe Slack, his groom, is training him now; drove him in 2:12 last week. What did you get it?"

"2:11; why, he is quite a pacer."

"Say, ain't that the black horse of Judge Greene's that Salishury had last year, that Fred Chadbourne is working?"

"Yes; and he is going more like a trotter than he ever did in his life. Fred has a couple of good two-year-olds, one is a trotter by Nutwood Wilkes, next dam by Director. She has been a mile in 2:25."

"That's a good moving big thing Barney Simpson has there. What is she?"

"She is a young mare by James Madison; only been worked about six weeks. I got her in 2:18. What did you make it?"

"The same. If some one was behind her that would pick her up and team her a little she would be quite a pacer."

"Oh, you don't think Barney can drive much, eh?"

"No; he sits too still—acts like he was going to sleep."

"Well, I have known of a lot of them that didn't go any faster after they left his hands, and some of them not so fast. He never drives for the grand stand, and I had rather he would train a horse for me than any of your wild Indians that can't sit still."

"Wonder what Ward thinks he will do with that old pacer Daedalion?"

"I'll tell you what he'll do. If that fellow stays right and gets to the races he'll make somebody heat their record to get first money."

"There goes Golden Gate; I think he can heat any green trotter in the State."

"You do? Well, I don't want you to pick winners for me. He is a fast horse, but there are others, and I'll show you one in a few minutes that will make him look like a selling plater, although I know he has been a mile in 2:13 and I think he can step the Santa Rosa track in 2:10."

"Hello! there's Alviso with Major Cook. I thought he had sold out his interest in that horse to Tony Bernal, and that Eddy Jones would train him."

"So he did, but Eddy did not seem to save the Major as well as the man that made him, so Mr. Bernal gave him back to his old trainer and the Major showed his appreciation of the change by trotting a couple of heats in 2:16. But Eddy still has Toney's little Diablo mare Irene and she is working nicely

without the hobbles; stepped a quarter in 0:31 and a mile in 2:21 without them the other day."

"Say, is it so that Mills offered \$50,000 for this track for Eastern parties?"

I guess it is, but the old man asks \$75,000 and says he won't take any less, and that he won't have to keep it long to get \$100,000."

"Well, that is a lot of money and I guess he'll keep it a while, but it would be a great thing if some one would buy it and fit it up as it should be, in up to date style. Build a grandstand, club house and hotel, a lot more stalls, blacksmith and harness shops, warehouse for hay and grain and enclose the grounds. Then this would become the most popular training track in the country, with lots of horses here the year round, and under proper management ought to pay good interest on the investment."

Hello! there is Dan Lawrence and Dunlap scoring up together; Dan won the last heat and he will win this if he can. That ain't a bad kind of a young mare he's got. Couldn't go a hit when he brought her here last winter; now she has been in 2:10 and Dan thinks she'll do 2:10 before the season is over. They're off. That's a fast horse of Dunlap's, but he don't seem to be himself today. He's by Dexter Prince, dam by Gossiper, and if he don't make a break he'll heat Dan. There he goes; stepped on a watermelon seed, and Dan wins the heat. Time 2:17 and I'll bet that did "Toughluck" more than \$100 worth of good."

"There's a couple of broodmares coming in over there, just came on that freight, I guess. Going to Searchlight too."

"Say! I'll be blamed if I can see how so many breed to that horse when there are such horses as Stam B., Bonnie Direct and Guy McKinney right here."

"You don't?"

"No; I don't."

"Well, I'll just tell you right now, and I'll make it so plain to you that you'll never forget it—There she is! that's her!"

"That's who?"

"That's the green one I was telling you about a little while ago. That's Sonoma Girl, ain't she a peach?"

"She's a good looking mare, but they tell me she'll stop."

"They say she'll stop do they? What makes them think she will stop?"

"Oh! because she is too pure gaited. Too machine like; trots too easy to be game."

"Oh, lord! wouldn't that jar you? Trots too easy to be game. Well that's the best I ever heard. There; she's scoring up with Rsjah. She can keep him company pretty easy. I hope he'll stay on his feet, but they are not going any, only 1:15 to the half. Now they are moving up a little. Oh! that pacer's broke. She's waiting for him, it's a pity he won't stay on his feet; you would see a merry half. He is up to her again at the three-quarters pole. There he goes—another break; that's too bad. Ain't she a sweet going thing? She's only jogging. What did you get it?"

"Half in 1:03! Say; how fast could she trot a half on this track if she was turned loose?"

"Well, I'll tell you. Faster than it was ever trotted by any horse, and George G. stepped it in 1:01. She can heat him doing anything you can mention. I would like to see her trot the Memphis track next fall when it is in record breaking condition. I believe she would step faster than any trotter has ever done, har Lou Dillon, and she might give the Queen a pretty close rub. She has more speed than Lou had with the same amount of work. She can step a quarter now better than 0:29. She did it the other day in 0:29; just 'huggy riding'. Mr. Springer had no idea he was going faster than 0:31 or 0:31; till he looked at his watch. It was no mistake other watches caught it the same. I saw Lou Dillon trot a quarter here last April, a year ago, in 0:29; when Miliard Sanders thought her performance would sell her to Smathers, who was here at the time, and if he could have gone any faster he would have done so. I saw Judge Greene do the same distance in the same time (no faster) and both he and his driver were making a supreme effort. I have seen George G. heat 0:30. I have seen many pacers step in 0:30 and better, but never saw any horse, trotter or pacer, do a quarter in 0:30 or better with the consummate ease with which that little brown mare did the trick the other day. No man ever saw a trotter that could heat a 2:00 gait with such ease. She is the most perfect line trotter that ever stepped on a race track; can speed to her limit without a hoot on and never touch a hair, wears only six ounces in front and four behind, and an open hidle. How can you heat her? She is better bred than any trotter or pacer that has ever gone in 2:00; she is full of nervous energy, stamina and courage and I want to

know how are you going to heat her? She can step any part of this track from an eighth to a mile out faster than it was ever done by any of the many champion trotters that have worked on it."

"Gee! but you are swelled up on that mare, ain't you? But I am from Missouri. She will have to show me. I know she is fast but I think they will heat her at that, and heat her good and plenty. If she had a different trainer she might do pretty well, but when you talk about her heating Lou Dillon or trotting in 2:00 you make me tired. She might go in 2:10 but I think that will hang her up. And say, I would like to know where Springer learned to train 2:00 horses. I never heard of his winning any races or breaking any records. I don't believe he ever rode in a sulky till he came here a year ago."

"All right, you are the same as the rest of these knockers around here. You won't admit that anyone else has anything that is any account. You want to be 'showed.' Well, you are so confounded jealous and envious that you won't believe a thing when you see it. Some of you fellows said when Mills sold that mare to Springer that he had unloaded a gold brick and now you hate to own up that she is anything else and because Mr. Springer has come down here from Idaho for his health and has thought and developed more speed within the last year than all the rest of you smart trainers that have been in the business all your lives ever did, it makes you mad. I am not going to tell you what Mr. Springer will do or can do, but one thing I think you will be convinced of before the season is over, and that is, that he handles his horses pretty well for an amateur. But if I owned Sonoma Girl I would not go hush-whacking her up through Oregon, Washington and Idaho, but would take her East where the kings and queens of the trotting world will be assembled and measure her speed with their's and perchance win a crown for the daughter of Lynwood W. and Maud Fowler."

Racing at Walla Walla.

The spring meeting at Walla Walla during the last week in May was quite successful. The harness races were nearly all half-mile heats, three in five, and considerable speed was shown as the summaries below will show.

The officials were F. E. Smith, Frank Singleton and R. B. Caswell, judges; Robert Leighton starter. The meeting throughout was well managed and gave entire satisfaction.

SUMMARIES.

2:30 trot, half-mile heats, 3 in 5, purse \$150.
Rensler Maid by Pilot Medium (Burns) 2 2 1 1 1
Kitty Clover by Price Mont (Lynch) 1 1 2 2 2
Nancy Cole by Westfield (Beller) 3 3 4 3 dr
Johnnie S. by Woodman (Laroux) 4 4 3 4 dr
Time—1:13¾, 1:10¾, 1:12, 1:11, 1:12¾.

2:16 trot, half-mile heats, 3 in 5, purse \$200.
Oreta by Caution (Erwin) 1 2 3 3 1
Belladi by Chebels (Heller) 2 3 1 1 2
Helen Norte by Del Norte (Rutherford) 3 1 2 2 dr
Time—1:03¾, 1:07, 1:07¾, 1:06¾, 1:07.

2:25 pace, half-mile heats 3 in 5, purse \$150.
Major Del by Del Norte (Barrows) 1 1 2 3 1
Del Wilkes by Del Norte (Heller) 4 2 1 1 2
Teddy by Diablo (Hegoboom) 2 3 4 3 dr
Monowhip by Woodman (Prior) 3 4 3 dr
Time—1:11¾, 1:07¾, 1:08¾, 1:11, 1:08.

Free-for-all pace, half-mile heats, 3 in 5, purse \$150.
Hassalo by Westfield (Prior) 2 1 1 1
Francisco by Caution (Lynch) 1 2 3 2
Ollie M. by Westfield (Erwin) 3 3 2 dr
Time—1:02, 1:02, 1:02¾, 1:03¾.

Special mixed race, mile heats, 2 in 3.
Honnie B. by Mohigan 2 1 1
Nancy Cole by Westfield 1 2 3
Johnnie S. 3 3 2
Time—2:30, 2:33, 2:25¾.

2:30 pace, half-mile heats, 3 in 5, purse \$200.
Garvin Wilkes by Bezan (Prior) 2 1 1 1
Annie Turner by Glenelg (Barr) 1 2 3 2
Lady Cad by Del Norte (Heller) 3 4 2 dr
Bessie R. by Francisco (Hegoboom) 4 3 4 dr
Time—1:04, 1:03¾, 1:03¾, 1:03.

Boise Entries.

The Idaho Inter Mountain Fair Association close three stakes on May 10th to be decided at its meeting in October this year. The entries received were as follows:

Inter-Mountain Stake, 2:17 trotters, \$1000—Golden Gate, Sonoma Girl, Lady Madison, The Commonwealth, Lady Hare, M. J., Tallisman, Rozell, Beladi, Swift B., and Getaway—eleven entries.

Capital Hotel Stake, 2:14 pacers, \$1000—Prince Tom, Cavalier, Adamont, Yukon, Hallie Hinges, Derhertha, Maud W., George D., Billy Red, Economizer, Polka Dot, Henry N., Garvin Wilkes, Ollie M., Hassalo, Cavaliero, Oregon Maid, Monroe S., and Osmont—nineteen entries.

Overland Stake, three-year-old trotters and pacers, \$500—Bessie R., Jules Redel, Phalto Norte, Sunny Jim, Meta Hail, Cloud, Alto Lace, Loveless, Mamie C., Satin Royal and Ameda—ten entries.

For all kinds of weather there is no drink like aakson's Napa Soda—plain or in a lemonade.

Notes and News.

The entry lists are big.

All the best horses are named.

California's circuit will be a success.

The croakers who said California could not get up a good circuit have quit croaking.

Racing began at Pueblo, Colorado, this week and will move to Colorado Springs next week.

The Horse Review says, "Lou Dillon matined in 2:09½ at Memphis last week." Such acting was probably only play for her.

Aristo was given a mile in 2:17½ (his record) one day last week at Empire track and stepped the last eighth at a two minute gait.

The pacing mare Monica 2:15 by McKinney that was sold at the recent Blue Ribbon sale, will be bred to Rey Direct 2:10 this year.

Athalena, dam of the fast Oregon three-year-old pacer Sunny Jim, is at Pleasanton to be bred to Searchlight 2:03½. Athalena is by Altamont.

Pleasanton will open the circuit with a banner meeting. Secretary Fred Adams says the track will be in perfect shape and kept so during the week.

A fine road team is advertised for sale in this issue. They are at the Occidental Stables, Santa Rosa and were both sired by that game race horse Silas Skinner.

Bessie Birchwood, entered in the M. & M. by G. H. Easterbrook of Denver, is reported to have worked a quarter in thirty seconds at Overland Park track recently.

Go out to Ingleside track to-morrow and see the bicycle races. The meeting is for the benefit of the new speedway and athletic amphitheatre in Golden Gate Park.

A race meeting will be held at the track at Centreville, Alameda county, on the Fourth of July. Quite a number of local trotters and pacers will contest for small purses.

They say Marengo King, the handsome black stallion by McKinney out of By By by Nutwood, shows as much speed as any trotter in training at Memphis, but is unsteady.

George McCann of Dixon claims the name Emma A. for his filly by John A., dam Fidelity by Falrose, with which he expects to win Breeders Futurity No. 4, which is for foals of this year.

All the races advertised for the Pleasanton meeting filled with the exception of the three-year-old pace. This has been reopened to close July 1st. It is for the same amount—\$350.

There are thirty-four head of high-class colts and fillies to be sold at the Meek Estate sale, Thursday evening, June 28th. Send to Fred H. Chase & Co., 1732 Market street, for a catalogue.

C. G. Simmons, of San Jose, who had many years experience with horses has discovered something that he thinks will do better work than a blister or the firing iron. Read his advertisement.

M. Zahner has driven his mare Maud W. by Waldstein a mile in 2:23 since he reached the Salem track. This is the track record for this year. He drove Derbertha, sister to Diablo, a mile in 2:23½.

George G. 2:12½ was shipped to Cleveland last week and is said to now be the property of Mr. Anthony Brady of New York. Here's hoping Mr. Brady may drive him into the two-minute list before fall.

The annual meeting of the members of the Pacific Coast Trotting Horse Breeders Association will be held Monday evening next, June 13. Let every member attend. A new Board of Directors is to be elected.

Gen. Brayton Ives of New York drove his California bred trotters, Monte Carlo 2:07½ and Nora McKinney 2:12½ miles below 2:20 at Empire Track last month. Monte Carlo stepped a half in 1:04 and Nora one in 1:05½.

Allendale the light bay pacer by Falrose that Ed Mills took east, last week, was bred by Mr. E. D. Dudley of Dixon. Allendale is one of the handiest horses ever hooked to a sulky. He wears no hoppies or boots.

Mr. William J. Dingee's mare Flora M. 2:16 by Richard's Elector dropped a filly by Sidney Dillon this week that is eligible to the Pacific Breeders Futurity No. 4, her dam having been named in that \$6000 stake.

James Berryman's stallion Silver Moon by Silver Bow Jr is growing into a grand stallion. He is in his three-year-old form now, and showing a lot of speed. He is now at the Pleasanton track and will be kept there until next season.

Hanford's purses did not fill. They have been reopened to close July 1st. Read the advertisement on another page. There are many good purses, and two of \$1000 each. Don't miss this Hanford meeting. It is one of the big fairs of Central California.

Dreamworld Genie was the name of a bay mare, trotter, sold at the Boston sale, with the consignment from Thos. Lawson's Dreamworld Farm. This mare was bred at Palo Alto Farm and is by Dexter Prince out of a mare by Guy Wilkes. She brought \$750.

Now that a big list of entries has been received all along the line on the Pacific Coast, will the old chronic kickers who said we couldn't have a circuit, please take their positions and score by the pole horse. They will be on their own protection during the circuit.

Marguerite, the Strathway mare owned by Mr. Rudolph Spreckels and used by him to pole with Annie Rooney 2:17, also by Strathway, was bred to Bonnie Direct 2:05½ last year and now has a magnificent foal at her side. She will be bred to Sidney Dillon this year.

Mose Hart sold last week the bay four-year-old gelding by James Madison, dam by Steinway, that has been trained by H. R. Ward at Pleasanton for the past few months. The gelding is a very promising trotter and has improved so fast under Mr. Ward's training that he is looked upon as a likely candidate for 2:20 honors this year if kept at work.

The fastest colt on earth is the honor claimed for a pacer bred, owned and trained by U. G. Smith of Glen Falls, New York. The colt is fourteen months old and paced an eighth in fifteen seconds two weeks ago. He is perfectly gaited, wears no boots or other rigging, never makes a break and is fearless of any object. Mr. Smith will train him during the summer to beat the yearling mile record of 2:20½.

Want a good one? Take this tip and buy the brown filly by Welcome 2:10½ out of Directess by Direct 2:05½, second dam the dam of Fallacy 2:17½ by Mambrino Wilkes third dam the famous old granddam of Clipper 2:06, Centennial Bell by Woodburn. She'll do and you'll get her at your own price June 28th, when the Meek Estate colts and fillies are sold by Fred H. Chase & Co., at 1732 Market street, this city.

The two-year-old brown gelding by Welcome 2:10½, dam Linda (dam of Dan Burns 2:15) by Hawthorne, that is among the youngsters to be sold at the Meek Estate sale on the 28th inst., is a nice colt of good size and very promising. Look him over when the consignment reaches Chase & Co's salesyard. He'll bear inspection. There is a three-year-old full sister to this gelding in the sale that is a great prospect.

Mr. F. McGregor will not race his mare Gertie H. 2:26½ by Stone Robin this year. Mr. McGregor's partner Mr. Hocken of Santa Rosa, was seriously injured recently by a kick from a horse, and Mr. McGregor is compelled to devote all his time to their large livery stable business at Santa Rosa, and will not be able to take Gertie H. on the circuit. She is a very handsome mare and has worked a mile in 2:20.

There is rich blood in the veins of the three-year old filly by Welcome 2:10½, dam Pansy by Nutwood Wilkes 2:16½, second dam Patti (dam of Lustre 2:22 and Sidnut 2:25½) and granddam of Janice 2:08½ by Nutwood 600, third dam old Centennial Belle (granddam of Clipper 2:06) by Woodburn, and fourth dam Bonnie Bell by Williamson's Belmont. She is a beauty and a great prospect, and will be sold to the highest bidder at the Meek Estate sale.

M. M. Donnelly, owner of the pacing mare Flora G. that made such a good showing at the Decoration Day races, will race her through the California Circuit, and she is now in training at the San Jose track in Dan Leiginger's string. Mr. Donnelly purchased this week from the Kenney Manufacturing Company a new McMurray sulky, white enameled and striped with blue and gold, that is a beauty. It weighs 31 pounds and is the latest 1904 pattern. Flora G. is expected to pull it a mile in 2:10 before long.

Several of the gaited saddle horses brought to this city two weeks ago by Mr. Spaulding of the American Saddle Horse Breeding Farm of San Diego, and shown at the San Francisco Riding Club have been sold at good prices. The horses have attracted much attention and Mr. Spaulding is much pleased with the outlook for his breeding venture. The stallion Rex Montgomery will be in the stud at the farm every season at a service fee of \$50 for the season with usual return privileges. Those who desire to breed gaited saddle horses will find in him one of the very best stallions of his breed in America.

Our Pleasanton correspondent writes as follows: "Ed Mills shipped from here to Cleveland, O., on June the 1st the noted trotter George G. 2:12½ and the handsome and fast green pacer Allendale. The horses were shipped by express over the Union Pacific. Mr. Mills purchased George G. about two weeks ago with the idea of taking him East to race. Just as the horse was about to be loaded on the cars Mr. Budd Doble arrived in Pleasanton and upon hearing that George G. had been sold and was about to be shipped away approached Mr. Mills with a proposition to buy the horse. It is well known that Mr. Doble has been trying to buy him for some time, and in fact, really held an option on him. It only took these gentlemen about five minutes to do business and Mr. Doble secured the horse for a New York gentleman, Mr. Anthony N. Brady, a friend of Mr. Billings. The horses were shipped according to previous arrangements and all is well that ends well."

BIG LIST OF ENTRIES.

Nearly Every Race on California Circuit Will Have Big Field of Starters.

Owners and trainers of trotting and pacing horses have responded nobly to the advertisements of purses by the associations giving meetings in California this year and the list of entries received have been generous in every instance. From all parts of the State the entries have been sent, and from Pleasanton where the circuit opens, up to the close of the State Fair the harness events will not lack for good fields and the racing gives every promise of being high class.

The State Fair advertised nineteen stakes and closed eighteen. This is the best showing made in years and is evidence that the harness horse owners have quickly and generously responded to the offer made by the Directors to make harness racing more of a feature of the race program than formerly.

The program of the Pacific Coast Trotting Horse Breeders Association for its Santa Rosa meeting, has likewise met with the most generous treatment from the horsemen. Every race filled with the exception of the 2:13 trot and as the Santa Rosa track is in perfect shape, fast time may be looked for at Santa Rosa in nearly every event. The Pleasanton Race Meeting also received a big list, and all down the line there will be the best racing seen in California in years.

Entries for Santa Rosa Meeting.

Twelve races have been filled for the Pacific Coast Trotting Horse Breeders meeting to be held at Santa Rosa, which opens August 17th to continue four days. This gives three good races for each day, and as the list printed below will show, makes one of the best programs ever offered to the lovers of harness races. There is a total of 133 entries, an average of a little over 11 entries for each race.

No. 1, 2:24 Class Trot, \$500.

W G Durfee, blk h, Monocrat by Monwood—by Altamont Jr.
J Pankey, blk g, The Trotter by Silkwood—by Blackwood.
R W Peterson, b g, R W P by Lynwood W.
F R Garnsey, b m Alcacita by Red Cloak—Alcazette by Alcazar.
Dingee & Greene, blk h, Directum II by Directum—Little Witch by Director.
H A Bell, b g, H D S by Arthur Holt—Jennie B by Jerome Eddy.
P H McEvoy, b s, Millbrae by Prince Alrie—Fearless by Falls.
Nutwood Stock Farm, ch h, T C by Nutwood Wilkes—Zeta Carter by Director.
Dan Lieginger, h g Cicero by Brentwood.
Silva & Wright, blk m, Royal Dame by Chas. Derby—Princess.
W O Bowers, ch g Glide by Silver Bee—Mollie M by Starlight Goldust.
Ben F Chaboya, br h Erosmont by Eros—Francisca by Almont.
S H Hoy, b g, Pat Rose by Falrose—by Gen Washington.

No. 2, 2:20 Class Pace (Santa Rosa Stakes) \$1500.

S H Hoy, s m, Miss Winn by Demonio—by Nutwood Wilkes.
Dan Lieginger, s m, Flora G by El Echo.
F R Garnsey, b c, Sunny Jim by Ketchum—Nellie B by Christmas.
W G Durfee, Cavalier by Welcome—by Steinway.
T E Richardson, r m Mabel R by Strathway—by Algonia.
B Croner, h m, Hattie Croner by Bay Bird—by Algonia.
S A Mini, blk s Blackwood by Baywood—Lottie Lee by Moslem.
Ed Ellis, b m Baby Ellis by Alcona Jr—by Gen Washington.
H W Goodall, b g, Rajah by Chas Derby—Edon by Gen Benton.
C Whitehead, b m, The Mrs by Derby Ash—Spurwick Girl by Hawthorne.
H H Dunlap, ch g, Harold D by Dexter Prince—Sunrise II by Gossiper.
Thos Charlton, s m Rose Thorne by Hawthorne—Bell by Dexter Prince.
S K Trefry, b g, Tom Carneal by Diablo—Mountain Maid by Cresco.
J D Springer, h g, Billy Red by Glenelg—Bunnella by Ingraham.
E A Servis, r g, Dr J by Doc Hicks—by Singleton.
Oftutt & Shadbolt, r m Mildred O by Secretary—Vesper Bell by Dawn.
O Mowers, ch m, Gladys M by Ketchum—Norlocca by Nutford.
Victor Verilhac, ch m, Gertie A by Diablo—Lola by Sidney.
Chas E Clark, ch g, Si Perkins by Iris—by Almont Medium.
S A Eddy, h g, Tammany by Iris.
I N Minor, h m, Lady Petrina by Directum—Petrina by Piedmont.
Jos Long, b m Nellie R by Wayland W—Topsy by Whippleton.

S A Eddy, b s, Cuckoo by Strathway-Edith M by Milton R.
 J H Vance, blk b, Higball by Silkwood by Star Sultan.
 H Delaney, br s, Zolock by McKinney-Gazelle by Gossiper.
 S E Servis, ch g, Edwin S by Doc Hicks-by La Harp.
 Mabry McMahan, bl s, I Direct by Direct-Fran-cisca by Almont 33.
 T V Barstow, b m, Alene by Nearest-Grenetta by Chrisman Hambletonian.
 J B Iverson, ch m, Dictatress by Dictatus-Salinas Belle by Carr's Vermont.
 C Whitehead, s g, Toppy by Delphi-by Dexter Prince; bl s, Delphi by Director-Etta by Dexter Prince.
 A Ottinger, br s, Daedalion by Diablo.
 Silva & Wright, br g, Kelly Briggs by Bayswater Wilkes-Algenie by Algona.

No. 4, Two-Year-Olds, Pace, \$300.

I L Borden, bl f, Roberta by Robert I-Allie Cresco by Cresco.
 Nutwood Stock Farm, b c, Lord Alwin by Nutwood Wilkes-Ingar by Director.
 J W Marshall, b f, Mona Wilkes by Demonio-Trix by Nutwood Wilkes.
 Grace Bros, b g, Sid Allen by Sidney Dillon-Flora Allen.
 G W Kirkman, b f, Stonelita by Stoneway-Ethel Basler by Robt Basler.
 Ben Davies, b f, Delilah by Zolock-Gipse by Booth.

No. 5, 2:16 Class, Trot, \$500.

W G Durfee, Briney K.
 J B Iverson, b m, Princess by Eugeneer-Belle by Kentucky Prince.
 Grace Bros, b g, Ole by Silas Skinner-Eveline by Nutwood.
 J H Vance, gr g, Rozelle by Bob Mason.
 C A Arvedson, b s Sutter by Noonday-Eva B by Prompter.
 A L McDontid, b m, Verona by Nutwood Wilkes.
 E P Heald, b m, Lady Rowena by Pilot Prince-Nona Y by Admiral.

No. 6, 2:25 Class, Pace, \$500.

J D Springer, cb m, Miss Idaho by Nutwood Wilkes-by Forest Clay Jr.
 W Masten, b g, Elmorene by Iris
 Thos Charlton, s m, Rose Thorne by Hawthorne-Belle by Dexter Prince.
 E A Servis, r g, Dr J by Doc Hicks-by Singleton.
 E Lindley, bl g, Dart by Hector-Julia Kilarney.
 Silva & Wright, s g, Harry W.
 G R Richards, blue m, Ruby H by Bayswater Wilkes-by Promoter.
 R H Bonner, b m, Oliveta by Richard's Elector-by Mountain Boy.
 J W Zibbell, b g Prince Almo by Prince Almont-Cap by Fallis.
 E D Dudley, br m, Dorna Doone by Bayswater Wilkes-Bee by Sterling.
 B Croner, b m, Hattie Croner by Bay Bird-by Algona.
 O. Mowers, b g, Casey by Athadon-Oregon Nell.
 J H Vance, g g, Henry N by Raymond by A W Richmond.
 S A Eddy, b g, Tammany by Iris.
 A W Wiley, b b, Cavaliero by Stanton Wilkes-by Electioneer.

No. 7-2:30 Class (Three-year-olds) Trot, \$400.

E Lindley, b m, Mamie R. by son of Oro Wilkes-Moscovia by Belmont.
 F R Garnsey, b s, Murray M. by Hambletonian Wilkes-Anna Belle by Dawn.
 Jas H Gray, br c, Carabina by McKinney-Biscara by Director; b c, Calamanco by McKinney-Rose Russell by Bay Rose.
 C L Jones, br c, Carlokini by McKinney-Carlotta Wilkes by Chabry Wilkes.
 E D Dudley, ch m, Paprika by Oro Belmont-Auntie by Dawn.
 J Groom, bl g, Walter Wilkes by Sable Wilkes-by Patchen Vernon.
 W Mastin, b s, Marvin Wilkes by Don Marvin-Nora S. by Sable Wilkes.
 Grace Bros, b g, Wilmar by Wildnut-Sweet Marie by Stamboul.
 Geo L Warlow, br s, Allesandro by Athaneer-Narcola by Athadon.

No. 8-Three-year-olds, Pace, \$400

Geo W Kirkman, gr m, My Way by Stoneway-Ethel Basler by Robt Basler.
 E D Dudley, br m, Friskarina by Bayswater Wilkes-Bee by Sterling.
 J B Iverson, cb m, Thelma by Dictatus-Salinas Belle by Carr's Mambrino.
 Nutwood Stock Farm, gr m, Gray Witch by Nutwood Wilkes-Little Witch by Director.
 I L Borden, b c, Cresco Wilkes by Nutwood Wilkes-Allie Cresco by Cresco.
 J E Montgomery, b g, Seymour M. by Diawood-Nancy H. by Upstart.

No. 10-2:14 Class Pace, \$500.

W Mastin, b g, Penrose by Falrose-Miss Mooney Filly by Brigadier.
 Victor Verilbac, ch g, Harry Hurst by Delwin-Lady Kohl by LaGrande.
 E A Servis, ch g, Edwin S. by Doc Hicks-by La Harp.
 Chas Galindo, ch b, Rey del Diablo by Diablo-Rosita A. by Adrian.
 Silva & Wright, b m, Economizer by Chas Derby-Economy by Echo.
 H W Goodall, b g, Uncle John by Chas Derby-Naulahka by Balkan.
 S A Eddy, b s, Cuckoo by Strathway-Edith M. by Milton R.
 E P Heald, b m, Nance O'Neil by Pilot Prince-Nona Y. by Admiral.

I C Mosher, b f Gluck by Zombro-Scappoosea by Roy Wilkes.
 Ella Warlow, b f, Sextette by Athabla-Donnatrine by Athadon.
 Gen L Warlow, b s Atbasham by Atbadon-Cora Wickersham by Junlo.
 A L McDonald, b g Rey McGregor by Rey Direct.
 E P Heald, b c, San Juan by Nutwood Wilkes-Princess McKinney by McKinney.
 C A Arvedson, b f, Lady Sutter by Sutter-Anna Phelps by Tilton Almont.
 N M Strong, br c, Ambush by Zolock-Silkwood by McKinney.
 Dingee & Greene, br h, W J Dingee by Nutwood Wilkes-Little Witch by Director.
 W G Durfee, Bellemont by Zombro-by Altamont.
 G W Kingsbury, b f Della K by Silver Bow-Elma by El Benton.
 Jas Coffin, b c, Admiral Togo by Iran Alto-Aria by Bernal.

No. 12, 2:19 Class Trot (Sonoma Co. Stakes) \$1500.

A W Wiley, b m, Lady Madison by Jas Madison-by Nephew.
 S H Hoy, bl m, Little Babe by Bradtmoor-by Dawn.
 A L McDonald, bl g, Charlie T by Zombro-Sarah Benton by Albion.
 H C Ahlers, br g, Telephone by Direct-Nellita by Philosopher.
 J D Springer, br m, Sonoma Girl by Lynwood W-Maud Fowler by Anteo.
 Bob Burress, br g, Golden Gate by Bay Bird-Doushka by Western.
 Silva & Wright, s g, Tailsman by Steinway-by Woodnut.
 Nutwood Stock Farm, cb m, Mamie R by Nutwood Wilkes-Ingar by Director.
 R W Peterson, b g R P W by Lynwood W.
 J H Pankey, bl g, The Trotter by Silkwood-by Blackwood.
 W G Durfee, b m, Rita H by McKinney.

 I N Minor, s g, Fredericksburg by Nephew Jr-Minnie Hubbard by Hubbard.

Pleasanton Entries.

The following named horses have been entered in the races of the Pleasanton Fair and Racing Association which closed June 1st.

2:30 Class Trotting, Purse \$500.

Geo W Kingsbury's D E Knight, b g by Lynmont, dam Daisy A.
 Nutwood Stock Farm's Mamie R, ch m by Nutwood Wilkes, dam Ingar by Director.
 Silva & Wright's M. J., b g by Bay Bird, dam by Cornelius, and Talisman, s g by Steinway, dam by Woodnut.
 O E Williams' Wilmar, b g by Wildnut, dam Sweetwater by Stamboul.
 W G Durfee's Monocrat, blk s by Woodrat and Rita H br m by McKinney.
 J H Pankey's The Trotter, blk g by Silkwood, dam by Blackwood.
 Mrs Emily Ward's Lady Madison, b m by James Madison, dam by Nephew.
 Ben Chaboya's Erosmont, br h by Eros, dam Francisco by Almont 33.
 J Groom's Walter Wilkes, blk g by Sable Wilkes, dam by Patchen Vernon.
 I N Minor's Morosco, br g by Wayland W., dam Lady Moor by Grand Moor.
 S H Hoy's Pat Rose, b g by Falrose, dam by Geo Washington.

Race for Local Buggy Horses.

Joshua Chadbourn's Hattie C., b f by Little Direct, dam Hattie W.
 C L Crellin's Anita, ch m by Diablo, dam Ruth C. by Guide.
 Dr L A Colestock's Joe b g by Eros.
 Geo Johnston's George J, gr g by Rockaby, dam Grey Nellie by Oakland Boy.
 Con Nevin's Diablo Bill, b g by Diablo, dam by Nutwood.
 Geo A Kelly's Tommy, blk g by Antrim, dam Miss Alwood by Alwood.

2:18 Class, Trotting, Purse \$500.

Mrs J L Hastings' Annie Hazen, ch m by Robt McGregor, dam Lady Pepper by Onward.
 Louise Kersten's Louise Croner, gr m by Wildboy, dam Abbie S. by Abbottsford.
 Al McDonald's Verona, b m by Nutwood Wilkes.
 J H Vance's Rozell, gr g by Bob Mason.
 W G Durfee's Briney K. and Idyllwild, b m by McKinney.
 Mose Hart's Herbert L., b g by Antrim, dam by Alwood Jr.
 Silva & Wright's M. J., b g by Bay Bird, dam by Cornelius, and Talisman, s g by Steinway, dam by Woodnut.
 C A Durfee's Cuato, b g by McKinney, dam Miss Jessie by Gossiper.

G Lindauer's Homeway, b h by Strathway.
 C A Arvedson's Sutter, b s by Noonday, dam Eva B. by Prompter.

2:13 Class, Trotting, Purse \$300.

S S Bailey's Redskin, ch g by Red Cloak
 Grace Bros' Ole, b g by Silas Skinner, dam Eveline by Nutwood.
 W W Mendenhall's What Is It, gr g by Direct, dam Lassie Jean by Brigadier.
 E P Heald's Tom Smith, br s by McKinney, dam Daisy S. by McDonald Chief.
 Al McDonald's Forest W., br g by Wayland W., dam Silver Shield by Poscora Hayward.

2:25 Class, Pacing, Purse \$500.

Mrs J L Hastings' Sky Pointer Jr, b s by Sky Pointer, dam Juliet D. by McKinney and Hall Pointer, b g by Sky Pointer, dam Lackawanna by Gossiper.
 L G Richard's Gigger, br g by Bayswater Wilkes, dam by Privateer.
 Victor Verilbac's Gertie A., ch m by Diablo, dam Lola by Sydney.
 J D Springer's Miss Idaho, ch m by Nutwood Wilkes, dam by Forest Clay Jr.
 H & A Mini's Blackwood, blk s by Baywood, dam Lottie Lee by Moslem.
 S K Trefry's Tom Carneal, b g by Diablo, dam Mountain Maid by Cresco.
 A W Wiley's Cavaliero, b b by Stanton Wilkes, dam by Electioneer.
 Ray McDonald's Swanbilda, b m by Orkney Wilkes, dam Maud S. by Jim Mulvena.
 Louise Kersten's Hattie Croner, b m by Bay Bird, dam by Algona.
 J H Vance's Henry N. by Raymond.
 Charles E Clark's Si Perkins, cb g by Iris, dam by Almont Medium.
 W G Durfee's Cavalier, br g by Welcome, dam Carmelita by Steinway.
 Dan Lawrence's Muriel, br m by James Madison, dam by Nemo.
 Thos Charlton's Rose Thorn, s m by Hawthorne, dam Belle by Dexter Prince.
 E A Servis' Dr. J., r n g by Dock Hicks, dam by Singleton.
 E Lindley's Dart, blk g by Hector, dam Julia by Kilarney.
 Emil Holling's Ring Rose, b m by Falrose, dam Pet by son of Hambletonian.
 Silva & Wright's Harry W., s g by unknown.
 C Whitehead's The Mrs., b m by Derby Ash, dam Spurwick Girl by Hawthorne.

 S A Eddy's Cuckoo, b g by Strathway, dam Edith M by Milton R.
 N Williams' Dr. W., blk s by Robert Bassler, dam by Sacramento.

State Fair Entries.

As will be seen by the following, the biggest list of entries in years has been received by the State Board of Agriculture for the harness races to be given at the State Fair meeting which opens August 22d. Every race advertised has been filled with the exception of the \$1000 free-for-all trot, which had but three entries. All the best trotters and pacers in California have been named in these events and high class racing will be seen by those who attend California's great annual State Fair this year.

Trotting, 2:24 Class, \$2000.

Geo W Kingsbury's b g D E Knight by Lynmont-Grant Jr.
 S H Hoy's bl m Little Babe by Bradt Moor-Dawn.

Colusa Team—Gibson 14, Ahlf 7, Francks 13, Ash 12, Phillips 12; total 58.
Sacramento Team—Newbert 11, Rubstaller 12, Englehardt 11, Stevens 12, Guisto 13; total 58.

There will be a big blue rock tournament at Gridley on the 18th and 19th insts. under the auspices of the Gridley Gun Club. The tournament last year was a big success. The Gridley sportsmen are not only good shooters but are most genial entertainers as well. A large attendance is anticipated.

The results of the Santa Rosa Gun Club shoot last Sunday are as follows:

Monthly medal shoot, distance and target handicaps: "Edmonds," 18 yards, shot at 30, broke 11; MacGregor, 16 yards, 30-25; Fehrman, 18 yards, 27-15; Young, 16 yards, 30-20; McQuiddy, 16 yards, 30-22; Slusser, 15 yards, 27-18; T. L. Lewis, 16 yards, 30-21; Tuttle, 16 yards, 30-12; Crawford, 16 yards, 30-17; O'Hara, 16 yards, 30-22; Hesse, Jr., 18 yards, 28-22; Hirschle, 16 yards, 30-17; Clarke, 16 yards, 30-20; Col. Jullard, 18 yards, 30-13.

The medal for the month was won by MacGregor, who broke 25 out of 30 targets shooting from the 16 yard peg. McQuiddy, O'Hara and Hesse, Jr., who each broke 22, divided the purse.

In another match, target handicap (25 to 30 birds), 16 yards, the scores were: Leggett shot at 28, broke 17; "Edmonds," 30-18; Col. Jullard 28-15; Crawford 30-18; Dryden 30-16; MacGregor 28-18; E. H. Drake 27-21; J. V. O'Hara 27-17; R. Slusser 26-14; O. I. McQuiddy 26-7; M. A. Clarke 26-17; L. C. Macke 28-18; A. M. Tuttle 30-15; W. Hopper 30-19; W. H. Young 26-7; T. L. Lewis 25-21; D. S. Hirschle 28-21; F. W. Hesse, Jr. 25-14; P. Fehrman 27-18.

In the tie shoot off, Lewis 20 yards, Hirschle 16 yards, the former shooter won.

Splendid weather conditions favored the shooters at the June club shoot of the California Wing Club last Sunday. C. C. Nauman (33 yards) was in splendid form grassing every bird that was trapped for him in the club race and following pools. Dr. Darby (29 yards), Clarence A. Haight (28 yards), Dr. E. G. McConnell, Hip Justins (30 yards), the Southern California representative of the U. M. C. Co. and J. W. Bradrick (27 yards) also killed straight. Following the regular club match the usual six bird pools were made up. In the first one eight out of twelve shooters scored straight, following five out of seven men killed clean, in the final pool, four men out of eight scored straight. The same distance handicaps prevailed in the pools as were imposed in the club race. The shooting all day was very good, the pigeons supplied were an unusually strong lot. Hip Justins only shot in the club race, this being his first appearance at Ingleside for several months.

Club race, 12 pigeons, \$75 added 5 moneys, high guns, distance handicap—

The Capital City Blue Rock Club held the regular club shoot at the Kimball-Upson grounds at Sacramento last Sunday. The Leggett trap was again too much for the shooters. D. E. Newbert was high man, making 22 out of a possible 25 and winning the club medal. The scores were: J. W. Hughes 14, J. R. Hughes 12, Cotter 16, Gilbert 18, Weldon 10, D. E. Newbert 22, Englehardt 17, Morgan 14, E. D. Adams 19, Shore 20, Ludden 11, Stevens 19, Blair 17, F. Newbert 17.

Mr. Chas. Baird, of Marysville, Cal., whom we have mentioned in a previous issue, is the only known armless shooter in the world. Through an unfortunate accident, in a threshing machine about ten years ago, Mr. Baird took his right arm off close to the shoulder and his left just below the elbow. The gentleman was first brought before the shooting public's notice by John Steward and W. H. Seaver at the Colusa tournament last April and again at the late Sacramento shoot. At both of these tournaments Mr. Baird gave exhibitions of his shooting to the admiration of large crowds. The gun Mr. Baird uses, a Winchester "pump," is especially equipped with straps, metal holders, trigger pulling lever, and other devices to fit his requirements, and the way he handles the gun and snoots both single and double targets is a most wonderful sight. Mr. Baird's best record at single targets, known traps, unknown angles, is 46 out of

the possible 50, and at double targets 16 out of the possible 20. Such shooting is considered to be first-class by shooters not handicapped like Mr. Baird is, but when it is taken into consideration the adverse conditions under which the gentleman shoots, his work with the gun is nothing less than marvelous.

He is a hunter as well as a trap shooter, for in the duck season he manages to bag quite a number of wild ducks—which he sells. Despite his unfortunate handicap, he manages to get along pretty well, for by reason of ingenuity and application he has acquired the faculty of doing the many things necessary and usual in daily life quite cleverly. It is no trick at all for him to put his clothes on, for instance, the only drawback being the fastening of his collar and adjustment of the tie. He has by dint of practice become an adept in using his feet and toes for many purposes that are usually performed by one's hands and fingers.

Frozen Fish Said to Come to Life Again.

Those Quebec fisherman and others who have so persistently insisted upon the fact that they have frequently seen frozen fish revived by the simple process of thawing out have long lain under the imputation of having graduated in the class of Annanias and Sapphira, though there are a number of otherwise most credible witnesses who are prepared to make solemn declaration of the fact that tomcods caught by them through the ice and carried home by them frozen as stiff as pokers, have become re-animated soon after being thrown into a vessel of water to thaw, preparatory to being cleaned and cooked. There are numbers of Canadian anglers, too, who tell the same story of the trout which they have taken through the ice in winter.

Quebec is not the only source of such reports, however. These stories of the revivification of frozen fish have recently received corroboration from both western Ontario and Wisconsin. One correspondent writes that in the west of Ontario it is nothing uncommon to find frozen fish in the blocks of ice stored for summer use. He cites a couple of illustrations. In one case, which occurred in an inland town of Lambton county, the ice for summer use was cut and hauled from the river St. Clair, some 15 miles distant. One of the hotel keepers of the town, during the winter in question, had stored a large quantity of it. During the first week of June, on passing his office, the correspondent in question was called in by him to be shown a curiosity, as he called it. It was a pike—jackfish as it is called thereabouts—imbedded in the centre of a block of ice 15 inches thick and about 22 inches square on the surface. Several persons examined it, and the main point in the discussion was: Would that fish come to life if thawed out? The ice was put in a wash tub of water. It took about a week to thaw the ice, and when that was accomplished the fish was as lively as if just taken out of a river. The fish was about 12 inches long, and in the course of a day or two, would come to the top of the water for crumbs of bread thrown to it. Another instance mentioned by the same correspondent is that of one of the same kind of fish having been put in a well—a surface one—on a farm in the township of Moore. The water froze clear to the bottom every winter, and yet for three years, during which many people saw it frequently, the fish would resume its normal life in the summer.

Some of the Lake Huron fishermen who have been spoken to on the subject say that there is nothing remarkable or unusual in it.

George E. Oster, who several years ago was a resident of Wisconsin, tells a much more startling story than any of the foregoing, and furnishes the names of witnesses, now in my possession, says a writer in the Boston Herald, who can corroborate the facts. The heroine of his story is a female trout, which, after eleven years of suspended animation in a cold storage warehouse, passed unscathed through a fire, was thawed out, and three years later was found to have spawned and to have originated a large colony of its species. Mr. Oster says: "In 1873 I was residing at Junction City, a pretty little place located in a romantic spot on the banks of Mill creek in central Wisconsin. The country at that time was new and fish and game were plentiful. Mill creek was famous as a trout stream, it being no trouble at all to catch 50 pounds of speckled trout in a half day's fishing. On Feb. 15, 1873—I remember the date because it was my 21st birthday—I took down my rifle and struck out into the forest for the purpose of killing a deer. I had wandered along the banks of the stream for a distance of about two miles, when I ran on to an old hunter who had cut a hole in the ice, through which he was fishing for trout. He was meeting with great success, for scattered all around him could be seen the speckled beauties, where he had thrown them as he took them off his hook. I was invited to help myself, and cheerfully accepted the invitation, proceeding to put a number of the fish in my game bag. I returned home tired and hungry, and some of the trout were prepared for supper. One of the largest, however, I placed in a large cold storage warehouse near the house, intending to present it next day to a friend. The fish was forgotten, and as a result lay in that warehouse solidly frozen until June 10, 1884. That night the building was totally destroyed by fire. The water thrown by the fire department had filled up the rock and watertight cellar, and three years later when men were set to work to pump out the water, preparatory to rebuilding operations, 447 fair-sized speckled trout were taken out, besides the old one, which had evidently fallen into the cellar at the time the warehouse was destroyed, and had become thawed out and spawned. The original trout was easily identified, one of its eyes having been accidentally knocked out and a part of its tail broken off before it was placed in the warehouse. Any one doubting the truthfulness of this story can easily be

satisfied by writing to Frank Blood or Arthur Sturtevant of Stevens Point, Wis., or to Eugene Sheppard, Rhinelander, Wis."

It goes without saying, however, that there was more than one female fish in the warehouse, for either the whole 447 found in the water when it was pumped out of the cellar had been previously stored there, or there must at least have been another fish present to fertilize the spawn of Mr. Oster's heroine, without which, as every fish culturist knows, the young fish could not have hatched out.

Fish Lines.

Fishing at the Big Meadows, recent reports say, is at present excellent. The trout are taking the fly better and greedier every day. Among the anglers at present at the resort are: Mr. and Mrs. W. W. Richards, George W. Mitchell, Mr. and Mrs. S. A. Wells, Mr. Burlingame, "Doc" Oliver, David Sachs, and Messrs. McMahon and Culver who have not missed a season there for years past.

Striped bass anglers have been getting quite a number of fish in the tidal canal waters between the High street end of San Leandro bay and the upper end of the Oakland estuary. The fish are caught, however, on clam halt, spoons being for the nonce laid aside.

Among those who were out this week were "Al" Wilson and "Al" Newman who took 11 fish to their boat, the largest scaled 17 pounds. "Boh" Sangster, Mr. Bliss, C. B. Hollywood, Mr. Cunningham, James Maynard, Jr., Jos. Sweeney and others.

Bass fishing in and about San Pablo bay, near San Pablo, has been but fair, the fish taken being generally small and underweight. Three boats last Tuesday accounted for 22 fish.

San Antonio creek is said to be full of bass again, but efforts to entice them with bait or spoon have been, for some not understood reason, unavailing.

Chas. H. Kewell and Mr. I. Freeman were out in a boat on the San Leandro fishing grounds yesterday and had success.

The angling fraternity have from time to time heard most favorable reports of Rogue river fishing and that region has been looked upon as the Mecca for an angler who can take a week or more time on a good stream. The following letter from Mr. A. B. Cornell, assistant S. P. Agent at Grants Pass, Or., dated June 4th will undoubtedly be of interest to every angler. Mr. Cornell writes:

"Yours of the 3rd inst., regarding fishing on the Rogue river has been turned over to me for answer, due to my fishing for the office force. The fishing at the present time is very good in this locality as well as at most any point along the river. Within the last two weeks the fish have begun to take a fly (black-hackle, black gnat and also brown hackle peacock-body), in fact some days they will take various kinds of flies as one who fishes knows. Recently we have been fishing with bait, (salmon eggs) and have done some very effective work, but from now on it will be principally with flies and spoons, spoons are used for the larger fish and a great many salmon and larger trout are being landed now with spoons (copper only). In selecting the best points for sportsmen, I would recommend in coming from San Francisco to stop at Tolo (now Golden Ray) where suitable accommodations can be secured both day and night and that is, what I think, the best place on the river to fish. Fishermen should have hip boots or wading pants. The Southern Pacific road runs along the Rogue river from Golden Ray to Grants Pass, a distance of 25 miles and about any station within this distance is good fishing. But, as I said before, Golden Ray is the cream, due to the stream being smaller there and not frequented by so many fishermen. There is but one stage from here which runs to Crescent City leaving each morning at 8 A. M. (except Sunday). If any further information is desired along these lines, I will take pleasure in securing same for you."

Angling news from Castella is to the effect that trout fishing on the river at that point is excellent at present and fish plentiful. The river is almost at its normal height and very clear. The best killing lures are the professor, Benn's improved governor and the march brown on number 10 and 12 hooks. Judge Nussbaum, of Oakland, and ex-Fish Commissioner Gould enjoyed the fishing there, a week ago. Last Saturday Mr. Gould filled his creel with as nice a catch of trout as the wishes of an angler could desire.

Laguinitas lake was opened on the 1st inst. A number of local anglers have taken advantage of the opportunity to fish in this beautiful Marin county lake and secured the necessary permits for a day's trouting.

James Watt and several friends will fish the upper Sacramento. George Walker leaves to-day for a trip to Boulder and San Leandro creeks in the Santa Cruz mountains.

Salmon are running in Monterey bay and trolling is daily in order. The sport seems to be at its best near Capitola. Last Sunday six local anglers were out in boats. Walter Burlingame and Chas. E. Ray, J. J. Deane and J. Herget, Harry Hosmer, and Mr. Shindell. Burlingame landed a couple of 15 pounds. Hosmer and his partner each caught a fair fish. Deane hooked only one salmon and experienced the chagrin of seeing his partner, Herget a novice whom he was initiating in the game, pull seven fine fish into the boat, they were fishing with handlines. The two handline fishers were dubbed by the other four (who used rods) as the "gang with a pull." Later in the day the "gang" retorted "well we skunked" the pole cats anyway. The fish were taken mostly on spoons, sardine bait being very scarce at present. It is believed that in the course of two or three weeks the fishing will be good in the extreme.

F. E. Watkins' Newmarket Beatrice is in whelp to Oak Jack (Ch. Banjo-Woodcote Venus). His Newmarket Baby is in whelp to Bonnybred Stilleto (Fire Chief-Bloomsbury Blancbe). All three of Mr. Watkins' Bull Terriers have won in Coast shows.

Mr. W. H. Richardson showed us this week a very good looking wire haired dog puppy—one of a recent litter by Mrs. R. F. Mayhew's Baby Sensation out of Bowdon Ruby (Ch. Barkby Ben-Lady Go Bang.)

Entries for the twenty-second annual Pacific Coast Derby will close on Friday July 1st. Entrance \$20—\$5 forfeit to accompany entry, \$5 payable November 1st and \$10 to start; open to all Pointers and Setters whelped on or after January 1, 1903. First prize 50% of stake; second, 30% and third 20%.

For further particulars and entry blanks address Secretary Albert Betz, Room 201 Parrott Bldg., San Francisco, Cal.

There will be, it is believed, a larger Derby entry this year than last. There has been a favorable season for the birds on the field trial grounds, they are plentiful and nesting well.

We recently received a copy of Bonnybred Kennels new descriptive catalogues. The letter-press and half-tones are attractive and up-to-date. The booklets are of much interest to Bull Terrier fanciers and replete with information concerning the best blood lines of the breed to-day. This is an opportunity that should not be overlooked by our readers for the catalogues can be procured, we are advised, by addressing Bonnybred Kennels, 294 Manger street, Brooklyn.

Specialty Clubs have offered specials to be competed for at the Long Island Kennel Club's summer show, Saturday, June 25, 1904, at Brighton Beach racetrack, Long Island, N. Y., as follows: The Russian Wolfhound Club, the Fox Terrier Club, the French Bulldog Club, the Boston Terrier Club, the Pointer Club, the Dachshund Club, the Airedale Terrier Club, the Welsh Terrier Club, the Japanese Spaniel Club and the Pomeranian Club. The L. K. A. of America and the L. K. A. of Massachusetts will also give specials at this show.

Some specials are offered by individuals for the best American-bred dog or bitch, Bull Terrier, Setter, Sporting Spaniel, Airedale, Collie, Beagle, Toy and French Bulldog.

We announce with regret the bereavement of Mrs. W. C. Bogen, nee Miss Della Beach, in the passing away last week of her father the late Tyler Beach of San Jose. Mr. Beach was one of the best known and most respected citizens of Santa Clara county. He had a large circle of friends and was public spirited to a degree. He came to this state and located in Santa Clara county in 1854 being engaged in business until the early '80's when he took charge of the St. James Hotel and made it a popular hostelry until several years ago when he retired. Mrs. Bogen is much esteemed by the Coast fancy and is the proprietor of the Beach Hills Kennels.

The Japanese Spaniel Club of America, Miss L. E. Turney, Secretary, 105 West 78th street, New York, N. Y., offers to members, special prizes consisting of the club silver medal for Japanese Spaniels exhibited in the regular classes at the Universal Exposition of 1904, the prizes to follow the official awards of the World's Fair, St. Louis, viz: Best dog, one year old or over, sterling silver medal; best bitch, one year old or over, sterling silver medal.

The Quick Growing Steer.

In modern times it is an accepted tenet of live stock husbandry that the most money is made in the young and growing animal. The farmer that has a good pasture and some calves of good conformation to put upon it is the one that is the most likely to make money out of his live stock feeding operations. The old steer turns grass, hay and grain into manure, but beyond a certain stage of growth he turns very little of it into flesh, save an exchange. The growing animal is the one that turns his feed most readily into flesh. The writer has known men that went into the feeding of live stock with a sort of bazy idea that it was very easy to get rich in this business, irrespective of the kind of stock involved in the feeding. The result was bankruptcy. This will be the result every time. More and more it is coming to be felt that the general farmer is to be the one that is to do most of the raising of beeves.

The day is apparently passing when great quantities of beef can be made from free range. The day is just as certain to pass when animals can be bred in one part of the country and fed to maturity in another part. We are likely to tread in the footprints of the older countries of the world, where this work has simmered down to the farmer that follows mixed farming. This is largely because he can

get the benefit of the growth of the young steer. The quick growing steer is the one that we must work to obtain. With the great ranges the scrub must go. With every curtailment of the size of the ranges there has come a widely felt necessity to improve the stock on the ranges.

When ranges occupied nearly all of the land west of the Mississippi river it did not make much difference how long a steer took to attain his growth and maturity. His feed and care cost almost nothing anyway. But with the curtailment of the ranging privilege more work had to be done in a short time and on a less area. This led to the rangers bringing in improved animals to sire their herds, with the single aim of getting an animal that would mature in the least time possible and make the most out of the grass he got. What we call extensive farming is favorable to the nondescript, but intensive farming, which is always on the gain, demands animals of the intensive character. The quick growing steer is therefore the chief factor in the problem of the production of cheap meat.

The common farmer should have nothing to do with any other kind of an animal. He cannot afford to breed his cows to scrub bulls when he intends to put these calves on pasturage and later finish them for the beef market. The quick growing steer is the steer of improved breed, as has been demonstrated over and over again. In the light of the experience of the past twenty-five years it is surprising that any man should still ignore the quest on of breed, which is the question of the quick growing steer.

A Northern correspondent writes as follows to a trade representative of this city:

"The 10th Annual Tournament of the Washington State Sportsman's Association was brought to a termination on May 21, '04, after a three days' successful shoot. Too much credit cannot be given to Mr. C. D. Ellis, secretary-treasurer of this organization. Everything possible was done for the comfort and pleasure of the attending sportsmen. The Harrington contingent assisting to make the shoot a success were: Messrs. W. J. Greene, J. E. Williams, W. F. Brown, G. R. Wilson, P. Shields, F. B. Rennie, S. E. McDonald, F. M. Carlton, Wm. Talkington.

The shooting grounds were ideal and could not have been better. There were 56 contestants shooting through the tournament, 32 of whom used the Union Metallic Cartridge Company shells, loaded by the Selby Smelting & Lead Company and also band loaded by Ware Bros. of Spokane, Wash.

Mr. Fred K. McBroom, of Spokane, Wash., won the high average for the three days' shoot, using the U. M. C. "Magic" shells, Du Pont powder and band loaded by Ware Bros. Mr. McBroom also made the longest continuous run, shooting 74 straight, as well as the individual championship, using the load and shells above mentioned.

The three-man team championship was won by Geo. W. Beck, Fred K. McBroom, J. Forbes, all of Spokane, Wash. Each used U. M. C. "Magic" shells, band loaded by Ware Bros.

"The Sportsman's Review" gold medal was won by Mr. R. C. Cox, of Seattle, Wash. He shot U. M. C. "Magic" shells, E. C. powder, hand loaded.

The wonderful increase in the use of U. M. C. shells over the ratio of last year up this way must necessarily be conclusive of good results to the shooters, clearly showing their superiority over other makes—a fact the sportsman of to-day is quick to realize."

Pennsylvania and Iowa in line. It isn't hard to be convinced of things when you have the proof before your eyes. No clearer demonstration of the superiority of Winchester "Leader" shells is needed than the one found in the records of the two important tournaments held in Pennsylvania and Iowa. At the Pennsylvania state shoot held at York, on May 18th, high expert average was won by J. A. R. Elliott, who broke 520 targets out of 535 shot at, missing but two out of the last hundred he shot at. J. M. Hawkins was second in the same class; while among the amateurs A. B. Richardson was second. At the Iowa state shoot, held at Spirit Lake, May 11, 12 and 13th, Fred Gilbert won the best general average for the tournament, W. R. Crosby being second. The high amateur average was won by C. M. Powers with R. Kline second. Mr. John Peterson, of Randall, Iowa, captured the "Smith Cup" he being the only man who made a straight score of twenty in this event. The "President's Cup" went to W. R. Crosby on a score of 48 out of 50 from the 22 yard mark. All of the above shooters shot the Winchester "Leader" shells, and Messrs. Elliott and Hawkins in connection used Winchester "pump" guns.

Oklahoma City, O. T., May 19th and 20th, C. F. Reust of McLoud, O. T., first amateur average, 335 out of 395 targets, shooting Du Pont Smokeless. Second amateur average, J. C. Clark, of Oklahoma City, O. T., 330 out of 395 targets, shooting Du Pont Smokeless. F. Houston of Perry, O. T., won territorial championship, 46 out of 50, shooting Du Pont Smokeless.

Ridgetown, Ont., May 10th, F. H. Conover, first

general average, 132 out of 150 targets, shooting Du Pont Smokeless.

Davenport, Iowa, Fred Gilbert, first general average, 583 out of 600 targets, run of 79, shooting Du Pont Smokeless.

Danville, Pa., May 23d and 24th, Neaf Apgar of New York, first general average, 356 out of 400, shooting Schultze powder.

Olean, N. Y., May 24th and 25th, J. S. Fanning, first general average, 370 out of 400 targets, shooting "Infallible." First amateur average, A. Sizer of Kane, Pa., 361 out of 400 targets, shooting Du Pont Smokeless.

Houston, Texas, Edgar Valle of Austin, Texas, won the \$400 diamond medal by killing 20 live pigeons straight. Otto Sens of Houston, Texas, won the Chronicle cup, 48 out of 50 targets. Abner Bolt of Abilene, Texas, high average, 25 straight. G. W. Boston, Ada, I. T., won Schmeltzer cup 20 straight. All shot "Infallible." "Infallible" also won the \$450 diamond medal, carrying with it the championship of Texas.

Fred Coleman, shooting the Parker gun at Mahanoy City, Pa., on May 16th, defeated Mr. Cooper in a match of 50 live birds, for a stake of \$1000, with a score of 45 to Mr. Cooper's 42. This was one of the most remarkable boots of the year, and a magnificent record for Mr. Coleman, and speaks volumes for the Parker gun.

At Junction City, Kansas, May 3d to 6th inclusive, Mr. Fred Gilbert, shooting the Parker gun won first general average with a score of 515 out of 545. Mr. C. M. Powers tied for second with a score of 505 out of 545. Mr. Powers also shoots and admires the Parker gun.

At the Cincinnati Gun Club shoot on May 12, Mr. Ad. Roll made a score of 44 out of 50 at 19 yard rise. In the championship series, Arthur Campbell scored 91 out of 100. Both the above gentlemen shooting the Parker gun.

Mr. J. E. Vaughn, of Los Angeles, Cal., won high average at San Diego, April 16th and 17th, shooting his new Parker. Mr. Vaughn is very highly pleased with the result of the Parker gun in his hands.

A few U. M. C. records made during May, 1904, at the shoot at Franklin, Ohio, high average was won by Mr. Chas. Young, scoring 96½%. E. D. Fulford at the Rochester, N. Y., shoot won high average scoring 93%. In Wasco, Texas, Mr. T. E. Hubby on May 9th won high average scoring 98%. On May 11th at Halle, Tenn., F. C. Riehl won first average scoring 96%.

At the Rockdale, Tex. shoot on May 11th, T. E. Hubby won high average, with 96½%. At Memphis, Tenn., E. Brady won the score of 94%, and also at Vicksburg, Mass., Mr. Brady won the high amateur average, scoring 95%. J. L. Head won the Decatur and Hebron shoots on the 11th and 14th, with scores of 98 and 93%. O. N. Ford won the Iowa target championship; Mr. A. P. McDowell the Iowa diamond badge at Spirit Lake on May 13th. Fred Coleman at Mahoney City, Pa., May 14th, before a large crowd won with U. M. C. shells, the Pennsylvania state bird championship. At the Watertown, Wis. Gun Club shoot, May 15th, G. V. Dering won the high average for the shoot scoring 91.1%.

At Litchfield, Ill., May 18th, W. T. Craig won high average scoring 163-175. J. L. Head on May 21st won the shoot at Indianapolis, scoring 94.4%. Mr. Head also won the shoot at Earl Park, Ind., on May 19th with a score of 93%. At the Minneapolis Gun Club shoot May 19th and 21st, T. A. Marshall won high average for the entire shoot. The Nebraska state championship was won by Wm. Townsend who missed but one bird. All these creditable scores were made with U. M. C. shells.

EARLY CLOSING STAKES. King County Fair Association SEATTLE, WASHINGTON, SEPTEMBER 19th to 24th

NORTHWESTERN DERBY (Closed).....	\$1500
Two-Mile Dash for 2:15 Trotters.	
PUGET SOUND STAKES (Closed).....	\$1500
One-Mile and a Half Dash for 2:11 Pacers.	
SEATTLE STAKES.....	\$1250
Two-Mile Dash for 2:11 Trotters.	
EVERGREEN STAKES.....	\$1250
One-Mile and a Half Dash for 2:14 Pacers.	

ENTRIES CLOSE JULY 2 Two or More Harness Races Each Day

CONDITIONS.

Entrance fee 5 per cent of stake and 5 per cent additional from money winners, payable 2 per cent July 2nd, when horse must be named and 3 per cent September 1st. Money divided 50 25 15 and 10 per cent of stake. The Association reserves the right to declare off and return first payment in any stake that does not fill satisfactorily. Right reserved to declare two starters a walk over. When only two start they may contest for the entrance money paid in, to be divided 70 per cent to the first and 30 per cent to the second horse. Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hoppers not barred on pacers over three years old.

Send for Entry Blanks to

G. W. DICKINSON, Pres.

A. T. VAN DE VANTER, Sec'y
P. O. Box 272, Seattle, W.

THE FARM.

Holding Cream for Churning.

A correspondent at Bloomington, Ill., writes that "in common with many others I thought it necessary to keep cream sweet when holding it for churning—for instance, Saturday's cream for Monday's churning. But I accidentally found that the best way is to ripen it, then cool it down very cool and hold it thus. Just how long it can be held and make a good flavored butter I don't know. But as to both time and flavor there is no comparison with sweet cream. I think Professor Farrington owes it to the dairy and creamery world to make some experiments with sour cream. I am satisfied that he will find that under ideal conditions he can hold it so long that he will think two or three times before he will publish the results, fearing that some will make the experiment under conditions far from ideal and therefore fail.

"Now, this holding of cream is of first importance in the hand separator system of creameries. Recently I have advised our patrons to hold their cream at from 70 to 75 degrees until it sours a little, then cool it to 60 degrees and hold it there, adding to it each day's fresh cream, mixing it very thoroughly. Cream handled in this way and held from five to eight days has come to us in prime condition, when cream held only three or four days came to us sweet, but either bitter or flavorless."

Poultry Notes.

Corn is a convenient food for fowls. Too much of it produces fat which makes lazy hens, and therefore few eggs.

Crude carbolic acid is always useful about the hen house. A little stirred into the whitewash acts as a fine disinfectant.

It is well to be crank enough to insist on having good fowls, good houses and good appliances with which to work.

During long rainy spells chickens need dry coops. A pail full of short-cut straw or saw dust, or chaff will fix it all right.

Unless there is plenty of room the hens will insist on laying with each other, and thus break many eggs and annoy each other when sitting.

It is growing quite common to buy up poultry and fatten it for market, the same as hogs or cattle. It pays in the increase in weight and price.

If the flock is small, no difference how well managed, the profit will be small. No profit amounting to much can be made with less than 100 hens.

Some of our breeds need shorter names. We see some using "Dottes," and "Rocks," and "Shans," games, etc. This is a good plan. We need abbreviations. Life is too short to call them by their full name every time they are mentioned.

Much theory indulged in by writers on poultry subjects is not borne out by facts. Ducks are ravenous eaters of everything green. If turned into the garden they will eat every hug and worm they can find. They also will eat the plant that has the hug on it. They will begin at the little end of a vine and eat every atom of it, until they can no longer get it out of the ground.—*Texas Farmer.*

Need Not Run Bills.

One reason why people engaged in dairying are prosperous is because it is a cash business. There is no credit with the old cow. We feed her to-day and to-morrow she pays us back in cash. The dairyman does not have to tell his hired man that he will pay him when he sells his wheat or a bunch of lambs, or when the peaches are marketed. He has the cash every week or every month. The dairyman need not run a bill at his grocery or anywhere else. His business is a cash proposition and he can pay as he goes. This is one of the basic principles of prosperity. Run up no debt and pay as you go. It gets a man into the habit of doing things on business principles, and when he does this he has started on the road to prosperity.—*Cultivator.*

It takes five generations to breed out the blood of a grade and a lifetime to eradicate that of a scrub. If a grade cow is half Jersey or of any other breed if bred to a pure-blooded bull her calf will be three-quarters of that breed and its calf, if bred in the same line, will be fifteen sixteenths of that breed and the last one's calf thirty-one thirty-seconds and so on to the fifth generation—sixty-three sixty-fourths—when the cow is considered a full-blood. It will be noticed that one sixty-fourth of the tainted blood still remains in her veins but that does not figure much in the pail.

A good sheep ranch can be established with much less money than an equally respectable cattle ranch. Not only will the stock cost less, but not so much land will be required. For sheep a much cheaper variety of land will do than for cattle. Hilly land, so badly broken that cattle cannot use it, will serve all right for sheep and for this reason the woolly tribe should inhabit our foothill regions more commonly than at present.

The Montana Registered Cattle Breeders' Association will hold a sale of pure bred cattle at Helena during the week of the State Fair. That is now assured. The offerings will come from the well known herds of the State, and will comprise cattle of four great beef breeds, Herefords, Shorthorns, Aberdeen Angus and Red Polls.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Hen Cholera Easy to Check.

Dr. A. R. Ward has written special bulletin showing how fowl cholera, the insidious disease, was put down in Marin and Sonoma county by the University of California experiment station last fall.

He says that the results of his observations and experiments lead to the conclusion that the disease is introduced into the body through food, and probably water infected with the bacteria. Since fowls eat their dead at every opportunity, this is a practice which must be strictly guarded against during an epidemic. Roosting-houses must be disinfected daily, and feeding troughs must be so designed that the chickens will be prevented from walking in the food. Still more heroic measures are suggested. The prompt slaughter and thorough disposal of all sick hens during an outbreak contribute toward the spread of the disease, and Dr. Ward emphasizes the importance of wholesale killing, pointing out the fact that this is the only true economy in the face of disease. The evidence shows that fowl cholera is a comparatively easy disease to control; but disinfection must be continued after the death rate becomes insignificant. The dissemination of the disease in many cases is due to careless disposal of the dead and the movement of the sick fowls. It has been found possible to take new stock on hand where the cholera has existed two weeks before, provided the buildings be moved and disinfected. This has been confirmed by experiments in the laboratory, which show that sunlight and disinfectants rapidly destroy the bacteria.

Butter makers have long since arrived at the conclusion that the water in which the butter is washed has much to do, not only with the keeping quality of the butter, but often with its flavor. We have seen farm wells so foul that the water could hardly be used except for cooking purposes, but that same water was used in the washing of butter and in the cleansing of vessels that were to hold milk. In one case the writer saw a well the water of which had become almost unusable. The owners had the well

cleaned out, and a great mass of dead angle worms was found in the bottom. It was these angle worms that had tainted the water. In the same way it is preferable to use soft water instead of hard, as sometimes the hardness in the water comes from the presence in it of decayed vegetable matter. At some of the colleges where butter making is taught, this matter of soft and hard water and of filtered and unfiltered water has been looked into, always with the results that the purer water and the soft water gave the best flavored butter. Reports from New Zealand say that some of the off-flavors in the butter that had been sent from that country to Europe were found to come from the water in which the butter was washed. So we caution our readers to make sure that the high-priced butter fat that is to be made up into a form to go on the table of the discriminating buyer be washed in water so pure that there will be no question of its contaminating the butter.

In setting hens, or in arranging nests for hens to lay, new straw or a new nest of any kind is a great check to mites, and poultry enemies of all kinds.

Sober up on Jackson's Napa Soda.

BREEDER AND SPORTSMAN, 36 Geary Street
San Francisco, Cal.

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

LIMONERO

RECORD (3) 2:15³/₄

REG. No. 33389

(A Great Sire of Beauty and Early Speed)

By **PIEDMONT** 9:04 (sire of 6 in 2:30 list and of dams of Fanny Wilcox 2:10¹/₄, Alta Vela 2:11¹/₄, etc., etc.); dam **LULANEER** (dam of Limonero 2:15³/₄, Bion 2:19¹/₄) by Electioneer 125.

LIMONERO 2:15³/₄, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for service in California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. **LIMONERO** 2:15³/₄ got his record as a three-year-old in the fourth heat of a six-beat race for a \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity. **LIMONERO** 2:15³/₄ will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS,

Owner.

J. H. WILLIAMS,
University Station, Los Angeles, Cal.

NUSHAGAK 25939

Sire of Aristo (3) 2:17¹/₄, winner of Occident and Stanford Stakes of 1902 (trial 2:11 at 4 years) Black Jack 2:28¹/₄ (trial 2:23); The Bonnet (4 y. o. trial 2:17¹/₄); Majella 2:29 (4 y. o. trial 2:13¹/₄).

Sired by Sable Wilkes 2:18, sire of 38 in 2:30. Dam, Fidella (dam of Fidette 2:28¹/₄, dam of Mary Celeste 2:17¹/₄) by Director 2:17; second dam by Reavis Blackbird 2:22; third dam by Lancelot, son of McCracken's Blackhawk. **FEE \$50** for the Season, limited to 40 outside mares.

PRINCE ANSEL 2-year-old record 2:20 1-2

Sired by Dexter Prince (sire of Eleata 2:08¹/₄, James L. 2:09¹/₄, Edith 2:10, etc.); dam Woodflower (dam of Saylor 2:15¹/₄) by Ansel 2:30, son of Electioneer; second dam Mayflower 2:30¹/₄ (dam of Manzanita 2:16, Wildflower (3) 2:21 and 8 producing daughters) by St. Clair 1885. Prince Ansel's oldest colts are now 3 years old. He has only 3 at that age, and the only one that has ever had a shoe on is in training at Pleasanton and can beat 2:30 easily. **FEE \$30** for the Season.

The above horses will make the Season at **WALNUT GROVE STOCK FARM.**

Good pasturage at \$3 per month. The best of care taken of mares, but no responsibility assumed for accidents or escapes.

ALEX. BROWN, Owner, Walnut Grove, Sacramento Co., Cal.

I DIRECT 2:12 1-2

(Officially Timed in Race in 2:08¹/₄)

SIRE, DIRECT 2:05¹/₄, sire of 54 in the list, including Directly 2:33¹/₄, Direct Bal 2:04¹/₄, Bonnie Direct 2:05¹/₄, Prince Direct 2:07, Directum Kelly 2:08¹/₄, Tribby Direct 2:08¹/₄, King Direct 2:09¹/₄, Rev Direct 2:10, etc., etc.

DAM, FRANCISCA (dam of I Direct 2:12¹/₄, Sable Frances 2:15¹/₄, Guyesca 2:26 and Earl Medium, sire of May Bod 2:13¹/₄, Tom Martin 2:14¹/₄, Kanawah Star 2:14¹/₄, Lucy Stokes 2:18¹/₄, Goneril 2:24¹/₄, Pearl Medium 2:29, etc.) by Almont 33. Second dam, Frances Breckenridge (dam of Maximus 5:175, sire of 2 in list) by Sentinel 289; third dam by Bayard St. fourth dam, Luna by Swigert's Lexington; fifth dam, Eagles by Imp. Glencoe.

Will make the Season of 1904 at Denulou's Stables, 19th and E streets, near Agricultural Park, Sacramento.

Fee \$50.

I DIRECT is one of the best bred and fastest of the sons of the great Direct. He is a splendid individual, stands 15-3 and weighs nearly 1100 pounds; has perfect disposition and is a game racehorse. He will be limited to a dozen mares, as he will be trained for the races on the California Circuit, in which he is already entered.

Hunting wild and dangerous game by the light of the camp fire is attractive. The actual experience of the trial is rough and hard. Under such conditions you need a rifle built for hard usage, one that will reach your game at long range, if necessary, and strike with deadly effect. We have four excellent sizes for such work. Write to-day for Catalogue No. 10.

SAVAGE ARMS CO.,
UTICA, N. Y.

SEYMOUR WILKES REG. NO. 0232.
Race Record 2:08 1-2
The Fastest Son of Guy Wilkes

And Sire of the Sensational Trotter Monroe 2:12 1/4
and Joe Eviston (3) 2:22
Will make the Season of 1904 at

Lakeville, Sonoma County, Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game racehorse. No horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike, and in nearly every instance are square trotters.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Blackhawk 767. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street San Francisco.

BAYSWATER WILKES 2:25 1/4 Son of Sable Wilkes 2:18
and Fanny Bayswater,
Sire of KELLY BRIGGS 2:10 1/4
Dam of 2 in 2:30

WILL MAKE THE SEASON OF 1904 AT
WOODLAND, CAL. Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, Sable Wilkes, also sired Nushagak, sire of Ariato, winner of the Occident and Stanford stakes. His dam, Fanny Bayswater, is the dam of Senator L., holder of the champion four-mile trotting record of 10:12.

Bred to BAYSWATER WILKES and you will get colts that will sell at good prices. For cards containing full Pedigree and all particulars address

CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES and DRIES in quickly and DOES NOT GUM and FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and insures a rapid, healthy growth—ALL DRYNESS and BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE FOR THRUSH and SCRATCHES and We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

C. O. STANTON, San Jose Manager.

Isn't He Worth Saving?

Why trade off or sell at a bargain price a good horse just because he "goes lame," "throws a curb" or develops some other blemish? There is nothing in the way of Spavins, Curbs, Splints, Windpufts or Bunches which will not yield readily and permanently to treatment with

QUINN'S OINTMENT.

Dr. E. H. Davenport, a prominent physician of Sheridan, Ind., writes: "I have used a number of remedies for the removal of curbs, splints, thickened tendons and tissues generally, but for the last two years I have not been without Quinn's Ointment. I have tested it thoroughly at different times, and say without hesitancy that it is the only reliable remedy of the kind I have ever tried." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circular, testimonials, etc.

THE PRELIMINARY ARRANGEMENTS for the California circuit of harness racing are all that could be desired. The purses and stakes are liberal, the entry lists large at all meetings, and the general public more interested than for some time. The next important thing will be the carrying out of the programs, and there should be an extra strong effort made by every association to have the very best management possible. A good starter is one necessity, but a good set of judges is vastly more important. Calm, cool headed fair minded men who know the rules "and knowing dare maintain" are doubtless hard to find, but if the associations will put as much energy into looking up such men as they do in securing bids for the privileges, they will be able to secure judges who will do satisfactory work. If California had a regularly organized circuit (and it should have) a paid judge and a starter could be employed that would go through the circuit and officiate at all the meetings. We do not doubt but arrangements could be made with the North Pacific Circuit by which a judge could be secured for all the principal harness meetings on this Coast. But while this should be done, it is now too late to make any such arrangements this year in the absence of any organization of a regular circuit in California. However there is nothing to prevent the California associations making a special, if not an organized effort to secure good starters and good judges. Let them do the best they can and there will be little cause for complaint. The principal thing in selecting men for judges is to pick out those who are cool enough to deliberate before forming an opinion, honest enough to be fair, with backbone enough to be firm, and who have sufficient interest in the rules governing harness races to study them before going into the stand.

A GOOD CHANCE to win money is offered by Manager Tom Smith of the Vallejo Race Meeting who has hung up a \$500 purse for 2:12 class trotters. There are many horses named in the slow classes that would stand a chance of winning in the 2:12 class this year as about all the horses usually entered in this class here are unable to put in three heats better than 2:15 when the race comes off. Well entered is well raced and the wise owner does not let the class of the race scare him out. It is the actual present class of the horses that he must consider.

JULY 1ST IS THE DATE set for closing entries to the races offered by the Central California Racing and Agricultural Fair at Hanford. \$1000 is offered for 2:17 class pacers, \$1000 for 2:24 class trotters, and there are several \$500 purses. The meeting will open October 10th and racing will continue five days.

FOUR BIG STAKES are advertised for the Seattle September meeting. Two are closed, but two others are open until July 2d. Read the advertisement.

Stanford Stake of 1906 Has 69 Entries.

Secretary L. R. Miller of the State Agricultural Society writes us as follows under date of June 14th: "Enclosed find a list of entries to the Stanford Stake of 1906, for foals of 1903, which closed June 1st. All the horsemen at the Sacramento track report it in splendid condition and with the class of entries to our regular races we should see some very fast time made at the State Fair this year. Everything is pointing to the very best race meeting and livestock show ever held at the State Fair."

The entries to the Stanford Stake of 1906 are as follows:

C A Arvedson's b f by Sutter-Anna Phelps.
Thos H Brents' b f Magladi by Del Norte-Laurelia.
Mrs S V Barstow's b c Nearest McKinney by McKinney-Maud J.
Alex Brown's b f by McKinney-Pioche; b f by Nushagak-Redflower; b c by Nushagak-Bonny Derby; b r or blk c by Nushagak-Chamois.
H M Belt's b c Primero by Cobwallis(?)—Jinny.
T W Barstow's s f Nearest by Nearest-Mormon Girl.
W O Bowers'—by Silver Bee-May.
Martin Carter's ch f by T C-Ingar; b h by Nutwood Wilkes-Bessie C; b f by Nutwood Wilkes-Lew G; b f by Stam B-Lida W 2:18; c h by T. C.—Queen C 2:28.
F G Crawford's b m Bell C. by Falrose-Ella.
Geo A Cressey's s c by L. W. Russell-Elsie.
Robert Christie's b c Joybells by Monbells-Maiden.
James Coffin's b c by Mendocino-Mary Osborne; b f by McKinney-Lucyner.
E D Dudley's ch c Palite by Nutwood Wilkes-Palita.
Wm De Pons' b c Vibrator by Azmoor-Melrose.
W G Durfee's b c by Petigru-Ludena.
L B Daniels' b c Lee Leword by Kentucky Baron.
Peter Fryatt's b f Easter Maid by Senator-Maud B.
J Fingland Jr's ch f Wilma by Nutwood Wilkes-Silvie Allen.
Patrick Foley's b c Major Montesol by Montesol-Lady Galindo.
Griffith & McConnell's b f by Bonnie Direct 2:05.
Ginger; b r by Bonnie Direct-Jennie Mac.
M G Gill's b c Kinney G. by Kinney Lou-Mattie G.
Henry Hahn's b c Bendocino by Mendocino-Sallie Benton.
E P Heald's ch f by Ed. McKinney-Princess McKinney.
J B Iverson's b m Ruby McKinney by McKinney-Ruby; b g g Roseer by Eugeneer-Roseate.
Charles Johnson's o f Roseleaf by Falrose-Larney; c f Paleta, by Nutwood Wilkes-Fiska.
Orville O Jonas' b c Ariel by Neerut-Midget.
J A Kirkman's br—Volway by Stoneway-Viva.
Geo A Kelly's r c by Antrim-Birdie.
A F Liefer's b c Monroe L. by Monroe S.—Lady Nance.
La Siesta Ranch's b c by Iran Alto-Lady Belle Isle.
William Leech's b f Hiawatha by Baron Bretton-Silver Bells.
P W Lee's b f Stam B Tarte by Stam B.—Estarte.
G B McAneny's b r f Mabel McA. by McKinney-Almah.
D S Matthews' b f Valentine B. by Edward B.—Rhoney G.
P B Michel's blk s General Fores by Neerut-Concha.
William Morgan's b c Crisis by Zombro-Nellie K.
R H Nason's b h Swiftwater by Diablo-Mischief.
Geo C Need's b c Golden Baron by Barondale-Mary B.
E C Peate's b c Electro by Sutter-Buchu.
Rose Dale Stock Farm's f by Washington McKinney-Hazel Turk; b f by Washington McKinney-Daly.
Mrs Sol Runyon's b h by Nushagak-Altwood.
Sutherland & Chadbourne's br s Sam G by Stam B-Bertie.
D B Stewart's b f by Zombro-Dutchess Medium.
Thomas Smith's ch c by Nutwood Wilkes-Daisy S.
T Edmond Snow's b c by Zombro-Alceszette.
E Topham's ch f by Monterey-Blanche T.
M H Tuttle's b f by Stam B-Laurel; b f by Mendocino-Lulu Wilkes.
W E Tuttle's b f by Stam B 2:11—Red Buck; blk f by McKinney 2:11—Aerolite.
L H Todhunter's b c Gerald G by Zombro-Itella; b c Silver Hunter by Zombro-The Silver Bell.
M S Severance's b f by Direct Heir-Rosedrop; b r f by Derby Heir-Clendoveer.
Vendome Farm's b s Alto Kinney by McKinney-Irantilla; b f Mrs. Weller by McKinney-Much Better.
Geo S Warlow's b s Jacolitos by Athabla-Narcola; b c Stanford McKinney by McKinney-Avena.

Owing to the unprecedented attendance at the tracks since the pool rooms were closed, it is reported the associations controlling the various tracks about New York are making arrangements to raise the price of admission. For grand stand tickets it is understood the figure will be advanced from \$2 to \$8, while 75 cents, the price for tickets to the field stand, probably will be doubled.

Strike!—If they don't give you Jackson's Naps Soda when you ask for it.

The Price Didn't Stop Him.

The Northwest is largely settled by Norwegians who, while notably thrifty and industrious, have never been accused of being overly fond of horses and certainly not given to letting go the money lavishly for them. The true love for horses and the sentiment which keeps so many "in the game" is, however, not withheld from the race, as was demonstrated not long since at the home of Dan Patch. Several weeks ago a Swede arrived there, mounted on a little black mare, who had a large feather-legged colt at foot which greatly resembled a Percheron. It was raining at the time, but the Swede man, red-shirted and pink-whiskered, was in thorough good humor. He dismounted leisurely and announced that he was going to breed the mare to Dan Patch. Whereupon the boys began to josh him. Finally Mr. Hersey joined the party and heard the Swede man's tale. He had shipped the mare from South Dakota to Minneapolis and had then ridden her 17 miles to the farm. Mr. Hersey, thinking to close all arguments at once, asked, "Do you happen to realize that it takes \$500 in coin of the realm to breed to Dan Patch?" "You tenk," said the Swede, "that I have not the money. I show you." At that he went into his overalls and brought up a roll of bills big enough to choke the firebox of an Atlantic liner. Heskinen off five crisp \$100 bills and inquired for the next freight to Minneapolis. Several high-class mares had already been turned away, as Dan's book was full, but Mr. Hersey didn't have the heart to deny a Swede as game as this one the privilege of breeding his mare. Sentiment in the horse business is truly deep and everlasting. The Swede man went home on a freight, for, said he, "it don't cost so much to travel that way."—"Marque" in *Horse Review*.

Answers to Correspondents.

SUBSCRIBER, Centreville—Will you please give me the pedigree and record of Como? If now living would be about 23 years old. Also the pedigree of Billy Hayward.

Ans.—Como, chestnut stallion, foaled 1878 by Elmo 891, dam Juno, said to be by Pat Malloy. Bred by C. F. D. Hastings of San Francisco. Record 2:26. Billy Hayward 489, grey stallion by Geo. M. Patchen Jr. 31, dam Grey Liza, said to be by Morse Horse 6. Bred by H. A. Mayhew, East Oakland, Cal. Record 2:31.

W. J. EAST, Eureka—How many times did Satsuma win the Burns Handicap, and who rode him in that event?

Ans.—Satsuma won the race but once which was in 1898. He was ridden by Henry Shields.

W. W. Mendenhall purchased a two-year-old colt from David Young of Stockton the other day that is not only a fine individual and a natural trotter, but one of the best bred ones in California. He calls the colt Hannibal and he looks like a future conqueror. He is by Iran Alto 2:12, fastest son of Palo Alto 2:08, by Electioneer. Hannibal is the first foal of Alma Wilkeswood, a daughter of Alcantara, and Alma Wilkeswood's dam is Emma Nutwood, a great broodmare by Nutwood that was sent East by her owner to be mated with Alcantara, the great son of Geo. Wilkes and Alma Mater. The next dam is Lady Emma by Black Hawk 767, the next is the Newby mare by old Gen. Taylor, champion 30 miles trotter and the next Rosalie by Williamson's Belmont. The great broodmares in the first four crosses of the pedigree of this colt are Elaine, dam of 4, Dame Winnie, dam of 5, Green Mountain Maid (twice) dam of 9, Alma Mater, dam of 8, Miss Russell, dam of 7 and Emma Nutwood, dam of 2. The great sires are Hambletonian 10, (three times), Harry Clay 45, Mambrino Patchen 58, Belmont 64, Nutwood 600, Electioneer 125, Geo. Wilkes 519, Messenger Duroc 106, Palo Alto 2:08, Alcantara 2:23 and Iran Alto 2:12. Breed this colt to a filly that is descended from Beautiful Bells and the tabulated pedigree of the product would contain the names of the four greatest of the great broodmares.

Two horses have been consigned to the auction ring in this city by Green Meadow Stock Farm, Santa Clara and will be sold by Fred H. Chase & Co. on the same evening the Meek Estate horses are offered. One is Rose K., a four-year-old sister to Robert I. 2:08, by Hambletonian Wilkes, dam the great broodmare Annabelle by Dawn. This filly is sixteen hands high, weighs 1150 pounds, can show a 2:30 gait, is a nice trotter, and good pole horse. She wears no boots and is afraid of nothing. The other one from the Green Meadow Farm is a three-year-old gelding by Hambletonian Wilkes out of a mare by Duke, son of A. W. Richmond. This young horse is nearly 16 hands high and will grow into a great carriage horse. He is very gentle, a square trotter but has not been driven much. Both these trotters are good prospects.

JOTTINGS.

THE BIG LISTS OF ENTRIES received by the associations offering purses and stakes for harness meetings in California this year, should convince our Eastern contemporaries that harness racing in this State is not in the deplorable condition that one or two disgruntled and discredited correspondents of the sour-grape variety would have them believe. Conditions in California are much different from those elsewhere so far as harness racing is concerned. Years ago the California Legislature divided the State into agricultural districts in each of which was a fair association which gave an annual fair and race meeting. In the boom days of the trotting horse, when large breeding farms were being established in almost every county by men of wealth, harness racing was the chief attraction at these district fairs, and so popular did they become that nearly every county organized a district association until there were 46 districts drawing from \$500 to \$3500 annually from the State Treasurer, the aggregate being over \$100,000. The hard times came in 1893 and when the next Legislature convened, the appropriation bill contained the usual appropriation for district fairs, but this item was vetoed by Governor Budd on the ground of economy. After two years, during which but very few meetings were held, the appropriations were restored and the fairs were again getting on their feet, when in 1902 Governor Pardee followed in the footsteps of Budd and struck the district fair money from the appropriation bill. Without the appropriation, few district boards will venture giving a fair, and as the harness racing has always been conducted by those organizations, it can readily be seen why the California circuit should shrink to such small proportions. The Pacific Coast Trotting Horse Breeders Association stepped into the breach during the Budd administration and gave several meetings each year, thus furnishing the trotting horse owners a chance to race, and this year the association will give two meetings, and with the aid of the Pleasanton and Vallejo associations and the State Fair, make up a good circuit of meetings at which purses ranging from \$500 to \$2000 are given. During all the years when financial depression and other causes tended to reduce the number of fairs held in this State, the Trotting Horse Breeders Association has kept to the front, given good meetings, organized an annual \$6000 colt stake and worked energetically for the promotion and popularizing of the sport of harness racing. Its meetings have been well attended and well conducted, and the Year Books will show that high class racing has been the rule. I believe that all the officers of the Breeders Association have the endorsement of ninety-nine out of every hundred persons connected with harness horse affairs in California. They have stood for clean racing and the present financial condition of the organization is proof of their good management.

Prior to the establishment of winter racing here by the California Jockey Club the only racing had in this State was that furnished by the State and District fairs during the summer months and a two-weeks' spring and fall running meeting in San Francisco. Racing then was a sport and was patronized by the general public quite liberally. When six months of racing, from November to May, was inaugurated in San Francisco, however, the race loving public soon became satiated and racing was no longer a novelty. Bookmaking then took the place of auction and mutual pools, and the immense profits made by the San Francisco racing associations led the State Fair and the district association directors to believe they could conduct meetings on the "running plan" and make money. Even the Breeders Association was led to believe that bookmaking and dash racing would draw big crowds and be popular with the public. It soon found, however, that a mistake had been made, and during the past few years has returned to the old plan of racing, and limited the betting to the auctions and the mutuels with the result that racing has improved, the attendance been better and the meetings paid a profit. The district fair associations and the State Fair directors have also found that the methods of the running tracks have been of no benefit to them financially or otherwise, and they are gradually returning to the more healthy, if old-fashioned, ways of racing. With the people (to whom fair organizations must look for their support) the bookmakers, and those who follow the races for the sole purpose of gambling on them, are not in favor.

Those who are acquainted with the conditions existing in California know that harness racing is still popular here, and it has been proven that well conducted

meetings will pay a profit. That such is the case is more remarkable when all the adverse circumstances are considered. By means of a little work and enterprise there will be seven or eight weeks of harness racing for purses of \$500 to \$2000 in California this year, and several weeks additional during which the purses will be from \$100 to \$500. Over \$50,000 will be trotted and paced for in this State before the season is over. The entry lists are large at every place where purses have closed thus far, there is general good feeling all along the line, and there are buyers for every good horse developed. There is more actual enthusiasm over the prospects of the approaching season of harness racing than has been manifest for years. Everything points to a successful season.

It is reported that Mr. Geo. W. Ford, the prosperous walnut grower of Santa Ana, has sold his good stallion Neernut 2:12½ to European parties for \$9000. It will be remembered that Neeretta, Neernut's first foal to be raced, took a record of 2:09½ and was afterwards sold to go to Austria, where she raced well, and it is said that her performance there led to the sale of Neernut. Mr. Ford's stallion never had much opportunity at the stud as he was raced a good deal, until ten years old, and the years when he should have been used for breeding were the dull years in harness horse matters and the majority of his foals were owned by Mr. Ford and not raced. That he will sire speed in Austria and pay a big profit on his price is as certain as he lives. Neernut was bred by C. S. Sargent of Stockton, Cal., passed to Mr. John F. Boyd of Oakwood Park Stock Farm when at the side of his dam, and was sold by Mr. Boyd when a two-year-old

Neernut 2:12 1-2

to Mr. Ford. He is fourteen years old and earned his record in a six heat race, which he won at Los Angeles in 1897, beating Margaret Worth, Osots. Antrim, Daisy Wood and Iran Alto. He is by Albert W. 2:20 (son of Electioneer and Sister by John Nelson) and his dam is Clytie II by Nutwood, second dam Clytie by Whipples Hambletonian, third dam a daughter of Williamson's Belmont. Neernut stands 15.3, weighs about 1000 pounds, and is a blood bay with black points. Although but two or three of the get of Neernut have been raced, nearly every one that has been trained at all has shown speed of a high rate and come to its speed quickly.

Several of the get of Neernut that were taken to the Blue Ribbon Sale last month by Mr. Ford will be raced this year. The entire consignment was withdrawn from the sale, and since then several of the horses have been sold at private sale and others have been leased. Secretary Snyder of the Detroit Driving Club has leased Burnut and Golden Nut and they are now being trained by Frank Colby at the Grosse Point track. Burnut has trotted miles in 2:15 and will be a 2:10 trotter before the season is ended if he keeps right and has no bad luck.

An effort is being made to get up races for the fast trotters on the California circuit this year. Although the State Fair directors offered \$1000 for trotters of the free for all class, but three entries were made to the race and it consequently was declared off. The horses named were What Is It 2:16½, Forrest W. 2:14½ and Ole 2:15½. Had it not been for a sprained ankle Liege 2:12½ would have been entered in this race. There are doubtless a half dozen trotters that will be raced in California this year whose owners believe are fast enough to compete with the four horses above named. Knowing this to be the fact, the Vallejo Association has opened a \$500 stake for 2:12 trotters, the Breeders have opened a \$600 stake for the same class at the Santa Rosa meeting, and the State Fair directors will doubtless open a stake for the same class. The Oregon State Fair advertises a stake of \$1000 for trotters of the 2:12 class and there will doubtless be other good stakes or purses for the fast trotters on this Coast. Owners of trotters that think their horses can win the big stakes offered for the slow classes will probably find that it will not require as much speed to win the free for all trots in California this year as it will to win the 2:24 trot at San Jose.

Those \$10,000 stakes for 2:14 class trotters offered by the Empire City and Brighton Beach tracks filled with sixteen entries each. Those in the Knickerbocker, which is the Empire City stake, are the California horses Sweet Marie 2:13½, Stanley Dillon and Aristo 2:17½, besides Mary Gage 2:16½, Alberto 2:13½, Direct View 2:14½, Lady Patchie, John Mc. 2:17½, Blondie 2:13½, The Rajah 2:14½, Dr. Time, Ethel's Pride 2:13½, Hie Boy 2:18½, Woodstella 2:16½, Katherine A. 2:14 and Miss Gay. The Long Island, which will be trotted at the Brighton Beach track, has the following entries: Mary Gage 2:16½, Fred McClung 2:15½, Alberto 2:13½, Aristo 2:17½, Direct View 2:14½, Lady Patchie, Sweet Marie, Alexander, Traveloso, The Rajah 2:14½, Ethel's Pride 2:13½, Oxford Chimes 2:13½, Hie Boy 2:18½, Woodstella 2:16½, Katherine A. 2:14 and Miss Gay. These are great fields and both races should furnish splendid contests.

Several of those who have signified their intention of entering their foals of this year in the side stake proposed by Mr. T. J. Crowley for colts and fillies named in the Breeders Futurity No. 4, met the other evening in the office of the BREEDER & SPORTSMAN and there was considerable talk about the proposed conditions of the race. The division of the money is a rather difficult matter to adjust satisfactorily to all concerned, and has not yet been finally determined. C. A. Durfee's idea is to have all the money go to the horse that has the best position in the summary at the end of the race. This to me, looks like the best plan. If it is divided into three or four parts, like the main stake, there will not be enough to make the side stake much of a feature, but if the whole sum is lumped and given to the best colt it will excite more interest among those having entries and draw more attention to the stake. There is nothing that attracts the public like a big stake, and the more money, the greater the attraction.

Workouts at Los Angeles Track.

The track at Agricultural Park, Los Angeles has been quite lively during the past few weeks, by the trainers who are getting their horses ready for the California and northern circuits. Mr. Edward R. Smith, of Los Angeles, who is in San Francisco this week, informs us that on a recent visit to the Los Angeles track he took the time of some of the workouts as follows:

Mosler's horses—Tidal Wave, pacer, by Nutwood Wilkes, mile in 2:10½; Red Skin, trotter, by Red Cloak, mile in 2:14, half in 1:06½; Oosoola, two-year old, mile in 2:24½, half in 1:10½.

W. G. Durfee's horses—Two-year-old Zombro filly, mile in 2:28½, last quarter in 0:34½; Cavalier by Welcome, mile in 2:13½; Idlewild, mile in 2:14½; Silver Coin, mile in 2:17½, half in 1:03½.

Vance's horses—Geraldine, three-year-old, entered in Occident and Stanford Stakes, mile in 2:20½, half in 1:08½; Highball, mile in 2:12½; Rozell, mile in 2:16½; green Strathway mare (trotter) half in 1:07.

Maben's horses—Ira, mile in 2:15½, half in 1:03½; Alfred D., mile in 2:13½, half in 1:03, quarter in 30 seconds; Mamie Elizabeth, mile in 2:17½, half in 1:07½; green Strathway mare, quarter in 32½ seconds.

Ward's horses—Miss Madison, mile in 2:16½, half in 1:07½; Cavaliero by Stanton Wilkes, mile in 2:12½, half in 1:04.

Delaney's horses—Zolock, mile in 2:12½, half in 1:05.

Matinee Racing at Sacramento.

There was a good attendance at Agricultural Park, last Sunday, to see the races between horses owned by members of the Sacramento Driving Club. Three races were on the card. The day was exceedingly warm, and some of the horses were tired completely out owing to the inexperience of the drivers who scored too long with them.

There were three starters in the first race—W. Trust with Candy Joe, J. Wheeler with Bobby Dobbs and F. E. Wright with Queen S. Bobby Dobbs won the first heat from Candy Joe by a nose in 2:28. The second heat went to Queen S. in 2:37½, both the others being very tired. In the third heat Queen S. had a walkover, the other two being withdrawn.

The second race had three starters. They were McMullen's Elrose, Christie's Diawood colt Briarwood, and Dr. Girardy's Jess. Elrose won the first heat in 2:36 but the Diawood colt annexed the two following in 2:38 and 2:37.

Mr. Williams' brown mare Flossie and Mr. Riley's black mare Alata R. were the only starters in the third race. Flossie won in two straights, the time being 2:30 and 2:30½, and the finishes very close.

George Beckers has moved his stable of trotters, and his stallion Zombro 2:11 from Cleveland to Columbus, Ohio. Zombro has a number of fine mares booked to him.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

President Harry K. Devereux, of the Gentlemen's Driving Club of Cleveland proposes that the members of that organization purchase saddle trotters for use at the matinees, and the suggestion has found instant approval. As a departure from trotting races to wagon, trotting contests under saddle should prove an interesting innovation, and since Mr. Devereux proposes to have the contests arranged on a handicap basis, competition should be keen throughout the season. The suggestion emphasizes the fact that the first of America's first-class matinee organizations is zealous of its standing and means to be in the forefront all the time.

N. K. Fedossieff of Moscow, Russia, supplementing his recent letter published in *The Horseman*, in regard to the success of American sires in Russia, says: "We have a large number of half bred Americans now and I have not seen a single instance that one of them should even have an inclination to pace. Such horses as Nominee that sired mostly pacers from American mares when crossed on Orloff mares produced a trotter in every instance. This is particularly interesting to those breeders that want to breed only trotters and have stallions at the head of their studs that produce a certain percentage of pacers, which is the case with every stallion standing for service in America. If the Orloff cross will stop the inclination to pace, even if it does not add to the speed of the American trotter, it will be of immense benefit to our breeders."

C. K. G. Billings is to construct a private training track right in New York, having decided to utilize his recent purchase of the Washington Heights battleground site adjoining his estate on the hill above the Speedway. It is astonishing how many of the formerly enthusiastic road regulars seem to be losing interest and moving elsewhere to do their fast driving. Gen. Ives says he does not enjoy the road as of old; Charles C. Lloyd keeps his fast ones at the track; Frank Work is averse to using the Speedway; A. B. Gwathmey has chilled a little, and still others prefer to drive full miles, carrying their watch so as to know how fast the moves really are. Some say that it is impossible to get a fair start and an even break up there. This should not be with so many genuine sportsmen among our leading owners.

N. W. Hubinger, of New Haven, Conn., who annually campaigns a good string down the Grand Circuit, had his leg broken at a matinee of the Gentlemen's Driving Club on Memorial Day. He was driving Great Barrington when the dashboard gave way and he was hurled to the ground, narrowly escaping being trampled to death by the horse he was driving.

At the Old Glory sale of last November Dan Malony, the White Plains horseman, picked up the yearling Bingen and Nowaday colt Governor Crane, paying \$1650 for the youngster. In January he sold him to Howard Willets at a stiff advance, \$10,000, but after looking the trotting field over the millionaire fancier concluded that he would not campaign trotters, so at the Cleveland sale Governor Crane passed under the hammer a second time, being struck off to the bid of John Rombagh, of the Empire City colony of trainers, at hut \$525. Malony repurchased him, and to-day he is munching his rations at the old stand up at the White Plains Fair Grounds, contented with his lot and entirely unaware of the kaleidoscopic changes of the market in which his particular case has been involved. He has \$40,000 worth of stake engagements ahead to fill in his two and three-year-old form and may prove a very great winner should he have his share of racing luck.

A feature in connection with the Decoration Day horse race at the Mount Holly, N. J., fair grounds was the winning of a race by a horse driven by Daniel Bodine, of Camden. Mr. Bodine is past 82 years of age, and the performance in which he took part is probably a record breaker. He drove Major S. in the free-for-all and won in two straight heats, one of which was paced in 2:13. Major S. is a pacer and wore hoppers in the above race. The 1500 spectators in the grand stand cheered the aged driver as he carried off the honors of the day.

George H. Estabrook of Denver has entered Hallie Hardin in the two big stakes for 2:14 trotters at Empire and Brighton Beach. Edwin Gaylord has entered Conanza for the same stakes. The two have been worked regularly by Joe McGuire, who says that either can trot in 2:10 at this time.

W. A. Clark Jr., the Montana horseman, has secured a membership in the Denver Gentlemen's Driving and Riding club, with the intention of making his debut as a matinee driver. The serious illness of his son in Butte called him away before the matinee so he was compelled to postpone his first appearance. The youngster has recovered from his illness and Mr. Clark will be in Denver within a few days prepared to take up his practice at driving. He has entered his two-year-old trotter, Sallie Lunn, in the Lexington trot for her class. She is by Wiggins, out of Belle de Baron hy Alstian. He is by Sultan out of Alma Mater. Sallie showed a mile in 2:29, the fastest ever trotted in Colorado by a two-year-old.

Lou Dillon's mile in 2:09, at Memphis recently shows conclusively that the champion will be in form to begin her assault on Father Time by the time the Grand Circuit opens. Her first attempt at record-breaking this season will probably be at Cleveland, July 30th, which will come on the Saturday following the Detroit meeting and preceding the Buffalo meeting. Arrangements are in progress for holding a one-day race meeting over the Cleveland track on that date, with some class races and several special features, chief of which will be an attempt by Lou Dillon to beat a record. If weather conditions are perfect and the public know that the famous mare is in good form, there will be a record-breaking crowd out to see the day's sport.

The well known trotting stallion Tommy Britton 2:06, that has been in the stable of W. J. Andrews at Buffalo since last November, has been sold to parties in Vienna represented by Albert Mozier for a reported price of \$15,000. He raced successfully as a yearling and two, four and six years, and sold in 1899 for \$20,000, E. A. Lord & Co., Chicago, bidding him off. Last November he was auctioned at \$7000, and no one has ever been told his buyer's name. Andrews worked the little horse over the Speedway all winter, and expected to race him in the 2:07 class of the Grand Circuit this season. It has been popularly supposed that he belonged to William Simpson, for whom Andrews campaigned Bouncer 2:09, John R. Gentry 2:00, and various others. It is said the Austrian buyers have 100 mares booked to Tommy Britton, a company having been formed that sent Mr. Mosier over to get the best fast horse he could find for \$15,000.

John Shepard, the dean of Boston road drivers, cannot be classed among the tax dodgers, a rather popular fad with many wealthy men. Mr. Shepard has a summer residence at Swampscott, Mass., on Massachusetts Bay, and the difference in the tax rate is such that he would make a considerable annual saving by making that place his home. In this connection Mr. Shepard says, "I am going to pay my personal tax to the city of Boston hereafter, because I believe it is my duty to do so. My business is there, the city protects it for me at considerable expense, and I consider it no more than right I should pay my taxes to that city."

Belle Hamlin 2:12, now 25 years old, foaled a bay colt by The Beau Ideal last week at Village Farm. The grand old mare held the pole record, together with Honest George 2:14, from September, 1892, until last season—a rare occurrence with so many fast ones out and about each year.

William Russell Allen denies the report that an attempt was made to poison Kremlin 2:07, and several other valuable horses at Allen Farm. He says that none of the employees have been discharged recently and hands the entire story as false.

Matinee racing among the trotters will open at the Empire City track, Saturday June 18th under the auspices of the New York Driving Club, with a program of miles dashed between fast horses owned by members of the club. The race committee, for the competition at the track this season, has made a number of changes in the rules which are expected to improve even the high-class entertainment of last year. The graduation system of last year, which has since been adopted by the matinee clubs throughout the country, will again be in operation. For the first time in amateur races, there will be a distance flag at 120 yards, with the sole object of relieving the judges of responsibility. Six silver trophies are offered in addition to the usual ribbons, and a horse must have competed in five matinees to win one of the cups. Two of the cups will be known as the President's Cups, and will be awarded, one to the trotter and one to the pacer scoring greatest number of points during the season, counting four for first, two for second, and one for third. There will also be cups for the fastest miles and to horses winning the greatest number of heats.

The St. Clair shaftless sulky, an invention of the well-known Kentucky horseman, George W. St. Clair, has passed the experimental stage, and the first vehicle will be ready for a thorough trial some time this month. Patents on the sulky have already been filed and passed upon. Scott Hudson, Frank P. Kenney and George W. St. Clair are the incorporators of the company which will put the "shaftless" upon the market. The sulky fits over the back of the horse.

"Ex-Congressman Johnson of Indiana, in the heat of debate, once called an Illinois congressman an ass. It was necessary for this epithet to be withdrawn, and after some colloquy, Mr. Johnson said:

"I withdraw the language, Mr. Speaker, but I insist that the gentleman from Illinois is out of order."

"How am I out of order?" yelled the man from Illinois.

"Probably a veterinary surgeon could tell you," hotly retorted Johnson, thereby repeating the original insult, but in parliamentary language."

Talking about unlucky numbers, the lowest priced animal in the Forhes' consignment was Croydon, number 13 in the catalogue. Croydon was foaled in 1903, the numbers in which, if added together, make 13. The colt's breeding is no explanation for the low price, a paltry \$200, that he brought. Croydon is sired by Peter the Great 2:07. His dam is by Bingen 2:05; second dam, Houri 2:17 by Onward 2:25; third dam by Mambrino Patchen, etc. The number "13" is not looked upon with favor by consignors to combination auctions, and some, who have been promised an early position in the catalogue, insist that they not be given that number. In the Chicago Horse Sale Company's catalogue of their February sale of this year number 13 is "reserved for whoever wants it." No one interested in the auction sale business needs to be superstitious. The late William B. Fasig bothered himself enough over the number 13 to preclude the necessity of any additional worrying in that direction. Many are the tales told of Fasig's superstitions. On one occasion he deliberately refused to take a train that would have gotten him to an appointment on time because, as he stepped from a car in front of the depot, a cross-eyed girl with red hair crossed his path. The busiest time the number 13 ever had with a sales manager was probably the day Ed. A. Tipton left New York for Portsmouth, N. H., to arrange for the sale of the horses belonging to the Frank Jones estate. From the time he left Grand Central depot on track 13, till several days later, when he stepped from street car 1313 to go to the office on his return he met the unlucky number at every hand. Mr. Tipton must hear a charmed life, however, for the sale was a success, the 72 horses averaging over \$760.

"Columbus" tells this one which will be appreciated by the trainers: An owner of a 2:30 trotting mare wrote a trainer that he would lease her for the ensuing season, adding that he had expended all the money he cared to on the mare, but believed that she should earn some money in her class. The trainer wrote back to this effect: "Your mare may be all that you claim for her and a money winner in her class. As you know her far better than I do, and do not care to spend another dollar on her, then it is quite certain that I don't."

Lafe Shaffer visited the sale last week and gave the *Horse Review* correspondent an interesting bit of news regarding that great mare Zephyr (4) 2:11 by Zombro, now being trained at Terrace Farm, Titusville, Pa., where she is owned. Zephyr, it will be remembered, showed sensational speed in the campaign of 1902, but later in the season sprained the tendons of her right hind ankle, and had to be let up on. During that season she was frail and slender, but fast as a ghost. Now, says Lafe, she weighs 1050 pounds, and no one would realize that she is the same mare. She is jogging sound, and will be seen at the races again, there being no indication whatsoever of her accident. She foaled a black filly by Beauseant 2:06 this spring.

William Rockefeller is the latest to enter the trotting game and five light harness horses belonging to him have been sent to the Empire City track, New York, for speed preparation. It is expected that later in the season some of them will be started in the matinees of the New York Driving Club. The horses include Shadeland Coastlight, Shadeland Beveleer and Bryan Evans. They are being trained by Louis Juan and Thomas Hoffman.

When Lou Dillon starts to heat 1:58 this season she will pull a sulky weighing just 24 pounds and will carry on all four feet just 16 ounces of shoes. The combined weight of her driver, Sanders, including sulky, harness, hoots and shoes, will not aggregate over 180 pounds.

Notes and News.

The Denver meeting opens to-day.

There are fifteen trotters and eighty-eight pacers in the 2:06 list.

Ben F. has paced a quarter in 29½ seconds since reaching Empire City track.

There are 69 entries in the Stanford Stake for foals of 1903 which closed June 1st.

There are twenty-nine entries to the Roger Williams Stake for 2:12 trotters at Providence.

A \$500 stake is offered for three-year-old trotters, by the Oregon State Fair. Entries close July 2d.

Charley Spencer worked a three-year-old Nushagak trotter a quarter in 33 seconds at Pleasanton last week.

Don't miss the sale of horses belonging to the Meek Estate. There are many high class colts and fillies to be sold.

Farmer Bunch worked the pacer Hattie Croner three heats from 2:17 to 2:13½ one day last week at Pleasanton.

Every year adds evidence of the trotting horse business, both as to records, increased demand and expanding prices.

Vance Nuckols of Cleveland will campaign Eaglella 2:11½ by McKinney this year. He thinks she will be a good one in her class.

The Oregon State Fair Directors have engaged H. E. Wood of Missouri as presiding judge at the races to be held in September.

Rain interfered with the opening of the Colorado Springs meeting last Saturday and the races were postponed until Monday.

It is announced that Prince Alert will start this season to beat Star Pointer's mile record in 1:59½ under normal conditions.

Fred Chadbourne is training the gray trotter What Is It 2:16½ by Direct at Pleasanton track, and will have him ready for the circuit.

Mr. August Gandren, the former owner of George G. 2:12½, has recently picked up a full sister to that horse and will have her trained.

Eula Mac 2:17½ by McKinney, matinee record 2:13½, won a matinee race at Pittsburg June 4th, defeating the high class trotter Dan T. 2:07½.

Three thousand dollars will be hung up in purses by the Salinas Driving Club for its meeting in September. The program will be out soon.

The Capitol City stakes, \$1000 for 2:12 class trotters, is offered by the Oregon State Fair for its meeting at Salem in September. Entries will close July 2d.

Blackthorn, the Salishury—East View M. and M. candidate, recently worked a quarter in 0:30½ at Emoire City track, accompanied by Consuela S. 2:12½.

Vet Tryon has applied for several stalls at the San Jose track and was expected to arrive there this week from Sacramento with his string of trotters and pacers.

Wednesday, June 2d, is the date set for the postponed annual meeting of the P. C. T. H. B. A. Be on hand at 8 p. m. at 36 Geary street, where the meeting will be held.

H. A. Bell's gelding H. D. B. by Arthur Holt, entered in the slow class trotting events on the California circuit this year, worked a mile last Saturday over the San Jose track in 2:16½.

Trainers are heading for Pleasanton, San Jose and Santa Rosa and the stalls at those popular tracks are rapidly filling up. There is every prospect for a splendid circuit of harness racing.

Jack Phippen drove Mr. P. H. McEvoy's handsome stallion Milbrae by Prince Airlie a mile in 2:17 last Saturday. This trotter is improving every time he is driven and Phippen has him in fine shape.

A green colt by Barondale 2:11½, out of La Maude by Adrian Wilkes, bred by P. S. Kell, Des Moines, Iowa, stepped a quarter in 30 seconds at the pace the other day over the Fort Dodge half-mile track.

The handsome mare Maggie N. is offered for sale. She is a full sister to Robert I. 2:08½ being by Hambletonian Wilkes and out of that great broodmare Anna Belle 2:27½ by Dawn. See advertisement.

Whitcomb has changed the date of holding their fair and race meeting from Sept. 5th to 10th, taking the week of Aug. 22d to 27th, preceding the Everett meeting. They will reopen a few more stakes for trotters.

Robert L. Dickey, the best of the horse artists, and the only one that can put real humor into a horse caricature, has moved to New York. His cartoons will still be a feature of the Chicago *Horse Review*, however.

Millard Sanders reached the Glenville track with his string June 3rd. He has sixteen trotters and pacers under his care, including Lou Dillon 1:58½, Anzella 2:06½, Rohizola 2:12½ and China Maid, all California bred.

The three-year-old trotter Harry McKerron by John A. McKerron 2:04½ worked a quarter at the Glenville track last week in 32½ seconds, the last eighth in 15 seconds. That Nutwood Wilkes blood breeds on and on.

In the list of entries to the stake for two-year-old trotters at the State Fair, the name of Geo. L. Warlow's hay filly Strathlie by Strathway, dam Athalie was omitted by mistake. Mr. Warlow made two entries to this stake.

N. K. West of La Grande, Oregon, who purchased a mare by McKinney out of Stenwinder, the dam of Directum 2:05½, at a sale in San Francisco last winter, has entered her in the slow trotting classes up north and will race her this year.

Efforts are being made by the Ward Totalisator Company of this city to have their machines used at the harness meetings in California and Oregon this year. We believe they would become popular with the public if once introduced.

A trotting race of half mile heats between Phil Collins' mare Nettie and John Pihl's mare La Cestina took place at Gonzales, Monterey county, on Sunday last, June 12th. La Cestina won the race which was a close contest. No time was announced.

"Five to enter and three to start" is the condition on which the Breeders have opened a stake for 2:12 class trotters to be decided at the Santa Rosa meeting. The stake is \$600 guaranteed. There should be six or seven entries to this race. Entries close July 1st.

The green pacing mare Mamie R. by Strathway out of a mare by Algona, worked two heats at Sacramento last Saturday in 2:17½ and 2:17, driven by her owner, Mr. Richardson, who is an amateur. As Mamie R. has been broke but seven months she must be a rare good one.

The present address of William Tyndall who came to California from New York some time ago is desired by his sister Mrs. Lillian Tyndall Mapes of Firstcliffe, New York. Anyone knowing Mr. Tyndall's address will confer a favor by writing to this office or to his sister at the address given.

Jacob Broliar of Visalia reached the San Jose track with his horses this week and is getting them ready for the circuit racing which opens July 27th. He has the good filly My Way (2) 2:30 by Stoneway 2:22½, dam Ethel Basler, and she is in fine form for the many stakes she is entered in this year.

Don't forget three additional stakes have been offered by the King County Association, Seattle, for its September meeting. \$1250 is given for 2:11 class trotters, mile dash; \$1250 for 2:14 class pacers, mile and a half dash; \$500 for three-year-old pacers, mile and a half dash. Entries will close July 2d.

The San Jose track is in fine condition. William Cecil drove Mr. Blessings' mare Our Boy's Sister a mile over it last week in 2:13. Cecil worked Irvington Boy by Nutwood Wilkes a mile in 2:15, and has several others by the same sire that show a high rate of speed every time he asks them to.

Through an error in publishing the list of entries for the Santa Rosa meeting of the Pacific Coast Trotting Horse Breeders Association, the hay gelding Walter Wilkes entered by J. Groom, should have been in the 2:24 class trotting stake instead of the three-year-old class. Walter Wilkes is an aged horse by Sahle Wilkes, dam by Patchen Vernon.

The Salinas Driving Club will hold a race meeting from September 14th to 17th inclusive. This will be the week after the Knights Templar conclave in San Francisco, and give all the stables that race at the State Fair, and do not go north to Oregon, a change to complete for good purses at Salinas, before going south to Hanford and Tulare. The program will be announced soon.

The California trotter, George G. 2:12½ by Homeward, reached the Glenville track, Cleveland, Ohio, on the morning of June 8th, and was stalled with Doc Tanner's string. Allendale the Falrose pacer owned by Ed Mills was with him and both landed at the track in good shape. It is said Mr. Anthony Brady of New York, the new owner of George G., will start him in the matinee races this year.

Horse training and display should have every sort of legitimate support from the public which admires the most useful of animals says an exchange. The horse is not to be owned or enjoyed by everybody, it is true, but improvements in horseflesh are so generally shared that it becomes a matter of public duty to rightly encourage the breeding, training and improvement of horses. Especially is this true of the higher class of animals used for driving and pleasure. The distraction and relaxation afforded in the handling of a horse in these activities has saved many a man's health and lengthened his life. And there is yet enough to take the place of the horse.

Ed Geers has in his stable two horses that are entered in the M. & M.—Alexander and the Sidney Dillon horse Stanley Dillon. They are owned by different parties and if they both start one will have to be taken from Geers' stable ten days before the race. Last week Alexander stepped a half in 1:02½ at Memphis and it is stated on good authority that Stanley Dillon has trotted a mile for Geers in 2:08½.

You will be wanting the Welcomes and the William Harolds in a year or two. The young sons and daughters of these horses are showing great speed whenever they are trained and all that have been raced have records. All the remaining colts and fillies by Welcome and William Harold owned by the Meek Estate will be sold at auction by Fred H. Chase & Co. 1732 Market street this city on the evening of June 28th.

There are a few young horses in the consignment to the Meek Estate sale that are out of mares with short pedigrees, but these mares were selected on account of their size and good looks to breed to Welcome and William Harold with the idea of getting carriage horses. The produce show that the crosses were good ones. There are several very fine young horses that will make extra fine animals for carriage purposes.

Mr. T. C. Cahney, the well known Eureka trainer, reached San Francisco last Monday after a pleasant trip by steamer, with three horses which he took to San Jose the following day to train for the circuit. He has Frederickshurg 2:12 by Nephew Jr., Lady Petrina by Directum and Moroso by Wayland W. These horses are owned by Mr. I. N. Minor of Humboldt county and will all be seen on the California circuit this year.

Melha by Gossiper 2:14½ dropped a fine black colt by Searchlight 2:03½ on the 11th inst. that looks like the real thing. If breeding counts it should be a hummer as the colts second dam is by Director 2:17, third dam by Nutwood 2:18½, fourth dam by Sam Purdy 2:20½. There is a double cross of Geo. Wilkes, and one each of Director and Nutwood on a Clay foundation. The colt belongs to Andrews & Abbot of Oakland who claim the name Guy Abbot for the youngster.

When you go to the Meek Estate sale at Fred H. Chase & Co's sales-yard on the evening of June 28th, don't let that bay two-year-old filly by William Harold out of Directess by Direct be sold for any low figure—She is worth a good bunch of money. Her second dam is by Mamhrino Wilkes, and has produced one trotter with a record below 2:20; her third dam is Centennial Bell, the well known old race mare by Woodburn that is the grandam of Clipper 2:06. This two-year-old is a great prospect.

Sir Albert S., the fast California pacer that succumbed to Prince Alert in the memorable match race over the Memphis track in 1902, which consisted of a \$10,000 sweepstakes and a single half-mile dash to settle, will be trained this year by Mr. Billings with but one idea in view: to lower Little Boy's record for pacers to wagon, amateur drivers. Little Boy was the first champion of any class to be driven to a national record by Mr. Billings, but he has recently been abandoned and presented to an Illinois breeder.

Several farmers residing in Colusa county have organized a draft horse company and will purchase draft stallions for the purpose of improving their stock. The Sun says: "Colusa is justly distinguished for her fine driving and carriage horses and her mules, but the breeding of draft horses has been very much neglected for the past fifteen years. This will surely be a wonderful acquisition to the live stock interests of Colusa county that brings wealth and prominence to a community more quickly than fine stock of any kind."

Had it not been for the fact that several of the most active members of the Pacific Coast Trotting Horse Breeders Association had other important business, which prevented their presence at the annual meeting called for last Monday evening, there would have been considerable important business to record; but as the meeting lacked two of having a quorum, an adjournment was had until Wednesday evening next, when a large attendance of the members is expected. The association is in a first-class financial condition, Treasurer N. T. Smith having over \$18,000 on hand, and the outlook for this year's meetings is particularly bright.

Hugh C. Agnew, the widely known and very prominent seedsman of Santa Clara county, contracted glanders from his huggy horse and died June 10th at his residence on Washington street, San Jose. During the last two days he suffered untold agonies and he was conscious almost to the last. Some time ago he noticed that his driving horse was afflicted with what he took to be a cold and he gave the animal medicine occasionally. A week ago he was busily engaged in enlarging the box stall of the horse and it is presumed that he got some of the virus from the discharge on his fingers or he may have contracted it in drinking from the water faucet near the stable.

Martin O'Dea, who put the shoes on St. Julien just before he broke the world's record by trotting in 2:12½ at Oakland with Gen. Grant as one of the timers, has been shoeing horses in San Francisco since 1865. During that time Mr. O'Dea's shop has been within a radius of four blocks from the place it has occupied for several years past on Geary street, between Grant avenue and Stockton. The shop has now been moved to Union Square avenue directly in the rear of the old shop which is to be torn down and a handsome new building erected in its stead by Mr. O'Dea who owns the property. Few men have shod as many of the champion trotters of California as Mr. O'Dea, and with his son he continues in business and has a large patronage from those who like first-class work.

The Kind That Bring Good Prices.

A purely American type of horse is the roadster. There is the trotting roadster and the pacing roadster, but the former is much preferred. The pacer is a very pleasant horse to ride after, getting into his stride quickly and showing much speed, but the men who pay the long prices for road horses rarely want the sidewheelers and at the great horse shows classes are rarely opened for them. In fact the demand for road uses is so overwhelmingly in favor of the trotter or diagonal-gaited horse that it is hardly worth while to consider the pacer in this connection. However, the gaits are so largely interchangeable and the conformation of the two sorts so much alike that the general principles which apply to one apply to the other with equal force. Besides when a man is breeding for trotters a pacer is apt to come despite his best efforts and when that is the case the natural pacer must be taught to trot or a lowered price accepted for him. Pace or trot, whichever he may, the road horse of to-day must have certain qualities to recommend him and therefore we will consider him as a trotter.

Trotters have been developed by the aid of the race course. In this they resemble the thoroughbred, and hence they possess by right of inheritance quality which only the refining influence of the course can grant. The road horse must have the quality of the race horse. He must be well bred and he must have speed. The highest priced roadsters have 2:10 speed or better. Seeing that Lou Dillon, the champion trotter of the world, is driven on the Speedway in New York and Cleveland by her owner it appears at once that if a rich man desires to ride in the van in company in a large city he must have something very fast. When a purchaser is looking solely to the pleasure he will derive from speeding with others on the driveway or track good looks come second to the ability to go, but at all times the handsomest animals will sell for the most money, the rate of speed shown being satisfactory. Therefore the ranks of roadsters used for speed purposes must be recruited from the course. Horses are not bred specifically for such purposes.

For the show ring there is as great a demand as there is for the speedway, perhaps greater. The greatest demand of all is for a pleasure horse of the roadster type, a horse with much beauty of conformation and some speed. There are nowadays so many horses which can trot in three minutes that this is no longer called speed—merely a good road gait—and the possession of such ability to go does not confer special value, as it once did, unless there is great beauty of outline and good manners to go with it. Therefore so far as speed is concerned it is well to breed for it in as large measure as possible, but primarily it is necessary to breed for good looks and good disposition in order that the appearance and manners of the finished product may be satisfactory to the dweller in the city.

The roadster is neither a very large horse nor yet a very small one. From 15.2 to 16 hands includes the right height, with the ideal around 15.3 at the shoulder and something under or over 1100 pounds on the scales. There must be substance, but no suspicion of coarseness about the typical road horse. He must have a long neck, cleanly cut out at the throat, a neat hony racing-like head with prominent eye, sloping shoulders, plenty of lung and dinner space, strong coupling, quarters deeply let down to the hocks and plenty of bone. His canons must be short and his feet of moderate size and round. The tall should be set on moderately high up and the hair in it and the mane should be fairly plentiful and very fine. In addition, he should have length and range, which is to say that he should stand over a good distance of ground and yet the obliquity of his shoulders should be such that his hack is not long. A weak coupling and light flank must be strenuously avoided.

In order to obtain this sort of conformation the breeder must suit himself. The racing trotter has so far proved the sire most prolific of such offspring. If the mares are chosen well it is generally not hard to find the horse to mate with them, for the reason that stallions of the most excellent lineage and fair records are distributed plentifully athwart the country and their services may be commanded at very reasonable fees. A glance at any of the turf papers will show that dozens of trotting stallions with record from 2:15 to 2:25 are standing at fees ranging from \$20 to \$35 and there are scores more just as good and as available whose owners do not think it worth while to spend money on printer's ink.

A good disposition being essential in the road horse due regard should be had to this point in mating the mares and first in selecting them. In rearing the foals they must be treated with kindness at all times and accustomed to handling as early as possible.

Young roadsters should be broken the fall after they are one year old.

It is well also to remember that a roadster may be too high. He is not wanted for heavy work. Cabbiness is not wanted; substance in the roadster means amplitude of space for the vital organs and of muscle to complete the assurance of stamina as well as speed. A bad head is a sore fault in a horse of this kind. A narrow dished face with an ear inclining backward will spoil the sale of an otherwise good horse at full value. A good sensible countenance, denoting the possession of horsemanship, and an ear that is carried well forward are wanted. And always breed for as much speed as possible in combination with the other qualities named. It is fortunate that the two are compatible and that nowadays one may breed for the elegance of conformation and excellence of disposition and the speed shall be added unto us—*Breeders Gazette*.

Geers' Horses in Fine Shape.

By the time Geers reaches Columbus his horses will be ready for a hot battle, as all are doing great guns in their work, writes Henry White. In addition to Alexander and Stanley Dillon, he has a pretty fair green trotter of his own in Travelesso, a 5-year-old son of the pacer Direct Hal, which he worked in 2:13 the other day. The same afternoon the trotter Robert Mc 2:10½, worked in 2:12, stepping the last half in 1:03. A man who knows this horse tells me he is not one which comes to his speed early, and when informed that he had gone a mile in 2:12, said: "That makes him a sure 2:07 trotter before the summer is over."

Scott Hudson, who is Geers' great rival, has taken two dozen assorted trotters and pacers from the Lexington track to that at Oakley, near Cincinnati, and will prepare his stable there. Hudson is a slow beginner with his horses, following the old-time method of turning them out for a few months in the fall and winter and not giving them any track work until the spring is well advanced. That his way of training is a good one his success in winning races amply proves, and while he will not begin the campaign quite as early as some others, the chances are that Hudson will show up well when it comes to the number of races won at the end of the season.

Lou Dillon's Togs.

The Memphis correspondent of the *Kentucky Stock Farm* writes: Millard Sanders has shipped his horses to Cleveland. Before his departure, Sanders said an order had been placed for Lou Dillon's equipment for the season's campaign, and that she would draw a sulky weighing an ounce over twenty-four pounds. The mare left here in perfect health, and her trainer makes no secret of his expectation that she will heat her record. Her four racing shoes will weigh exactly one pound. She will be provided with light hell quarter boots, such as she wore last season in addition to hind shin hoots with speedy cut attachments. On account of a fancy habit the little mare has of tossing her head she will be harnessed with a standing martingale, but will be driven without a check rein. Though not officially announced it may be stated authoritatively that Lou Dillon will be sent over about the same line of travel that she was asked last year. This means that visits will be paid to Cleveland, Brighton Beach, Readville, possibly Hartford, Lexington, then to the wind up of the harness season at Memphis late in October, where she will be called on to defend the Memphis Gold Cup challenges which she carried off for Mr. Billings in 1903 by defeating Major Delmar, driven by E. E. Smathers.

Salinas Will Hold a Meeting.

The Salinas Driving Club met last Saturday and decided to give a race meeting this year from September 14th to 17th inclusive. A finance committee of five members was appointed consisting of J. H. Menke, George A. White, T. C. Butler, C. Tynan and C. H. Widemann and an executive committee was also appointed as follows: J. B. Iverson, William Vanderhurst, C. Z. Hebert, Charles Whitehead and B. V. Sargent.

The executive committee called a meeting at once and have begun the preparation of a race programme, which when finished will be submitted to the club for approval. Suggestions by members are invited either by conferring in person with the chairman of the committee or by addressing J. D. Kalar, Salinas, secretary of the club.

In 1877 Charley Green rode Great Eastern a mile in 2:15 and during those twenty-seven years the record has stood, but either Charley Mac or Prince of Orange will put this mark on the shelf and thus C. K. G. Billings will add another laurel to his wreath of renown as a developer of great interest in horsemanship.

Directum in Fine Shape.

Directum 2:05½ is a greatly changed horse since coming to Minnesota writes Marque in the *Review*. I saw him in July of the year of his purchase, and at that time his ailing right hind pastern gave him constant trouble. Mr. Hersey found the trouble to be caused by lack of circulation in his foot, as well as the affected part, and once the foot was widened and softened the pastern began to straighten up and lose its lameness. Directum now shows no sign whatever of lameness and when stirred up he trots in the steam engine manner of yore. His general health and condition is also superb. He looks like a colt and when ed out charged and frisked like one. Whatever truth there was in the story of his having been impotent in the East there is no foundation for it now. Especial care was used in breeding him to mares and this, together with his improved physical condition, has made him the surest horse on the place. Mr. Hersey showed me his stud books for last season and thoroughly convinced me on this point.

Same Here.

Occasionally a man will tell the managers of the Montana State Fair that "the public wants running, not harness racing." The betting "public" no doubt prefers running races, but the general public does not. The state fair is an institution to promote manufacturing, agriculture and livestock breeding, and to exhibit the results of these industries to the world. The fact is, that in this State there are ten breeders of harness horses to one of runners. It is naturally so in almost every State, for a hundred men will buy drivers to one buyer of a runner. That is the reason, more than any other, that state fairs should offer more money for harness races than for running races. In Montana the proportion of the racing purses is larger for runners than in many state fairs. The management of the state fair of this State endeavors to recognize every division of the breeding industry. And in its racing schedule has kept in view this point as well as the feature of amusing the public.—*Montana Stockman and Farmer*.

Horsemen's Rates Withdrawn.

General Agent Tinling, of the Northern Pacific Railroad at Tacoma, has received a bulletin in which it is announced that the special rates given to horsemen on horses, sulkies, saddles and harness has been withdrawn.

It has been the practice in the past for the Northern Pacific to issue in advance of the racing season each year a special tariff for the accommodation of the shippers mentioned rates lower than the regular tariff on the shipments named being allowed between stated periods and on the race circuit. The special tariff applied to points in the states of Washington, Oregon, Idaho and Montana.

The special bulletin sent out by S. G. Fulton, assistant general freight agent, says: "Such reduced rates will not be resumed during the coming season, and you are instructed to notify all shippers accordingly."

A Glenville correspondent of the *Trotter and Pacer* says the sensation of the track there is a 16-hand gray gelding that the colored trainer W. B. Stewart brought up from Meadville a few weeks ago. The horse is known as Silver Ore, and has been well entered through the Grand Circuit. Recently Stewart worked him a mile in 2:13½, and then in a heat in 2:21 let him step the last half in 1:03½. The horse hardly took a long breath, and trainers are unanimous in the opinion that he is one of the best trotters seen at Cleveland in years. Stewart says Silver Ore is a speed marvel. He picked the gelding up at Meadville last fall, and worked him forty-seven days, in which time the gelding learned to step a mile in 2:21, last half in 1:03. That was the first work the gelding ever received. Stewart worked him through the snow all winter, and was able to jog him regularly all spring, which accounts for the condition that enables him to negotiate a mile better than 2:15, when Cleveland horses are in a condition for nothing below 2:20. The gelding is really nearer form than the horses that recently arrived from California, and Stewart says he will drive him in 2:10 this week, which will be the final stiff mile before starting at Fort Wayne. Silver Ore is an impressive looking horse, perhaps a little leggy, but a good honed chap and clean gaited. He is by Normaner, the brother of Norval, dam by Cuylercoast 2:11; second dam by Crawford 2:07½ and third dam by Hull. When Stewart first came here he placed Silver Ore at \$5000, and this much was offered last week by a Cleveland horseman, but since the fast mile the value has been increased.

Nordica, h m by Agamemnon	3	2			
Woody R., b g by Woody C.	3				

Time—2:27¼.

Race postponed until Friday on account of storm, and eventually declared finished owing to continued bad weather.

Trotting, 2:25 class, stake \$1000.

Oronoe, b h by Alfred G.	1	1			
Braxaleel, hr g by Spotswood	2	2			
Queen Ign, h m by Silver Sign	3	5			
Happy Harry, Lord Gilbert, Susie R. and Phyllis also started.					

Time—2:23¼, 2:23¼.

Postponed until Friday, owing to storm, and afterward declared finished owing to continued bad weather.

Pueblo Races.

The races at Pueblo, Colorado, opened on Monday of last week with a good attendance which kept up during the four days' racing. On Thursday a heavy rainstorm prevented racing, and the meeting ended on Friday. Winfield Stratton 2:06½ won the free-for-all pace on the closing day, lowering the Colorado half-mile track record in the second heat of the race. Several running races were given each day, but the horses were not of high-class. The harness races were very satisfactory and were very hotly contested—split heat affairs in many instances. None of the California horses won any money in any of the harness events, and only two or three started. The summaries of the harness races follow:

MONDAY, JUNE 6TH.

Pacing, 2:17 class, purse \$500.

Daniel J., b g by Winks	1	1			
Exodus, b g by Jay D.	2	2			
Joe Mack, b g by Actonward	5	3	2		
Puritan 3-4-5, Phoebe Almont 4-5-4, Belle Burton 6-8-6.					

Time—2:17¼, 2:19, 2:21.

Pacing, 2:15 class, purse \$500.

Time—2:16¼, 2:12¼, 2:15.

Light Hands in Driving.

Do not tug at a horse's mouth, but always drive as if any sudden pull or sharp jerk might break the reins, says an expert. However dull he may be, always have enough feeling of the bit to have him under control, and keep him up to it to that extent. At any hole, gutter or sudden elevation he sure your hand and arm freely "follow" his mouth, and do not let them administer a sudden jerk to it as the vehicle drops or rises. When starting just feel your steed's mouth an instant before you start, as a signal to him that you are about to require of him motion, and this should be done whether you mean to go forward or backward; it enables him to tighten his muscles and direct himself, physically and mentally, to obey your instructions.

The Arab Horse.

Mr. Randolph Huntington of Oyster Bay, L. I., is engaged in a sharp controversy in the Country Gentleman with several correspondents over the merits of the Arabian horse, whose defender and eulogist he has been for half a century. One can hardly help sympathizing with Mr. Huntington, owing to the loyalty he has shown for the Arab, and the glamour that surrounds his idol. The Arabian horse has been the theme of poets and writers for centuries and naturally a great deal of romance has been built up around him, obscuring his real personality, exalting his merits and hiding his defects. In fact, most writers would have us believe that he has no defects—he is a huddle of excellences, a gem of purest ray without a flaw. This has been taught us by writers until it has become an accepted belief, and our prejudices are all enlisted on the side of the mystic steed of the desert. He is always depicted as the swiftest of all breeds, the most enduring and the most intelligent. All great warriors ride Arabs, or are said to—which amounts to the same thing—from the days of Saladin and Coeur de Lion, to Napoleon and Wellington.

In the midst of so much extraneous matter, it is somewhat difficult to get at facts, especially as we must confess to having a strong leaning to the breed as the result of early reading, with but limited opportunities to observe the animal as he really is. First we must acknowledge that the horses of the east—Arabian and Barb—are really the foundation of the improvement made in the horses of Europe and Great Britain, and through them those of the United States. The horses brought to America by the Spaniards were largely of eastern origin. The breeds that have come to occupy first place in Europe and Great Britain trace undoubtedly to eastern horses, brought back in the first place by returning Crusaders, and later to animals imported for the purpose of improving the breed of horses. The English thoroughbred is the finest example we have in horse flesh of fine breeding and super-excellent quality. No doubt he owes much of his excellence to the use of eastern blood many generations ago. The French Percheron, when bred pure, showed distinct traces of Arab blood. So did the light horses of Austria, Italy, Spain and Germany. The most modern instance of the use of the Arab to improve the horses of a country is in the Orloffs of Russia, a breed that is expected to yet rival the American trotter in speed and endurance.

Accepting as well established the claims of the Arabian horse to be considered the greatest factor in the improvement of the modern horse, we think his claim for consideration ends right there. It is evident he has stood still for some hundreds of years, while the western horse under the studious care of men who were breeding for further development and practical results, has gone far beyond him. Admitting that the Arab now is as good as at any time in his history, he is far surpassed in size, beauty, speed, and endurance by the modern horses of Europe, Great Britain and the United States. The English thoroughbred has usurped his place as the great improver of other breeds, and has been used in the past hundred years in preference. Who would think for a moment of improving a thoroughbred, an American trotter, a Kentucky saddler, a French or German coacher, or an English hackney, by the use of an Arabian sire? What could he gain by such a course? Would it add anything to the value of these breeds? We mean their practical usefulness. Would it give more speed to the thoroughbred or trotter, more heauty and size to the coacher and hackney, more heauty and a better gaited horse than the Kentucky saddler, or finer action at the trot than the hackney, French coacher or American trotter? Would the result of such a cross be a better all-round horse than the American trotter, which can fill every place in which a horse can be used except as a heavy draft?

No; the Arab is a reminiscence of the dim past. He is too antiquated for modern people who want a real horse, not a mere huddle of impossible legends and romantic superstitions called a horse. His glory has departed because he has not been able to keep up with modern requirements, and he can never again exercise such a commanding influence as he once exerted over the horses of the civilized world. He belongs to the Arab and the desert, and may as well be left there.—*Detroit Free Press.*

DELEWARE, Ohio.

International Stock Food Co., Minneapolis, Minn.
Gentlemen—I have been using your "International Stock Food" for two years and regard it as a matter of economy and as almost indispensable in conditioning a horse for racing. Am feeding it to two fillies and brood mare with equally good results.

G. W. COYNER,

Judge of Common Pleas Court, Delaware County.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Some Sale Statistics.

Just at this time the newspaper scribes are contradicting one another on statements concerning the greatness of the Forbes dispersal, particularly in comparing it with the dispersals of the past. Such being the case it would be timely to present the exact results of the large dispersals of trotting horse history, writes Arthur Caton Thomas in the *American Horse Breeder*.

The following table is believed to enumerate all large dispersals at which 70 or more horses have been sold at auction for an average of over \$700.

Sale	Year	No head	Sold for.	Aver.
Rose	1890	85	\$236,820	\$2784
McFerran Estate	1886	187	337,740	1806
Forbes Estate	1904	173	116,450	1582
Spier Estate	1901	120	54,585	771
Jones Estate	1893	122	54,836	761
Withers Estate	1899	264	192,285	729
Daly Estate	1901	228	163,590	718

Although higher averages have been received in two instances, the Forbes average is remarkable considering the fact that the sale was not held in the boom days, and there was only one noted stallion in the consignment.

While on the subject of dispersals and high prices at auction, it might be well to mention that several dispersals of much smaller numbers have reached high prices. In 1892 the Hohart Estate sold 68 head for \$207,860, average \$3057. The horses of the Pierce Estate, 12 in number, headed by Lou Dillon, sold last year for an average price of \$2625. In 1889 William Corhitt sold 35 head at an average of \$1418; Gen. Tracy sold 99 head at an average of \$1141; Palo Alto sold 76 head at an average of \$1051, and Kellogg held a two days' combination sale, at which 110 head averaged \$1819. Palo Alto, in 1886, sold 97 head at an average of \$869. In 1891, S. A. Brown sold a consignment consisting of Anteeo and eight broodmares, for an average of \$8133. In 1892 J. C. Linneman sold fourteen broodmares and four weanlings for an average of \$4000. The same year C. W. Williams sold 33 head at an average of \$2397. In 1897, C. W. Williams sold 20 Allertons at an average of \$820. In 1898 the Hermitage Stud sold 31 head at an average of \$318; and Palo Alto 12 head at an average of \$1712. In 1900, Village Farm sold 48 head at an average of \$1242, while in 1901 the Penn Valley Farm sold 31 head at an average of \$1072.

Gabriel Case Dead.

There are few horsemen who have visited New York who did not make the acquaintance of Gabriel Case, familiarly known as "Gabe" Case, and they will all regret to learn of his death which occurred June 1st, after an illness of only a few days. Mr. Case went into the hotel business when young, and through his genial manners soon became to be highly regarded by horsemen. He ran the Hotel Fulton, at Eighteenth street and Fourth avenue, for a year, and then he took charge of the Fleetwood Park Club for several years. He bought the Jerome avenue clubhouse, formerly known as Dodge's Hotel, at 161st street and Jerome avenue, which is now Huber's road house. He remained there for fifteen years, and in March, 1891, he took charge of McGowan's Pass Tavern, in Central Park. While at the Jerome avenue road house, he established the custom of giving a magnum of champagne to the first person who reached his place in a sleigh after the first snowfall in each winter. This custom was continued at the Central Park tavern, which led to great hustling among horsemen who were anxious to win the prize. His house became headquarters for horsemen, and such men as Robert Bonner, David Bonner, Col. Fred M. Laurence, William Trumhull, Hosea P. Perkins, William H. Vanderbilt, Leonard Jerome, Frank Work and ex-Mayor Hugh J. Grant made the tavern their meeting place to exchange stories and relate personal experiences. These were known as the sealskin brigade. Old-time trotting lovers in all parts of the country will recall many pleasant visits to Case's tavern. Few men had the faculty of making friends as he had. He had a great memory for names and faces, and it used to be his delight to call a man by name whom he had not seen for years. Mr. Case was a member of the Hohoken Turtle Club, the Morris Park Race Track Association, the Empire Trotting Association, and a number of other organizations. He was very fond of harness horses, and always had a pair of good ones in his stable. His death will leave a vacancy in New York driving circles which will not be filled.—*Horse World.*

On July 30, 1885, Maud S. established a record of 2:08½ to the high wheel sulky. On July 30th of this year Lou Dillon will be asked to break a record and owing to the coincidence of date it is probable that Mr. Billings will decide that the performance shall be as nearly a duplicate of that event as possible.

Jackson's Napa Soda does not tangle the feet.

ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

Wildwood Remedies for Ailing Campers.

We quote from the *Chronicle* a seasonable article from the pen of Katherine Chandler. Now that the camping season is just about commencing, the suggestions of the writer may be of some little benefit to intending outing parties, notwithstanding that the presence in camp of a well stocked medicine chest is rather the rule than the exception.

The writer might have added to the list the sweet scented, aromatic labiate plant or vine common in California and known as "yerba buena" (*Micromeria Douglasii*).

This trailing plant can be found almost anywhere in the foothills; when dried and brewed into a tea has great stimulating qualities and is a stomach tonic. When camping we have frequently used the herb in preference to tea or coffee. A cup of "yerba buena" tea after a tiresome tramp over the hills, a hunt, or a troutling jaunt is stimulating and refreshing to a degree that can never be reached by a brew of the choicest oolong or pekoe.

One virtue of the grindelia has not been mentioned below, and that is, its sovereign efficiency as a preventive or cure for poison oak. The grindelia leaves and twigs, after being dried, can be made into a lotion that is soothing and curative in a case of poison oak. We have frequently, when out in the hills, and where poison oak was venomously abundant, as a preventive taken the fresh, gummy leaves of the grindelia bush and rubbed them over hands and face. We were susceptible to poison oak and had several times in our youth suffered severely from it, but never were we poisoned after having used the grindelia leaves as described above. This caution has been taken in other instances, to our knowledge, and with the same immunity; for, after the grindelia application, leaves and branches of poison oak have been handled recklessly and without restraint, so confident was the belief in the plant as an effective preventive from the poisonous bush—this latter diversion is one, however, that we will not recommend. In detailing some of the uses to which the remedies to be found on an outing trip may be efficacious, the writer says:

Even in the midst of the best health-generating outing, there is always a chance of illness, and as one cannot always have at hand a physician and a pharmacy, an acquaintance with Nature's remedies often proves useful. Many people who camp in the lower altitudes of California have their vacation spoiled by the ubiquitous poison-oak, even though hitherto they had never succumbed to its attacks. Now, near this same insidious poison, wherever it grows in the State, Nature has planted an antidote, one which was used by the natives before white men came.

This is the coffee berry, known also as the "pigeon berry," and as the "yellow root." It is a shrub from four to eighteen feet high, with oblong, leathery leaves, and small greenish-white flowers. The fruit is black and globular, and contains two or three seeds similar to the coffee bean. From its seeds it has gained its American name of "coffee berry." A wash made by steeping leaves and twigs is a preventive of poison-oak, and also a cure. If the case of poison be severe, it is well to take a dose of the tea internally, as well as to apply it frequently externally. The virtues of this plant were pointed out by the Indians to the Spanish padres, and they gave it the name it still bears in commerce, *Cascara sagrada*, or sacred bark. It is considered one of the most valuable laxatives known in the medicinal world to-day and each year tons of it are exported from the State.

Two other California plants form with the coffee berry the three most important vegetable additions during the last century to the world's pharmacopoeia. These are the yerba santa, or "holy plant"—and the grindelia, both known to the Indians from time immemorial. Both are effective in colds, or in any trouble of the pulmonary system and both may save the camper much anxiety. The yerba santa grows on dry hillsides in western California, and reaches from three to five feet. Its leaves are long narrow, stiff, leathery and sticky; they are edged with rigid teeth and are covered underneath with a fine wool through which the prominent veins protrude. The flowers are funnel-shaped and vary in color from white to violet. Great quantities of the yerba santa are exported annually, not only for medicinal uses, but also to be substituted for hops in porter and similar beverages.

The grindelia is sometimes called the gum plant or resin weed, or again, the August flower. It grows from two to four feet high, and its bright yellow flowers, which appear in summer, are similar to the honeysuckle. The resin seems to gather in the form of a white gum in the top of its branches, and each year about five or six inches of the twigs are cut off by tons and shipped East. Later we purchase it in the form of the medicine called "grindelia," to soothe whooping cough, bronchitis, asthma and kindred complaints.

Even more common than coffee berry, yerba santa, or grindelia, is the manzanita, and it is a great blessing in the valley dweller who ascends to higher altitudes. Rarely a summer passes that a light scourge of dysentery does not attack the Sierran camps, chiefly due to unreluctance in the mountain water. A tea of manzanita will cure every case. Indeed, it has been effective when a physician's medicines have

proved powerless. The manzanita is also used in compounding medicines to cure catarrh of the throat and stomach.

There is no excuse for a camper, suffering any common disease, to want for a remedy. If we have colds, Nature offers us, aside from yerba santa and grindelia, the choice of a tea of fragrant elder blossoms; a decoction of horehound, which, by the way, is only an immigrant to our shores, a tincture of sunflower, which is also adopted as an official drug for asthma, throat diseases and influenza, or an extract of wild peony, which will also allay dyspepsia.

If he is a victim to catarrh he can lie on a pillow of the common everlasting blossom, make a tea from the bark of the root of the mountain birch, or, if he be south of Santa Barbara, use a snuff made of dried woolly blue curls. This flower was called *romero*, or rosemary, by the Spanish Californians, and by that name it is known in medicine. Fried in oil it was used as an ointment for ulcers, and it is a valuable liniment for all muscular troubles.

If he suffers from rheumatism, there is the dogbane, the root of the skunk cabbage, which is also made into a salve for ringworm and white swelling; the white-veined shin leaf whose name is borrowed from its English cousin, is used by the peasants as plasters for bruises and sores, and the clematis, which is known in Europe as 'beggars' weed,' because the mendicants rub it on their bodies to produce blisters and ulcers, with which to awaken the pity of the charitable.

If he succumbs to fever he can make a tea of the button bush or button willow, which is also a good laxative, a tonic, and a cough cure, or a tea of the blue-eyed grass, which will sustain a patient for several days without other food; or an infusion of bedstraw, whose name was earned by some of the species filling the manger at Bethlehem.

After dwelling on the remedies nature provides, it may be well to mention some of the plants one should avoid. The two daturas, the large flowered white one and the common jimson weed are both poisonous. Both have a maddening effect on those who eat them. The former was used by the Indians to stimulate their warriors before entering battle, and it was also fed to children to produce a trance in which they could predict the future. The bulb of the *zygadenes* has earned its title of "death camas;" the larkspur and the holly-leaved cherry are both poisonous to sheep and cattle; the beautiful azalea hides death in flower, leaves and root; the white nightshade is equally vicious; the largest flowered phacelia poisons many persons by the mere gathering, the monkshood or aconite, is disastrous to animals, and the euphorbia poisons when brought into contact with wounds, and it affects the eyes if held near them.

However, the helpful plants far exceed the poisonous ones, both in number of species and in frequency of individuals. Having acquired the habit of observation, the camper can wander into the utmost wilds of the State feeling as secure from sickness as if accompanied by his private physician.

The Situation in Seattle.

Court proceedings resulting from the episode detailed below and which is taken from the *Seattle Daily Times*, resulted in a decision in favor of the plaintiffs—the faction who were out voted at the meeting here mentioned. In describing the situation the *Seattle* paper states:

Trouble has broken out among the dog men again and this time the grievances will be aired in the courts. At a meeting of the Seattle Kennel Club, held in the city hall last night, ostensibly for the purpose of hearing a report of the recent bench show, an effort was made to wipe out the old club by incorporating a new club of the same name and to divide the assets of the new organization among the members of the new club.

The faction that put through a resolution last night putting an end to the existence of the club that had fostered dog shows in Seattle for the past ten years is headed by F. W. Gilbert, J. A. Peebles and F. A. Pontius. They are opposed by President Riplinger of the Seattle Kennel Club, President Redelsheimer of the Western Kennel League, C. B. Yandell and others who have been interested in the club for many years.

It is claimed that the notice of the meeting last night was not general enough to bring out the full voting strength of the club. The faction headed by Mr. Gilbert had control of the meeting and Secretary McAlister refused to accept dues from men who had been members of the club for years, thus preventing them from voting.

J. M. E. Atkinson, H. C. Bromley, L. H. Rogers and W. J. J. Roberts and others who have been identified with the club for years were denied a voice in the meeting because they had not paid their dues. Each of them tendered the money and claimed he had not been notified by the secretary that he was in arrears. The secretary refused to accept the money, claiming that a recent meeting of the executive committee had instructed him not to do so.

C. B. Yandell, chairman of the executive committee, challenged this statement. He said on meeting of the committee had been held since the recent bench show and that therefore no such action could have been taken. By a vote of 18 to 12, which represented the strength of the two factions at the meeting, the secretary was sustained in his position, and the men

were not allowed to pay their dues, and so could not vote.

Then F. W. Gilbert introduced a resolution which had for its object the disbandment of the old club, the incorporation of a new club taking the same name and the distribution of the assets, amounting to about \$800, of which \$400 is in cash, among the members of the club in good standing.

The old members, many of whom had worked hard for ten years to put the club on its feet financially, protested vigorously against parceling out the assets of the club among forty-two members, some of whom have been members of the club only about three months. The motion prevailed, however, and then the old members who had been voted down and out sought redress in the courts.

About 1 o'clock this morning, May 6, Judge Bell was caught on the last car on his way home, and he signed a temporary injunction, restraining the officers of the club from in any way disposing of the property of the club until a showing can be made in court.

Mr. Redelsheimer, who has spent more money in support of dog shows and bringing Seattle prominently among the dog men of the country than any other man, said this morning that this meeting to organize a new club was directed solely against him, and he wants to know of the men who do not like him what he has ever done to earn their animosity, aside from spending his money to make dog shows a success.

Mr. Redelsheimer is president of the Western Kennel League, the organization which controls the dog situation on the Pacific Coast. He was elected to this position at the last bench show without a dissenting vote. He says it is his opinion that the men who are behind this new movement will, if they can, affiliate with the American Kennel Club, which is the rival of the Western Kennel League.

R. M. Palmer, who was one of the majority last night who voted for reorganization, says the object of the new move was to put the club on a broader and sounder basis. He says some time ago a meeting was packed to elect Mr. Redelsheimer president of the Seattle Kennel Club, and that ever since that time there has been an undercurrent of dissatisfaction, which found outlet in the action taken last night.

Under the new plan members are limited to one share each, and after the initiation fee of \$5.00, the annual dues will be \$1.00. None but stockholders will be allowed to vote, which Mr. Palmer says will limit the membership to dog men and will prevent the packing of a meeting to further the ends of any candidate for office. The older club members claim that in fact this arrangement will put the affairs of the club in control of a faction which has for years been striving to dominate its affairs in the interest of the American Kennel Club.

Now that the dispute has reached the courts, it will be thoroughly threshed out, as the leaders of both factions are determined to preserve their rights.

How to Invade Albion With a Dog.

A press dispatch by a London correspondent to the *Boston Herald* details the provisions of the English regulations in case one desires to take his dog with him when he lands on the "tight little isle." The correspondent only views the law from a humorous and puzzled standpoint; but on the whole it may not be so very bad—commercially. All in all very good, and possibly a little more method than madness in the measure—for there are many dogs in England for sale and there has been a good American demand for them and why "should coals be carried to Newcastle?"

The embargo of course prevails against canines from other countries than the domain of the dear American cousin, but in this case consistency is a jewel perforce. The correspondent says:

Not for a long while has any more absurd mandate been issued from a government department than the British Board of Agriculture's new regulation which has just gone into effect, requiring all dogs reaching these shores from abroad to wear for six months thereafter a sort of harness of a most extraordinary pattern. People who are in the habit of taking their canine pets with them on their travels are in a huff over the measure, and, as it will be enforced with indiscriminating stringency against dogs brought over by American visitors, the matter is one that will interest many readers in the United States.

The official reason given for this order is the necessity of protecting British stay-at-home dogs from the danger of being infected with rabies by foreign dogs, though how the board of agriculture's canary-colored harness is to have the slightest effect one way or the other on the spread of hydrophobia is one of those inscrutable governmental mysteries which hopelessly baffles the ordinary understanding. But the edict has gone forth and must be obeyed or divers severe pains and penalties will be incurred by the offending dog and its owner. With that minute attention to petty and superfluous details which characterizes most acts of British officialdom microscopic directions are given as to how the device is to be constructed. This is the specification which accompanies the board of agriculture's mandate:

The harness must be made of canary-colored hide. It must be lined with red felt, pinked at edge and stitched throughout with yellow thread.

There must be a girth strap, two shoulder straps, chest strap, martingale and saddle.

The girth strap shall be fastened by means of staples and ratchet plates, the staple to turn freely and to have a small hole to admit of the string of official leaden seal.

The staple plates and slide loops must be made of aluminum.

The plate on the saddle is to bear the following words, deeply engraved, and filled with black lac: "Board of Agriculture and Fisheries, in Quarantine for Rabies. I. D. No.—"

These directions must be strictly adhered to.

latitude is allowed for the display of individual taste. The substitution of yellow felt for red felt, or red thread for yellow thread, will constitute a violation of the law, which may be sternly dealt with. It would seem that the British board of agriculture has discovered some intimate, though occult, connection between canary-colored hide, red felt and yellow thread and the suppression of rabies. The cost of the harness will be \$3.75 and upward, according to the size required.

When a dog lands it must be subject to an examination by a veterinary surgeon appointed by the board. Whether or not the animal shows any signs of rabies makes no difference. After pocketing his fee he will proceed to invest it with the weird arrangement of straps, buckles, ratchet plates, martingale and saddle and affix the board of agriculture's seal, which it will be a punishable misdemeanor for any one but the authorized official to break. And for six months thereafter, sleeping or waking, in the privacy of its owner's backyard or curled up on its mistress' lap, the dog must wear that harness with the accompanying quarantine badge. And in addition, for the same period, it will not be allowed on a public thoroughfare without being muzzled.

"The measure is absolutely devoid of either rhyme or reason," said G. J. Knight, secretary of the National Canine Defence League, when your correspondent sought his opinion concerning it. "It is simply a piece of official tomfoolery, but in that respect it is on a par with most of the provisions made by the board of agriculture in recent years with regard to dogs. Our league will do its best to get the regulation repealed, and as in the past we have succeeded in compelling the government to withdraw more than one mischievous dog bill, we are not without hope of accomplishing something. It would seem that there are some people connected with the board of agriculture who occupy their spare time in devising ways and means of irritating dogs and annoying their owners. It has been abundantly demonstrated that six weeks is the average incubation period for rabies, and why a dog should be quarantined as a suspect for six months is one of these mysteries of officialism that no one can unravel. Compelling a dog to wear an utterly useless and costly harness simply amounts to the imposition of another tax in addition to that which the owner has to pay for the privilege of keeping a dog."

Furthermore, the owner of the quarantined dog, before getting the harness arrangement, must deposit \$25 (\$125) with the Government to be used in expenses, vet fees, etc., and if there is any money left over it is refunded when the term of isolation expires.

AT THE TRAPS.

At the Washington Gun Club shoot at Sacramento, last Sunday, some good scores were made. Four men tied for the medal. In the shoot-off Stephens won.

The regular club shoot scores, 25 targets, were as follows: Ruhstaller 22, Stephens 22, Newbert 22, Vetter 19, Adams 21, Connor 11, Reichert 19, Peak 22, Hagerty 18, Englehart 20, Ladden 9.

Tie shoot-off, 25 targets, Peak 21, Stephens 21, Newbert 19, Ruhstaller 18. Second tie—Stephens 22, Peak 21.

Other scores made during the day were: Ten birds—Ruhstaller 8-9, Reichert 7, Adams 5-8-7, Stephens 9-7, Gray 6-9-9, Lowry 8, Vetter 9-6, Newbert 7, Englehart 8-8, Peak 2. Fifteen birds—Newbert 11, Reichert 11, Ruhstaller 15, Lowry 10, Connor 4, Gray 12.

Seattle shooters won almost everything at the recent Victoria, Wash., tournament. The team trophy, nearly all of the individual prizes as well as high average awards were won by Stewart, Steele, Ellis and McLaughlin. In the team shoot Seattle scored 85 breaks, Victoria 75. Ellis was high average, Steele second and McLaughlin and Stewart tied for third.

The Washington State Association's tenth annual blue rock shoot was held at Harrington two weeks ago. Many high averages were scored, the weather and other conditions being favorable. The championship medal was won by E. E. Ellis of Seattle, who prevailed over a strong competition, the trophy was won last year by Dell Cooper. Ellis broke 38 out of 40, and won 40% of the purse.

At the Harrington, Wash. shoot, McBroom of Seattle won high average, 92% at 600 targets. E. D. Ellis of Harrington won the Hunter Arms Company trophy, E. E. Ellis of Seattle, the L. C. Smith trophy. In the team shoot Spokane scored 55, Seattle 53. About 60 Washington, Oregon and Idaho sportsmen participated.

The Empire Gun Club June shoot took place last Sunday at Alameda Point. J. B. Hauer and R. C. Reed were high guns in the club championship race. The winners in the re-entry race are given below. Reed was high gun in the special prize race, shooting as a guest of the club. Webb made the high member's score.

In the Sweeney medal race Hauer shot most cleverly. Starting at 16 yards he broke 5, then 5 at 18 yards, then 5 pairs at 20 yards; then, at 22 yards, he broke the first two pairs and then missed his twenty-fifth target. This score is the best shot up in this event for two years. W. O. Cullen ran up 25 breaks previously, a truly good score under the conditions. It is not probable that Hauer's score of last Sunday will be beaten this season.

A summary of the scores shot is the following:

Club championship race, 25 targets—

Hauer	10011	11111	11111	11110	11111	23
Cullen	10001	11111	01110	00001	11100	14

† Back scores. * Birds only.

The winners were: First class—Nauman, "Slade" and Murdoch.

Second class—Gamble and Forster.

Third class—W. A. Robertson, Iverson and Muller.

Fourth class—Dr. Pitres, Dutton and Frahm.

Fifth class—Walpert, Klevesahl and Walsh.

Sixth class—Bradrick, Pisani and Turner.

Seventh class—Masterson, Nichols, Leary and Knick.

Eighth class—Grosse.

Club handicap match, 25 to 30 targets, 2 classes—Nauman shot at 25, broke 24; Hoyt 26-21; Walpert 30-25; Pisani 30-20; Shreve 28-19; Leary 30-22; Haight 26-25; Sylvester 26-23; Patrick 30-14; Robertson 26-21; Dutton 28-23; Bradrick 26-25; H. Klevesahl 30-23; Hutton 26-22; E. Forster 25-23; Turner 30-16; Murdoch 25-20; Donohoe 30-25; Gamble (18 yds) 25-23; Iverson (18 yds) 26-24; Shield 27-24; Walsh 30-19; Nichols 30-19; Biller 30-9; Masterson 30-24; Daniels (18 yds) 26-18; "Slade" 25-24; Frahm 28-24; Muller 26-18; Lewis 26-15; Pitres 28-25; Barber 27-11; Gross 30-12.

On the tie shoot-off, Bradrick won the first-class medal for the month—the scores were: Haight shot at 26, broke 24; Bradrick 26-26; Donohoe 30-18; Dr. Pitres 28-15. Walpert won the second class medal for the month.

Added money event, handicap, 25 to 30 targets, high guns, 3 moneys—

Daniels shot at 21 broke 20; Nauman 20-11; Forster 20-18; Bradrick 20-19; Hoyt 20-19; Walpert 22-18; Donohoe 22-16; "Slade" 20-19; Masterson 22-18; Shields 21-15; Lewis 20-18; Dr. Hutton 20-18; Haight 20-17; G. Sylvester 20-19; Turner 22-13; Rouch 22-9; Gamble 20-18; Robertson 20-14; Murdoch 20-16; Monday 22-14; Frahm 22-17; Nauman for birds 20-19.

The winners were: Daniels first money, Bradrick,

Hoyt, "Slade" and G. Sylvester divided second and third moneys.

Fifth event, 10 singles at 16 yards, 5 pairs at 14 yards, class shooting, 3 moneys—

Daniels, doubles 6, singles 5-11; Nauman 9-10-19; Ashlin 7-8-15; Dr. Hutton 5-8-13; G. Sylvester 8-8-16; Hoyt 6-9-15; Iverson 8-10-13; Forster 7-9-18; Donohoe 6-9-15; Haight 7-8-15; Dr. Peters 9-7-16; Bradrick 8-9-17; Lewis 3-6-9.

Nauman won first money, Iverson second and Bradrick third money.

The Golden Gate Gun Club regular monthly shoot will be the Ingleside card to-morrow.

A big merchandise shoot, similar to that held last year, will take place at Ingleside next month under the able management of Mr. Edg. J. Forster. It is believed there will be at least 100 trap shooters in attendance.

The Golden Gate Gun Club has joined the Northwest Sportsmen's Association, that organization having recently included the sportsmen's clubs of this State among the list of eligible clubs for membership and participation in shooting tournaments under Northwest jurisdiction. The association is now composed of gun clubs located in California, Oregon, Washington, Idaho, Utah and British Columbia.

The annual Northwestern inanimate target tournament will be held at Pendleton, Wash., on June 23, 24 and 25. A strong team of local cracks, Clarence A. Haight, C. C. Nauman, R. C. Reed, E. E. Drake, A. J. Webb and W. H. Seaver will attend and contest with the Northern representatives of skill with the shotgun. It is also probable that W. H. Varian and "Pop" Carr will make the trip. This squad of California marksmen will make a team of shooters that will put the Northern men on their mettle. It is estimated that the value of the trophies, championship medals and cash prizes will aggregate \$2500, for which the attending shooters at the tournament will compete.

It will be agreeable news to the anglers of the State reports Chief Deputy Fish Commissioner Vogelsang that through the efforts of the Fish Commissioners 50,000 young steelhead have been planted in Lake Tahoe. The eggs were taken from Eel river and hatched at the Ukiah hatchery under the supervision of Colonel A. V. La Motte, and are being exchanged for 200,000 Lake Tahoe trout eggs.

The steelhead ranks high as a game fish, and fishing for it in the tributary waters along the Pacific Coast is exceeded only by the pleasure and excitement of trolling for quinnat salmon. It will also rise to the artificial fly, and its large size and gameness make it a fish much sought after by fishermen.

The Fish Commissioners have also successfully planted 50,000 young salmon in the waters of Marin and Sonoma counties along the line of the North Shore Railroad. The Commissioners were induced to do this by reason of the success which has attended the planting of quinnat salmon taken from the Bear Valley hatchery. The young salmon, which worked down the streams to Tomales bay and so on into the ocean, after reaching maturity returned in large numbers to the waters from which they were liberated, and have given ever since food and sport to many.

Coming Events.

Rod.

April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.

April 1-Nov. 1—Trout season open.

May 1-Sept. 1—Close season for shrimp.

June 11-Saturday Contest No. 7. Class Series, Stow lake, 2:30 P. M.

June 12-Sunday Contest No. 7. Class Series, Stow lake, 10 A. M.

July 1-Jan. 1—Open season for black bass.

Aug. 15-April 1—Open season for lobsters and crawfish.

Nov. 1-Sept. 1—Open season for crabs.

Sept. 10-Oct. 16—Close season in tidewater for steelhead.

Nov. 15-Sept. 10—Season open for taking salmon above tide water.

Gun.

June 19—Golden Gate Gun Club. Blue rocks. Ingleside.

June 26—Millwood Gun Club. Blue rocks. Mill Valley.

June 23, 24, 25—Sportsmen's Association of the Northwest. 20th annual blue rock tournament. Pendleton, Or. H. J. Stillman, Secretary, Pendleton, Or.

June 26—Union Gun Club. Live birds. Ingleside.

July 3—California Wing Club. Live birds. Ingleside.

July 3—College City Gun Club. Blue rocks. North Berkeley.

July 10—Union Gun Club. Blue rocks. Ingleside.

J. L. Head at Louisville, Ky., March 31st, 97-100, 97%.

At the Pasadena Gun Club blue rock tournament, May 30, 1904, J. E. Vaughan of Los Angeles, won high average, 95.1-10 per cent, using U. M. C. "Acme" shells. Mr. Guy Lovelace of Los Angeles, won second high average, using U. M. C. "Magic."

At the recent Union Gun Club shoot, C. C. Nauman made the high average in four principal events. Nauman, Murdock and "Slide" were high in the club shoot. High scores in the medal event by Haight, Donoboe, Bradrick, Walpert and Pitres—a possible 25 each—were all made with "Magic" and "Acme" shells and Walpert won second class medal with a Remington gun and "Magic" shells. Out of 34 shooters, 20 used U. M. C. shells.

"Leaders" in eleven states. The proof of the pudding is in the eating; the proof of a shell is its shooting. Here is proof from eleven states of the kind of shooting that can be done with Winchester "Leader" shells. On May 19th, at St. Joseph, Mo., Wm. Clayton, shooting the "Leader" shells, won the Wyeth trophy, emblematic of the World's Amateur Live Bird Championship, with one of the most remarkable scores on record. He lost only one bird out of 100, killing his first 79 straight. At Dubuque, Iowa, on May 18th, Fred Gilbert broke 199 out of the possible 200 targets; and his record for five days' shooting at Dubuque and Davenport was 970 out of 1000 targets. He won high expert average for the two above tournaments. C. M. Powers won the best general amateur average for the Dubuque tournament with a score of 353 targets out of 400 shot at. S. Foley tied for second high amateur average. Messrs. Gilbert, Powers and Foley always use the Winchester "Leader" shells. At the Auburn, N. Y., Gun Club tournament for amateurs on May 18th and 19th, the first five high averages for the two days' shoot were won by shooters using the "Leader" shells. H. B. Whitney, T. F. Adkin, C. S. Clark, W. Linden and R. H. Cave winning in the order named. Another remarkable demonstration of the superior quality of Winchester "Leader" shells was given at Vicksburg, Miss., May 17th and 18th, at the tournament of the Southern Trap Shooters Association, where Harold Money and Charles Spencer tied for the high expert average with the score of 885 out of 400 targets shot at. Is not this proof convincing? If you are in doubt, try Winchester "Leader" shells and see if your shooting does not improve. Within the past three weeks Winchester shells have won all the im-

portant shoots in Tennessee, Georgia, Texas, Missouri, Iowa, Pennsylvania, Mississippi, New York, Ohio, Illinois and Oklahoma. The above tournaments covering a large area of country, and bringing together a great number of shooters, only goes to show the universal popularity of the Winchester "Leader" shells.

Fred Gilbert is certainly making a remarkable record this year, and is doing some wonderful work with his Old Reliable Parker gun. Mr. Gilbert never shoots any other gun, and maintains that his high scores are due to the faithful performance of the Parker gun. Mr. Gilbert under date of May 25th, made a new world's record from 22 yard rise, breaking 50 targets straight. This is certainly a wonderful performance. Under date of May 24th, at the same place—Marshalltown, Ia., at 20 yard rise, Mr. Gilbert scored 49 out of 50. Under date of May 18th at Dubuque, Ia., Mr. Gilbert scored 199 out of a possible 200. In all, Mr. Gilbert has shot from May 10th to 27th inclusive, 2500 targets on 13 different days, with an average of 96.3-10%. This is a record that is hard to beat, and one that is not happening with every shooter these days. At Dubuque, Ia., Mr. Gilbert broke 157 straight without a miss. At Marshalltown, Mr. Gilbert's straight runs of 100, 137, and 118, were simply wonderful. To see Mr. Gilbert in his shooting form, making such records as these with his old trusted friend, the "Parker" is good evidence that the Parker should be used if you are desirous of making good scores.

At Winnipeg, Man., Mr. F. G. Simpson, shooting the Parker gun won the Dupont Trophy, with a score of 46 out of a possible 50. Mr. Simpson is a remarkable shooter and one of considerable note, always shooting the Parker gun. At Omaha, Neb., May 18th, 19th and 20th, Mr. C. B. Adams shooting the Parker gun was second for three days, with a score of 462 out of 495 shot at. On May 17th, Mr. W. S. MacClelland, of Richmond, Va., made a very creditable score with his new \$225 Parker gun, making 22 out of 25. This is a very creditable showing for an amateur. H. D. Kirkover Jr., Buffalo, N. Y., on May 24th, broke 95 out of 100. Mr. Kirkover is a very popular shooter, and this is his first performance at the traps since the first of January. You may hear from Mr. Kirkover and his Parker gun again.

DOINGS IN DOGDOM.

At the Braintree show last week there were 590 entries—over 400 dogs benched at the Ladies Kennel Association of Massachusetts show.

Among the star attractions at the show were the recently imported smooth-coated Fox Terrier Strangers Samson owned by Alfred Thomas of Worcester. He has been a great winner at English bench shows, and he made his first appearance before an American judge at Braintree.

One of the chief aims of the association is to induce women to own and to exhibit dogs in the ring. The club has an active membership of over 100, and in planning the arrangements for the show it was decided to make an innovation in dog show management by having ladies act as stewards.

The stewards have control over the dogs in the ring, and it was their duty to take general supervision of the benching and likewise to see that all of the dogs entered in each class appeared in the ring on schedule time. The ladies who kindly consented to act as stewards were Miss Fanny Brooks, Mrs. L. Weston, Mrs. E. K. Thayer, Mrs. Henry Nagoun, Mrs. George E. Parmenter, Miss Cordella Jackson, Miss Margaret Brooks Briggs, Mrs. C. S. Little and Mrs. Storm Van Gravesende.

Tbornbill Lady Bountiful whelped a litter on the 4th inst. to Tbornbill Tomales, first puppies, parti-colors, December P. K. L. show '04. A dog and a bitch of the litter are most beautifully marked parti-colors. Percy Ward says they look as if they will come on splendidly.

Stockdale Kennels, Bakersfield, have at the present time a few of the best bred young Pointers on the Coast, among them are several first class Derby prospects, particularly youngsters by Champion Cuba of Kenwood out of Winnipeg Fly. They are over a year old and have had some work on birds. Here is an opportunity for the selection of a good Pointer that is worthy of attention. Manager Dodge will take on a puppy to train if the purchaser so desires.

Stockdale Kennel's puppies are vaccinated against distemper and since this treatment has been in vogue at the kennels the puppies have been immune from the dread scourge feared by most breeders.

The general string at Bakersfield is in fine fettle and "Mace" will also have quite a number of outside dogs to train, he has recently secured the services of a very capable assistant kennelman.

We might suggest further to sportsmen who are desirous of procuring a good young dog to shoot over next season that the chance is open to procure a more than ordinarily good Pointer at present by addressing Mr. Dodge, care of the Stockdale Kennels, Bakersfield, for further particulars.

Dr. A. J. Sewall, whose articles we have often quoted, in a recent issue of *Illustrated Kennel News*, to which journal the eminent vet is a contributor, has given out an interesting story showing the comparison of cow's milk with the bitch's milk as a puppy sustainer. In analysis of a fair sample of each kind he gives:

	Cow's	Bitch's
Water.....	87.4	66.3
Butter.....	84.0	14.8
Sugar and soluble salts.....	5.0	2.9
Caseine and insoluble salts.....	3.6	16.0

That a bitch's milk is almost three times as strong as a cow's is not usually understood, yet a common practice in giving milk to puppies is to add to the original weakness by diluting with water. For the pup to obtain sufficient nourishment on a cow's milk diet so large a quantity is necessary to balance up that the result is an over-distended stomach, indigestion following and the puppy does poorly. The arrangement of a dog's digestive organ is such as to receive food in a concentrated form—dogs in nature are carnivorous and until they get meat they have nothing but the dam's milk which is in the nature of a concentrated food. When the litter is about six weeks old, the bitch forages for food and returns with a loaded stomach; subsequently, when partially digested, this food is ejected, by vomiting, and then the whelps are given "prepared food" and so suitable that their immature stomachs can dispose of it.

Dr. Seawall gives the following directions as to the best methods to prepare cow's milk so as to make it as much similar to the bitch's milk as possible. To every pint of cow's milk add two and one-quarter ounces of cream—about three tablespoonfuls and two and one-half ounces of caseine. Very finely powdered caseine may be bought for about 50 cents a pound. When it is difficult to procure caseine, half the quantity of plasmon may be added instead. The cream should be added first and the mixture well stirred or shaken, as the caseine does not dissolve. When feeding puppies with this artificial bitch's milk, it must be understood that, comparatively, only a small quantity is necessary—about one-third as much as would be given of cow's milk.

The owner of the Bull Terrier pup Edgewood Peer is somewhat inaccurate in several statements which appeared in a letter published in the *American Stock Keeper*.

The paragraph which appeared in this journal calling attention to certain Woodcock Wonder characteristics noticeable in E. Peer was prompted by remarks to that effect made by a number of fanciers—including several members of the Bull Terrier Club and the same being common rumor and gossip among Bull Terrier and other fanciers was certainly legitimate matter for publication, however unpalatable it may have been to the owner.

Mr. Attridge places entirely a too liberal construction on our offer to publish matter submitted by him, this is patent upon perusal of the letter appearing in our esteemed contemporary.

The statement attributed to Mr. Mortimer is in bad taste, to say the least, and we doubt its verity. For what should prompt the judge to make the assertion, off hand, as Peer was taken into the ring, "My, what a beauty! I'll bet he's no Wonder pup. There is not the slightest resemblance between the dog and any Wonder pups here."

That assertion, by whosoever made, proves that there was comment upon the marked resemblance of E. Peer to "Old Ben's" get.

Mr. Jack Bradsbaw the former half owner (for we bought Wonder from the owner in this city in December, 1902), has stated that there was a resemblance. However, we do not wish to talnt Mr. Attridge with anything like a suspicion of juggling—he seems to be very tender on that subject, by the way, nor do we for a moment imagine that there is a tinge of "dishonesty" in the makeup of Mr. A., whom, we all know has raised some very good Bull Terriers and has an

immaculate and most unimpeachable reputation for probity and the manifold virtues a dog man should possess.

Mr. J. W. Rinlinger, President of the Seattle Kennel Club, was in this city during the week. Mr. Rinlinger is enthusiastic over the doggy situation in the north and prophesied a lively circuit for next season.

W. C. Bogen's Bull Terrier bitch Silkwood Venus (second novice and puppies last April) was served by A. Joseph's Bloomsbury Baron on the 2nd inst. Mr. Bogen believes that the "nick" will prove the right one in this breeding.

Eaglewood (Cb. Woodcock Wonder—American Belle) is offered by Mr. B. at stud to approved bitches "to accommodate owners, for a pup of the litter. I do this," he writes "because I am not in the game for the financial end of it, and would be willing to help any breeder who has a good bitch."

Champion Meersbrook Bristles and Royston Remus, two great Fox Terriers that have luckily left their ball mark with the breed, have gone over to the canine majority recently.

While on the subject of field trial and bench show breeding, let us offer a word of advice to bench show breeders who wish to secure field trial from, says the *American Field*.

The first thing they should do is to get rid of their dogs' heavy coat and long feather and flag. Breed dogs with as short and bard a coat as they can.

How to Cure Alfalfa.

The leaves of alfalfa contain more than three times as much protein as the stems, a ton of alfalfa leaves containing as much protein as 2800 pounds of bran, says Prof. Cottrell in a bulletin of the Kansas Experiment Station. Protein is the material in feed necessary for the formation of blood, lean meat and milk. Every effort, then, should be made to cure the alfalfa in such a way as to save all the leaves possible. The method of curing will vary with the condition of the crop, ground and weather. When alfalfa has made a slow growth, and at the time of cutting the ground and the weather are dry, there is no difficulty in curing. Often, under these conditions, it is safe to rake within a few hours after mowing, and stake a few hours after the alfalfa has been put in the windrows.

When alfalfa has made a rapid growth, and is rank and succulent, and the weather and ground are damp, the problem of curing is a difficult one. It is easy to dry the leaves, but the stems will contain much moisture after the leaves are too dry. Alfalfa hay should become so dry before stacking that when a handful of stems are tightly twisted together no water can be squeezed out. The most practical way to accomplish this, and at the same time save the leaves is the plan to adopt, and this will vary with different seasons and places.

There is practically no difficulty in curing any but the first crop. When the conditions for curing the first crop are unfavorable, we have usually found the most practicable method to be, to cut the alfalfa in the morning, after the dew is off, allow it to barely wilt in the swath, then rake, and before night put in narrow, tall cocks. After the dew is off the next morning and the surface of the ground has become dry, we open these cocks carefully, so as not to shatter off the leaves. If the weather is favorable, the hay may be stacked in the afternoon; if not, we recock carefully, and repeat treatment until the hay is properly cured.

Some alfalfa growers, in stacking the first cutting of alfalfa, put alfalfa and dry straw or prairie hay in alternate layers. This is a satisfactory way if the dry material is available. Others use ten to fifteen pounds of salt or air-slacked lime for each ton of hay, sprinkling the salt or lime so as to cover as much of each load as possible. Experiments made at this station indicate that considerably less gains are made by cattle when salt is mixed with the feed. A trial of lime on alfalfa, made at this station, showed little effect. From all the experience we have gained to date, we advise that the best way to prevent spontaneous combustion of alfalfa is to thoroughly cure before stacking. It is not often that all the con-

ditions necessary to produce spontaneous combustion are present, and ordinarily there is no danger, where reasonable care is taken, except with the first cutting, and with this cutting only when the growth is rank.

A cow, whether Shortborn, Hereford or Jersey, that gives but a small amount of milk and for a short time only needs but a small udder, while a cow that yields a hundred pounds a day must have both a large reservoir to hold the milk and milk glands sufficiently developed to secrete it. Between these two extremes all gradations exist. The organ therefore to which the greatest importance is attached and in which the greatest differentiation may be expected is the udder. To conform perfectly to the standard it should have a long connection with the body, extending well forward under the belly and be continued with loose skin well up behind. The front quarters should be of the same size as the hind ones and should hang to the same level.

According to the Iowa Dairy Commissioner the cost of making a pound of butter at the various creameries of that state varies from 1.2 cents to 6 cents per pound. The butter that cost 1.2 cents to make was in a co-operative creamery that made annually about half a million pounds of butter from whole milk. The average cost for making butter, taking the state as a whole, was 2 1/4 cents per pound. Separating the creameries into groups, the cost was found to be as follows: In creameries making not more than 50,000 lbs., 3.14c; between 50,000 and 100,000 lbs., 2.36c; between 100,000 and 150,000 lbs., 1.99c; between 150,000 and 200,000 lbs., 1.78c; between 200,000 and 300,000 lbs., 1.71c.

A Missouri cattle breeder gives the following method of polishing horns: Make the horns smooth and even with a coarse file or rasp and then take a fine sandstone and water and rub the file marks out; then take a fine whetstone (a water stone is best), wet or rub out all marks, as the least scratch will show when polished. Then get some tripoli (or, as the railroad men call it, triplye), wet as much of it as you want to use, then with a rag of any kind rub the horn well with it (you can hardly rub too much); then polish with the palm of the hand. Don't be afraid to hear on and rub quick. Boiling water will not take the polish off. They will take any color wanted by boiling in some kind of dyes.

Commissioner McConnell of the Minnesota Dairy and Farm Department is investigating an egg-yolk butter coloring. The yolk of eggs, it is said, has been used as a butter color by European butter-makers for some time. It is claimed that the results are entirely satisfactory, the yellow animal fat of the yolk producing a fine color with no injurious effect. It was only recently that the attempt was made in the United States to substitute liquid egg yolk for other butter color. It was used recently by experts of the food commission who pronounced it a success.

A Western dairyman calls a cow that does not give enough milk to cover expenses, a "star boarder." He says some are naturally bad, others are bad because of improper feed and care.

The best kinds of everything pay the best. The best teams, the best tools, the best varieties, pay the best profit. These need not be expensive, but such as produce the best results.

matism, Sprains, Sore Throat, etc., it
is invaluable.
Every bottle of Caustic Balsam sold is
warranted to give satisfaction. Price \$1.50
per bottle. Sold by druggists, or sent by ex-
press, charges paid, with full directions for its
use. Send for descriptive circulars, testimo-
nials, etc. Address

THE LA FRANCE-WILLIAMS COMPANY, Cleveland, Ohio.

Nearly half a century ago the farmers of Holland began to realize that dairying was more profitable than the growing of grain. This invariably proves to be the case as the density of the population increases. Holland now imports as much grain as she grows.

It is well known among scientific feeders that cattle that have been starved or improperly fed during calfhood or as yearlings, never recover entirely. The muscles and tendons harden and shrink and such an animal is never afterwards able to put on flesh in the way intended by nature. They may be fattened, but the fat is always in layers and bunches on the outside, and not mixed with the lean meat. The feeding of calves and yearlings on hay alone during this growing period also has a disastrous effect on the future growth of the animal. As stockmen study the economy of meat making, they will learn to handle their young cattle on a different plan from that now too generally in vogue.

For the growing chicks a good lice powder can be applied while they are in their brood coops at night or liquid lice killer can be painted in the bottom of the same just before they go to roost and very thinly covered with coarse straw that the liquid does not stain the chicks' plumage, thus making them dirty looking. Scalding water poured in all the cracks and crevices of brood coops and nest boxes

will kill all little red mites which are found in them. Lay the coops thus treated in the bright sunshine where they can dry off quickly. It is a good plan to sprinkle some air slaked lime in the bottom of the nests after cleaning them out and renewing with clean nesting material.

The United States government has instituted another safeguard against the possibility of unhealthful beef. Not only will beef cattle be inspected before slaughter at centers, and the beef after being dressed, but beef cattle are now to be inspected at centers before they go to the feed lots. These inspections are to stop the passage of any mangy or scabby cattle that might otherwise pass out for the fattening process. This move on the part of the Bureau of Animal Industry should have the applause of Europe, says the *National Provisioner*. It is the purpose of our government and of our abattoirs to kill none but perfectly healthy beeves. With this triple inspection as a precaution, the domestic and foreign trade should feel fully reassured. This inspection of stockers and feeders will dampen the disposition to ship any but absolutely sound cattle, even though the stock put under this inspection go to the country and will not be seen again in the beef pens for months to come. Every move of the government shows a commendable disposition to in every way guarantee sound beeves and sound beef.

BREEDERS' DIRECTORY.

SHORTHORNS AND SHIRES—Quinto Herd of Shorthorns. 41 premiums California State Fair, 1903. Young stock for sale. Send for catalogue.

INTERNATIONAL STOCK FOOD 3 FEEDS FOR ONE CENT

SAVES \$10 WORTH OF CORN OR OATS EVERY YEAR FOR EACH HORSE

IT MAKES STALLIONS SURE

Home of JAY BIRD

GENTS:—

I have been feeding "International Stock Food" to Jay Bird, Baron Wilkes, Jr., and Scarlet Wilkes, and it has been a great help to them. Jay Bird made a season of 82 and "International Stock Food" made him a sure foal getter. W. A. BACON, JR., "INTERNATIONAL STOCK FOOD" makes stallions sure and your mares will raise stronger and more vigorous colts. It makes colts grow very rapidly. It makes a delicate feeder heartily. It gives race horses more speed and endurance and keeps them healthy. Will you try it without sacrificing a cent? Write us at once and we will mail testimonials and full information.

THE STANDARD BRED YOUNG STALLION

HIGHLAND

(TRIAL 2:12)

Bred at Highland Stock Farm, Dubuque, Iowa.

will make the Season of 1904 to a limited number of approved mares

AT SAN MATEO, CAL.

TERMS FOR THE SEASON.....\$25.

HIGHLAND is a grand looking young stallion, five years old. His breeding is most fashionable, and his immediate ancestors are producers of race winners with fast records. He is beautifully gaited and has a perfect disposition. Does not pull or want to break at speed, and can be placed at will in a bunch of horses. He is a high-class horse and has better than 2:10 speed. As he is to be raced next year, his owner desires that he be bred to a few high-class mares this season.

HIGHLAND is a coal black horse with one white hind ankle, stands 16 hands high and weighs close to 1200 pounds.

CAMPBELL'S

EMOLLIO IODOFORM

GALL CURE

For GALL BACKS and SHOULDERS, CRUPPE SORES and SADDLE GALLS there is now superior.

The horse CAN BE WORKED AS USUAL. For BARBED WIRE CUTS, CALKS, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor.

We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the feet which often injure and often lay up race horses.

All Trainers Should Have It in Their Stables

THE ANNUAL MEETING of the members of the members of the Pacific Coast Trotting Horse Breeders Association which was held last Wednesday evening resulted in much good being accomplished. A new Board of Directors was elected and all are enthusiastic horsemen and breeders who will work to put new life into the association and keep it where it has been for many years, the leading association on the coast for the encouragement of breeding and racing trotting horses. The report of the secretary showed that there is over eighteen thousand dollars in the hands of Capt. N. T. Smith, treasurer of the association, most of which is stake money, but there is over \$1000 to the credit of the organization that is not owing to the stakes. The association is therefore in a most prosperous condition, and the two meetings to be held by it this year will make it still more so. In the re-election of officers by the new Board of Directors, E. P. Heald, who has so ably presided over its deliberations for years and who enjoys the respect and esteem of all the members as well as the horsemen of the entire Coast, was unanimously re-elected president. Col. J. C. Kirkpatrick was elected first vice-president, Mr. F. H. Burke second vice-president, and Capt. N. T. Smith and Mr. F. W. Kelley were re-elected to the positions of treasurer and secretary respectively. With its new, energetic board of directors, the Breeders Association will bend every effort to make the breeding of the light harness horse more popular than ever in California, and by its annual race meetings provide the tests by which the comparative speed, endurance and racing and road qualities of the California bred trotters and pacers can be known. The resolution passed by which no bookmaking will be permitted at the association's meetings will receive the hearty endorsement of all who have the best interests of the harness horse business at heart, and it could be emulated with profit by the State and all the district fairs and associations that will hold harness racing in California in the future.

WITH DEEP REGRET we learn that the popular horseman and esteemed citizen of California, Mr. Frank W. Covey, for so many years Superintendent of the great Palo Alto Stock Farm, is in very poor health having recently suffered a second stroke of partial paralysis. Since the Palo Alto Farm discontinued the breeding of trotting horses, Mr. Covey has been a resident of the town of Palo Alto, where, with his estimable wife he lives a very quiet life, so foreign to one of his active, energetic temperament, but made necessary by his unfortunate illness. We echo the sincere wish of every person in California who has met and become acquainted in the least with his genial personality that Mr. Covey may soon find renewed health and be spared to his family and friends for many years to come. It would have been his greatest pleasure to see the Palo Alto Stock Farm continued as the greatest breeding farm of its kind in the world, and no man was better fitted to carry out the plans of its great founder than he. But the trustees of the vast estate willed that the enterprise should come to an end, the horses were all sold and the farm given over to other uses. In his remaining days Mr. Covey will have the consolation of knowing that the work he did as Superintendent he did well, and that could he have continued it, the fame of Palo Alto would have grown greater with each succeeding year.

HORSE BREEDERS, will be interested in the following expert opinion of the Eastern market which appeared last week in that well informed journal the *Breeders Gazette* of Chicago: "According to the usages of the trade the summer season has been begun in the horse market. As usual when the spring orders had been satisfied prices receded somewhat, but in the present instance the recession was not marked save on the commoner classes. Good harness horses, light and heavy, are as dear at this writing as they ever were in the history of the country and the supply is so small that all the dealers have unfilled orders in their pockets, orders which they may not, and probably can not, fill before fall if then. The exporters have had a troublous time in getting such harness horses as they wanted, indeed many of them are in the same position as the domestic men, but their competition has had a most beneficial effect on prices ever since the first of the year. Good drafters are not quite so high as they were a week ago, but something of the seeming decline may be explained in the fact that goods of the show yard stamp in this line are very scarce and the effort of every fitter is to have his best loads ready just in the height of the spring selling. We believe however that if drafters as good as were presented some weeks ago should now be put up for auction every cent as much money would be forthcoming for them as was paid at that time. There is no oversupply of high class market horses. There are plenty of men looking for good horses of all sorts, but the cheaper trade has been in a measure handled for the present. No one anticipates that there will be any rapid slide down the price hill in the horse market this year. What may happen when the first of the larger crops now coming on appears in the ring remains to be seen. It is very doubtful if much of an impression will be made. The outlook is very good."

THE CROWLEY STAKE, by which name the side stake for foals of 1904 suggested by Mr. T. J. Crowley one of the Directors of the Breeders Association, is now referred to by those interested, is causing lots of talk and not a day passes but some owner comes forward with the announcement that he desires to enter his colt in this novel event. It is proposed to close the entries on August 1st, and in our issue of next week the full conditions of the stake will be announced. From present appearances there will be a large number of entries, and if the rivalry is as great when the race comes off as it is now, the Futurity of 1904 will be the biggest drawing card of the year on the Pacific Coast.

Good Purses at Salinas.

The Salinas Driving Club, at its meeting last Saturday night, adopted a list of stakes and purses for its race meeting to be held at Salinas on the 14th, 15th, 16th and 17th of September. Entries to all stakes and purses, except the two-year-old and three-year-old trotting colt stakes, will close July 26th, when horses must be named.

Five per cent of each purse must accompany the entry in all cases, and 5 per cent additional will be deducted from money winners.

Following are the purses to be contested for, viz:

PACERS.

1. Monterey County Chamber of Commerce stakes, for 2:20 class, \$600.
2. Green class, for horses without records, \$300.
3. For horses eligible to the 2:10 class, \$300.
4. For horses eligible to the 2:15 class, \$300.

TROTTERS.

5. Salinas Driving Club Stakes, for 2:20 trotters, \$600.
6. For trotters of the 2:15 class, \$300.
7. For green class trotters, or horses without records, \$300.
8. District (Monterey, San Benito, Santa Cruz and Luis Obispo counties) three-year-old stake, for trotting colts, three-year-old or under, \$10 to accompany nomination, July 1st, \$15 August 1st and \$25 September 1st, with \$50 added by the club.
9. District two-year-old trot, conditions and added money the same as in No. 8.
10. Mixed race, trotters and pacers, 2:25 class for horses owned in Monterey county, \$150.
11. Mixed trotting and pacing race for members of the Driving Club owners to drive, \$150.—*Salinas Journal*.

Back Numbers Wanted at \$1 Each.

To complete the files of the BREEDER AND SPORTSMAN for a subscriber we wish to procure one copy of the following dates: April 24, 1897, February 5, 1898, and will pay \$1 for one number of each of these dates. Send papers to BREEDER AND SPORTSMAN, 36 Geary street, San Francisco.

Annual Meeting P. C. T. H. B. A.

At the postponed annual meeting of the Pacific Coast Trotting Horse Breeders Association, held last Wednesday evening, a quorum being present, the meeting came to order with President Heald in the chair.

Mr. I. L. Borden, of the committee on the speed track and new athletic amphitheater at Golden Gate Park, reported that the committee, which consists of Mr. Borden, Mr. James Coffin, Mr. T. J. Crowley and Mr. J. A. McKerron, had devoted a great deal of their time to the work and that they had interviewed not only the railroad companies but various other concerns and persons interested and that so far the cash collected by the committees from the different organizations amounts to over \$10,000 in addition to which there is \$4000 subscribed that is now being collected. He also reported that meetings were being held regularly of the various committees interested in promoting the work and satisfactory progress was being made towards raising the subscription necessary to secure the completion of the track.

There being no other standing committees, the secretary's and treasurer's reports were read showing the association to be in a prosperous condition, that the cash on hand with the treasurer is \$13,264.24, and with the secretary \$283.17.

The reports of the secretary and treasurer were approved and ordered spread on the minutes.

The next business taken up was the election of a Board of Directors for the ensuing year, the following names being placed in nomination: Messrs. E. P. Heald, R. S. Brown, J. C. Kirkpatrick, A. B. Spreckels, F. H. Burke, T. J. Crowley, I. L. Borden, C. A. Durfee, A. J. Molera, James Coffin and Geo. W. Kingsbury. No other names being presented nominations were declared closed and on motion the Secretary was instructed to cast the unanimous vote of the members present for the election of the nominees.

There being no other business to be presented the meeting adjourned, after which a Directors' meeting was held for the purpose of organization and Prof. E. P. Heald was elected President; J. C. Kirkpatrick, First Vice-President; F. H. Burke, Second Vice-President; N. T. Smith Treasurer and F. W. Kelley, Secretary for the ensuing year.

The Secretary was instructed to advertise for bids for privileges, bids to be opened on July 20th.

It was further decided that bookmaking would not be permitted at the coming meeting of the Association. Forty applications for membership were presented and the applicants elected.

Tulare Entries.

TULARE, CAL., June 23, 1904.

BREEDER AND SPORTSMAN:—The 2:10 class pace for our meeting filled with the following entries: Zolock, Alone, Cuckoo, Rey Del Diablo, Milt Gear and Lilly I.

The 2:28 class pace filled with Dr. W., Kid, Mureal, Olivetta, Lady R., Corset Maker, My Way, Lilly I., Milt Gear and Bollivar entered.

The yearling stake filled with five entries, and the two-year-old pace with four.

A named stallion stake with four local horses entered was also declared filled.

There will be another program of harness and running races announced later. We have a force of men working on the track and grounds, putting things in shape for the meeting. Everything points to a very successful race meeting and stock show.

W. F. INGWERSON, Secretary.

Strike!—If they don't give you Jackson's Naps Soda when you ask for it.

JOTTINGS.

THE CALIFORNIA CIRCUIT is sure to have a grand opening at the "horse centre" on Wednesday, July 27th. Horsemen and all who like to see horses contesting for supremacy in races will be boarding the trains everywhere and telling the conductors: "Put us off at Pleasanton." There has never been more interest and enthusiasm over a season of harness racing on the Coast than has been aroused this year by the big purses offered everywhere and the big lists of entries received. Every day news comes from some track of a horse stepping a very fast mile, and the news calls forth the remark: "That fellow will win his race, as no other horse has shown that fast." The very next day, however, there will be authentic reports of three or four horses that have gone miles just as fast or a little faster, until the sure winners are getting to be just about as numerous as the entries. This is what keeps the interest up and makes the sport good. The man who can pick the winner in any race at Pleasanton, and desires to back his judgment with a little money, will get odds as good as two-to-one in any race on the program, provided auction pools are sold. There are a lot of crackerjack horses in training this year, and "the talent," who are always supposed to know all the "good things" and get all their information from the "inside," are of many minds this year and already putting up small bets among themselves on the outcome of nearly every race.

I heard of a lover of the sport who gets around and visits nearly all the tracks at this time of the year, betting a horse owner a new hat the other day that there would not be three heats in 2:15 or better trotted in The California Stake for 2:24 class trotters at San Jose this year. Now that horseman thinks he has the hat already won and ought to be wearing it now, and it looks that way to me, as such trotters as Sonoma Girl, Golden Gate, Abe Miller and two or three others that are entered in that race have already worked miles better than 2:15. But "there's many a slip 'twixt the cup and the lip," and there is no George G. in the race this year even though there are some who have shown wonderful speed. George G. won this race last year at Petaluma. There were four heats in the race, George G. getting the first in 2:14. He was beaten the next heat by Deputy in 2:13½ owing to a break, and trotted the next two in 2:12½. Had George G. not been in the race it is more than probable that some of the heats would have been slower than 2:15. The year before at Fresno, Petigru won the race, Forrest W. being second, Verona third and Vi Direct fourth. These were the only starters. Petigru had made a record of 2:10½ at Woodland a few weeks before, and Forrest W. one of 2:14 at the same meeting and was reported to have shown quarters in 30 seconds. Verona and Vi Direct had not shown so fast, but they were pretty fair trotters at that and could both trot miles very close to 2:15 in their work. Petigru won the race in straight heats in 2:17, 2:16 and 2:17½. Taking the "dope" of the California stake for the two years it has been trotted, and its even money and take your pick whether 2:15 will be equalled three times during the race at San Jose this year.

The eastern scribes who see nothing but evil from the introduction at this late date of thoroughbred blood into trotting families, are having lots of fun over the fact that Nancy Hanks' five-year-old daughter Princess of Monaco by Imp. Meddler sold for but \$625 at the Forbes sale. Will these smart fellows please tell me why at the same sale a four-year-old filly by Bingen 2:06½, out of the trotting bred mare Vina Belle 2:15½, (dam of Azema 2:18) by the great Electioneer, second dam Flushing Belle, (dam of Vina Belle 2:15½ and granddam of two in the list) by Dictator, third dam Fayette Belle by Mambrino Chief II, sold for but \$660, while the three-year-old filly Vazaka by Bingen out of Red Tape (sister to India Silk 2:10½, China Silk (2) 2:16½, etc.) by Prodigal 2:16, second dam the great broodmare Brown Silk 2:19½ by Baron Wilkes 2:18, third dam Nannie Etticoat (dam of 5) by Bellwood 756, fourth dam the great Soprano (dam of 10) by Stratmore 408, fifth dam Abbess (dam of 2) by Albion, sold for but \$500? According to the scribes who are always writing about developed sires and dams and producing lines, and who never miss a chance to decry thoroughbred blood in the trotter, Vazaka should have brought about ten times as much as the half bred Princess of Monaco. Mr. Forbes did not believe that a foal from Nancy Hanks by Meddler would be more valuable than her foals by good trotting sires, but bred her once to the great thoroughbred sire as an experiment, which he could well afford

to do. If Princess Monaco had trotted a mile in two minutes it would not have established the theory that the way to get a two-minute trotter is to breed a trotting mare to a thoroughbred horse, although some writers would have so asserted and proven it to their own satisfaction. The fact is that Mr. Forbes succeeded in getting a filly from Nancy by a thoroughbred horse that sold for \$625, which shows that the Princess must be a pretty good piece of horse flesh. Any breeder who can mate his mares and stallions so as to sell all the five-year-olds of their produce at an average price of \$625 can write the word "success" across his books when he goes out of the business.

California harness horses have been in evidence but very little on the Colorado circuit so far. At Pueblo, Trinidad and Colorado Springs meetings the only one to start was James Coffin's pacing mare Welladay by Steinway out of Katy G. by Electioneer, therefore a full sister to Klatawah 2:05½, Chas. Derby 2:20, Saraway and others. Joe Cuicello, who took quite a string of horses to Colorado, has started Welladay several times, but up to the Denver meeting she has been outside the money. Bert Logan, Bane and the other California horses that were shipped to Colorado, did not start at any of the three meetings which preceded the Denver meeting. Bert Logan was entered in the 2:30 pace which opened the program at Denver last Saturday but for some reason he did not start, and the same may be said of Bane by Charles Derby and Getaway by Strathway who were down to start in the 2:20 trot. Ed Gaylord's mare Confianza 2:21½, that took her record as a three-year-old in 1902, and is a full sister to Tuna 2:16½, was also one of the entries in the 2:20 trot at Denver last Saturday, but did not go to the post. According to some of the Denver papers the meeting at Overland Park does not give promise of being very successful, although there was a big crowd on the opening day, and thirteen books were doing business.

Washington Park, Chicago, where the American Derby is run, has been compelled to close its gates. The Washington Park Club is one of the best racing organizations in America and gives probably the best attended running meeting that is held in this country. It is an organization of gentlemen who have kept the sport clean and high-class, refusing to hold their meeting for more than twenty-one days in each year and under whose auspices the American Derby has become the greatest event of the summer racing season. Washington Park, however, is within the city limits of Chicago, and the officials of that city insist that the laws prohibiting betting on races shall be obeyed. The Washington Park Club's officials respected the laws, made no attempt to evade them, and some found that they could not afford to continue their meeting, so the stakes were all declared off and the gates of the track were closed. Every true sportsman will regret that such a condition of things exists in Chicago, but will realize that it is the natural result of the excess of racing which has led to it. In nearly every State in the Union where the gamblers have secured control of sport the conditions are rapidly becoming the same. Thus far New York seems to be the only State that has legislated so that racing has been kept under control. There a State commission allots dates to each track and sees to it that the season is within proper limits. The gambling cormorants who are only in the game for profit are forced into the background and kept there. The Washington Park Club of Chicago would be holding their usual twenty-one days of high-class racing had not the professional gambling tracks become so numerous in Chicago and vicinity that the State Legislature and the City Council felt themselves compelled to pass laws prohibiting bookmaking and pool selling. They were not after the Washington Park people but they could not reach the professional gamblers without including all race tracks. There is not a particle of doubt but the sport of racing is being brought into disrepute in many localities by the greed of the gamblers who, like Death, claim all times for their own.

The man who constantly uses a horse and does not teach him some useful lessons neglects one of his chief opportunities for making the horse a valuable servant. Horses can easily be taught to obey promptly ordinary words of command and it takes no extra time and but little trouble, and should be so taught. It is annoying—particularly when there is no need for it—to have a horse that won't stand even to road wagon unless the driver has hold of the reins; that will not be caught without a chase or bringing up all the horses on the farm, is hard to bridle, is habitually impatient in standing and starting.

For all kinds of weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

Kamehameha Day at Honolulu.

The birthday of the departed King Kamehameha III is always celebrated in Honolulu by a day devoted to racing under the auspices of the Honolulu Jockey Club. Racing begins at 10 a. m. and continues all day with an intermission for luncheon. Nearly the entire population of the Hawaiian capital turns out to witness the sport, both running and harness races being given. Kamehameha Day falls on June 11th and this year was a great success. The sensation of the day was the lowering of the pacing record for Hawaiian bred horses, by Creola, a daughter of the California bred stallion Creole 2:15 and a thoroughbred mare. Creola was bred by Hon. D. P. R. Iserberg at his Waialae Ranch, and this was her first start in a race. She won the first heat in 2:18, a new record for a Hawaiian bred pacer, but was beaten in the race by the California pacer Denny Healey. The track, which is deep and sandy, was five seconds slower than the average California track, showing that the mile was a fast one for a green untried mare. Creola was driven by Mr. J. Quinn.

The summaries of the races decided during the day are as follows:

Running, three furlongs—Egyptian Princess won, Frank S. second, Geraldine S. third. Racine Murphy and Black Bess also started.

Pacing, 2:18 class—Sambo 1-1, Cyclone 2-2, Billy Lemp, dis. Time—2:20 2-5, 2:22.

Running, half-mile-dash—Bruner won, Defender second, Egyptian Princess third. Geraldine S. also started. Time, 0:49 1-5.

Pacing, 2:30 class—Denny Healey 2-1-1, Creola 1-2-2. Time—2:18, 2:23 1-5, 2:28 1-5.

Running, five furlongs—Egyptian Princess won, Racine Murphy second, Black Bess third. Time, 1:02.

Rosita Challenge Cup, running, one mile—Racine Murphy won, Defender second, Egyptian Princess third. Time, 1:42 4-5.

Pacing, 2:24 class—Denny Healey 0-1-1, Oak Grove 0-2-2. Time—2:31, 2:25½, 2:22½.

Pacing, free-for-all—Cyclone (Jo Wheeler) 1-1, Billy Lemp 2-2, Sambo, dis. Time, 2:15, 2:17½.

Running, one mile and a half—Bruner won, Dixieland second. Time, 2:44 4-5.

Gentlemen's Driving Race—Los Angeles won, Faro Bank second, Toney third. Time, 2:27.

A blue ribbon was awarded Mr. Iserberg for the performance of Creola in breaking the Hawaiian record, and that gentleman immediately offered a \$200 cup to the first Hawaiian bred pacer that would lower the mark of 2:18 made by his handsome mare.

Colorado Springs Summaries.

TUESDAY, JUNE 11.

Pacing, 2:14 class, purse \$800.

Jess C. ch g by Cotabell.....	1	2	1	1
Young Hal, h b by Hal Dillard.....	5	1	2	3
Helio Girl, b m by Helio.....	2	5	5	6

Selden Wilkes, Haven Dixon, Jim Dixon and Bonnie Treasure also started.

Time—2:20½, 2:20¾, 2:18¾, 2:19¼.

Pacing, 2:55 class, purse \$500.

Estabelle, b m by Snowwood.....	6	1	1	1
Obe Craft, br b by H.....	1	2	6	2
Ima Electric by Electric.....	2	4	2	5

Fairy Medium, Glidesway, Welladay and Trimble Boy also started.

Time—2:25¼, 2:25¾, 2:30¼, 2:25¾.

WEDNESDAY, JUNE 15.

Trotting, 2:24 class, purse \$500.

Englewood, a g by Strongwood.....	1	4	1	1
Dick Welch, r g by Paul N.....	2	1	2	4
Lady Elsin.....	3	3	3	2

R. R. Johnson also started.

Time—2:23¼, 2:19¼, 2:22¼, 2:24¼.

Trotting, 2:25 class, purse \$800.

Oronte, h b by Alfred G.....	1	1	1	1
Happy Harry, b g by Happy Hel.....	3	2	2	2
Queer Knight, b g by Knight.....	2	3	3	3

Berzaleel, Woody R. and Susie R. also started.

Time—2:25¼, 2:25¾, 2:25¾.

THURSDAY, JUNE 16.

Pacing, 2:17 class, purse \$500.

Bonnie Treasure, ch g by Bonnie Bills.....	1	1	1	1
Daniel J., b g by Whitman.....	2	2	2	2
Phoebe Almost, b m by Combination.....	4	5	3	3

Exodus, Puritan, Joe Mack and Belle Burton also started.

Time—2:19¼, 2:18¾, 2:18¾.

Pacing, free for all, purse \$500.

Winfield Stratton, b b by Saraway.....	1	1	1	1
Laura Spru, ch m by William C. P.....	3	3	2	2
Stranger O, b g untraced.....	2	4	3	3

Daisy Field and Dora Delpha also started.

Time—2:16¼, 2:16¾, 2:15¾.

Trotting, 2:35 class, purse \$500.

Major H., b g by Baron Wilkes.....	1	1	1	1
Johnny K., g g untraced.....	2	3	6	6
Frankie, br m by Ned.....	5	7	2	2

Anna G., Ed G., Nettie Van Grundy, Lucille K. Silver Star, Woody R. and Clay Wolfe also started.

Time—2:24¼, 2:24¾, 2:24¾.

After Veterinarians Fail, Try Craft's.

BAUCE, ILL., May 15, 1904.

Wells Medicine Co., Lafayette, Ind.

Gentlemen:—The book you sent me a few days ago entitled "The Horse" is very useful and I am well pleased with it. I have a thoroughbred mare that has had catarrh for about two months. I had a veterinary surgeon treat the case for three weeks without any relief. I then got a bottle of your Craft's Distemper and Cough Cure, and after the fourth dose the fever left and the mare is getting along splendid. Craft's is worth its weight in gold to any man handling horses, and I would recommend all horsemen to keep a supply on hand. Very truly,

LUTHER C. ARTHUR.

EASTERN GOSSIP.

[Culled From Our Exchanges.]

A press dispatch from Syracuse, New York, under date of June 8th, says: Thomas F. Adkin's M. and M. candidate, Lisonjero, in training under the direction of D. W. Howard, trotted the fastest mile of the season here to-day in the presence of his owner, who came down from Rochester to see two or three of his horses work. As if knowing that he was under surveillance, the big bay son of Dexter Prince equalled the matinee record he took as a member of the Chicago Driving Club's brigade last season by turning the mile track in 2:13. The last half he trotted in 1:04 and the last quarter in 30½ seconds, completing a performance which stamps him as a possibility and a factor in the big Detroit race. Other members of the Adkin string went around 2:20 with repeats, but the mile of Lisonjero was the topic of conversation among the horsemen at the track.

Word comes that Capt. W. S. Tough died last week at Kansas City, Mo. In the seventies there was no better known man in trotting horse circles, as he was the owner of the famous champion trotting stallion, Smuggler 2:15½, selling him to Col. H. S. Russell, who took him through the memorable campaign of 1876, in which he defeated Goldsmith Maid and other great horses of the time. For over twenty years Captain Tough was a horse and mule dealer at the Kansas City stock yards.

Miles in 2:20 or better are reeled off every day at Glenville, the fastest mile of the season over this track being credited to Lou Dillon. Millard Sanders allowed her to step in 2:10½, and she acted as if one right at 2:00 could have been had for the asking. The trotting queen is in the pink of condition and Millard is confident that she will cut her record several seconds. Al Bock 2:08½ and China Maid by McKinney 2:11½, the latter being sighted for the Chamber of Commerce stake, worked several glib miles in company, the fastest in 2:14, and the mare has apparently as much brush as any horse at Glenville. Robizola 2:12½ trotted two heats around 2:15. Sanders thinks her the best thing in sight for the 2:13 and 2:12 classes, and looks for her to go into winter quarters with a record of 2:08 or better.

Monte Carlo 2:07½, for whom Brayton Ives was reported to have paid \$20,000 last fall, is working most satisfactorily this season at the Empire track, and at present holds the season's record for a work-out mile to wagon. He trotted what looked to be an easy mile, driven by Mr. Ives, in 2:10. The mile was a splendidly rated one, and the Mendocino gelding looked as though he could have trotted to his record. Many good judges now predict that he will draw his owner a mile to wagon some day during the summer in 2:04. There never was a more perfect-gaited trotter than Monte Carlo, and he has stepped halves right at a minute on more than one occasion. Mr. Ives has in him and Nora McKinney 2:12½ two of the most perfect gentleman's road horses in America to-day.

William E. Weeks, Assistant Superintendent of Parks in New York, has the saddle used by the late Charles S. Green, when he rode Great Eastern to the world's record of 2:15½, at Fleetwood Park, in 1877. Weeks, who was himself one of the crack riders of the old days, used this saddle for years in races against John Murphy, and loaned it to Green for the contest against Rarus at Fleetwood. It was on this saddle that Weeks rode the trotter Joe H., against Pilot's time in Madison Square Garden, making the mile in 2:35½, over the seven lap course. He used it also in all his saddle races during the eight years he was in France and besides won several blue ribbons with it in the show ring. Notwithstanding all this service, the saddle is still in perfect order and apparently as good as new.

A preacher, who went to a Kentucky parish, where the parishioners bred horses was asked to invite the prayers of the congregation for Lucy Grey. He did so. They prayed three Sundays for Lucy Grey. On the fourth he was told he need not do it any more, "Why," said the preacher. "Is she dead?" "No," answered the man; "she won the Derby."

Addie Lee II 2:23½ by Electioneer, one of the best known ribbon winners in New York, and dam of three standard performers, died recently at H. N. Bain's Elm Stock Farms, at Dover Plains, N. Y. Besides having won first premiums at many county fairs, Addie Lee II won three silver loving cups at the Goshen horse show, and, with Honey Bee, she made up the only team that ever beat a team shown by the late Col. Klipp, in the show ring.

Directors of the Massachusetts Society for the Prevention of Cruelty to Animals have decided to offer \$20 to each of the over 300 Massachusetts towns with which to establish watering troughs or fountains for animals, on which are to be inscribed the words "Blessed are the merciful." The society is enabled to make this offer through the bequest received in the will of the late Arioch Wentworth. This offer is to be made to the selection of the towns immediately. At the meeting it was stated 966 hands of mercy were formed during April.

A relay race to the World's Fair from Albuquerque, N. M., is a project that is under discussion. F. H. Leland, a veteran cavalryman and a member of General Gomez's Cuban staff, together with William Closson, a well known rough rider, are backing the scheme. The race will be 1200 miles relay and will be open to cowboys from Arizona and New Mexico with a purse of \$1500 as the prize. There are already ten entries and the race will probably come off during July but Buffalo Bill will not be at his wickiup to receive the hoys when they get there.

When the rubber horseshoe pad first made its appearance several years ago, some looked with doubt on its utility, others viewed it as a luxury in hoof wear and a few accepted it as a thing long wanted. It took hundreds of years to have the word of Aristotle that the globe was round, accepted. The faith of the men who first accepted pads as a good thing and the makers' faith in the necessity and the utility of this soft but substantial method of shoeing was strong enough to cause them to spend fortunes in their perfection. These have waited hardly more than a decade to have their principles not only accepted but applauded. Pads as an article of hoof wear are a source of untold pleasure to "man's noblest friend" and of profit to both shoer and owner of the horse. The great interesting subject of what is the most prolific cause of corn would hardly have excited interest if the rubber pad was in use a decade ago. But why cite a decade of years? Corn in a horse's foot is a hereditary character of disease as is cancer or consumption in the human being. So many horses of to-day are inheritors of the disease which inflicts their progenitors, hence we say that if the horse of a decade or more ago had his hoofs fortified against the causes which produce corn their progeny would to-day not be affected with it. The principle of pads is to supply the foot with that which has been desired, viz: Frog pressure, and in view of the character of work which every horse is now-a-days being subjected to, driven over hard streets and roads, (most roads in the country are of the stony kind and quite as hard on the foot as the city pavements), corn is constantly making its appearance to the lessening of the horse's value, for once the disease sets in, the foot is more or less liable to trouble which takes a certain value from the animal. It is therefore timely to direct attention to the immense utility and virtue of pads as a means not only of nullifying the effects of present disease, but preventing the appearance of that which is easily possible. And at this particular season when the summer is now about to open and the horse will be called into more hard and frequent use on the streets and roadways, is the time to consider the use of this substantial method of shoeing. Pads have fulfilled their promise, they have proven their worth, they can be recommended with confidence. They are a bona-fide article of hoof wear and are no longer "a brilliant prospect, but a magnificent realization."

A most remarkable old mare was recently killed in Maine, who is thus described by the "Turf, Farm and Home": "Kitty, the Hotel Coburn, Skowhegan delivery horse, was killed Saturday, she having been so infirm from old age as to be unable to stand. She was one of the most remarkable horses in the country. Her age was 46, and for 25 years she has been employed on the Coburn baggage wagon. She knew the hour of the arrival and departure of all trains and if for any reason her driver did not start for the depot when she heard the train whistle she would go without him and back into the place reserved for her without help. Woe betide the horse which ever secured her regular position for there was sure to be trouble."

Secretary Theo. D. Coleman of the Central New York Circuit has issued a circular in which he draws attention to the fact that in the conditions governing that circuit there is no clause claiming the right to declare off any race not started by 3 o'clock on the last day of the week of the meeting, such as is generally claimed by almost all associations. He says that it is the intention of every association in the circuit to race off the entire program in every case where it is possible to do so, in spite of delays due to postponements on account of rain. This system was adopted in that circuit last year, and in one case twelve races were got off in two and one-half days' racing.

The trivial fines imposed on chauffeurs running automobiles at an excessive and unlawful speed on much-frequented roads should be displaced by substantial penalties. The automobile cannot be abolished, but should be subjected to reasonable regulations with respect to speed. The recently enacted New York law imposes a fine of \$100 if the speed of an automobile exceeds the legal limit. For the third offense imprisonment is added to the fine. Such a penalty will be treated with respect and will be rarely imposed. The American public is friendly to legitimate sport and loves a fast horse and a fast machine of any sort, but the highways are public property and not a private and exclusive possession. They should be so used as to preserve the rights of all who travel upon them. The fine levied upon the law-defying automobilist should bear some relation to the danger to which he subjects other travelers.

Boston's Work Horse Parade was a gigantic success from every point of view. More horses were in the parade than ever were driven in Boston since the parade was inaugurated and the institution of prizes for long service proved the main feature of the whole affair. It was developed in the showing for these old-service prizes that there are more men in Boston who have worked for their present employers a long time than any one thought for, and the competition was very keen. The good effect of the parade on the care and condition of Boston's horses was very apparent.

The League of Amateur Driving Clubs has issued a neat little booklet containing its by-laws and rules. It will be well for a number of amateur clubs which are not members of the league to note some of its rules if they wish to maintain their amateur standing and escape the penalties of professional records. Rule 1 states that no pool selling or bookmaking of any kind shall be allowed. Rule 3 states that all performances under the auspices of the league clubs shall be conducted under the rules of the National or American associations. Rule 4 declares that no club shall allow the use of hobbles at its matinees. Rule 5 confines all contests to road wagons. Rule 6 confines the membership exclusively to amateurs, and defines an amateur to be a man who has not accepted wages or hire for his services as a trainer or driver, and any member who competes for a purse or against professionals, except in such events as are specially arranged for amateurs, shall forfeit his amateur standing.

The *American Sportsman* of Cleveland says all the signs of the season indicate that the matinee game will be on stronger than ever. All the clubs of the leading cities, east and west, are intact and the spirit of the sport is more buoyant than ever. Ohio horsemen who were at first staggered by the vile blow struck at harness racing by Governor Herrick, have already recovered their nerve, and we get word from all directions that the game will proceed, just as if nothing unusual had happened. Notwithstanding the all pervading disappointment because the historic Glenville track has been knocked out of the Grand Circuit by the official acts of Governor Herrick and Mayor Goff, the Gentlemen's Driving Club of Cleveland are stronger and better equipped this year than ever before, and the Saturday matinees of the club will, in a measure, furnish entertainment to that large class, in the Western-Reserve of Ohio, who enjoy with such rare and wholesome relish the speed contests of the annual Cleveland Grand Circuit meeting. It is estimated that the loss to Cleveland is not less than \$100,000, because the Governor of Ohio (a Cleveland product, we regret to state) was induced, from personal ambition, to strike the staggering blow to the harness racing pastime. In this season of business quiet the hotels of Cleveland can ill afford to lose the \$30,000 that would have been added to the good side of the ledger, had the hosts of the Grand Circuit been allowed their annual welcome visit.

At the Empire track Tuesday writes Sam Freeman, several prominent road drivers and horsemen were at luncheon in the clubhouse and the conversation turned on the two miles worked by James Butler's trotter, Judge Green. Mr. Butler drove him the first mile and Chas. DeRyder the second. Fred Dietz remarked jokingly to Mr. Salisbury that he did not think the driver of the first mile could get as much speed out of the horse as the other. "Well, you see," replied Mr. Salisbury, always ready with an answer, "the first driver is better at signing checks than he is at driving." And Mr. Butler ordered.

They are talking that it will be a great year for the Bingen family, and nothing but the worst kind of luck can keep the prediction from becoming a fact says Milton Hatch. The speed shown by the young Bingen is more than sensational. With Dave McClary's three-year-old showing a mile in 2:18, a couple the same age at Allen Farm that can step a quarter in 35 seconds, practically untrained, I would think were an effort made Bingen might be the leading sire of the year.

Notes and News.

A full sister to George G. 2:12½ has been bred to Searchlight 2:03½.

Bids for privileges at the Breeders meeting at San Jose are advertised for in this issue.

Boralma 2:07 is running out in the paddocks at Dreamworld and it is said his legs will not even stand stiff jogging.

Mary Marie, the chestnut pacing mare by Hart Boswell, worked a quarter in 30½ seconds at Pleasanton last week.

Directum 2:05½ starts his list of new ones for 1904 with Gracino (5) 2:24½, winner of a seven-heat race at Baltimore last month.

Mr. J. M. Atkinson has purchased from A. T. Van De Vanter of Seattle, the trotter Tickets 2:20½ by Conductor and will use him as a road horse.

One of the most promising young trotters in Missouri is sired by the California bred stallion Surpol 2:10, son of Electricity and old Sallie Benton.

Bayswater Wilkes has ended his season at Woodland and been taken back to Winters by his owner, Sam Hoy. He has made a very successful season.

Harold D., the green pacer by Dexter Prince owned by Henry Dunlap, worked a half in 1:02½ at Pleasanton last week and came the last quarter in 31 seconds.

A Frazier racing bike, almost new, will be sold at Fred H. Chase & Co.'s yard, next Thursday night, after the horses of the Meek Estate and other consignors are sold.

The rules and by laws for 1904 of the League of Amateur Driving Clubs has been issued in convenient pocket size, bound in blue boards. Secretary Quimby will please accept our thanks for a copy of the same.

Several of the "old boys" are striking a fast gait this year and showing that they are not all out by any means. The eighteen year old stallion Waco 2:16½ by Erelong, recently trotted a half in 1:07½ over an Eastern track.

The two-year-old bay filly by Welcome 2:10½ out of Eleanor, sister to Eric 2:17 by Richards Elector, is one that is worth looking over and taking a chance on. She is to be sold at the Meek Estate sale next Thursday evening.

Mark Smith of Stockton, owner of the fast trotter Deputy 2:13½, has been down to Salinas looking him over and is much pleased with his condition. Charley Whitehead is training Deputy and will race him through the circuit.

N. G. Smith who has raced trotters through the California circuit, died at his home in Everett, Washington, last week after an operation for cancer of the stomach. He was a native of Galena, Illinois, and a veteran of the civil war.

Henry Helman has bought from Dr. A. C. Froom the trotting mare Lady Jones 2:26½ by Captain Jones, paying over \$2000 for her. The mare has been miles in 2:15 this year and will be raced on the northern circuit where she is well entered.

Rose K., the full sister to Robert I. 2:08½ and Maud Murray 2:12, is a great prospect for some one to get at his own price next Thursday evening at Fred H. Chase & Co.'s salesyard, 1732 Market street. Look her over a day or two before the sale.

Look over that fine big gelding by Hambletonian Wilkes that will be sold next Thursday night at Fred H. Chase & Co.'s salesyard. He is one of the best looking and most promising three-year-olds in California and is broke single and double.

Hi Hogboom took the horses he has been working at the Woodland track down to San Jose this week. Among them is the three-year-old Carloklin, by McKinney, owned by C. L. Jones of Modesto, that is entered in the Breeders Futurity of this year.

The report that came from the East that Geo. W. Ford had sold his stallion Neernut 2:12½ while in Cleveland turns out to be a canard. It was printed in all the Eastern horse journals, and the big dailies. Mr. Ford reached home last week and reports that Neernut has not been sold.

The Rocklin Driving Park Association will give a program of racing on its excellent half mile track on Monday July 4th. The principal purses are \$250 for a free-for-all trot or pace and \$150 for a 2:40 class trot or pace. These events will be half mile heats, three in five. Entrance ten per cent.

Some of the California boys who have been racing on the Colorado circuit must have been entertaining Dr. Battey (Columbus) of the *Western Horseman* who has been acting as judge at some of the meetings, with colorful atmosphere stories. In the last issue of that excellent journal "Columbus" states that the California mare Tuna 2:16½ now at Denver, will be raced through the grand circuit and "has been extremely good this spring, having stepped a mile in 2:08½ with last half of mile in 1:03½ before leaving Pleasanton."

The editor of the *Trotter and Pacer* epigrammatically remarks: "Under any system some of the drivers will try all of the time, and all of the drivers will try some of the time, but the thing to make trotting popular is a plan which will compel all of the drivers to try all of the time."

The two-year-old Duke of Monterey by Monterey 2:09½, dam Kitty Fox by Panoast, second dam by Dictator, third dam by Mambrino Time, fourth dam by Paddy Burns, will be sold at Fred H. Chase & Co.'s salesyard, Thursday evening next. This is a great bred colt that should make a fast trotter.

C. A. Durfee, who was up from San Jose this week, reports that his favorite little trotter, Cuate 2:18 by McKinney, dam Miss Jessie 2:13½ by Gossiper, has been very ill and for a day or two he thought the chances were against his recovery. On Wednesday Cuate was better and apparently out of danger.

The newly organized driving club at Santa Ana will hold a meeting on the 4th of July at the Ford track. A match race between two local trotters has already been made for \$100 a side, and two other regular events will be on the program. Several parties expect to start broodmares for time records, and a good day's sport will be furnished.

Ross Richmond, a fourteen months old roan colt owned by Mrs. J. G. Hill of Pioneer, Kern county, is one of the most promising youngsters in that section. He is by Richmond Chief 2:11½ out of a mare by Ross S. 2:19½, son of Nutwood. Ross Richmond is entered in Breeders Futurity No. 3. Mrs. Hill owns a full brother to him foaled this year.

Our good friend Hon. William McDonald of Livermore writes that he claims the name Silent Lady for a chestnut filly with blaze face, left hind leg white from hock down, foaled May 12 1904, sire San Marco, dam Ada Knight by John Knight. We suspect Mac has selected this name for his filly because he thinks there is not another like her on earth, but we predict she'll be "heard from" later on.

Thirty-four young horses from the Meek Estate will be sold by Fred H. Chase & Co., next Thursday evening, at 1732 Market street. There are three yearlings, nineteen two-year-olds, eleven three-year-olds, and one four-year-old. There are some of the best bred youngsters in California among them and all are good individuals and in good condition. Get one or more at your own price.

How's this for breeding? Two-year-old bay gelding by William Harold 2:13½, dam by Nutwood Wilkes 2:16½, grandam Patti, dam of Lustre 2:22, Sidnut 2:25½, and grandam of Janice 2:08½, by Nutwood, third dam Centennial Bell (grandam of Clipper 2:06) by Woodburn, fourth dam the famous old mare Bonnie Bell by Williamson's Belmont. He is to be sold at the Meek Estate sale next Thursday evening.

The Pleasanton Racing Association has decided to add another race to the program of the meeting to begin July 27th and has offered a \$500 purse for 2:16 class trotters. The Pleasanton association proposes to have the best race meeting ever held in Alameda county if liberal purses and hard work will secure the result. July 15th is the date for closing entries to this race and there should be a big list.

A race for gentlemen's road horses has been arranged for July 4th at Kenilworth Park, Petaluma, as a side attraction for the Fourth of July celebration. The races will be governed by association rules, best three heats in five. Following are the entries for the race: Dr. Al McLaughlin's gray horse Kelley, Dr. J. T. O'Brien's bay horse Typewriter, William Slattery's sorrel mare Becky, Will Conley's sorrel gelding Dr. O.

Officer Van Keuren of the police force of this city has had a stroke of bad luck. His fast mare Mattie B. 2:15½ by Alexander Button was bred to McKinney in 1902, but failed to get in foal. Last year, McKinney having been sold and sent East, he sent her to Searchlight, and on Friday morning last she foaled a very handsome large and lively colt that Mr. Van Keuren was confident would have a little more speed than any other colt foaled this year in California. He went out near the Trocadero where the mare was on pasture, to look at the colt, which was a fine healthy fellow and a natural pacer. While standing admiring the youngster, a gelding that was among the other horses in the field suddenly rushed at the colt, hit him severely over the loins, and before he could be driven off had knocked the colt down and badly bruised him. Everything was done to save the little fellow but he died that evening.

Should Tom Axworthy 2:26½ the young horse in Millard Sanders string win a heat in 2:10 this year, which he is confidently expected to do, his dam Nell, will be the first mare to produce four 2:10 performers. Nell is now the dam of three in 2:10 and five others that have standard records, making her the dam of eight in all. Her list comprises the following: Belle Vara 2:08½, Susie T., pacer. 2:09½, Vassar, pacing record 2:07, trotting record 2:22½. Amhidexter 2:11½, Lighthall 2:25½, Georgette 2:27, Nell Worthing 2:22 and Tom Axworthy 2:26½. Nell's son Lighthall is the sire of Spraguelight 2:20½, and her daughters have produced Gray Gem 2:09½, Lissa B. 2:13½ and Lady Carlisle 2:15½. Nell is a roan mare by Estill Eric, son of Erison, her dam Skipper by the running bred Embury Horse (by Embury's Lexington out of a mare by Davy Crockett) and her second dam a daughter of imported Monarch, thoroughbred.

A great match race was pulled off at Salt Lake City half mile track on June 10th for a side bet of \$900 and gate receipts, between Angie Duryea by Patchen Wilkes owned by Dr. Humelbaugh and Crabapple by Coxcomb owned by C. J. Crabtree. Angie Duryea won first heat in 2:21½. Crabapple won second, third and fourth in 2:15½, 2:22 and 2:24½ respectively. The judges were Hal Brown, Ezra Thompson and Frank Wilson. Both horses will be seen on the North Pacific Circuit this fall.

Silver Ore, the green horse that our Cleveland (O.) correspondent states has trotted a mile in 2:13½, and a half in 1:03½ this spring is by Normareer, a full brother of the successful sire Norval (2:14½), by Electioneer. The dam of Normareer was Norma, by Alexander's Norman 25; second dam by Sir Wallace, son of Sumpter, by Sir Archy, and third dam, Eagletta, a thoroughbred daughter of the renowned four-mile race horse Grey Eagle, by Woodpecker, son of Bertrand, by Sir Archy.—*American Horse Breeder*.

H. C. Hewitt of Haldsburg reports the arrival at his place of a foal that he thinks is about the most perfect thing in the horse line he has ever seen. It is a filly by Seymour Wilkes 2:08½, dam Bonnie by Ferndale, son of Anteeo. Mr. Hewitt has named the filly Alice B., and says that for blood like looks, bone and size she is one of the best he ever saw. He has substituted her in the Breeders Futurity for the foals of his Maud H., which were twins and foaled dead. He says "if Alice B. does not win the futurity she will be close up."

Saraway, the full brother to Chas. Derby that is owned over in Colorado, is rapidly coming to the front as a sire of speed. He has three representatives on the Colorado circuit in Winfield Straiton 2:06½, Glideaway 2:15½ and Lord Gilbert. The two last named are full brothers. Glideaway was raced a little on this coast a few years ago, and while quite fast was never able to win a heat. He is a much improved horse now, and his mile in 2:15½ over the Trinidad half mile track, makes him the fastest green pacer of the year thus far. He is entered in the Chamber of Commerce at Detroit.

Frederick Watson says: "The receipt of a score card, or, more correctly speaking, a list of the entries, of one of the meetings at Donnerstag, Hungary, shows that the Europeans are far ahead of ourselves in this department of conducting trotting meetings. The list of entries states the time each race will be started, gives a complete list of the records of all the starters in alphabetical order, and a concise summary of their past performances, showing where they started, what horses they defeated, etc., and much more such information as must prove very useful to the patrons of the track in estimating the chances of the various starters."

The Denver *Field and Farm* does not have a very high opinion of the meeting now being held at the Overland Park track in that city, judging by the following which appeared in last Saturday's issue of that journal: "The Denver races will open to-day for two week's meeting and horsemen are wondering how the hungry maw of the patrons can be appeased for fourteen days with a little bunch of the same old horses. The bookmakers are to run the meeting as usual and the public is to be milked for its dough in the same old style. It does seem strange that a great modern city like Denver can not have honest racing creditable to it. The Overland meetings have become so rank and disreputable that our Colorado people who used to come in droves are now keeping away as a matter of self-protection."

Several grandly bred young horses owned by Dr. Farnum of this city are being broken and made ready for sale by Trainer Cain at Tanforan. Among them is a two-year-old by Nutwood Wilkes, dam by Cornelius, son of Nutwood, second dam sister to Ruth Ryan by Lodi. This colt is a good looking large colt, nearly sixteen hands high and a nice gaited trotter. There is a two-year-old colt by Sidney Dillon, dam Guyeera by Guy Wilkes, second dam Biscari (dam of five in the list) by Director, third dam Bicara (dam of 6) by Harold, etc. This is doubtless one of the best bred entire sons of Sidney Dillon ever bred and he looks very much like his sire. He is just nicely broke and should make a trotter. Another that Mr. Cain is handling is a three-year-old by Cupid 2:18 that would make a show horse. He is not large but a powerfully muscled and round made youngster that has lots of style. A Diablo two-year-old is also a good looking young trotter of much promise. None of these horses will be trained for the track but are being broke for sale. They are sound, well bred and in fine order.

The Santa Ana *Evening Blade* of June 13th says: "The report that George W. Ford, owner of the local race track, had decided to abandon the race track and close it up permanently has moved local admirers of the best driving horses to make an effort to keep the track open as a driving park and to that end the organization of a driving club has been agitated, by which means it is believed the matter may be successfully accomplished. A meeting was called and an attempt made to interest a sufficient number of local people to enable organization to be effected. So far as the question has been discussed, it seems to be the idea that a driving club with a membership of say one hundred persons who will be required to subscribe five dollars each, which sum will entitle them to the privileges of the track as a driving park, is all that is necessary, the amount so subscribed to pay the owner of the track for keeping it in condition for use at all times. Of this required number of subscribers, 85 signed the list and it is expected that the remainder will be forthcoming when the matter has been fully exploited and the plan explained."

Heard at Pleasanton.

"Why, hello, Bill! Where did you come from?"

"Just came over from San Jose."

"Many horses over there?"

"Yes, there's quite a few."

"Any good ones?"

"Well, there's two or three you'll hear from."

"What are they?"

"Jack Groom's got one you'll read about. His name is Walter Wilkes. He's by Sable Wilkes, dam by Patchen Vernon, and I'll tell you that he looks to me like the real article. He's a trotter and a green one. Can step a 2:00 gait for a ways. Don't know how far he can go, but he's surely a fast horse. Hasn't been a mile better than 2:17, but that was easy. I heard Budd Dohle say he liked him awful well, and you know they must look pretty good to please that expert veteran."

"Jack Nippen has got another good one. He's a Wilkes, too—by Prince Airlie, son of Guy Wilkes, dam by Fallis 2:23. He's been a mile in 2:14, last quarter in :32. Barring accident, he's a 2:10 trotter. He's good headed, never makes any mistakes, and certainly acts like he'd race. His name is Millbrae. He's named after that milk town over in San Mateo county. His owner, P. H. McEvoy, is one of the supervisors over there. He names his horses after the different towns in his county. He's got another by the same sire that he calls Portolo, which he always thought would make a better horse than Millbrae, but he didn't."

"Say, there is a great pacer over there—that mare of Barstow's, Alone 2:09. You heard of her?"

"Yes, I've heard about her; she's a fast mare, ain't she?"

"Fast! Well, I should say she's fast. Now, I'm going to tell you something. She's got the most appropriate name any trotter or pacer ever had."

"How's that?"

"Why, because she'll be all alone—away out in front all by herself."

"Oh, you think she can win the 2:10 class, do you?"

"It's a cinch! There'll be nothing to it but Alone. You know this mare has age now. She is six years old, big and strong. She ain't the lanky filly that she was two years ago when she got her record. She'd stop a little then, but she's a different mare now. She's matured, and nobody's horse is getting a better preparation. You know she's got the speed. Went a half better than a minute last year, and a quarter in :27. She's getting lots of show miles to leg her up, and I would like to see the pacer in California that can beat her when the bell rings."

"Say, how's Durfee's colt, Almaden?"

"Oh, he's been working miles 'round 2:20 and a little better, but I don't like him real well. He don't go as good gaited as he did last year; but he may get aquared away, and if he does he'll win those stakes, and that would please Durfee more than anything that could happen."

"Do you see that colt there that Charlie Spencer is driving? He is by Prince Ansel, out of the dam of Aristo, and, in my opinion, he'll beat Almaden just as Aristo beat Cuate, two years ago—mark what I tell you. He's as good gaited as his sire, you know what a colt trotter he was. This fellow is as tough as whalebone and the farther he goes the faster he can go."

"But what about that two-year-old colt that Cecil's got over there, full brother to John A. McKerron? They tell me he is a pacer."

"You bet, he's a pacer, and a good one, the best looker you ever saw; very much like his brother in color, conformation and every way except that he paces. He can step a mile right close to 2:20 now."

"Hello! what's that Sam Gamble's got there? A pacer, sure as your alive. I never expected to live to see Sam ride behind a pacer; thought he didn't like them."

"Oh! yes, he likes them, if he's got 'em, and they are by Stam B. This is a nice mare, a sweet gaited one, will make a fast pacer and a reputation for her. A good pacer is a credit to any sire, but there are only a few good ones. There are lots of pacers, things they call pacers, but I mean real pacers, that don't have to have their legs tied together and don't wear all the boots in the catalogue; that don't have all the devices in the way of bits and checks, etc., that were ever invented to make them controllable and prevent them from doing everything but pace. There has been within the last year and are now a good many so-called pacers working on this track, but of all that number, you can count on the fingers of one hand the real, genuine sidewheelers that appear to possess the qualifications of a first-class pacing horse. There is one here at present that I want to go on record as predicting that he will become, in the course of time, if he is fortunate enough to fall into good hands, a great race horse possessing, in a very high degree, all the qualities necessary to get the money

with. He is a four-year-old gelding, bred in the purple and been overlooked by the "talent" simply because he has not been "kicked" and driven for the "rail birds."

"While he has not been asked to show as much speed as many others have shown, his development has been of the right kind, gradual. His muscles and strength have been developed with his speed and he has never been asked to do more than he was ready to do with perfect safety. The colt I refer to was owned and developed so far by Barney Simpson; was broken last December and recently worked a mile in 2:16, as yet has never stepped a quarter better than 0:31, but he can. He was sired by Don Derby 2:04, dam Cyrene 2:27 by Guide 2:16, son of Director 2:17, second dam Alice R. (dam of 3) by Nubuc, third dam by Geo. M. Patchen Jr. In size and individuality he is all that could be desired for a race horse. A strong hearty fellow that is always ready for his dinner or his work, with the very best of feet and legs; a perfectly balanced head, wears only the lightest of gr. hoots for protection, 6 oz. shoe in front and 4 behind. His action is the poetry of motion. Don't lose sight of him, he'll be heard from some day. We understand that he has been sold but that Barney will continue to work him."

"Isn't that Forest W. McDonald's driving?"

"Yes, that's him, but Mc says he's no good. It's just about a month before the races begin and Mc has started in to make everybody believe that that old horse hasn't a chance. He wants to get about ten to one against him, if he can, for he really believes that he can win and he wants to make a good clean up at the first meeting, but you don't want to pay any attention to what he says, but play all your spare change on Forest W."

"What about the 'Farmer's' mare Hattie Croner?"

"Well, I'll tell you. She'll be there or thereabouts when that 2:25 pace is decided, and you can get good betting on her, too. There'll be a lot of fast horses start in that race, and it will be the best setting race of the meeting. That mare has been a quarter in 0:29, and she's getting faster and better gaited all the time, but there are others. Harold D. has been a half in 1:02, Miss Idaho a half in 1:02, Tammany stepped same distance in 1:03 and Dr. W. in 1:04 the first time they were worked since their arrival, and I think they can both go a half close to a minute. Then there's The Mrs. that worked around 2:10 two years ago and more than a dozen others that we have seen and heard of going miles better than 2:15. Oh! that will be a hot race and the man that can pick the winner can get a lot of easy money."

"There's a horse I never saw before, or the man either. Newcomers, ain't they?"

"Yes, that's Lawrence Daniels and Edwin S. 2:14; and let me tell you that's a pacing horse. He's one of the real things. Salisbury would have liked to have taken that fellow over East, but he couldn't get him. Mr. Daniels brought another pacer with him called Dr. J. He's green and wears the straps, but they say he can step pretty well. He's in the 2:25 class."

THE LISTENER

Thrush as a Dirt Disease.

Thrush has been characterized as a dirt disease, and is, therefore, preventable, and should be unknown in any well regulated stable. Mr. J. A. W. Dollar says: "If thrush in itself is not of much importance, it often leads to much more serious conditions. It weakens the framework of the hoof, and in flat feet favors the advent of contraction. It may interfere with the animal's use, and even when not actually producing lameness, it causes the stride to be shortened and diminishes freedom of movement. When affecting one side of the frog, it is apt to lead to unilateral contraction and obliquity of the hoof. In addition it has been held responsible for the production of corns, sandcracks, and even canker."

"By using the knife in conjunction with astringent dressings, thrush can be cured, i. e., the offensive discharge can be stopped; but, as compared with the sound, well-developed organ which results from proper shoeing, the small, dry, shriveled frog thus produced is most unsatisfactory. Thrush can only be regarded as cured when the discharge has ceased and the frog is once more dry and well developed. This not to be obtained by the application of chemicals; regular exercise and the intermittent pressure it causes can alone produce sound horn."

A Banker's Testimony.

Mr. W. G. Cottrell, prominent banker at Clarence, Iowa, writes: "I have used your Quina's Ointment for several years for various kinds of blemishes on my colts and horses, and always with good results. It is the best of anything I have ever used." For curbs, splints, spavins, windpuffs and all blemishes, try Quina's Ointment. Price one dollar per bottle, delivered. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain it from druggists.

Answers to Correspondents.

SUBSCRIBER, Readley—Will you please give breeding of dam of Sue 2:12 by Athadon. Where did Sue obtain her record and what horses did she go against?

Ans.—Sue's dam was Gypsy by Scallions Hambletonian, grandam Dora by Jack the Barber. Her record was made at Davenport, Iowa, July 9th, 1901. She won the race in straight heats. The other starters were John Auduhon, Ed Hooker, Porto Rico, Anselita, Meta Arthur, Tom Lilly and Annie Ripley. The time was 2:13, 2:12, 2:14.

ROBERT HORNER, Paaulo, H. I.—Will you kindly give the breeding of the following standard bred animals in your paper: Chestnut mare Alhertine, Hawthorne 10935, Daniel Lamhart, La Roche 10934, Arphay Bell, Elmo.

Ans.—We do not find the mare Alhertine registered. Hawthorne is by Nutwood 600, dam Fidelia by Volunteer 55, grandam by Roe's Abdallah Chief. Daniel Lambert 102 was by Ethan Allen 43, dam Fanny Cook by Abdallah 1, grandam by Stockholm's American Star. La Roche 10934 is by Hambletonian 725, dam Revere said to be by imported Glencoe. Do not find any record of a horse named Arphay Bell. There are two stallions registered as Elmo. Elmo 891 was by Mohawk 604, dam untraced. Elmo 8074, was by St. Elmo 8073, dam by Tiger. Elmo 891 was the sire of Alfred S. 2:16, Overman 2:19 and others.

READER, Selma—What is the record of Bay Wilkesa by Mambrino Wilkes?

Ans.—Bay Wilkes son of Mambrino Wilkes out of a mare by Frank Hunter, has a trotting record of 2:16, made at Tulare in 1893 in a race in which he defeated Consolation and Strathway.

Cleveland Track Notes.

[American Sportsman, June 16]

The trotting mare Robizola 2:12 by Robin stepped a mile, Tuesday, for Millard Sanders in 2:11.

Millard Sanders believes that Anzella 2:06 will stand the preparation. On Tuesday he worked her two miles, each around 2:25.

Mary Gage 2:16 by Oro Wilkes 2:11 worked a mile, Tuesday, for Ben Kenney in 2:16, with the last half in 1:05, and a quarter in 31 seconds.

The pacer Allendale, that came over from California with the trotter George G. 2:12 by Falrose. He is owned by Ed Mills and will be raced.

Charley Mac 2:07 is taking to his work Mr. H. K. Devereux is giving him under the saddle. Mr. Devereux has stepped him a mile in 2:22, with the last half in 1:09.

The horses in W. L. Snow's stable are working good. The Roman 2:09 and Topsey 2:09 have not been asked to step as fast as their records, but are in shape to do so. The other members of the stable are getting miles down toward the 2:10 mark.

The horses in training at the Forest City Farm are working good. Bert Shank likes Italia and believes that she will be ready for her first engagement—the M. & M. Several green trotters are showing up that will be heard from later. Norris 2:10 and Casplan 2:07 are in good form.

R. C. Hopkins started the pacing mare Monica 2:15 by McKinney 2:11 at the matinees Saturday. She was third, and the way she came the last half made her look as if she would be a useful mare for Mr. Hopkins in this season's matinees. She is an exceptionally well bred mare, her dam being Maggie Thorne by Director, grandam Maggie S. by Hawthorne 10935. She should make a great broodmare when her racing days are over. Mr. Hopkins bought her at the last Fasig-Tipton sale.

After two slow miles, Tuesday morning, Millard Sanders worked Lou Dillon a fast mile in 2:06. The last half was stepped in 1:01, with the last eighth done a little better than 11 seconds. To those who saw the mile it was plain that fast as the champion trotter was last year she would this year be still faster. It might sound like buncombe to say that a trotter who trotted a mile last year in 1:58 was much faster this year than last, but there is not a man at the track who saw the performance Tuesday morning that does not believe that Lou Dillon will lower her record this year.

[The eighth in 11 seconds credited to Lou Dillon in the above item is doubtless a typographical error; 14 seconds is nearer correct. Ed. B. & S.]

A futurity stake for a race to take place in the summer of 1906 between ponies by the stallions Silver Dick and Fuslade was arranged recently by their owners, Walter Hobart and Francis Carolan. There has always been a great deal of rivalry between Carolan and Hobart over their speedy little racers, and as a result of this the stake has been arranged. The match has been left open for Rudolph Spreckels, president of the California Polo and Pony Racing Association, to make a nomination if he so desires.

ROD, GUN AND KENNEL.

Conducted by J. K. De WITT.

W. K. L. Constitution and Rules.

At a meeting of the Western Kennel League held at San Jose, June 16th, the constitution and rules of the league as given below were adopted. The constitution and rules published in this journal on May 21st, while in the main correct, have been changed in some material respects, we now publish the same complete and as officially promulgated.

In many respects the same is similar to those of the A. K. C. Membership in the league is open to the clubs of the United States or British America, the same territorial extent covered by the A. K. C. Fifteen clubs are now members of the league—represented by two delegates from each kennel club and one from any specialty club—this arrangement may become cumbersome in the course of time.

The machinery of the executive board seems to be adequate and arranged for speedy and satisfactory disposition of matters coming before it.

Section four article six is a new section. Here the gauntlet is thrown down and exhibitors within a certain specified zone are specifically told to come in or stay out. This section, in the interest of general dogdom of the Coast, we believe is not good policy. It is open to criticism from many standpoints. It probably was incorporated in the constitution on the assumption that a majority of Coast exhibitors were W. K. L. adherents and that the fanciers who patronized both A. K. C. and W. K. L. shows would be whipped into line or compelled to stay with the minority.

In section 5 of rule 12 a clause has been eliminated that makes a championship easier. The matter cut out was "Where winners class is not divided by sex there must be at least eight dogs of the breed entered; where the class is divided by sex there must be at least five dogs of each sex entered." Five firsts in winners makes a champion of record. Taking into consideration some of the wins awarded on the last circuit and the lack of competition, it looks easy now under the protective mantle of section 4, article 6, to raise an immense crop of champions on the Coast—all home raised.

CONSTITUTION.

Article I—Name—The name of this organization shall be the Western Kennel League.

Article II—Objects and Powers—Section 1. Its objects shall be to form a more perfect union between kennel clubs and fanciers; promote harmony of interest; establish a uniform code of rules for the government of clubs holding dog shows or field trials, and the awarding of prizes, as in its judgment is best adapted to the conditions; adopt standards for judging the various breeds of dogs, promote the general interests of the fancy, and compel, so far as in its power lies, fair and honest treatment in all transactions connected with dogs, dog shows and field trials.

Sec. 2. Its powers are derived from the consent of the governed as delegated to it by the clubs composing its membership, and it shall only exercise such powers as are expressly given by the adoption of this constitution, or by such amendments as shall be made at a regular meeting of the league.

Article III—Membership—Section 1. All regularly organized bench show or specialty clubs or associations in the United States or British American provinces which have held dog shows or field trials, or are formed for the purpose of holding dog shows or field trials, or for the improvement of any breed of dogs, shall be eligible to membership in the league.

Sec. 2. Each show-giving club shall be represented by two delegates, and each specialty club by one delegate, to be chosen annually.

Sec. 3. The annual dues of clubs shall be ten dollars (\$10), payable on or before January 1 of each year. Any club failing to pay such dues within the specified time shall forfeit all right to representation in the Western Kennel League, and such club may be suspended or dropped from the roll.

Sec. 4. The Western Kennel League shall have the right to make one assessment during the year, not to exceed ten dollars.

Sec. 5. Each club holding membership in the Western Kennel League is entitled to hold one show during the year, for which current dues and assessments have been paid. For any additional shows an additional fee of ten dollars each shall be paid; the same shall accompany the application of the club to the Western Kennel League for reservation of dates.

Sec. 6. Applications of clubs for membership in the Western Kennel League shall be made in writing to the Secretary of the Western Kennel League, accompanied by the applicant's constitution and by laws and a list of officers and a full year's dues. An election by ballot shall be held at the next meeting of the Western Kennel League, or the executive board, provided the said application shall have been filed with the secretary of the league at least ten days previous to said meeting.

Article IV—Jurisdiction—The jurisdiction of this league shall be all territory in the United States and British America.

Article V—Officers—Section 1. The officers of the league shall be a president, a vice-president, a vice-president in each state or territory, and two in British Columbia, and a secretary-treasurer. The officers shall be elected at the annual meeting of the league,

and shall hold office for one year, or until their successors are elected. The president, state vice-president and secretary-treasurer, together with one delegate from each club member, shall constitute the executive board.

Sec. 2. It shall be the duty of the president to preside at all meetings of the league and of the executive board, enforce a strict compliance with the constitution and rules of the league, direct the secretary to call meetings of the executive board, when, in his judgment, the affairs of the league demand it, or upon the written application of three clubs.

Sec. 3. It shall be the duty of the vice-president to perform any and all the acts within the power of the president in case of his absence or disability. The vice-presidents shall hold rank in accordance with the seniority of the organization of their respective clubs.

Sec. 4. Any vice president or member of the executive board unable to attend the meetings of the board or the league shall have the power to appoint a proxy to represent him, and such proxy shall exercise all the powers of his principal, but no one person shall represent more than one club.

Sec. 5. It shall be the duty of the secretary-treasurer to keep a true and correct account of all the proceedings of the league and of the executive board; grant dates for shows or field trials to clubs applying for the same, which have complied with the requirements of Article III of these rules, when not in conflict with dates already claimed; keep a record of all the awards made at shows held under the league rules; collect all money due the league and disburse the same only as directed by the finance committee; serve all notices directed by the president and attend to all the correspondence of the league.

The office of secretary-treasurer shall not carry with it any salary, but expenses incurred by this officer in the discharge of his duties shall be borne by the league.

Sec. 6. It shall be the duty of the executive board to meet at the call of the president, and during the recess of the league to sit as a court of review on all cases which would otherwise come before the league, and in such cases its acts shall be binding until reversed by the league. It shall have power to settle all disputes between clubs, admit new members and perform all other acts which the league could perform in session, except to alter or amend the constitution. It shall make a report to the league at the annual meeting of all acts performed during the year, and submit the proofs and evidence on which its findings were made. A majority of the board shall constitute a quorum, but if no more than a quorum be present, then a two-thirds vote shall be necessary to decide any question involving the rights of any club or individual.

Sec. 7. A finance committee of three members shall be appointed by the president. The finance committee shall audit all bills and order the treasurer to pay same upon vouchers issued by it.

Sec. 8. Roberts' Rules of Order shall govern all meetings of the Western Kennel League.

Article VI—Violations, Trials and Penalties—Section 1. Charges for any violations of the rules of the league for issuing false pedigrees, or other reprehensible conduct in connection with transactions in dogs or dog shows or field trials, must be brought before the subordinate club nearest to where the offense was committed. Upon the receipt of said charges the president of said club shall appoint five members, in no way connected with the offense, to investigate the case and report to the club the facts and the evidence submitted, and the club, upon the receipt thereof, shall determine the penalty, if any, to be inflicted, and shall within five days thereafter forward to the secretary of the league a true copy of such findings, together with the evidence submitted, and the league, or, during its recess, the executive board, shall review the same, together with any new evidence which may be presented, and either confirm or reverse such findings.

Sec. 2. Should the offense be one against the club and affecting that club only, then its decision shall be final so far as it and its shows or field trials are concerned; but it may forward the evidence upon which its decision was based and ask the league to make the penalty general in its application.

Sec. 3. In case any dispute shall arise between clubs, then each club a party thereto shall, upon the application of either, appoint three members to act as arbitrators, and should they fail to arrive at a settlement of their difficulties to the satisfaction of both, then the same committee shall take evidence pro and con and submit it to the league for final action.

Sec. 4. Any exhibitor showing at shows held west of the 110th deg. of west longitude under rules other than those of the W. K. L. shall be barred from making any entries at or taking any part in W. K. L. shows.

Article VII—Meetings—There shall be at least one meeting held each year, and such meeting shall be held during the show of some one of the member clubs, the selection to be made by a majority of the delegates present at the last previous meeting. At the time this selection is made an alternate place shall be selected, and in case the club at the place first selected should fail to hold a show, then the meeting shall be held at the alternate place.

Article VIII—Quorum—A majority of the delegates of all clubs shall constitute a quorum for the transaction of all business of the league.

Article IX—Amendments—This constitution can be amended only at an annual meeting of the league or at a special meeting called for that purpose and by

a two-thirds vote of all accredited delegates.

Article X—Rules Governing Clubs and Shows—Section 1. Every club or association, a member of the Western Kennel League, shall be the arbitrator of its own internal affairs, and shall have power to suspend or expel its members, or disqualify any person from exhibiting at its shows subject to appeal to the Western Kennel League. It shall have the right to hold shows under the rules of this league, offer such prizes as it sees fit and preform any other act not in conflict with the constitution of the league, or the powers it has delegated to the league by becoming a member thereof.

Sec. 2. Every club or association, a member of this league, shall hold its shows under the following rules, which it shall publish in its premium list:

SHOW RULES.

Rule 1. Every dog must be the bona fide property of the person or kennel making such entry on the day of the closing of entries, and the entry form must contain his or her name, or the name or names of the owner or owners of the kennel. The entry must clearly identify the dog to be exhibited by name, and if known, the date of birth, name of sire and dam, and the name of its breeder. Should any of these particulars be unknown to the exhibitor, it must be stated on the entry blank. If the dog is registered in the Field Dog Stud Book the number must be given. No entry can be accepted of a puppy, in the puppy class, whose age, sire or dam is unknown.

Rule 2. If the name of the dog which has won a prize be changed the old name must be given on the entry blank as well as the new name and inserted in the catalogue until such time as it wins a prize under its new name.

Rule 3. All dogs eligible for registration must be registered in the Field Dog Stud Book, or listed with the secretary of the Western Kennel League. The listing fee shall be an annual one of ten dollars. The clubs are hereby authorized to act as agents of the league in collecting such fee; but it should be distinctly understood that clubs shall be held responsible to the league for the listing fees of all dogs at their shows which are not already registered in the Field Dog Stud Book or listed with the secretary of the Western Kennel League. As duplication of the listing fee is not permissible, exhibitors of dogs listed with the secretary of a show must be informed by the secretary of their dog being listed by said secretary in a name already in use, the name of their dog must be changed after the show, or circuit of shows, by application to the secretary of the league.

Rule 4. The breeder of a dog is the person owning or leasing the bitch at the time of her being bred.

Rule 5. Bench show committees shall decline any entries they see fit, or may remove from the show any dog on account of disease, vice or any other good cause.

Rule 6. A castrated dog or spayed bitch shall be disqualified. Total blindness, deafness or lameness shall disqualify. If the judge or veterinary surgeon is satisfied that the deafness or lameness is temporary, the dog shall be allowed to compete. A deaf dog is defined as one that cannot hear the ordinary words of command.

Rule 7. A dog suffering from a contagious or objectionable disease shall be disqualified, and shall at once be removed from the building. The regularly employed veterinary surgeon shall alone decide as to the condition of the dog, and his decision shall be given in writing.

Rule 8. A judge may disqualify a dog which, in his opinion, has been improperly tampered with, subject to the decision of the veterinary surgeon. Should the judge's disqualification be not sustained by the veterinary surgeon, the class must be rejudged.

A judge, upon the complaint of anyone actually engaged in handling or judging, or during the judging of a class, may if in his opinion the complaint is warranted, order from the ring any person guilty of intentional or deliberate interference with any dog therein competing. Any person so ordered from the ring shall be prohibited from further handling or showing in any class during the continuance of said show.

Rule 9. Discretionary power is given the judge of each class to withhold any or all prizes for want of merit, and appeals can only be entertained where misrepresentation or breach of the rules is alleged. The judge's decision shall be final in all cases affecting the merits of the dogs.

Rule 10. Should an appointed judge be unable to fill his engagement the bench show committee shall have the right to fill the vacancy.

Rule 11. In any class where there is a limit of weight, a dog entered in such class may at any time after the opening of the show, and before the judging, be weighed, and the weight of the dog shall be registered and held good at the time of judging. Any competing handler or exhibitor shall have the right to demand the weighing or measuring of any dog during the judging of the class, other than those whose weight has been officially registered. Any subsequent protest must be made in the formal manner provided for in these rules.

Rule 12. Regular classes: 1. The puppy class shall be for all dogs over six months and under twelve months of age, and no entry can be made of one under six months, or whose date of birth, breeder, sire and dam is unknown.

2. No prize class for dogs never having won a first prize in any W. K. L. show, puppy class excepted.

3. The limit class shall be for all dogs never having won four first prizes in the limit or open classes under W. K. L. rules.

4. The open class shall be for all dogs of any age over six months. No prize winner shall be debarrd from competing. A dog which has gained the title of champion under any rules can be shown in open class only.

5. The winners class shall be open only to winners of first prize in any class in the show, giving at least three of the before-mentioned classes one of which must be the open class. The winner of five wins in this class will thereby become a champion of record, will be recorded in the Western Kennel League record of winners and will be entitled to a Western Kennel League championship medal. The judge may withhold the award of first in this class should he be of the opinion that there is no dog of sufficient merit to justify the award. Before awarding "Reserve" in this class, the dog, or dogs, having been placed second to the winner in any of the regular classes must be brought before the judge for competition with the remaining dogs in said winners class. No class winner can be withdrawn or withheld from competition in the winners class, and no entry fee shall be charged for said competition in this class. The winners class can be divided by sex, provided that the required classes announced in the premium list are also divided by sex.

6. The miscellaneous class shall be open to all dogs of established breeds for which no regular class has been provided in the premium list; entries in this class must specify the breed of the exhibit. Failure to comply with this condition shall disqualify the dog and cancel the award.

Rule 13. Should a dog win a prize subsequent to the entry at a show, he shall be eligible to compete when the entry was made, and during the show for which he has been entered, the committee shall transfer him to his right class and have him judged therein.

Rule 14. When a dog has been entered in the wrong class, either on account of weight limit or other cause, the committee, if satisfied that no fraud was intended, shall transfer him to be judged in the class in which he properly belongs.

Rule 15. Should a dog be disqualified, the next dog, as placed by the judge, shall be moved up to his place; provided that no dog be moved into any place where the prize has been withheld by the judge.

Rule 16. Equal first or equal second shall not be given, but the judge may divide third between two dogs, in which case the win shall count as third for each dog.

Rule 17. Any dog entered for competition and received at the show building must compete in all classes in which he is entered, and failing to do so, shall be subject to a fine by the Western Kennel League equal to the entrance fee for each class. No dog eligible for special prizes can be withdrawn from competition unless it has been stated on the entry blank, "Will not compete for special prizes." No special prizes can be accepted or offered by a show committee after the advertised date of the closing of entries.

Rule 18. The age of a dog shall be computed up to the day preceding the opening of the show.

Rule 19. Any exhibitor or his or her representative may file an objection to any dog in writing, stating the reasons therefor, at any time prior to the close of the show, and depositing with the secretary of the show the sum of five dollars, which shall be forfeited to the Western Kennel League if the decision is against him, in which case the bench show committee shall meet at once and decide the matter, and from its decision there shall be no appeal.

Rule 20. A person or club guilty of misconduct of any kind in connection with dogs, dog shows or field trials may be suspended by the president of the Western Kennel League, or, in his absence, by the vice-president, or by the committee of the show or field trial club, where the offense was committed. The disqualification or suspension of an owner shall apply to all dogs owned by him.

Rule 21. Should a prize winner be disqualified the next dog es placed by the judge shall be moved up to his place; provided, that no dog shall be moved into any place where the prize has been withheld by the judge.

Rule 22. The handler of a dog, or person whose name appears on the entry blank as the handler, shall be considered as the agent of the owner in all transactions, unless the club is otherwise notified.

Rule 23. Entries shall close not less than seven days before the opening of the show.

Rule 24. Dog show committees may provide such classes for dogs of recognized breeds as they choose, provided that such classes do not conflict with the conditions of the foregoing classes.

Rule 25. The secretary of the Western Kennel League must, after careful investigation, cancel all wins when satisfied that these rules have been violated by an exhibitor, in the following cases: When the entry has been made after the advertised date of closing entries; when a dog has been entered in the name of the agent only; when a puppy is entered being under the age of six months; when a dog is entered in the novice class, having previously won a first prize; puppy was excepted; when a dog is entered in the limit class, having previously won four or more prizes in such class; when a dog is entered in the miscellaneous class and the breed is not specified or recognized; when a dog by authority of its owner, is led into the judgment ring by, or in charge of, a person not in good standing; when a dog is entered by an owner or his agent, if either is not in good standing; when the dog is not of recognized breed.

Rule 26. Two advance proofs or copies of the premium list must be sent to the secretary of the Western Kennel League for approval and his certificate of same must be printed immediately preceding the rules governing dog shows, in such premium list, when issued. Failure to comply with this rule will subject the club to loss of membership.

Rule 27. The above rules must be published in all the premium lists of clubs holding shows under the Western Kennel League rules.

Rule 28. All prizes must be returned to the show officials in case a dog is disqualified by the Western Kennel League subsequent to the closing of the show.

Rule 29. The secretary of a club holding a show under these rules must furnish two catalogues of all entries in said show, showing the winners of first, second, third and reserve in all regular classes, and first and reserve in all winners classes, to the secretary of the Western Kennel League within ten days after the closing of the show. Failure to comply with this will subject the club to suspension; provided, that the club may be reinstated by application to the executive board of the Western Kennel League, who shall impose such fine as they shall see fit.

Rule 30. The word "dog," as used herein, is used in its generic sense.

DOINGS IN DOGDOM.

Mrs. Bradley-Dyne the leading Irish and Scotch Terrier breeder on the Coast in making a change of her "ad" writes us: "I have had good luck with my venture in sending my Scottie O'Brae to St. Louis for a mate. She whelped, on June 6th, six puppies (5 dogs) to Crimmon Rambler. By the death of Ch. Fighting Mac, I lost a most reliable stud dog for his progeny always bad merit. He has left behind, however, a full brother and sister to W. P. Fraser's Scottie's Jewel (second bitch puppies New York) and a grown bitch (out of Scottie O'Brae) who is getting quite close to her championship now. Scottie, incidentally, took third limit at Chicago. Dr. Ewing states some thought she should have taken second, beating his entry. Thus the first two dogs I have sent East, both on their initial appearance, went into the money. W. P. Fraser has sent me a wire haired bitch by Watchmaker out of Limefield Beauty and in whelp to Fustian. This litter should hold something very decent, if not excellent. Wires seem to be feeling their way a bit faster up here, they cannot help but be popular once they show themselves."

The Glen Tana Collie Kennels reports the following sales, viz: for the last six weeks. Two Lenzie Prince puppies to Denver, Idaho, two Rippowam Archer puppies to Victoria, B. C., one Rippowam Archer puppy to Green River Hot Springs, Wash., one Lenzie Prince puppy to Hanna, Wyo., and two Lenzie Prince puppies to Spokane parties.

Glen Tana Rainbow by Wishaw Climax, has whelped to Mr. Morgan's great dog Ormskirk Olympian, four puppies, two of each sex. This is the blood that produced Champion Ormskirk Leader.

We bred ten of our brood bitches to Glen Tana Marquis last month. Have just received the brood bitch Glen Tana Nina from Mr. H. B. Hungerford. She is in whelp to Ch. Wellesbourne Conqueror. She is by Biehlings Parbold Polygamist out of Ch. Parkhill Squire.

We regret to note that Mr. Norman J. Stewart of San Jose, is at present seriously ill at his residence in the Garden City. The many friends of the genial fancier, we are sure, will unite with us in wishing Mr. Stewart an early and complete return to health.

C. C. Lee will breed his well known English Setter bitch Laura L. to Ch. Buckwa. It was originally planned to send her up to Stylish Sergeant at Seattle, but this was found to be impracticable at the last moment.

Admirers of a sterling good English Setter will be sorry to know that Frank Maskey's Lady Rodschaff (Luke C.-Cressida) died this week, shortly after whelping. Lady Rodschaff has been a winning performer in the field and has also whelped winning field trial and bench show progeny; she was bred in the purple and passes with the regrets of the many sportsmen who knew her worth as worker to the gun, a faithful companion and a valuable brood bitch.

Theodora Gladstone (Rover D.-Queenie K.) a smart English Setter bitch, second limit, S. F. '04, has been placed with John Goloback, Crockett, Contra Costa county, where she will be one of the brood matrons in the kennels presided over by Cato Jr., first winners, S. F. 1903-4.

J. W. Riplinger will send down from Seattle two English Setter bitches to be served by John Goloback's Cato Jr. (Cato-Maggie F.). This breeding should produce something good.

Gabian Kennels, Hollister, have some high class young English Setters for sale that are just about right to begin the preliminary work for the fall shooting season.

There is an entry of 51 Airedale Terriers for the L. K. A. show at Mineola, N. Y., this week. It is claimed this will be the best Airedale exhibit ever shown in the United States. Mr. Russell H. Johnson will judge the breed at the show.

Entries for the L. K. A. show this week were 850, with 523 dogs. Long Island Kennel Club show today at Brighton Beach had 535 entries—339 dogs.

All dogs imported into the United States from England must be entered in the Kennel Club Stud Book, together with sire and dam and grandparents.

The official American Spaniel Club judges for the year ending July 15, 1905, are Messrs. Armstrong, Bloodgood, Bradbury, Farewell, Greer, Jarrett, Mortimer, Oldham, Payne and Warner.

AT THE TRAPS.

--The Union Gun Club will hold a live bird shoot at Ingleside to-morrow. Two six bird and a twelve bird race comprise the schedule of events.

The Twentieth Annual Northwestern tournament began on Thursday and will conclude to-day at Pendleton, Wash., under the auspices of the Pendleton Sportsmen's Association. The program of events is an attractive one and there is a large attendance of shooters.

The Millwood Gun Club shoot for June will take place tomorrow at Mill Valley.

The Golden Gate Gun Club shoot at Ingleside last Sunday was shot during a strong wind that prevailed all day. Notwithstanding, an excellent entry of contestants were able to find most of the targets and score correspondingly good averages. The medal winners in the first event were: Champion class, C. A. Haight and Edg. J. Forster; first class, W. J. Golcher and W. R. Murdock; second class, H. P. Jacobson and H. Klevesahl. In the second event the high guns were: Champion class, Forster, Nauman and Weh; first class, A. M. Shields; second class, H. Klevesahl. In the third race, Nauman and Forster divided first and second moneys and Haight, Weh and Feudner split third money; in the champion class, Potter and Gamble won first and second money, W. J. Golcher third, R. C. Reed fourth and Murdock, "Slade," Dr. Huxton and Ed. Donohoe fifth money in the first class. Second class purse went to Jacobson and H. Klevesahl, first two moneys; Cuner third and Knauff and Turner fourth money. The only straight made during the day was shot by W. J. Golcher in the first event. A summary of scores is given below.

Champion Class—	Medal Shoot 25 targets	\$150 Cash 25 targets	Consolation 25 targets	Sealed Condition 15 targets
Haight.....	23	21	22	14
Forster.....	23	22	23	..

Cuner.....	11	14	18	4

The Fresno tournament a week ago, as indicated by the scores, shows that there was something doing. On the first day, out of 26 entries, eighteen men shot through all the eight events. There were eight straights as follows: Varien 20, 20, 25, 25; Lovelace 20, 25; Iverson 20; Gibson 20. On the second day, out of 19 entries, 12 shooters made 14 straights: Varien 20, 20, 25, 25; Lovelace 20; Vaughan 20, 20, 25; Bradrick 20, 25; Daniels 20, 20; Sylvester 20; Iverson 25, in the 7 events shot up. The scores of 19's and 24's are too numerous to mention. W. H. Varien was high average with 315 out of 325 and has the Pacific Coast record to date. J. E. Vaughan scored 304 out of 325 and J. W. Bradrick broke 300 out of 325. Varien made the longest run, 78 straight. Two five-men squads, Varien, Lovelace, F. Stone, Blanchard, Gibson and Vaughan, Hoyt, Bradrick, Ingalsbe and Daniels in one event missed but one target, scoring 99 out of 100 in a 20 target race. The shoot was attended by shooters from Los Angeles, Merced, Hanford, San Francisco, Pacific Grove and other points. Among the San Francisco visitors were W. S. Wattles and Harry T. Hoyt, who shot through every event, for birds only.

One of the local shooters on his return from Fresno is enthusiastic in his praise of the Fresno sportsmen and citizens. He says:

"I cannot speak too highly of the rare hospitality extended the visiting as well as local shooters by the management of that club. Too much credit cannot be given to Messrs. F. Fanning, F. J. Stone, Geo. Stone, Jake Lewald, Oswald Schleuter, E. C. Ickes and Will Ellert under whose excellent management the tournament was given, and to whom the visiting contestants are greatly indebted for the many courtesies extended during their short stay. They were untiring in their efforts to make the event a success, and Fresno can boast of giving one of the cleanest and best high class tournaments ever held on this Coast. The grounds and traps were excellent and bespoke the same careful attention as was evident with everything undertaken by the management of the Fresno

Gun Club, and not one single complaint was heard.

The club was not alone in dispensing hospitality, the same desire to make the shooters' visit a memorable one was manifested by the Elks of that city, the members of which order extended a most cordial invitation to the contestants, visiting and local, to join them at a luncheon, where an excellent repast awaited the boys. Mr. Ralph Rice, the genial steward of the Elks, was the right man in the right place.

The last evening of our stay, and the close of the tournament, marked another courteous act, Mr. E. A. Doubboe, one of the most prominent merchants being our host for that time, a sumptuous dinner was followed by toasts and speeches, and the boys only regretted that they could not more plainly show their appreciation for the rare hospitality which was shown so continuously during their visit.

Mr. A. L. Holdscaw also deserves much praise for his efforts to promote the shooters' interests and insure each one a hearty welcome, and we only hope that the Fresno Gun Club will continue in this successful manner, and with the high class men now enrolled on its list, I cannot see how it can be otherwise."

The program for both days was as follows:
First day—No. 1, 20 targets, \$2 entrance, \$5 added; No. 2, 20 targets, \$2 entrance, \$7.50 added; No. 3, 20 targets, \$2 entrance, \$3 added; No. 4, 20 targets, \$2 entrance, \$8.50 added; No. 5, 20 targets, \$2 entrance, \$3 added; No. 6, 20 targets, \$2 entrance, \$3 added; No. 7, 25 targets, \$2.50 entrance, \$10 added; No. 8, 25 targets, extra event.

Second day—No. 1, 20 targets, \$2 entrance, \$5 added; No. 2, 20 targets, \$2 entrance, \$7 added; No. 3, 20 targets, \$2 entrance, \$8 added; No. 4, 25 birds, \$2.50 entrance, \$10 added; No. 5, 25 targets, \$1.75 entrance, mdse. event; No. 6, 20 targets, \$2 entrance, \$8 added; No. 7, 25 targets, \$4 entrance, \$12 added.

A summary of scores for the two days follows:

Sunday, June 19, 1904.

O. L. Stevens won the medal at the Capital City Bluecock Club shoot, last Sunday, at Sacramento. D. E. Newbert, the winner at the previous shoot fell down when he shot from the 18 yard mark. The distance handicap has prevailed against two wins of the trophy this season, so far, by any individual member. To retain the medal permanently, it must be won by the same shooter three times in one season. Stevens had a close competitor in F. R. Adams, both men had scored 22 breaks, Adams missed his last target, Stevens won the tie shoot-off. A summary of the club score, 25 targets, is the following:

O. L. Stevens 22, F. B. Adams 22, E. D. Adams 21, L. S. Upson 20, C. Cotter 18, A. Just 18, C. Palm 18, F. J. Ruhstaller 17, H. J. Vetter 16, D. E. Newbert 15, J. F. Brown 15, J. Guisto 14.

The Gridley Gun Club's second annual blue rock tournament, held at Gridley June 18 and 19, was well attended and successfully conducted throughout, the Gridley sportsmen winning many encomiums from visiting sportsmen for their hospitality. The card for the first day embraced eight events including the Kimball-Upson Company's trophy race and the Gibson Cup race, the final event for the day was a merchandise shoot (7 classes). All events were at 20 targets, class shooting, except the trophy races. Events 3 and 4 were shot together, entrance separate, birds were included in all events.

In the K-U trophy race (No. 4) G. W. Gibson, T. S. Bolt and E. Holing tied with 18 breaks each. In shooting off the tie Bolt and Holing each broke 20 straight, Gibson found hit 18. On the second shoot off Holing won with 17 against 15 breaks. J. W. Humble of Gridley was the previous holder of the cup and received two-thirds of the entrance money. Holing won the balance and will get two-thirds of the next entrance.

In the Gibson cup race (No. 7) F. M. Newbert scored 17 and won. G. W. Gibson also broke 17, but did not compete for his own donation. This race is shot at 10 pairs, the winner to hold the cup until the next tournament. Second man wins 60% and third n

40% of entrance, class shooting. There were two 14's and three 13's to figure on the purse.

The second day's shoot was programmed for nine events, including the Kimball-Upson medal race and a five men team shoot, event seven was for merchandise prizes (8 classes). All events were class shooting excepting 4 and 9. Events 3 and 4 were shot together.

The K-U medal race (No. 4) 20 targets was also won by Frank M. Newbert of Sacramento, who scored straight. O. Hellman, previous winner, received two-thirds of the entrance money. Newbert took the balance and is entitled to two-thirds of the next entrance purse.

Oroville won the five-men team championship of Northern California, 15 targets per man. The medal was wrested from the Gridley team which won it at the recent Sacramento trophy shoot.

F. M. Newbert of Sacramento was first high average, 250 out of 280; G. W. Gibson of Williams, 249 out of 280, second and J. Haugh of Gridley, 244 out of 280, third high average.

A summary of scores and events follows:

Events	1	2	3-4	5	6	7	8	140 Tgs
	20	20	20	20	20	20*	20	Total
Hellman, O. O.	17	17	16	20	16	14	19	119

Event 9 Championship of Northern California, 5 men teams—

Oroville—Derby, Johnson, Hazelbush, Damon, Roberts, 59.

Marysville—Steward, Giblin, Webber, Marshall, White, 58.

Sacramento—Newbert, Englehart, Holing, Gibson, Hellman, 57.

Chico—J. A. Johnson, Miller, Richards, Thomasson, Salisbury, 54.

Gridley—Norman, Biggs, Moore, Bolt, Haugh, 51. Red Bluff, targets only—Epperson, Lewis, Robinson, "Black Gnat," "Red Bluff," 61.

A program of shoots has been arranged by the recently organized Southwestern Washington Gun Club Association, the first shoot will take place at Elmo, July 2d. The officers are: Dr. J. A. Walkins of Kaqulam, President; D. W. Fleet of Montesano, Vice-President; A. O. St. John of Chehalis, Secretary.

The Great Western Handicap tournament will take place at Denver next month.

The program for the big merchandise shoot at Ingleside on August 28th is arranged for four classes of shooters, viz: champion, first, second and third classes. The race will be at 30 singles, distance handicap. The first 15 targets will be from the 16-yard peg, after which shooters scoring 14 and 15 breaks will go back to 20 yards, 12-13 breaks, 18 yards; 10-11 breaks, 16 yards; 9 breaks or under 14 yards. This handicap will govern shooters in each class. There will be at least 70 prizes, viz: 10 for the champion class and 20 for each of the other classes, the value and variety of the articles is such as to satisfy the most exacting contestant. The entrance will be \$1.00. It is anticipated that there will be a larger attendance of shooters than last year's showing of 109.

Bulkheads Nos. 1 and 2 will be used for the prize shoot and bulkhead No. 3 reserved for pool events. The affair will be under the management of Edg. J. Forster, this in itself is a guarantee of a successful shoot.

Frank L. Houpt, a well known local sportsman, was the hero of a courageous episode recently. Houpt is a popular member of the Empire Gun Club and attended the club shoot at Alameda Point at the last club shoot. When through shooting, Houpt and several friends left the club grounds and on their way to the railroad station, just before reaching the bridge over a slough, Houpt suddenly described a

child struggling in the swift current of the creek. Without saying a word, off went his coat and with a rush he was into the water and after the floating child, which by this time had become entirely exhausted and was nearly drowned. Houpt soon reached the little one, lifted her head from the water and turned for shore. The water was deep and the tide strong, and then began a battle for life, for encumbered with clothing and the almost inanimate body of a half drowned child made a handicap that required coolness, courage and strength to enable the brave swimmer to reach the muddy shore of the slough not more than fifty feet away. However, youth and grit prevailed and the rescue was finally accomplished. The saved child proved to be a seven-year-old girl who had accompanied her parents on a fishing trip that day. The father and mother, a younger brother and the little girl had all been fishing from the rock wall in Oakland creek. The girl had gone a short distance away from her relatives and had fallen, unseen by anyone, into the water and whilst struggling against an apparently inevitable fate, had been carried away by the rapid current of an ebb tide, out of sight and sound of her people. Houpt's lucky discovery and brave action, at the risk of his own life, saved the child just in the nick of time, for in ten or fifteen seconds more the poor little one would have been beyond human aid. Mr. Houpt's quick action and subsequent fight for the shore was observed by a number of people who rushed to the immediate vicinity of the averted tragedy and were ready to aid, but before taking action their assistance was unnecessary, so quickly did the affair transpire. Houpt was the modest center of a group composed of the frightened parents and others who were profuse in their praises of his gallant conduct. The saved child was Clara Meracle, the daughter of Mr. and Mrs. C. L. Meracle, of Oakland.

A Noted Greyhound Dead.

Rubber Anklee a famous performer on the sward and a bench show winner died from an attack of pleuro-pneumonia this week at the kennels of James Sweeney, Colma. She was the winner of the American Waterloo Cup at St. Louis last year, being nominated by Mr. J. H. Rosseter, who bred her. In 1902, she won winners and special for best in a competition of 150 Greyhounds at the S. F. K. C. show. Her quality and courage was proven in many a gruelling course and her perfect conformation to type made her a bitch out of a thousand. Her loss is particularly felt now as she was rounding into what promised to be her best form.

She was by Fortuna Favente, imported from Fawcett Brothers' kennels near Liverpool, her dam being Brilliantine (Lord Neversettle-White Lips), bred by H. C. Lowe of Kansas City.

Fish Lines.

These are the days when ancestral spirit seems to take possession of the individual and there comes a longing for the wild and rugged regions which are seldom, if ever, frequented by man. It is a desire to be with Nature and in her temples—to glide noiselessly through the forest or wildwood or to follow the course of a stream, treading cautiously along its banks, wading here and there, stopping on or at a boulder or developing the prospects of inviting ripple and pelucid pool in the keen pursuit of enjoyment and health promised with aid of rod and reel. As the spring passes and the summer months with their languid heat come in the stuffy town or cultivated valleys, it is this longing that develops into an almost insatiable desire to get away from the haunts of men and to live once again, for a time at least, the arboreal existence of our progenitors.

The estuary and tidal canal waters in Alameda are still attractive for the striped bass fishers. One day this week Al Wilson and Bob Sangster landed 17 fish. They went over to the fishing ground on the 2 o'clock boat from this city and returned at 7 P. M. The bass do not run much over 5 pounds and are taken on clam bait.

Fishing at Lake Tahoe, Webber lake and Independence lake is now in full swing. Quite a crowd of local anglers are at the resorts mentioned above. Mr. and Mrs. A. M. Cumming left for Webber lake last week.

Reports from most fishing resorts are to the effect that fly-fishing is excellent. The many streams of Sonoma, Napa and Mendocino counties are now low and clear and afford good fishing.

The flood-gates at Lake Tahoe have been closed for a week or more; this should bring on early fly-fishing in the Truckee.

The open season for huck bass will commence on Friday next, July 1st. One of the best and easiest reached black bass waters is Russian river, where good fishing can be had near Guerneville and vicinity.

The run of salmon in Monterey bay is still on. The fish taken are not very large, it is claimed, however, that the larger salmon will come in very soon. At all events, trolling for salmon at various places in the bay promises to be an alluring sport for six weeks or more.

Anglers intending to try the salmon fishing at any of the resorts, Monterey, Capitola or Santa Cruz (the fishing now is at Capitola) should take their own tackle with them. The professional boatmen advertise that they will supply tackle, bait and other things, so that the sportsman will be properly accommodated. This in many cases is a snare and a delusion—handlines with heavy sinkers—the rig used

by market fishermen or clumsy, large cane poles is the best that an angler can procure from most of the admirals of the mosquito fleet. There is one thing that many of the boatmen are not lax in, and that is in exacting as high a tariff as the traffic will bear.

Last Sunday at Capitola a number of fish were caught, the day was foggy in the forenoon and breezy in the afternoon. Among the successful local anglers at Capitola were: F. W. Kelley, Dr. Redmond Payne, Dr. Clyde Payne, A. Brown, Mr. and Mrs. Jas. Chesley, Harry Hosmer, Chas. E. Ray, J. J. Deane, John Herget, Mr. and Mrs. W. F. Bogart and others.

Trade Notes.

At the tournament of the Fresno Gun Club, Fresno, Cal., June 19th and 20th, there were 32 contestants; of this number 18 used U. M. C. ammunition. Mr. W. H. Varien of Pacific Grove, Cal., won high average with the Pacific Coast record of 315 out of a possible 325, using U. M. C. ammunition. Mr. J. E. Vaughan of Los Angeles, Cal., was second average—304 out of a possible 325, using U. M. C. ammunition. Mr. J. W. Bradrick, an Eastern crack shot and Kansas City handicap man, made third average—300 out of a possible 325, using U. M. C. ammunition. The longest run was made by Varien, 78 breaks.

A friendly match at 100 blue rocks, Sergeant System, was shot between W. H. Seaver, of this city, and A. J. Winters and M. Ahrams of Portland, Or., the 17th inst., at the grounds of the Multnomah Rod and Gun Club, Portland, Or., Mr. Seaver came out victor with the splendid score of 95 out of the 100 viz: W. H. Seaver, 24-24-24-23, total 95; A. J. Winters, 23-21-23-24, total 91; M. Ahrams, 22-23-21-23, total 89. Mr. Seaver and Mr. Winters shot Winchester "Pump" guns and Winchester "Leader" shells. Mr. Ahrams used a Parker gun and U. M. C. "Acme" shells.

The most remarkable bit of shooting recorded in a long time was that done by William Clayton at St. Joseph, Mo., on May 18th, when he won the Wyeth trophy, a prize emblematic of the world's amateur live bird championship. This shooting was remarkable because of his score of 99 birds out of a possible 100, and because he killed his first 79 straight. He used Winchester Leader shells.

A remarkable bit of shooting was done by J. H. Federhoof at one of the recent regular shoots of the Buffalo Bill Gun Club, which has its home in North Platte, Neb. Mr. Federhoof won a \$50 gold medal for a straight score of 25 targets thrown from a 70-foot tower trap. He used a Winchester repeating shotgun and Winchester Leader shells.

Fred Gilbert is certainly a wonder. At the Sioux City tournament, June 6-9, Mr. Gilbert broke 193, 197 and 194 for the three days respectively, out of a possible 200. This is shooting some. Mr. Gilbert shoots the Parker gun at all of his shoots, and says there is no other.

At Wilkesbarre, Pa., June 14-15, Mr. M. C. Dirk, using the Parker gun, won high average with 301 out of 340. At Lake Denmark, N. J., June 9th, Mr. T. W. Morley again defends the live bird state championship, with a score of 24 out of 25. This is a good showing for Mr. Morley and the Parker gun. Mr. Ed. Brady of Memphis, Tenn., shooting the Parker gun at Camden Park, June 8th and 9th, won high average with a score of 371 out of 400.

At Battle Creek, Mich., June 17th, Chas. Hantz won the Semi-Import medal of the Michigan State shoot with a score of 25 straight, shooting the Parker gun.

Wytheville, Va., June 1st and 2d, H. B. Money of Colorado Springs, Colo., first professional and general average, 333 out of 400, shooting Schultze powder. Second average, Walter Huff of Macon, Ga., 380 out of 400, shooting DuPont. First amateur average, R. L. Pierce, Wytheville, Va., 376 out of 400. Second amateur average, A. M. Hatcher, Bristol, Va., 372 out of 400. All shot Schultze.

Watertown, S. D., June 1st and 2d, Fred Gilbert, first general average, 323 out of 335, shooting DuPont. First amateur average, H. G. Taylor, 316 out of 335, shooting "E. C." Second amateur average, Russell Klein, 313 out of 335, shooting DuPont. Third amateur average, John Burnister, shooting "E. C." and E. H. Froek, shooting DuPont, 294 out of 335.

Williamsport, Pa., June 2d and 3rd, first general average, L. J. Squier, Wilmington, Del., 367 out of 380, runs of 52, 62 and 100, shooting DuPont. Second general average, J. M. Hawkins, Baltimore, Md., 366 out of 380, shooting DuPont. Third general average, Ed Rike, 364 out of 380, shooting Ladin & Rand. First amateur average, R. C. Derk, Northumberland, Pa., 354 out of 380. Second amateur average, W. C. Everett, Williamsport, Pa., 346 out of 380. Third amateur average, R. B. Johnston, Williamsport, Pa., 344 out of 380. All shot Ladin & Rand.

Richwood, Ohio, June 2d and 3d, first general average, D. A. Upson, Cleveland, Ohio, 380 out of 400, shooting DuPont. Second general average, C. D. LeCompte, Eminence, Ky., 376 out of 400, runs of 63 and 142, shooting "Infallible." Third general average, C. A. Young, Springfield, Ohio, 372 out of 400, shooting DuPont. Fourth general average, R. L. Trimble, Covington, Ky., 367 out of 400, shooting DuPont. First amateur average, D. A. Upson, Cleveland, Ohio, 380 out of 400, shooting DuPont. Second amateur average, C. A. Young, Springfield, Ohio, 372 out of 400, shooting DuPont. Third amateur average, O. P. Lenox Jr., Richwood, Ohio, 360 out of 400, shooting DuPont.

Bartherton, Ohio, Columbia Gun Club, June 4th, C. O. LeCompte, 143 out of 150, run 77 straight.

In our last report we omitted to mention that at Eaton, Ohio, June 1st, C. O. LeCompte made a run of 99 straight, unfinished, scoring 109 out of the last 110

The Growth of the Hoof.

Many horsemen will be interested in knowing just how the growth of the hoof of a horse takes place. Dr. John W. Adams contributes an interesting discussion of the point in Farmers' Bulletin No. 179, of the U. S. Department of Agriculture in his treatise on "horseshoeing." He says: All parts of the hoof grow downward and forward with equal rapidity, the rate of growth being largely dependent upon the amount of blood supplied to the pododerm, or "quick." Abundant and regular exercise, good grooming, moistness and suppleness of the hoof, going barefoot, plenty of good food, and at proper intervals removing the overgrowth of hoof and regulating the bearing surface, by increasing the volume and improving the quality of the blood flowing into the pododerm, favor the rapid growth of horn of good quality; while lack of exercise, dryness of the horn, and excessive length of the hoof hinder growth.

The average rate of growth is about one-third of an inch a month. Hind hoof grow faster than fore hoofs and unshod hoofs faster than shod ones. The time required for the horn to grow from the coronet to the ground, though influenced to a slight degree by the preited conditions, varies in proportion to the distance of the coronet from the ground. At the toe, depending on its height, the horn grows down in eleven to thirteen months, at the side wall in six to eight months, and at the heels in three to five months. We can thus estimate with tolerable accuracy the time required for the disappearance of such defects in the hoof as cracks, clefts, etc.

Irregular growth is not infrequent. The almost invariable case of this is an improper distribution of the body weight over the hoof—that is, an unbalanced hoof. Colts running in soft pasture or confined for long periods in the stable are frequently allowed to grow hoofs of excessive length. The long toe becomes "dished"—that is, concave from the coronet to the ground—the long quarters curl forward and inward and often completely cover the frog and lead to contraction of the heel, or the whole hoof bends outward, and a crooked foot, or, even worse, a crooked leg, is the result if the long hoof be allowed to exert its powerful and abnormally directed leverage for but a few months upon young, plastic bones and tender and lax articular ligaments. All colts are not foaled with straight legs, but failure to regulate the bearing or the

hoof may make a straight leg crooked and a crooked leg worse, just as intelligent care during the growing period can greatly improve a congenitally crooked limb. If breeders were more generally cognizant of the power of overgrown and unbalanced hoofs to divert the lower bones of young legs from their proper direction, and, therefore, to cause them to be moved improperly, with loss of speed and often with injury to the limbs, we might hope to see fewer knock-kneed, bow-legged, "splay-footed," "pigeon-toed," "cow-hocked," interfering and paddling hoofs.

If in shortening the hoof one side wall is, from ignorance, left too long or cut down too low with relation to the other the foot will be unbalanced, and in traveling the long section will touch the ground first and will continue to do so till it has been reduced to its proper level (length) by the increased wear which will take place at this point. While this occurs rapidly in unshod hoofs, the shoe prevents wear of the hoof, though it is itself more rapidly worn away beneath the high (long) side than elsewhere, so that by the time the shoe is worn out the tread of the shoe may be flat. If this mistake be repeated from month to month, the part of the wall left too high will grow more rapidly than the low side whose pododerm is relatively anemic as a result of the greater weight falling into this half of hoof, and the ultimate result will be a "wry" or crooked hoof.

In the care of unshod hoofs the colt should have abundant exercise on dry ground. The hoofs will then wear gradually and it will only be necessary from time to time to regulate any uneven wear with the rasp and to round off the sharp edge about the toe in order to prevent breaking away of the wall.

Colts in the stall can not wear down their hoofs, so that every four to six weeks they should be rasped down and the lower edge of the wall well rounded to prevent chipping. The soles and clefts of the frog should be picked out every few days and the entire hoof washed clean. Plenty of clean straw litter should be provided. Hoofs that are becoming "awry" should have the wall shortened in such a manner as to strengthen the foot-axis. This will ultimately produce a good hoof and will improve the position of the limb.

Hatching Chickens From Preserved Eggs.

The *London Lancet* recently published an article describing experiments which had been made for the purpose of determining whether eggs could be hatched which had been preserved for twelve months by immersion in a 10 per cent solution of sodium silicate. It was said in the article that chickens had been hatched from these eggs. A correspondent of the *Lancet* now writes to that journal, narrating some experiments which friends of his undertook for the purpose of verifying the statements made. Twelve eggs were collected in June, and immediately placed in a 10 per cent solution of sodium silicate, and completely covered by the solution. On September 5 four eggs were taken from the solution and marked, and nine newly laid eggs were placed under a hen. All the newly laid eggs were hatched out within three weeks, but the four preserved eggs did not hatch. One of these eggs was hoiled and was quite fresh; the other three were broken and the yolk fell out separately from the white. The whites were whipped up and became quite stiff. This is stated to be the best test of a fresh egg. It is of interest to note that these preserved eggs, even when they had been incubated for three weeks, still remained perfectly fresh, seeming to indicate that their shells were still impermeable to external influences.

Assuming that the remarkable preserving effect of the sodium silicate is due to the formation of an insoluble glass with the lime salts of the substance of the shell, it is curious that it has been possi-

ble to hatch out a chicken without first making the shell again permeable to air. This experiment is one which should be repeated after the shell has by some method again been rendered permeable, for it seems improbable that the hatching of such preserved eggs can take place if the shell remains impermeable to air.

Hog Cholera.

Oklahoma Agricultural Experiment Station. Press Bulletin No. 105.

Hog cholera and swine plague are the principal diseases of hogs that appear in the form of an epidemic and that are considered very infectious and contagious. Both diseases generally appear in any given outbreak but the general name of hog cholera is applied to such outbreaks as well as to several other diseases that appear among hogs. It has been generally recognized that hog cholera is due to a bacteria commonly designated as the hog cholera bacillus. This germ is present to a great extent in the alimentary canal and is passed from the body of the sick hog in large numbers and in this way infects lots and pens where the sick hogs are. Such infection may be easily taken into the body of the well animal with food and water and in this way soon infect the entire lot.

When the disease appears among the hogs of a given locality, as on a certain farm, it is evident that the pens are infected. This infection may be carried to the pens in a number of ways but generally by means of some sick animal or on the shoes of parties who have been in pens where sick animals are. In any case the first thing to do is to move the well hogs into fresh lots and where there will be no communication with the pens where the sick ones are kept. If others take sick the well ones should be moved again as it will do little good to move out the sick and leave the others to take the disease in the infected pen. Washings from infected lots when carried into the streams will spread the disease to farms located further down the stream and hog raisers should be especially careful of their water supply when the disease is in their locality. They should not allow hogs to take water from a stream when the disease is known to be on farms above them.

There has been a great deal of work done to find some cure or preventative for hog cholera. Certain lines of work seem to indicate that a system of vaccination may be perfected that will act in a similar manner on hogs as a means of preventing hog cholera, as vaccination does on cattle to prevent blackleg. If such a method is found to be reliable the disease will be practically under control. The feeding and care that hogs receive will do much to prevent such diseases, as unthrifty herds are the ones most likely to contract any disease. Plenty of green feed, such as cane, alfalfa, etc., with a good supply of fresh, clean water during the summer months will do a great deal toward keeping the best possible condition.

The Oklahoma experiment station at Stillwater, has devoted a considerable time to the study of hog cholera and the transmission of the disease by means of the hog cholera bacillus. This work has been principally along the lines of producing immunity in the small experimental animals and studying the effect of the germ in the hog.

Boars are naturally irritable, and should not be driven very far nor worried. If it is necessary to move them they should be hauled.

Hogs enjoy salt as well as other stock. It assists in digestion, and should not be omitted when the food is concentrated.

Hog raising should not be undertaken in a country where corn and clover or some other pasture is not plentiful.

Fine Stock for Yolo.

The Bullard company of Woodland last Tuesday received a carload of fine stock which was recently purchased by the company in Ohio. The shipment includes 45 head of registered Merino rams and one registered Percheron stallion, weighing 1970 pounds. The animals are all in fine condition.

Hetty Green's son Eddie is going to establish a gigantic poultry farm near Terrell, Texas, on which he will place 10,000 Leghorn hens and roosters. The eggs produced will be sent to St. Louis and Chicago markets. He has already bought 4500 hens in one lot from a northern chicken raiser, and also a big chicken farm. He has placed the farm in the hands of a competent force and is confident of results. He has figured out that each hen can represent enough money in the course of a year by her eggs to pay all expenses attendant upon keeping her and net him \$1 clear profit, which will make his annual profit off the farm exactly \$10,000. He has been assured he can get a market for all the eggs he can deliver. He will probably find that his figures lie a little.

A cable from London announces that the royal commission appointed in 1901 to inquire into the relation between human and animal tuberculosis has reported that the two are practically identical. This conclusion is contrary to the opinion held for some years by Dr. Koch and which has been practically confirmed by the investigation of the Berlin board of health.

Cattlemen in the Eastern part of Colorado, where mange has existed, are dipping their cattle, and reports are to the effect that in many districts the disease has been almost completely cleaned up and cattlemen are hopeful that they will eventually stamp it out entirely. There is little fear of any further damage from this trouble.

The horse that is always ready for his meals is the one that does the work. The engine that burns lots of coal makes lots of steam and pulls lots of freight.

While sheep readily eat all kinds of weeds, they are very dainty in their taste and will refuse to eat grain with which no fault can be seen.

It is the hungry, poorly fed sow that eats her pigs. When well fed and well cared for they usually make good mothers and good sucklers.

Mutton can be produced at less cost than beef, and the fleece is an additional profit.

It is said that clover is the best pasture for sheep.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

PRIVILEGES! FOR SALE.

Pacific Coast Trotting Horse Breeders Association Meeting at

SAN JOSE

AUGUST 3, 4, 5 and 6, 1904

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Poultry Points.

By 'poultry' is meant birds domesticated for their eggs or flesh.

Possibly more boys would make farmers if they were encouraged to be poultry men.

England consumes 64 imported eggs per head of her people, or about 2,380,000,000, costing about \$63,000,000.

Lice is often brought to the poultry yard by bringing other fowls there. If possible purchase only from clean flocks.

Speaking of poultry as food it is estimated that 250,000,000 chickens and other fowls are consumed in this country every year.

We should remember that the first two weeks of a chicken's life is the most critical period. Unless it gets a good start it will never grow well.

Well persons may possibly endure the factory-dressed chickens; but if the person is sick he should have the best, and the fattest that can be obtained.

Pea fowls, which at one time were bred for popular table use, are now kept principally for ornament, and really are a neglected part of poultry industry.

The experience of one season or the low price of poultry or eggs should not discourage any one from entering the poultry business. The tendency in price seems to be upward.

If left alone geese will mate early in the spring. Some practice mating them in the fall. They then become acquainted with each other and are ready for laying as soon as the season comes.

Guineas are timid birds; they do not fight, but they are the best sentinels we have. They seem to watch day and night. They will discover a dog, or a hawk, or a stranger long before any one else will.

Dry food is the most suitable for young chicks. Scatter it in litter of some kind that they may become strong in scratching for it. Where the food is fed soft, it does not stimulate their moistening glands and they become weak.

Unless chicks are with the hen they need feeding four or five times a day, for the first week. Some prefer dry feed all the way, others use baked foods and various mashers. Both obtain good results.

Notwithstanding there is a large variety of chickens, turkeys, guineas, pheasants and quail, they all belong to the same class of birds—the Gallinaceae, or comb breeds—and resemble each other in structure and habits.

Frequently it is said that eggs are too high to set. It is like high priced seed of any kind. We pay for first-class kinds, and it pays. If one is to have hens at all, it requires no more to feed good ones than it does to feed worthless ones.

It is interesting to note that the walking birds have lighter flesh in the breast than flying birds. Investigation in France proved that the muscular activity of birds made the difference in the color of the flesh. The flesh of walking birds is more tender than those that fly.

Pigeons are the only representative of their class in the poultry world. They come between the comb-hearers and the swimmers. They are sometimes classed among the light-fleshed birds. There is some difference between the color of the flesh on their breasts and the other part of the body.

It certainly would be a good plan for the pure food inspector to visit the poultry markets. With many persons a goose is a goose, a duck is a duck, and a chicken is a chicken. Those who have eaten the fresh, fat, luscious country fowl know that there is a difference. Fowls are much improved if cooped, and fattened for a week or two before killing.

A good coop in a good dry place should be prepared for every hen that brings off chickens. The chicks should be 24 to 36 hours old when they are taken from the hen. Evening is the best time to take them off. Feed them lightly and then they go to bed for the night, and are 12

hours older and stronger when they really begin life next morning.

Turkeys are very dependent on insect life for growth. If they do not find hoppers and bugs, they wander long distances. When they do find abundance, they seem to care little for other food, and grow nicely without it; but they do not become fat. When the weather becomes cold and insect life disappears, they need plenty of corn, and will fatten rapidly.—*Texas Farmer*.

Notice to Hog Shippers.

Many farmers and stock breeders would get much better prices for the products of their farms if they would take more pains in shipping and get their consignments to market in better order. The following notice which has recently been sent out by the Western Meat Company of this city is timely and should be heeded by every breeder who ships his hogs to market and expects a fair price for them.

You are urgently requested in driving or loading hogs to see that they are not kicked, prodded or beaten. Every time a hog is kicked, clubbed or prodded its flesh is bruised, and its value thereby reduced. Bruised hams, shoulders or sides are not to be sold except at very low prices, and there is no demand for such meat at any price. You are therefore earnestly asked in handling your hogs to refrain from heating or kicking them, and to see that your employees do likewise. Please, also, be careful not to load too many hogs in a car, otherwise they will bruise themselves while fighting for room.

Yours respectfully,
WESTERN MEAT COMPANY.

The Right Kind of an Argument.

At a recent meeting in Iowa, two huttermakers, whose creameries were adjoining, got together and were discussing a certain patron who would not care for his cream, and as he was where it could be sent to either creamery, they made an agreement—one that he would not accept it at all, and the other that he would send him a written notice that no more would be received unless of a certain quality. I am waiting to see how it comes out. It is a move in the right direction, and if both huttermakers live up to their agreement, they will bring him to time; there should be more of this done.

A certain set of people you can coax into better methods, others you must reason with, and again others you must drive—and when you find this latter class, get together as these two huttermakers have and drive them.—S. B. Shilling, in *Dairy Produce*.

The wool of a sheep begins to deteriorate after passing the third year. The best wool is obtained from a sheep two or three years old. Having been sheared the fibers are all of the same length which makes it better on that score than lamb's wool. Such wool is preferred for combing and for all purposes when parallel fibers are required, such as spinning for cloth and fabrics. Lamb's wool is not so desirable on account of uneven lengths and uneven firmness, but is much used for knitting yarns and for the manufacture of infant's fabrics, such as flannels, on account of the softness and because it is less irritating to the delicate skin. After the third year wool begins to show the effects of age and becomes frowsy and harsh. It becomes cotted and when scoured works badly. Then if the sheep has ever been in bad condition, it will show up in the fleece of the aged wether or ewe. The wool of aged sheep is also subject to more shrink than that of younger animals.

Cornmeal is so heavy that it settles to the bottom of any slop in which it is stirred. It is a valuable ingredient, but needs to be stirred frequently in order to be kept well mixed.

There are those who claim that pond water is unhealthy for stock; yet thousands of cattle are raised which never see a well nor a creek.

Cost of Good Roads.

The cost of road-building varies in the different places, according to the topography of the country and the proximity of the stone used.

A satisfactory highway can be built eighteen feet wide, exclusively of stone, usually for \$3000 to \$3500 a mile. These are known as macadam roads. A more costly stone road, running from \$4000 to \$6000 a mile, is the telford road. Both are named after Scotchmen, who first devised the systems. The macadam road consists of a deep foundation of large stones, laid as smoothly together as possible, the foundation stone being of a nearly uniform size. A layer of smaller stones is placed over the foundation and rolled down, binding the two together. Then layers of crushed stone, each layer being of finer quality than its predecessor, are rolled into and over the foundations. The final layer is of very fine crushed stone. The whole settles itself into a compact mass, almost as smooth as a flagstone, from which water runs off as soon as it falls.

The telford road is more expensive because its foundation is laid with more care. The foundation stones are of a uniform size and are laid with the ends uppermost, like so many bricks set upon edge. These are bound together by smaller sizes of stone, the various dressings of finer stone being laid and rolled in the same way as for the macadam roads. The durability of such a highway is unquestionably longer than any other kind of a road known.—*Outing*.

Skimmed milk is by all odds the best basis on which to build up a balanced ration for little pigs. Milk is better suited for building up the frame work. A little grain, such as oats, is very beneficial. Skimmed milk heads the list of wastes and should be carefully preserved, says the *Twentieth Century Farmer*. Since the hand separator has come more into general use the skimmed milk will be more judiciously fed and with greater profit. The bad results obtained from skimmed milk have been largely due to the fact

that it has been allowed to ferment. In the old system the milk is hauled to the skimming station and when returned it is not fit to be fed and so many valuable animals often do not do well and the owner attributes it to the product and does not consider that it is not in the right condition for feeding, and so bad results often follow. But where it has been fed sweet, most excellent gains have been made when a small quantity of oats or midlings has been added to the skimmed milk.

Mr. Goodnight, of Texas, has now been breeding buffalo cattle for twenty years and he is positive that no case of blackleg has occurred among them during that time and up to this writing it holds good to those that are only one-fourth blood. He says: "This year I have several head of calves only one-eighth blood and will give them every chance to take blackleg in order to test them, although I think they are immune. I have been trying for several years to establish a race of cattle from the buffalo. So far I have only partially succeeded. When this is done it will be the greatest thing for the cattle industry of America. They have some characteristics that are very valuable to this interest. Besides their great weight and the extra quality of meat, they are first, most probably immune from disease; second, they never eat loco; third, they never lie with their backs down hill, which causes so much loss in weak cattle; fourth, they do not go into hog holes; fifth, they have the greatest lungs in any animal on earth, and sixth, they put on more flesh for what they eat than other animals."

Almost coincident with publication by the Department of Agriculture at Washington of a bulletin setting forth the discovery of an ant in Guatemala that eats the cotton boll weevil came a press dispatch from Texas, saying that not far from San Antonio a cotton-grower had found the native red ants destroying the weevils in great numbers.

Sober up on Jackson's Napa Soda.

Warning has been sent out by the Agricultural Department at Washington that much of the alfalfa seed being sold this year, the demand being enormous, is adulterated. Much seed, owing to the great call and short domestic supply, has been imported, and it has been found to be largely mixed with the seeds of yellow clover and Chilean lucerne or hurr-clover. Dodder-infected seed is also being sold, it is alleged, and buyers are urged to look closely to their purchases lest the dodder pest attack their crops.

LIMONERO RECORD (3) 2:15³
REG. No. 33389
(A Great Sire of Beauty and Early Speed)

By **PIEDMONT 904** (sire of 6 in 2:20 list and of dams of **Faovy Wilcox 2:10⁴**, **Alta Vela 2:11⁴**, etc., etc.); dam **LULANEER** (dam of **Limonero 2:15³**, **Bioo 2:19³**) by **Electrocoer 125**

LIMONERO 2:15³, bred at the Palo Alto Stock Farm, is one of the best Stallions standing for vice to California. He is a magnificent dark bay horse with no marks, and in breeding, class and individuality ranks with any of them. He gets big bays and browns that are sure to be good race horses and high class roadsters. A number of his youngsters are to be seen at the Los Angeles track. **LIMONERO 2:15³** got his record as a three-year-old in the fourth heat of a six-heat race for \$5000 purse which he won at Lexington, beating the great Expressive, B. B. P. Baroo Dillon, Xinite and Futurity. **LIMONERO 2:15³** will make the Season of 1904 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25 FOR A LIMITED NUMBER OF GOOD MARES. Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles, Cal., in care of **HARRISON G. ARMS, Owner.** **J. H. WILLIAMS, University Station, Los Angeles, Cal.**

BAYSWATER WILKES 2:25¹ Sire of **KELLY BRIGGS 2:16⁴**
WILL MAKE THE SEASON OF 1904 AT

WOODLAND, CAL. Fee \$40.

BAYSWATER WILKES is a sire of speed, size, good looks, soundness and gameness. Every one of his produce that has been trained can show standard speed. His sire, **Sable Wilkes**, also sired **Yushagak**, sire of **Aristo**, winner of the Occident and Stanford stakes. His dam, **Fanny Bayswater**, is dam of **Seator L.**, holder of the champion four-mile trotting record of 10:12.

Breed to **BAYSWATER WILKES** and you will get colts that will sell at good prices.

For cards containing full Pedigree and all particulars address
S. H. HOY, Winters, Cal.

Absolutely Cures Sprains, Swellings, Spavins, Windpuffs, Removes Blisters

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Swellings, Windpuffs and Blisters which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickson, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, sprains, windpuffs and all blisters it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.
